SUPPLEMENTAL

Dear Honorable Court,

I'm writing in regards to the newly discovered evidence of the Head Investigator Lorin Williams on my case, who has been fired. All his cases are being reviewed. Mr Williams was the head investigator of my case pending in your honorable court. My case is of exceptional importance by way of the exculpatory scientific evidence of the Spartanburg Regional hospital security surveillance camera video that rebuts the Southeastern Converters security surveillance camera video that, I couldn't of travel approximately 5 MILES in 28 SECONDS proving that I was never at the crime scene. There is also an alibi witness statement Antionette Butler, to corroborate the video proving my innocence. The state used false evidence as well to get the wrongful conviction I am suffering.

Based on the exceptional importance of my case along with the fact the head investigator Lorin Williams of my case has been fired for misconduct, my case is a tainted case. I pray this honorable court grant me relief as other cases he was involved are under review for his misconduct, as I suffered from this misconduct resulting in an innocent man being wrongfully convicted. Petitioner deserves immediate release from the injustice done by this misconduct of Investigator Lorin Williams being involved in my case. Trial lawyer Michael Brown, even stated at trial during closing argument that investigator Lorin Williams could of cleared this case up. (See PCR app.I. line 6-25)

Respectfully submitted,

Rishawn Reeder
