

CERTIFICATE OF GOOD FAITH

I, Jerry Simmons, Petitioner in the above titled cause, under penalty of perjury avers the following Petition For Reconsideration/Rehearing is presented in good faith and not for delay. The issues raised in his original petition are clearly established by this Honorable Court's precedence as well as Louisiana's State. Petitioner's rights were clearly established and all his allegations are found and supported by the record.

Petitioner is aware that unfavorable rulings do not equate to "violation of constitutional right" Petitioner is further aware that he is entitled to meaningful review of his state conviction and the purpose of the Federal Court is to enforce his constitutional rights as determined by the standards established by this Court precedence.

Petitioner in the instant case was arrested for an offense against a state police officer, he was provided counsel who was friends with the officer, a trial judge who denied him all constitutional protection...All found on the record, including state's own opinion.

Without this United States Supreme Court's intervention in this matter states courts are free to arbitrarily enforce the constitutional provision as finances and status dictates. Petitioner ask if this Honorable United States Supreme Court does not enforce his constitutional guarantees then who, the court of public opinion? Petitioner has diligently pursued his claims through the channels finally reaching this Court's docket only to be told "writ denied"

Petitioner knows based upon all court's determination his federal and state constitutional right were indeed violated as determined by this Court as supported by the record.

Respectfully Submitted,

Jerry Simmons #593386
