SUMMARY OF THE ARGUMENT

Louisiana is one of only a few states that have not established a procedural right of action directly assist appellant's with NO relationship single men, women, young or elderly individuals with legal assistants in cases which criminals seek to destroy via it employer or neighbor(s). These low income individuals are left to fin for themselves. This state of Louisiana has felled to protect its citizens from harm and danger. In fact, if legal aide services were available for appellant the injuries sustained would not have occurred. There are many priority streaked individuals seeking legal help against praetors, these individuals are being left to try there best to defend themselves without law degrees. This state only provides help to people in relationship or family member which leaves anyone other than family to harm, attack, and injure.

Louisiana has also adopted this reformed justice program which is hurting and harming its citizen. This program violates citizen's civil rights, voting rights and spiritual rights to exists as a human and an Americans. This device created to help individuals unable to help themselves in now being used a weapon to inject pain, destroy and control behaviors of individuals in the justice system. Unfortunately this device was gotten into the hands of people with criminalistic behavior mentally whom are professionals, government, and private wealthy individuals to purchase as a product, being used on animals and humans. This man made device being placed in the human body to control, harm, and destroy lives should be band removed and destroyed from any human body. How dare this country with the best way of living cause harm to its own citizens. People all across the world fight to come to this country for freedom and someone took it

personal to take something that helps paralyzed individuals to promote criminal activities for self gain. These people needing to control others need to be imprisoned, every day people with this device implanted fight to live. Living should not be something you fight for, as citizens of this country the Deceleration of Independence is something the veterans of WWI and WWII fought for, appellant great-grandfather Luchen Ursin fought in both wars. He die at the age of 97 years old and appellant heard this story a hundred times as a child; however, people were fighting for freedom, that's why appellant feels so strongly about hurting individuals in this country for personal gain at any cost.

Unfortunately these Appellee(s) acted in bad faith using every source of government to discredit this country's justice system and caused corruption to cities afar. These individuals and companies should comply with state laws and the courts to restore and replace appellant and this country's faith and dignity back to good standers.

ARGUMENT

1. Appellant argued that by not being able to receive a fair trial jury's verdict, court date or sentence date, appellant was imprisoned without a sentencing with cruel and usual punishment. Which this country's justice system rules unwarranted and is called kidnapping which violates individuals civil rights which is also stated in this constitution. Anyone that prevents any citizen(s) from movement throughout this country restraining, holding or stopping them in any form is a crime. This person should be treated as any criminal kidnapping and breaking laws. This technical implant leads appellant to think about anyone married to a military spouse which has been place in this situation using military medical benefit. Unfortunately appellant wasn't using the benefits they were being stolen, and

used for fraudulent insurance claims by Appellee(s).

2. Appellant also argues the fact about this reformed justice system using implants to control human life is a violation of this constitution as well. This country has grown in technology in many areas that will help people all across this country; but to use something that was created to help disabled individuals unable to communicate is inhuman and goes above levels of humanity. Technology creates robs to do job removing humans from work and now this country is trying to make the human popularity robs which offends GOD and any other spiritual community. This device is being place in humans all across this country is a deceptive device is and opens doors to criminal to easily access banking, private and personal. Nothing and No one is safe now. These high ranking professionals and wealthy citizens exposed low income, poverty stridden citizens to racial and hateful acts of crimes, creating a conspiracy to easily mislead and enforce corruption with in the justice system.
3. With the use of government departments, transportation departments, private own companies, the communication department, internet and cell phone high ranking professionals, and wealthy citizens throughout this state of Louisiana are able to harmed, threatened, forced and blackmail forcing its citizens to commit act in which criminal behave. This country fell to protect appellant and citizen's civil rights promoting criminalistic behavior leaves an open platform for personal gain.

CONCLUSION

Appellant respectfully requests that this Court the United States of America take actions and responsibility to reverse these criminal activities throughout this country's justice system. Where as the Eastern District Court fell to set trail date, to address allegations filed in complaint(s); with laws broken, crimes committed, and government funds used fraudulently.
