

Att: Mr. Jeffrey Atkins - Deputy ~~Wheeler~~ ^{50%}
From: Mickie Stone RN. Clerk of the
United States
Supreme Court

- ① motion for leave to file
a petition for rehearing case
19-10097 (USCA)
Mickie Stone vs Centene Corporation
- ② Petition for rehearing (44.2) Case # 19-10097
(USCA) Mickie Stone vs Centene Corporation

There was a six month delay due to Covid
receiving the Supreme Court Judges decision
I received the letter in September 2020.
I was unable to file a motion by the states
28 day time frame.

USCA. Case No. 19-10097
In the Supreme Court of the U.S.
October Term 2020
Mickie Stone - petitioner
vs
Centene Corporation - respondent
Petition For Rehearing

This court should not resolve the substantial
and important factual issues in my case
without full briefing and arguments.

Centene Corporation was and still is under
investigation by the EEOC for age and mental
health issues of discrimination at several of
their company locations; especially Sunshine
Heath in Sunrise, Florida.

The Supreme Court granted me a writ of
certiorari. The attorney that represents
the respondent stated she was a bar
attorney on the Supreme Court. This alone
is a conflict of interest. I am representing
myself because of financial reasons.
Most of my filing costs have been waived.

I was terminated from Sunshine Health in 2013.
After three years of excellent work as an
OB/GYN high risk case manager. I have been
a registered nurse for forty five years and
have never been terminated from my jobs.
I had been diagnosed as having bipolar
depression at age 27 when my father passed
away from a major heart attack.

In 2013 my mother passed away after a long and painful battle with Pancreatic Cancer. She was my last surviving family member. My brother passed at age thirty nine from HIV. I took a short term disability leave for severe depression. I was hospitalized for Lithium Toxicity for several weeks; had dialysis and electric Shock Treatments. The psychiatrist Dr Douglas Lanes in Hollywood after being seen by several other psychiatrists placed me on a medication regime to follow for six weeks and I miraculously recovered to full working capacity. I brought the note into Human Resources and because they already had preconceived ideas about bipolar disease; they told me I had two choices. Resign or I will be fired. I asked them to grant me a refresher course and I passed with flying colors. Marie Milord RN was the instructor. Lauren Kirshner RN (my immediate supervisor and Jill Martin RN (my coworker) conspired to have me fired by making false accusations and harrassing me on a daily basis. Jill Martin RN (my coworker) spoke with Lauren Kirshner RN (my immediate supervisor) and gave her a daily report while I was hospitalized at Memorial Regional Hospital in Hollywood Florida. This is a tremendous HIPPA violation of my rights! I developed cardiac issues from the daily pressure and needed a cardiac catheterization shortly after returning to work. The catheterization was normal according to Dr Michael Chizner at Broward Health in Fort. Lauderdale, Florida. I came back to work a few days later with medical clearance and after one hour I was escorted out of the building; not even able to take my belongings which were personal to me. Embarrassed in front of my fellow coworkers. I believe this was a personal vendetta against anyone that has a psychiatric or physical disability. The statute of tolling was already submitted to the Supreme Court.

Since this will be my final attempt
Please try to seek justice in my
case by reading all the factual
information. I hope this time
the verdict of the judges of the
Supreme Court will enable myself
and others with similar causes.
to have an equal opportunity at
obtaining and maintaining successful
and fulfilling careers in the
future and to prevent blatant
discrimination from employers
and coworkers.

Thank you for your
consideration in this
matter.

Sincerely
Mickie Robin Stone RD
