313 W. Prospect St.
La Follette, TN 37766
(423)377-9155

QUESTIONS PRESENTED

Questions of importance to the Public:

Are victims of industrial poisoning persecuted as a group with grounds for claims a subclass facing Unconstitutional animus?

Is litigation against foreign entities found criminal in harming the populace applicable under JASTA (Justice Against Sponsors of Terrorism Act)?

Does District-wide conspiracy negate medical malpractice pre-trial requirements of 'good-faith' certificates or notification?

Is IFP screening or abuses thereof Unconstitutional?

Questions of further Consideration:

Does the District Court have to follow fair and unbiased expected procedures based on precedent of facts and logical argument?

Does the District Court have to maintain its Jurisdiction as a duty?

Whether factual error and preserved error is immune from plain error review?

Can Orders only cite precedents which conflict with their decisions?

Are Pro Per allowed to amend Complaint in perceived errors of form?

Question added by Oppositions Brief:

Did the United States District Court for the Eastern District of Tennessee, and unanimous panel of the United States Sixth Court of Appeals commit reversible error by concluding, in reliance on 28 U.S.C. § 1915(3)(2)(B)(ii), that the Petitioner's Complaint (and proposed Amended Complaint) failed to state a claim upon which relief could be granted?

PARTIES

Shane Bruce is the petitioner; he is the plaintiff-appellant below.

The respondents, defendants-appellee below, are categorized.

The medical malpractice are: **Lori P. Staudenmaier M.D., UT Family Physicians,**

The University of Tennessee Medical Center, Gregory A. Finch P.A.,

Tennova Cardiology, Stephen Teague M.D., Jeffry Nitz,

Tennova LaFollette Medical Center Clinic, Christian Terzian M.D.,

Lafollette Medical Center Tennova Healthcare,

The failure to warn respondents are:

Office of the Secretary of Defense, General James Mattis,

The Center of Disease Control,

**Sir John Sawers, Chair of the BP geopolitical, environmental safety & security board
member of BP plc as of 2015**

Britain

The actual cause of poisoning defendant **BP plc [British Petroleum]** was severed to **MDL
2179 2:18-cv-02626 United States District Court of Louisiana.**

Based on evidence¹ obtained from Respondents the Petitioner withdraws suit against the following parties. Previously joined as the doctors had alleged comparative fault.

The following three parties' are no longer parties, with thanks for their efforts:

American Association of Poison Control Centers (AAPCC)

American Medical Association (AMA)

National Institute of Health (NIH)

¹ Appendix H of the Petition

INDEX OF APPENDICES

- Appendix 1 Carolyn Jackson, Employee of Tennova Healthcare inviting Petitioner under false pretenses, baited.
- Appendix 2 Police Report saying they were called again before Petitioner baited
- Appendix 3 Okey Jackson's Petition for injunction to be treated for arsenic or transferred from Tennova's care.
- Appendix 4 Okey Jackson Heavy Metal Screening Medical Report

STATEMENT OF CASE

It is unclear if the “BRIEF IN OPPOSITION” filed on July 23, 2020 is supposed to be a filed for all the Defendants, though is known to the Petitioner at two of the defendants who were withdrawn from the case preferred to have no further need to participate in litigation then misrepresented, and if the Brief in Opposition filed by the Respondents Christian Terzian M.D. Jeffery Nitz PA, Tennova Cardiology, Tennova LaFollette Medical Center Clinic, LaFollette Medical Center of Tennova Healthcare which completely failed to address even a single particular of the Petition is supposed to be an attempt at a counter-petition by the Respondents listed in this paragraph. Apparently the firm has a long career in attempting to re-describe in great confusion rather than following what required by law or the usual and expected answers, if the any description was accurate, it would be superfluous as the Complaints speak for themselves, and if inaccurate then misrepresentation, let’s call the Respondents and the resulting Order from a Court where no order was maintained, false, minimally error into misconduct, as neither actually addresses the Complaints, Amended or otherwise, and any fool can participate in wool-gathering and name-calling. Why do Respondents bother filing such?

By Rule 15, “Briefs in Opposition” states

“Counsel are admonished that they have an obligation to the Court to point out in the brief in opposition, and not later, any perceived misstatement made in the petition. Any objection to consideration of a question presented based on what occurred in the proceedings below, if the objection does not go to jurisdiction, may be deemed waived unless called to the Court's attention in the brief in opposition.”

As the Respondents BREIF IN OPPOSITION does not list any misstatements in the Petition as there are none, and proclaims not a single objection, the Petition is unobjected to wholly and as the other civil Respondents have declined to reply such non-response supports an agreement that all the statements of the Petition are agreed to as factual without further objection allowed, including the serial and multitude of errors as listed in Petitions and Appellant Briefs, which none Respondents have ever actually directly claimed the Petitioner has been in misstatement at any time only shyster insinuations.

Thus, it seems obvious that the “BREIF IN OPPOSITION” filed is only filed in some attempt deride the Petitioners and confuse the Courts as has been these Respondents MO. Firstly, to call someone who is ill or sick “affected” in and of itself is a crime. “Affect” means to pretend, mimic or feign and calling the ill or those in medical need ‘affected’ is an attempt to isolate and block needed care, again cultish Respondents.

The proper word would be “effected” which is part of cause and effect as perpetrated by the actual malfeasant who caused injury or damage. I am scientist, I’ve spend a better part of decades studying “cause and effect” in determinism, I have never misused nor substituted such words, the word ‘affect’ attributed to me is detestable to me.

Such is the bent of such cultists, who pretend to mock, deride and confuse such as those stereotypes low-brow bullies who mock their victims or project fault. I also object to the word ‘bizarre’ which can only be attributed to those cultish respondents and not ‘affected’ or ‘projected’ by the attempt of the Respondents as that cult does. They would feign to be the Courts to me and might be feigning to be me to the Courts. Besides inducing people to take poisons or handle venomous snakes they continually press the limits of legal persuasion over decades in an attempt of conspiracy of murder, such as when they held Okey Jackson without antidote knowing he’s poisoned.

When pressed by clear logic or factual accusations they might well start ranting in jibberish, nonsensical utterances with no meaning, much like the Respondents filings which have never addressed a single fact, simply filed to deride and confuse, ‘affecting’ their own statements called “standing in” as the Petitioners which Judge Mattis seems particularly susceptible to, as his Order to Dismiss with Prejudice wasn’t based on the Petitions filings, but the Respondents ‘interpretation’ which also denotes that same cult.

Interpretation of ‘tongues’ which is what they wrongly call that jibberish or secret language they speak. They speak no tongues, foreign or otherwise, such as languages and science is an exacting unforgiving fields which they avoid, even though there are several successful scientists paraded for generations, They actually prefer stupid, drugs and extortion, the area only known for violations of human rights and a population deceptive to anyone, draw from historical perspective so the labor movement where the population boasts of inept assassins of Yablonski of 1969, or “Snake Salvation” television

series, etc., examples of the persistent local character, now dressed in scrubs. Since they themselves are at the level of jibberish they think it wise and pithy to ignore all reality and simply 'interpret' what is said, meaning ignore it completely and again 'feel' their way into saying whatever fantastic and usually wrong thing they feel like and stomp their feet to impress upon themselves and onlookers it's supposed to be taken as Gospel.

For instance, I am the only Physicist to have ever graduated from Campbell County, the home of these Respondents which has only 5% college educated. Of those with college degrees, none are drawn to disciplines or pursuits, but cult affiliated people move to those vocations which are guild-like, that promotes 'magical thinking' where if they simply agree on something enough together it is, with no studied basis in reality.

You'll see what would be dissident, despoiling or cult behavior elsewhere in DoT, DA or Press or various occupations, organized in easy money. As they don't want effort, they are enraged at success of the industry of science, each group preying/waring on the other, there's dozens of clinics in one small town as everyone's kept sick.

Rather ugly, always ready to have a conspiracy ready on hand to whatever purpose, nor have I always been an outsider, Carol Jackson, my mother and Okey Jacksons wife is obsessed with the misbehavior, and as I stated is employed at LaFollette Medical Center of Tennova Healthcare. That pattern abuse towards Okey started before he was hospitalized as she hired black-belt armed drug-dealing biker gang members to not only isolate, but both admitted to extortion in litigation to keep treatment, testing and care from Okey. Okey and I both poisoned, myself re-poisoned, in 2016-17. With rampant 'cultish' medical malpractice, locally there is no safety net against such malfeasants when hospitals collude in conspiracies to isolate and murder.²

² See Appendix 1, the invitation by Carol Jackson promising a 'treatment team' meeting to discuss Okey Jackson ordeal and Appendix 2, that they called the police before I was invited in hopes to cause controversy and intimidation. They had also called the Police the night before when downgrading him from monitored care to a forgotten corner of the nursing home, refusing to let me check him out, as unconscious as he was, and move him to a hospital that would treat him, ignoring the Petition Okey Jackson had signed Appendix 3 and the medical report of his poisoning Appendix 4. Tennova dangerous hospitals in misdeeds. <https://bead.llc/BvJ/.index.php>

Nor have the Respondents ever once challenged any of these often-stated facts:

1. Petitioner, was then in the year preceding the filing of suit against them in the U.S. Eastern Tennessee District Court, suffering from Arsenic Poisoning.³
2. That the Doctors and Hospitals knew of the poisoning.
3. That those East Tennessee Doctors and Hospitals refused to treat the poisoning even though aware of it.

Except when these Respondents who filed the BREIF IN OPPOSITION did previously claim that the Order Dismissing was appropriate in the PETITION FOR CERTIORARI APPENDIX E1 pages 12 and 13, on the question of establishing 'duty of care' which attempted to challenge they were ever doctors by mis-affirmation.

It's of particular interest that Gideon Jr, previously rallied that part challenging 'duty of care' of the Eastern Tennessee Courts Order as he was the counsel of parties defeated in Kelly v. Middle Tennessee Emergency Physicians, such serial errors in misstating precedence obviously not made in ignorance. The Petitioner has whittled at the boilerplate misstatements of Respondents till they've said noting pertinent in the three years since complaint, except as examples of misconduct.

As Gideon is now avoiding any 'duty of care' argument clung to previously, shy when misstatements confronted. The BREIF IN OPPOSITION fails to include any of the documents from which the Eastern District Court Order was cobbled together from, the Order quotes from Gideon falsely 'affecting' the Petitioner, not this Petitioner, in attempts to censor Amended Complaint and evidence which they said would 'prejudice'. That is the strongest indicator of Judicial Misconduct and bias possible, that no quotes were taken from the Petitioners filings, and only the misrepresentation of the Pro Per which Judge Mattice refuses to consider anything besides that 'interpretation', which in

³ Appendix H of the Petition, which shows Respondent Dr. Lori Staudenmaier medical orders from the Mayo Clinic and AAPCC to treat with Urgent and Emergency Medical protocols which was obtained through her representation was from the shared medical files of Stephen Teague and the Tennova Cardiology of the LaFollette Medical Center of Tennova Tennessee which are the Respondents who filed the BRIEF IN OPPOSITION. Thus, all these defendants knew of the poisoning and knew it wasn't being treated. Petitioner has audio recording of Jeffry Nitz PA giggling while saying that no one would either research how to treat the Petitioner for poisoning.

a court of law, is on the side of judicial misconduct, perhaps treason where science and complaints are ignored for Party “tongues”.

As the Respondents counsel never addressed facts, only ‘affected’ the Complainant, serial misstatement, name calling and even slanderous statements such a clinically bizarre, it’s akin to what’s become customary of the junkie saying “your disrespecting me” in anticipation right before you actually were ready to, not wit, cult conditioning. Undue burden from misconduct to address, already enough grounds, then enough to make cases of misconduct, cyber-stalking, extortion, terrorism, conspiracy to murder by respondents’ pre-trial actions. Whats misrepresentation to those completely amoral and reprobate? The Sub-Culture simply hasn’t been properly met yet, reminiscent of civil rights abuses, 9(a) defendants.

How impeached must those groups of Defendants/Respondents be before some punitive action is taken at an intercessory level, or simply wait for the poisoned sky to get them in abandonment of duty? It should not be the Complainants task to have to tear down false opposition again and again and again. It was these doctors blaming the AMA, which I said due process would address, “higher powers” being ‘affected’. Complaint is required to be taken prima facie, and Answer as Discovery required, every stage of the miscarriage of due process is correctable, except Okey Jacksons death. Understand such crimes are common in the East Tennessee District, none of them prosecuted by the local DA a protagonist in her own father’s death by abuse of diabetes.

As whittled down the serial and multitude of misleading inferences and misstatement by the Respondents, I think it’s finally only saying “He’s got dogs.”, which I do. Several large dogs make an effective deterrent against the roving army of junkies in drug induced paranoia that infest Lafollette, the known associates of the Respondents/Defendants they probably have heard that commented on.

So while Reply to such a Brief isn’t required when it fails so miserably to address any fact or error, simply knee-jerk derision, it is my concern that the science behind the actual cause of the Petitioners first poisoning be understood. Realizing, with no intended offense towards the august nine, that lawyers and courts do not understand science, not

distinguished from the illiterate or population led by influencers, worse maybe in being the focus of misleading arguments.

So, I've created a YouTube video, which only 1% of viewers has watched all the way through, explaining how to implement an offensive WMD using industrial technology. I was a researcher at the Naval Surface Warfare Center of Philadelphia and Office of Naval Research, mostly classified. So, I Reply to invite the august nine of the United State Supreme Court to take a couple of hours from the diligent reading which I can appreciate to watch the videos.

Video available online <https://bead.llc/Proof-of-BP-Frauds/.index.php> (google) "Exposed: How to make a BioChem WMD from Industrial Tech: Toxic Skies, Arsenic Rain, Virus, Bacteria." Also <https://youtu.be/fY7zN0LOmfY> See channel for more info, like when not prescribed the DMSA antidote while in dire need I tried to buy from overseas but received counterfeit substances, toxins from the Chinese. This I've been poisoned a third time, twice from foreign actions. Which while a caveat to all, is further damages from the Medical Respondents refusing to prescribe the antidotes, as they confusedly attempt and fail to re-describe what I've told them directly. Perhaps video will help, as 'professional' watchers mirror neurons being able to mimic more exactly.

ARGUMENT

Like the cultish jibberish of those who would try to argue the Bible supports hedonism, malic, poisons, and tyrannical powers, the Respondents would be arguments and conclusions are like those cited precedents they clearly make misrepresentations of law as they have in mislead in 'errors' to create a Order which cobbled together their bizarre behavior as they affected the Petitioner. "Bad Doctors, Bad Lawyers, Bad Judges"⁴, and they've not made any factual or logical challenge of merit, counsel reflecting the topsy-turvy helter-skelter of his clients who'd deride science, laws, society, established mores,

⁴ Quote from Judge McAfee the Campbell County Circuit Judge as he said he would ignore the laws or undue burden or Okey being kept without treatment and then stated "if that's how she [Staudenmaier] feels, good enough for me." Granting the RO to the defendants. This after asking everything be "dumbed down" and refusing argument against the Respondents. It is commonly doubted unopposed McAfee has read filings or orders he signs in years, local lawyers say 'spoon-fed'. Transcript available upon request of the United State Supreme Court.

when sued vindictively holding a poisoned patient in false imprisonment till dead sounds more like a war crime rather than a medical malpractice suit. Mistrial by misconduct.

Such examples support the Petition in the private Federal rights in such matters where widespread malice towards any group by a population where the majority is cultish and malicious, or the flipside rogue government entities being influencers or not, the matter needs discovery. I'm normally the last to castigate the government, I have to met such who do locally, if not them in paranoia then their attempts at supremacy which becomes pronounced if they hear one has been poisoned and about to "buy the farm". Perhaps convert to Catholicism instead of attacking Christian values will 'affecting' the appearance of Churches. Catholics, law abiding Citizen believe in "duty of care" rather than some crazed attempts to redefine, re-describe, and shout and poison as their brains twist in whatever it is that compels them. Shouldn't we sanction punitive actions against such objectionable and dangerous antics as the respondents? Opinions requiring law enforcement to do so? It has become obvious East Tennessee has gone rogue.

CONCLUSION

There being no participation in the required due process from the Respondents in answers or discovery which was stayed. Obviously beside prima facie this Petitioner provided abundant evidence in the void of the Court which didn't provide due process, more than enough that a prosecutor should be empowered, much less a civil litigation. The only actions shown by the Respondents/Defendants those affirming malicious intent which they've not explained, due process would share that duty to explain.

There obviously are a multitude of claims made in Complaints upon which relief can be granted, so obvious as the underlying Courts decisions not only undermine credibility of the Courts but create both outrage and cold chill of terror among many, the abuse of the normal citizenry when misconduct belligerent in the face of overwhelming evidence, then insulted by corrupt bias, seeing no other explanation, none have challenged facts or evidence, simply snide, disruptive lawyers/Judges quoting each others misrepresentations, again such Courts represent an obstacle even threat the public and the Constitutionality of the Nation, worse apparently such misconduct injustice rampant, then that last stance of who corrects misconduct, the Supreme Court?

Apparently, those needed marches on D.C. to threaten the government into some simulacrum of compliance aren't from cult Districts. May a scholar correct?

The Petition stands, gains grounds with every interaction and request made in the Petition matters of import which will effect an entire District and more, as who knows what influence such Respondents would have, either the 20 Billion of very questionable management or the cult population insulating it, must be prodded for Discovery by the rational mind and this Petitioner. The United States Supreme Court with its vast history in the Civil Rights movement is best prepared to plan such a course.

Civil Court, Campbell County Tennessee

Petitioner: Shane Bruce (Son of Okey Jackson)

Filed: 11th of November 2017

Petition
Motion for Injunction to Emergency Treatment
by Chelation Infusion or Patient Transfer of Okey Jackson

This Petitioners' father, Okey Jackson also has Arsenic Poisoning as does this petitioner. Despite his rapid decline in health his doctors in LaFollette and wife Carol Jackson a Registered Nurse who also works in the health care industry at the elderly behavioral ward at Tennova Medical Center LaFollette refuses any treatments but what the doctors prescribe. Younger son Morgan Jackson and Carol Jackson have even hired others to prevent at first any testing of heavy metals and then treatment of even oral chelation products stating they were afraid "that might kill him" referring to the chelation antidote.

This petitioner after three years of hearing Carols' false promises to have tests for the poisons finally went and purchased a tissue test took the samples from Okey Jackson myself. Okey is highly positive for Arsenic poisoning in amounts of great concern, enough to poison four people his size, such was obvious by his condition and deterioration of his health.

Tennova Medical Center LaFollette staff profess not knowing what to do about Arsenic Poisoning, and so do nothing. Respiratory disease, damage and problems are common to Arsenic Poisoning even at low or moderate levels if left untreated over a long period of time even if ingested. "*Arsenic Impairs Lung Function: Findings from The Health Effects of Arsenic Longitudinal Study.*" Christopher Olopade, Faruque Parvez, M Eunus, T Islam, A Ahmed, R Hassan, Habibul Ahsan by *American Journal of Respiratory and Critical Care Medicine*.

On 8th of November 2017, the patient advocate said even with a doctors' orders that it would take two full weeks to get approval for the basic procedure of administering antidotes. Even though this petition notified the hospital with labs the 1st of November, apparently, they have not started the approval of the processes that should already be required in any and every emergency room.

The lack of treating for arsenic constitutes a lack of emergency medical care as prominent in this case. Okey has been hospitalized since the 30th of October 2017 repeatedly readmitted to the emergency room with impaired lung functions. Contacts to Welfare, local legal, local law Enforcement or Adult Protective services this last two and three years ensure Carol and Morgan Jackson follow antidote treatment to Okey Jackson have been ineffective. They also curtail his own efforts to treat himself, blocking his purchases and returning his orders of supplements. Whether such conspiracy should be investigated by local authorities leads to a larger problem within the medical industry which this petitioner is litigating in U.S. Courts, where there is a refusal to test, diagnose or treat any elemental poisons. Never the less, the immediate family members should know enough to listen to this petitioner as I am a Physicist with HazMat experience.

Okey is also very weak an unable to move his own, often unable to feed himself. Three and four years ago he was doing house renovations, rapid decline from untreated arsenic poisoning at least in part. He's not listened to, often taking minutes or more to make even a simple wish known, his speech impediment much worsened by his condition. On the 8th of November this petitioner spent 9 hours watching over him, he was not able to be wakened, didn't stir during even pin pricks or nurses moving him over. He'd woken only for about two minutes on his own. Even during lung suction he appeared to be mostly asleep and immediately went back to deep snoring slumber, with rapid eye movement.

Appendix 3 pg. 2

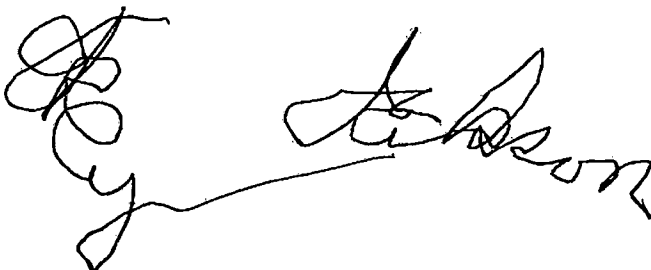

That he's been admitted to ER, they are legally bound to keep him till he is stabilized. That stabilization requires the treatment and antidote of Arsenic that cause of lung disease else he's caught in a continuing decline despite the temporary procedures that are keeping him alive. Arsenic Poisoning and the position without such treatment there untenable. Such is a Violation of Constitutional and Civil Rights as wells as a Violation of Emergency Medical Treatment and Active Labor Act. What is required is his medical transport to a ICU that will treat for Arsenic Poisoning by intravenous chelation, the only known treatment for elemental poisons, which do not ever dissipate and are progressive unless treated.

This petition asks that this Court to orders that **Tennova LaFollette Medical Center Clinic** to promptly treat his closest family member by Chelation infusion as the prescribed treatment of Arsenic Poisoning and/or promptly medically transfer him to an intensive care facility that will treat his imminently life-threatening condition of Arsenic Poisoning by intravenous chelation.
