David,

Mr. Maiden will provide three (3) days notice to the Madejs of any pothole patching or other maintenance work on the 2 mile section of Dutch Creek Road. That is at least two days more notice than given previously. For any serious major repaving work he will provide them thirty (30) days notice. For the time period running through any appeal or the expiration of any appeal date without an appeal, Mr. Maiden will also notify us and we will forward the notice to you. After that time period the Madejs will be responsible for notifying her counsel of notices received from the Athens County Engineer.

**Subject:** request for clarification

Maribeth and Molly:

We would appreciate it if you could clarify the Athens County Engineer's comments in Sunday's edition of *The Athens Messenger*. The article (both pages attached) indicates that he will begin the reconstruction/resurfacing planning process now, and schedule the work when funding is available. Further, it states that maintenance work consisting mainly of pothole patching and grading, however, will be done in the near term -- this fall and winter. He is also quoted as stating, "I will notify the Madejs well in advance before doing road work on that section of Dutch Creek Road."

We have a couple of questions. First, will he notify the Madejs well in advance of doing any road work, including pothole patching, grading or leveling?

Second, the judge suggested notice "far in advance," and the Engineer said "well in advance." Can you give us a sense of what the Engineer means by "well in advance"?

Again, we would appreciate any clarification that you can provide. As for the means of notice, we would request notice to Fazeel Khan and myself as a reliable method. Please let us know if that is acceptable.

Very truly,  
Dave Ball
