State planning law requires every County to adopt and maintain a "blueprint" for development throughout the county: a General Plan. This General Plan is the County's basic planning document and is the vehicle through which a County addresses, balances, and fits together the competing interests and needs of its residents. The County has begun to implement the General Plan through the adoption of ordinances, resolutions, and approval of other programs. Please see [General Plan Implementation](#) and [Frequently Asked Questions](#) for more information. Any questions about the General Plan process can be directed to Planning Services.
