JEFFREY SHULSE,)
<i>Defendants,</i>)
)
DAVID LEVY, MARK NORDLICHT,)
<i>Defendants-Appellees.</i>)

Before: SACK, CHIN, AND LOHIER, *Circuit Judges*.

After a nine-week jury trial, defendants-appellees David Levy and Mark Nordlicht were convicted of securities fraud, in violation of 15 U.S.C. §§ 78j(b) and 78ff, conspiracy to commit securities fraud, in violation

App. 2

of 18 U.S.C. § 371, and conspiracy to commit wire fraud, in violation of 18 U.S.C. § 1349. The convictions relate to the defendants' participation in a fraudulent scheme to defraud bondholders of an oil and gas company, Black Elk Energy Offshore Operations, LLC, from the proceeds of a lucrative asset sale. Following the trial, the defendants moved for a judgment of acquittal pursuant to Federal Rule of Criminal Procedure 29, or, in the alternative, for a new trial pursuant to Federal Rule of Criminal Procedure 33. The district court (Brian M. Cogan, *Judge*) granted Levy's motion for a judgment of acquittal and conditionally granted his motion for a new trial in the event the judgment of acquittal was later vacated or reversed. The district court denied Nordlicht's motion for a judgment of acquittal, but nevertheless granted his motion for a new trial. The government appeals, arguing that the district court erred in granting the defendants' post-trial motions. For the reasons set forth below, we agree. We therefore

VACATE the district court's order and judgment granting the defendants' post-trial motions, and REMAND for further proceedings consistent with this opinion.

LAUREN HOWARD ELBERT, Assistant United States Attorney (Kevin Trowel, David Pitluck, Lauren Howard Elbert, Patrick Hein, Assistant United States Attorneys, *on the brief*), for *Jacquelyn M. Kasulis, Acting United States Attorney for the Eastern District of New York*;

App. 3

MICHAEL S. SOMMER (Morris J. Fodeman, Katherine T. McCarthy, *on the brief*), Wilson Sonsini Goodrich & Rosati, P.C., *for Defendant-Appellee David Levy*;

WILLIAM A. BURCK (Daniel R. Koffman, *on the brief*), Quinn Emanuel Urquhart & Sullivan, LLP, *for Defendant-Appellee Mark Nordlicht*.

SACK, *Circuit Judge*:

This appeal concerns a scheme allegedly executed by defendants-appellees Mark Nordlicht and David Levy to defraud bondholders of an oil and gas company, Black Elk Energy Offshore Operations, LLC (“Black Elk”), of the proceeds of a lucrative asset sale to Renaissance Offshore, LLC (the “Black Elk Scheme”). In connection with their participation in the Black Elk Scheme, the defendants were both convicted of securities fraud, conspiracy to commit securities fraud, and conspiracy to commit wire fraud.

Central to the alleged Black Elk Scheme was a New York-based hedge fund known as Platinum Partners L.P. (“Platinum”). Platinum consisted of multiple investment funds, including Platinum Partners Value Arbitrage Fund, L.P. (“PPVA”), Platinum Partners Credit Opportunities Master Fund, L.P. (“PPCO”), and Platinum Partners Liquid Opportunity Master Fund, L.P. (“PPLO”). Nordlicht and others founded Platinum in 2003, and Nordlicht was the Chief Investment Officer (“CIO”) of PPVA, PPCO, and PPLO. Platinum also had a relationship with a reinsurance company named Beechwood, which was founded in or around

App. 4

early 2014 by a group of investors that included Nordlicht. Beechwood included several entities: Beechwood Bermuda International Ltd. (“BBIL”), Beechwood Re, and B Asset Management (“BAM”). Levy worked at Platinum as a portfolio manager. In early 2014, Levy left Platinum and joined Beechwood as its CIO. He later returned to Platinum where he became co-CIO with Nordlicht.

One of Platinum’s largest investments was in Black Elk, an oil and gas company headquartered in Houston, Texas. In 2010, Black Elk raised capital by issuing \$150 million in bonds. Black Elk also issued a Series E preferred security in early 2013, of which Platinum purchased the majority.

But Black Elk experienced significant financial setbacks between 2012 and 2014. An explosion in November 2012 at one of its offshore oil platforms in the Gulf of Mexico, coupled with ensuing civil litigation and regulatory scrutiny, resulted in a sharp decline in its business. Black Elk was also plagued by rampant mismanagement and poor financial planning. By 2014, it appeared to be spiraling towards bankruptcy.

At trial, the government alleged that Nordlicht, Levy, and their co-conspirators sought to limit Platinum’s losses in the event of a Black Elk bankruptcy. They did so by orchestrating the sale of Black Elk’s most valuable assets, and fraudulently manipulating the priority structure by which Black Elk debt and equity holders would be repaid to ensure that the proceeds of any asset sales went to the preferred equity holders (among whom Platinum was prominent) instead of the bondholders who would have otherwise

had priority to those proceeds. In order to modify the priority structure, it was necessary for a majority of the outstanding bonds to consent (against their interest) to an amendment to the bond indenture. The government alleged that the defendants rigged the vote of bondholders by fraudulently concealing their control over certain bonds – in violation of the bond indenture – to ensure that the amendment would pass. As a result of this alleged fraud, the defendants unlawfully diverted nearly \$100 million in asset sale proceeds from the bondholders to the preferred equity holders – who were not entitled to it – to Platinum’s benefit.

After a nine-week trial, a jury convicted Nordlicht and Levy on the charges related to the Black Elk Scheme. After the verdict, Nordlicht and Levy both moved for judgments of acquittal or, in the alternative, for new trials. The district court denied Nordlicht’s motion for a judgment of acquittal, concluding that “when viewed in the light most favorable to the Government, the Government adduced sufficient evidence . . . to make a judgment of acquittal under Rule 29 inappropriate.” *United States v. Nordlicht*, No. 16-cr-00640 (BMC), 2019 WL 4736957, at *9 (E.D.N.Y. Sept. 27, 2019). Despite this, however, the district court concluded that “letting the verdict stand against Nordlicht would be a manifest injustice” and therefore granted his motion for a new trial. *Id.* at *16. The district court separately granted Levy’s motion for a judgment of acquittal, reasoning that “[e]ven making reasonable inferences in favor of the Government, and deferring to the role of the jury in weighing evidence and assessing credibility, the Government failed to meet its burden of proving beyond a reasonable doubt

that Levy had criminal intent.” *Id.* at *14. The district court also “conditionally grant[ed] Levy’s motion for a new trial in the event that the judgment of acquittal [was] later vacated or reversed.” *Id.* at *18. The government now appeals.

For the reasons set forth below, we conclude that the district court erred in granting the defendants’ respective Rule 29 and Rule 33 motions. We therefore vacate the district court’s judgment of acquittal as to Levy, vacate the district court’s order granting new trials to Levy and Nordlicht, and remand for further proceedings consistent with this opinion.

BACKGROUND

*Factual Background*¹

A. The Relevant Entities

1. Platinum Partners L.P.

Defendant-appellee Mark Nordlicht and his two partners, Murray Huberfeld and David Bodner, founded Platinum – a New York-based hedge fund – in 2003. Platinum consisted of multiple investment funds,

¹ Because the defendants appeal their convictions following a jury trial, for purposes of our review of the district court’s decision on the Rule 29 motions, “our statement of the facts views the evidence in the light most favorable to the government, crediting any inferences that the jury might have drawn in its favor.” *United States v. Rosemond*, 841 F.3d 95, 99-100 (2d Cir. 2016); *see infra* pp. 46-47. For purposes of our review of the district court’s decision on the Rule 33 motions, “all facts and circumstances” must be examined to “make an objective evaluation.” *United States v. Aguiar*, 737 F.3d 251, 264 (2d Cir. 2013); *see infra* pp. 76-77.

which included PPVA, PPCO, and PPLO. Nordlicht was the CIO of Platinum and its various hedge funds, and in his role as CIO, Nordlicht made the “final decision” regarding investments. GA.194.

Defendant-appellee David Levy is Huberfeld’s nephew. Levy worked as a portfolio manager at Platinum until around early 2014. As a portfolio manager, Levy was responsible for overseeing some of Platinum’s portfolio investments, as well as finding other potential investment opportunities. One of Platinum’s largest investments, on which Levy worked, was in a company named Black Elk.

In early 2014, Levy left Platinum to join a reinsurance company, Beechwood, as its CIO. Around late 2014 or early 2015, after his brief stint as Beechwood’s CIO, Levy returned to Platinum as its co-CIO alongside Nordlicht.

Black Elk

a) Platinum’s Relationship with Black Elk

Black Elk was a Houston-based oil and gas exploration company that held and managed valuable oil and gas assets in the Gulf of Mexico. Black Elk raised money for its operations by issuing common equity as well as various forms of debt. In November 2010, Black Elk issued \$150 million of publicly traded senior secured bonds. In 2013, to raise additional capital, Black Elk also issued a Series E preferred security, which functioned like debt. In the event of a bankruptcy or liquidation, the secured bondholders would be paid first, followed by those with preferred equity and then those with common equity.

App. 8

Platinum was a significant investor in Black Elk. Levy and Daniel Small – another portfolio manager at Platinum – co-managed Platinum’s position in the company. PPVA continued investing in Black Elk over time. By 2014, PPVA owned 85% of Black Elk’s common equity. As of 2014, PPVA, PPLO, and PPCO also held most of its preferred equity.

Because of Platinum’s significant investments in Black Elk, Nordlicht, Levy, and Small were involved in Black Elk’s management. Nordlicht, Levy, and Small maintained close communication with Black Elk management, including its co-founder and Chief Executive Officer (“CEO”) John Hoffman, Chief Financial Officer (“CFO”) Jeffrey Shulse, Chief Technical Officer Art Garza, and Vice President of Operations Joseph Bruno. For example, Black Elk management met with Nordlicht, Levy, and Small to discuss prospective Black Elk acquisitions and strategic objectives. Nordlicht, Levy, and Small also often worked out of Black Elk’s offices and participated in its management meetings.

The Indenture

The relationship between Black Elk and its bondholders was governed by an indenture (the “Indenture”). The Indenture contains several key provisions, including ones that govern the use of proceeds from an asset sale (Section 4.10), establish limitations on Black Elk’s annual capital expenditures (Section 4.21), set forth the circumstances under which a default could be called and waived (Sections 6.01 and 6.04), and establish the procedure for amending the Indenture (Article 9).

App. 9

Under Section 4.10(b) of the Indenture, Black Elk could use any asset sale proceeds: (1) to repay indebtedness, including money owed to Black Elk bondholders; (2) to acquire assets of an oil and gas business; (3) to acquire the majority of the voting stock of an oil and gas business; or (4) to make capital expenditures or acquire long-term assets for its oil and gas business. Under the Indenture, the proceeds from a sale of Black Elk's assets could not be paid to any equity holder.

Section 4.21 of the Indenture sets forth strict limitations on Black Elk's capital expenditures in any one year. Section 6.01 provides that holders of 25% of the aggregate principal amount of the bonds may call a default alleging that Black Elk violated the terms of the Indenture. Section 6.04, however, allows holders of a majority of the aggregate principal amount of the bonds to waive any default called by the bondholders.

Section 9.02(a) permits amendment of the Indenture with the consent of the holders of a majority in aggregate principal amount of the outstanding bonds. Section 2.09 (the "Affiliate Rule"), however, explains that – when determining consent – bonds held "by the Permitted Holders, the Issuers or any Guarantor, or by any Person directly or indirectly controlling or controlled by or under direct or indirect common control with the Permitted Holders, the Issuers or any Guarantor, will be considered as though not outstanding." GA.888.² In other words, such Black

² As cited herein, "GA" refers to the Government Appendix, "Supp. GA" refers to the Government's Supplemental Appendix, "SGA"

App. 10

Elk bonds could not be counted in determining whether holders of a majority in aggregate principal amount of the bonds consented to any proposed amendments.

In Section 1.01, the Indenture defines the terms “affiliate” and “control” as follows:

“Affiliate” of any specified Person means any other Person directly or indirectly controlling or controlled by or under direct or indirect common control with such specified Person. For the purposes of this definition, “control,” as used with respect to any Person, means the possession, directly or indirectly, of the power to direct or cause the direction of the management or policies of such Person, whether through the ownership of voting securities, by agreement or otherwise; provided that beneficial ownership of 10% or more of the Voting Stock of a Person will be deemed to be control. For purposes of this definition, the terms “controlling,” “controlled by” and “under common control with” have correlative meanings.

GA.861 (emphases in original).

2. *Beechwood*

Around 2013 or early 2014, a group of investors – consisting of the founders of Platinum (Nordlicht, Huberfeld, and Bodner), as well as Mark Feuer and Scott Taylor – founded a reinsurance company named

refers to the Government’s Special Appendix submitted with its opening brief, and “SA” refers to the defendants’ Supplemental Appendix.

Beechwood. Beechwood was paid a premium by primary insurers to invest those companies' funds. BAM, BBIL, and Beechwood Re were entities related to Beechwood.

Nordlicht, Levy, and their associates at Platinum retained significant control over Beechwood's investment decisions. Email correspondence among Feuer, Huberfeld, and Nordlicht from 2013 outlined Beechwood's corporate terms as follows: "1-Nordlicht group to put any capital necessary to secure funds"; "2-Capital to receive 8 percent preferred return"; "3-Capital to be returned and preferred return to be re[]paid before any profit split"; "4-Feuer group to receive 750k a year in draws (deducted from their profit split) after 100 million in funds deployed"; "5-Feuer group will run the insurance end"; "6-Nordlicht group will run the investment allocation side"; "7-all profits split 50-50 to each group (After paying back the original capital)"; "8-Nordlicht group to retain all fees generated by invest[m]ents in Platinum funds." GA.582-83. Consistent with this, when Beechwood was first created, Nordlicht and Levy together decided which investments would be purchased and transferred from Platinum to Beechwood. And Beechwood invested in many portfolio companies and securities in which Platinum was already invested, including Black Elk, and in the Platinum funds themselves.

Shortly after Beechwood was founded, Levy left Platinum to become CIO of Beechwood. As such, he controlled the investment side of Beechwood and made investment decisions on behalf of the company on a day-to-day basis, while Feuer and Taylor ran the

“insurance side” of the company. GA.206. While CIO of Beechwood, Levy also continued to work for Platinum on its investment in Black Elk.

Platinum and Beechwood also shared employees, and Platinum employees frequently worked out of Beechwood’s office, which was only a few blocks away from Platinum’s. While CIO of Beechwood, Levy, as mentioned, continued working for Platinum on Black Elk-related issues. Nordlicht would periodically enter the Beechwood office to take phone calls and participate in meetings. Naftali Manela, who was CFO of PPCO through late 2014, also worked simultaneously at Platinum and Beechwood; at Beechwood, Manela assisted Nordlicht in figuring out how much money Beechwood could invest in Platinum and what form those investments could take. In addition, Israel Wallach – although never a Platinum employee – worked at BAM as a portfolio manager from January 2014 to March 2016 and had links to Nordlicht: He learned about the position at Beechwood from Nordlicht, met with Nordlicht to discuss the position at Beechwood, and communicated with Nordlicht about his work at Beechwood after he was hired.

Manela testified, on cross-examination, that Feuer and Taylor engaged legal counsel to ensure that Beechwood was structured in such a way that it would not be an “affiliate” of Platinum. Manela further testified that Levy was present for one conversation where Feuer and Taylor stated that Beechwood was not an affiliate of Platinum.

B. Black Elk Spirals Towards Bankruptcy

Black Elk began experiencing significant financial difficulties from late 2012 through early 2014. In November 2012, Black Elk's business suffered a sharp decline after one of its oil platforms, West Delta 32, exploded in the Gulf of Mexico, resulting in three fatalities. Following the explosion, government regulators shut down several of Black Elk's platforms, rendering them non-operational and unable to produce revenue. The cessation of oil production, heightened regulatory scrutiny, and ensuing civil lawsuits put a cash flow strain on the company. As a result, Black Elk did not have enough incoming revenue to cover its expenses and was having trouble paying its bills. There was also evidence that Black Elk's executives and employees engaged in extravagant spending, including on private jet travel (in at least one instance with New Orleans Saints Cheerleaders onboard), trips to Mardi Gras in New Orleans, the purchase of a fleet of helicopters, the purchase of a condo on Bourbon Street in New Orleans, attendance at strip clubs, hunting trips, and the purchase of a speedboat. By the end of 2013, Black Elk was heavily in debt.

At Black Elk management meetings during the period following the West Delta 32 explosion, Black Elk management discussed with Levy and Small Black Elk's financial difficulties and the possibility of putting Black Elk into bankruptcy. Black Elk's Vice President of Operations, Joseph Bruno, testified that at one such management meeting at which Levy was present, Levy – in response to the prospect of bankruptcy – stated, “We cannot do that. It's a lot of money to lose.” Bruno

testified that it was his impression that Levy was in charge of managing Platinum's investment in Black Elk.

C. Platinum Seeks to Sell Black Elk's Assets to Pay Preferred Equity Holders

Despite Black Elk's financial difficulties, its oil and gas reserves retained significant value. In 2014, to raise cash, the company began contemplating the sale of its most valuable assets – its oil and gas wells – to a variety of companies, including Renaissance Offshore, Fieldwood, Talos Energy, and W&T Offshore.

On March 16, 2014, Small emailed Nordlicht about the severe financial challenges Black Elk was facing. Small wrote that, in 2012, Black Elk had been generating more than \$100 million in annualized earnings before interest, taxes, depreciation, and amortization (“EBITDA”) and negotiating to sell itself for more than \$500 million but “[w]e know what happened subsequently – two major wells watered-out and the company had an explosion both of which exposed its underperforming properties, bloated cost structure, poorly negotiated escrow agreements and lack of financial planning and controls.” GA.590-91. Small explained that their strategy moving forward was “to renegotiate escrow agreements and surety coverage to release cash that can be used to decommission negative cash flowing fields, further reduce the cost structure, drill low/high return . . . and . . . acquire under-reserved fields.” *Id.*

Nordlicht responded to Small the same day:

Happy to discuss this week and come to final arrangement. This is also the week I need to figure out how *to restructure and raise money to pay back 110 million of preferred [equity in Black Elk] which if unsuccessful, w[oul]d be the end of the fund [(PPVA)]*. This “liquidity” crunch [at PPVA] was caused by our mismanagement – yours[,] David [Levy] and I – of the black elk position so I will multitask and also address your concerns but forgive me if I am a little distracted. I have been up until 3am for the last two weeks working through this issue.

GA.590 (emphasis added).

On April 16, 2014, after Nordlicht received an email regarding problems with Black Elk’s oil production, he wrote to Small, Levy, Hoffman and Shulse: “This is starting to become major issue. When will production get back up?” GA.596. One month later, on May 20, 2014, Shulse wrote to Nordlicht, Small, and Levy:

I am working on a revised cash forecast, but not good news from Houston . . . Oil check is going to be \$9.2 million instead of the \$12.0 million I was expecting . . . [.]

There are not enough bonds on the short term horizon to cover this kind of deficit . . . We will have royalties, hedges, payroll, insurance, rent and other “have” to pays that will not be covered by the current or future oil check[.]

We will need to discuss some sort of bridge with Platinum and then seriously consider the options in front of us around the Talos/Renaissance transaction . . . the Fieldwood/Sandridge offer

. . . and any other short term liquidity events we can make happen . . . \$6 million is a shortfall we can[']t make up[.]

GA.614-15 (emphasis added) (ellipses in original). Nordlicht responded, copying Black Elk in-house counsel Marizza Pichè, and chastising Shulse for failing to label his email as “atty client privilege.” GA.614. Shulse responded that he was not sure “why a business issue such as cash flow would need to be covered by attorney client privilege?” *Id.*

On June 16, 2014, Nordlicht expressed grave concerns about PPVA’s liquidity to PPVA President Uri Landesman:

I think we need to revamp the strategy on PPVA and figure out what to do. *It can’t go on like this or practically, we [(PPVA)] will need to wind down.* This is not a rhetoric thing, it’s just not possible to manage net outflows of this magnitude. *I think we can overcome this but this is code red, we can’t go on with status quo.*

GA.628 (emphasis added). Landesman replied: “We are pushing hard, illiquidity a bigger hurdle than energy concentration Need monetization/liquidity events in the fund; I know you realize this and are doing your best.” *Id.* Nordlicht responded: “We are getting some liquidity from black elk – though not the equity. . . . Am hesitant to put myself in position of using that for reds [(redemptions)]. We just need to short term go crazy, get everyone focused, and long term try to come up with marketing pitch where we can raise even when we are illiquid.” *Id.*

On July 2, 2014, Shulse wrote to Small, Levy, Nordlicht, and Hoffman: “We [Black Elk] are officially out of money next week . . . We had a lot of [Accounts Payable] obligations to keep production from shutting in last week . . . I am doing everything humanly possible to keep this ship moving forward[.] Just letting everyone know where things stand.” GA.632.

Around this same time, Black Elk began pursuing a significant sale of assets to Renaissance Offshore, LLC (the “Renaissance Sale”). Black Elk ultimately entered into a Purchase and Sale Agreement with Renaissance on July 10, 2014, and the sale was expected to close in August 2014.

D. Black Elk and Platinum’s Attempts to Amend the Indenture

1. The Failed Private Consent Solicitation

In early 2014, Nordlicht, Levy, and others endeavored to amend the Black Elk Indenture through a private consent solicitation process. Late in 2013 or early in 2014, a group of Black Elk bondholders who held at least 25% of the Black Elk bonds began to threaten Black Elk with a default based on Black Elk exceeding the capital expenditure limits set forth in Section 4.21 of the Indenture. Nordlicht, faced with the prospect of these bondholders filing for default, sought to gain control over at least 50% of the principal amount of the Black Elk bonds to override any default action and adopt certain amendments to the Indenture. In particular, Platinum sought to amend, *inter alia*, Sections 4.09 and 4.21 of the Indenture to address Black Elk’s capital expenditure covenant and its ability

to incur additional debt. The proposed amendments did not then include any changes to the provision governing the use of asset sale proceeds (Section 4.10).

On February 6, 2014, Nordlicht wrote to Black Elk CEO John Hoffman with a copy to in-house counsel Pichè:

John - FYI - am close to buying 20 million bonds from msd.³ It will at that point be easy task to buy additional 25 if bondholders don't behave and we can change covenants at any time by flipping our bonds to friendlies who will [d]o right by the company.

GA.581 (footnote added). On March 3, 2014, Nordlicht updated Black Elk's CFO, Jeffrey Shulse, as well as Small, Pichè, Hoffman, and Levy: "Their [(the bondholders threatening default)] group is falling apart. Msd just sold their position. They still have 25 percent but likely we will have 50 percent in friendly hands relatively quickly in which case this is all academic." GA.584.

On March 5, 2014, Rob Shearer of BakerHostetler – outside counsel to Black Elk – emailed Shulse: "For purposes of calculating whether the requisite consent has been obtained, . . . indenture securities owned by an obligor . . . or by any person directly or indirectly controlling or controlled by or under direct or indirect common control with any such obligor" must be excluded under section 316(a) of the Trust Indenture

³ "MSD" was a holder of Black Elk bonds that had threatened a default. GA.435.

Act (“TIA”). GA.587 (emphasis omitted). Shulse then forwarded Shearer’s email quoting section 316(a) of the TIA to Nordlicht, Levy and others, stating: “We need to be mindful of this provision when assuming we control the bonds or not.” *Id.* Nordlicht responded: “I see u accidentally forgot to include Marizza and label this attorney client privilege. I have corrected But when we say we have friendly holders we will be fully compliant with this provision.” *Id.*

As a part of the private consent solicitation process to amend the Indenture, on May 6, 2014, three of the Platinum funds – PPVA, PPCO, and PPLO, which collectively held about \$93 million in Black Elk bonds (or about 62% of the issued bonds) – submitted consents in favor of the proposed amendments to the Indenture. The consents disclosed that PPVA held \$50,308,000 in bonds, PPLO held \$10,046,000 in bonds, and PPCO held \$32,917,000 in bonds. These consents were distributed to counsel, including Shearer.

Shearer testified that, at the time, he did not raise any concerns that Nordlicht’s actions in “flipping bonds to friendly companies” might violate the Affiliate Rule. SA.173. He further testified that he could not recall any discussions where he told anyone at Black Elk that it was improper for Platinum to flip bonds to friendly companies in order to amend the Indenture. Shearer also testified, however, that neither he, the trustee’s counsel, nor the other lawyers at BakerHostetler working on the private consent solicitation knew that the Platinum entities were voting their bonds until after they received the consents. Shearer nevertheless also testified that neither he nor any of the lawyers

working on the transaction raised any concerns about Platinum voting their bonds after they received the consents. BakerHostetler drafted, signed, and submitted to the trustee a legal opinion indicating that the firm had reviewed the Indenture and that all conditions necessary for its amendment had been met. Shearer explained at trial that the lawyers working on the transaction had not been focused on the Affiliate Rule at the time of the private consent solicitation process and had erred in overlooking it.

In June 2014, Shearer notified Shulse that the trustee for the Black Elk bondholders was “not comfortable that the consents were properly obtained,” and was insisting that a public solicitation process be used. GA.796. In particular, in a June 2, 2014 email, Shearer wrote to Shulse:

They are insisting that we run a new consent solicitation process. Among other things, they pointed out that when you run a more customary process, DTC [(Depository Trust Company)] will freeze trading of the bonds held by holders who consent to the proposed amendments so that they cannot be traded until the second supplemental indenture is signed. Without that, they are not comfortable that the consents were properly obtained. I think they are uncomfortable with other aspects of the process, but that one by itself is enough to cause them to require us to start over.

Id.

Later that day, Shulse forwarded to Nordlicht the public consent solicitation documents he received from Shearer, and Nordlicht replied to Shulse, Levy, and Small: “David [Levy] – u needn’t explain to me what the hell is going on and why we are wasting time on this.” GA.625-26. Shulse replied to all: “The short answer is the trustee refused to sign unless we did the solicitation process . . . they don’t trust our consents are valid because we have received a default notice in the past 60 days and we have the behind the scenes process with various dates on our consents” *Id.* Nordlicht asked what was the “quickest way to end [the] process,” and Shulse replied that “[t]he quickest way is to do the formal solicitation . . . get our 51% in order . . . vote it through the DTC / BNY [(Bank of New York)] agents and end it” GA.625. Nordlicht replied to Levy, Small, and Shulse: “There is a disconnect here. No more talking to lawyers. David [Levy], u f’d this one up bad for no reason. We will have one pager signed by 51% of bondholders, no trustee necessary. It’s fine. We don’t need any process. Bondholders are being taken out, this is all moot.” *Id.*

The private consent process was ultimately terminated.

2. The Public Consent Solicitation Process and the Amendment of the Asset Sales Provision

a) The Consent Solicitation’s Proposed Amendments

After Nordlicht and Levy failed in their attempt to amend the Indenture through the private consent

solicitation process, they began to move forward with a public process (the “Consent Solicitation”).

On June 23, 2014, Small emailed Shearer an earlier draft of the proposed amendments to the Indenture and asked him to “eliminate all of the existing amendments in the attached” except those pertaining to the elimination of the capital expenditure covenant (Section 4.21). GA.797. Small also requested that Shearer add an amendment allowing Black Elk to “use proceeds from Asset Sales under section 4.10 to make an offer at par for outstanding bonds which offer will be open for 10 business days and any remaining proceeds following the 10 day offer period may be used to repurchase preferred equity of the company.” *Id.* The proposed amendment to Section 4.10 thus allowed for a fifth use of asset proceeds beyond the four enumerated uses originally specified in the Indenture: it permitted Black Elk to use the proceeds of an asset sale to purchase at par any Black Elk bonds that Black Elk bondholders elected to tender and then to use any remaining asset sale proceeds to “repurchase or redeem preferred equity of [Black Elk].” GA.832. Black Elk bondholders had three options in responding to the Consent Solicitation: (1) tender their bonds at par (thereby consenting to the proposed amendments); (2) consent to the proposed amendments without tendering, thereby continuing to own their bonds; or (3) neither tender nor consent.

The Renaissance Sale was the specific asset sale that would provide proceeds in connection with the Consent Solicitation. The amendment of the asset sales provision would therefore permit Black Elk – which

App. 23

Platinum was actively managing – to pay Platinum and other Black Elk preferred equity holders with funds obtained from the Renaissance Sale.

b) Platinum Transfers Black Elk Bonds to Beechwood to Manipulate the Consent Solicitation Vote

On April 8, 2014 – more than three months before the Consent Solicitation Statement was distributed to the Black Elk bondholders – Levy, Nordlicht, and Small were assessing the Black Elk bonds that they controlled at Platinum’s hedge funds (PPVA, PPCO and PPLO) and the Beechwood entities (BAM and, later, BBIL), which were summarized in one consolidated table. Small wrote to Platinum trader Nicholas Marzella, copying Levy, with the subject “Black Elk bonds”: “Nick, can you send the holder and amount of bonds that are with each broker.” GA.609. Marzella replied to Levy and Small by sending the following table, which showed that various Platinum and Beechwood entities held a total of \$98,730,500 of the \$150 million of outstanding Black Elk bonds:

22,870,000.00	PPCO NMRA
10,046,500.00	PPCO NMRA
24,987,000.00	PPVA NMRA
25,321,000.00	PPVA CS

App. 24

10,146,000.00	PPLO CS
5,360,000.00	BAM
98,730,500.00	

GA.609-10.

Around this time, Nordlicht also asked Wallach and another Beechwood employee, David Shirreffs, to obtain the third-party market pricing for the Black Elk bonds and to include them on their profit and loss statements going forward, so that they could monitor the price of the Black Elk bonds on a daily basis. They subsequently added the Black Elk bonds to their profit and loss statements for tracking purposes and kept Nordlicht apprised of the price. During April and May 2014, Nordlicht inquired several times regarding the price of Black Elk bonds and whether BAM and BBIL had the capacity to purchase those bonds.

Between April 8, 2014, and July 7, 2014, Nordlicht directed that over \$30 million of Black Elk bonds be sold from Platinum's funds to Beechwood. On May 13, 2014, Nordlicht instructed Wallach to purchase \$8 million worth of Black Elk bonds on BAM's behalf, and instructed Marzella to sell \$4 million of Black Elk bonds each from Platinum accounts at Credit Suisse and Nomura. On June 23, 2014 – the same day that Small wrote an email to Shearer, with a copy to Levy, initiating the public consent solicitation process – Nordlicht asked Wallach how many Black Elk bonds

Beechwood owned and Wallach informed him that the principal value was \$13,360,000. Later that day, Nordlicht emailed Marzella, copying Wallach and Shirreffs, instructing him to sell \$10 million worth of Black Elk bonds from PPVA Nomura to BBIL Nomura. On July 1, 2014, Nordlicht emailed Marzella, copying Wallach, directing him to sell another \$7 million in Black Elk bonds from PPVA Nomura to BBIL. On July 7, 2014, Nordlicht instructed Marzella to sell \$6.7 million of Black Elk bonds from Platinum to Beechwood (\$3.35 million from PPCO and \$3.35 million from PPLO).

Levy was kept aware of the sales of Black Elk bonds from Platinum's hedge funds to Beechwood. For example, on July 2, 2014, Marzella sent a table to Small reflecting Black Elk bond holdings. Small responded to Marzella: "Nick, can you update the below for recent BAM purchases. Also[,] can you confirm with [Credit Suisse] how much would show up as of today that is owned by the PPVA and PPLO." GA.634. After Marzella made these changes, Small sent the updated table to Nordlicht and Levy, saying: "We need to decide on a record date for the consent. Below is a summary of the positions held by PPBE and BAM." *Id.* In addition, on July 23, 2014, Manela sent Levy a list of investments that Beechwood held related to Platinum and wrote: "Let[]s discuss." GA.748-49. One of the listed Beechwood investments was \$31,051,000 in "Black Elk Energy Public Debt 13.75%," with the comment: "Purchased 3,335,000 each from PPCO and PPLO and 24,381,000 from PPVA." GA.749.

c) *The Defendants Do Not Disclose the Black Elk Bonds Held by PPCO, PPLO, or Beechwood*

On July 3, 2014, about two weeks before the Consent Solicitation was distributed to the Black Elk bondholders, Small asked Black Elk attorneys Shearer and Brittany Sakowitz to confirm “that under the TIA [(Trust Indenture Act)] if \$5MM of the bonds were owned by an affiliate then in order for the consent to be approved a majority of \$145MM (greater than \$72.5MM) would need to consent rather than greater than \$75MM.” GA.636. Sakowitz replied:

Correct. Securities owned by the obligor or by any person directly or indirectly controlling or controlled by or under direct or indirect common control with the obligor must be disregarded for purposes of calculating the vote required to approve the proposal. (Trust Indenture Act, Section 316(a)).

Id. Small then forwarded this exchange to Nordlicht and Levy, stating: “See below regarding the majority consent calculation.” *Id.* And on July 7, 2014, Small again emailed Nordlicht and Levy, stating that “[t]he company must disclose how many bonds are owned by affiliates in order to establish the requisite number to constitute a majority. . . . Let’s discuss asap” GA.641.

On July 8, 2014, Manela emailed to Levy and Small a table listing the amount of Black Elk bonds Platinum’s hedge funds and Beechwood held. The latest number of Black Elk bonds that PPVA, PPCO,

PPLO, BAM, and BBIL held totaled approximately \$98 million.

On July 9, 2014, Small wrote to Shearer and Sakowitz, among others: “\$18,321,000 bonds are controlled by PPVA and should be disclosed and excluded from the calculation.” GA.703. On July 13, 2014, Small again reiterated to Shearer and Sakowitz that \$18,321,000 bonds are “controlled by and should be disclosed and excluded from the calculation.” GA.705.

The Offer to Purchase and Consent Solicitation Statement was circulated to the Black Elk bondholders on July 16, 2014. The Consent Solicitation Statement provided that, for the proposed amendments to pass, tenders or consents needed to be received from “at least a majority in aggregate principal amount of all the outstanding Notes [approximately \$150 million] (disregarding any Notes held by affiliates of the Company).” GA.816. In other words, once all Black Elk bonds held by affiliates of Black Elk were removed from consideration, the proposed amendments would pass only if more than half of the remaining Black Elk bondholders tendered their bonds or consented to the proposed amendments.

The Consent Solicitation further provided that, as of July 16, 2014:

[PPVA] and its affiliates, which own approximately 85% of our outstanding voting membership interests, own approximately \$18,321,000 principal amount of the outstanding Notes. Otherwise, neither we, nor any person

directly or indirectly controlled by or under direct or indirect common control with us, nor, to our knowledge, any person directly or indirectly controlling us, held any Notes.

GA.819. Shearer testified that, in preparing the Consent Solicitation, he relied on Small's representations as to the amount of Platinum-owned bonds. At trial, this language in the Solicitation Consent was central to the government's allegations of fraud.

d) The Defendants Vote Beechwood and Platinum's Black Elk Bonds to Ensure that the Amendments Would Pass

Bruno testified that, after the Consent Solicitation Statement was sent, he participated in a Black Elk management meeting with Shulse, Levy, and Hoffman where they discussed the status of the Consent Solicitation. At that meeting, according to Bruno, Shulse indicated that they had not yet heard anything and Hoffman commented that he did not think anyone in their right mind would do it and said, "[Y]ou're not going to hear anything." GA.243-45. Levy was visibly agitated in response, and Bruno overheard Levy say to Shulse: "It's covered." GA.245.

Consistent with Levy's representation to Shulse, Levy, Nordlicht, and Small collaborated to ensure that Platinum and Beechwood voted their bonds so that the amendments would pass. On July 28, 2014, Beechwood employee Samuel Adler wrote to Wilmington Trust, with a copy to Levy, stating that the Black Elk bonds held by BAM and BBIL were voting "consent without

tendering.” GA.750. The same day, Adler wrote to Nomura, with a blind copy to Levy, also stating that the Black Elk bonds held by BAM and BBIL were voting “consent without tendering.” GA.753.

On July 29, 2014, at 9:29 a.m., Nordlicht wrote to himself with the subject heading, “To do today”: “Black elk – 1 – need budget for post renaissance properties. We need immediate p and a [(plugging and abandonment)] plan. *We need plan as to how to distribute money to the right places (preferred, preferred, preferred).*” GA.757 (emphasis added). That afternoon, Nordlicht wrote to Small with a copy to Levy: “[H]ow is partial close renaissance talks going?” GA.759. Small replied to Nordlicht and Levy: “CEO of Renaissance on vacation. Jeff [Shulse] texted him last night and this morning . . . and if balance doesn’t close we can unwind deal and keep deposit if it is Renaissance’s fault. We are waiting for a response.” GA.758. Nordlicht replied to Small and Levy: “David [Levy] – I have Beechwood at 36,422,400 in terms of ownership of bee [(Black Elk)] bonds. Dan – Do u know respective funds?” *Id.* Small responded to Nordlicht and Levy by sending a table of Black Elk’s bond holdings.

The table Small sent to Nordlicht and Levy provided a breakdown of how many Black Elk bonds were owned by each of the Platinum and Beechwood entities. The table listed the “BlackElk Bond Holders” as PPCO Nomura (\$29,582,000), PPVA Credit Suisse (\$18,321,000), PPLO Credit Suisse (\$13,711,000), BAM Wilmington Trust (\$13,360,000), and BBIL Wilmington Trust (\$23,657,000), for a total of \$98,631,000. GA.764.

The table also provided a calculation of the aggregate principal amount of bonds that were needed to consent to ensure that the amendments passed, assuming that only PPVA Credit Suisse's \$18,321,000 in bonds were ineligible to vote. In particular, the table listed the total outstanding Black Elk bonds (\$150,000,000), subtracted PPVA's holdings (\$18,321,000) from that number to get \$131,679,000, and then listed \$65,839,500 (half of \$131,679,000) — i.e., the number of bonds necessary to pass the Consent Solicitation, assuming that the bonds held by PPCO, PPVA, PPLO, BAM, and BBIL would not be disclosed as affiliates and would be voted. *Id.*

On August 1, 2014, after the votes were cast, Shearer emailed Small a draft Officer's Certificate, setting forth the \$18,321,000 worth of bonds that Small had disclosed as controlled by Platinum. On August 13, 2014, Shearer followed up, asking Small to review and complete the certificate so that Black Elk could issue a press release. Shortly thereafter, Small emailed Nordlicht and Levy with the subject heading "Officer Certificate," seeking their approval for his email response to Shearer. GA.770. Small wrote: "See attached wording and let me know if you are ok. Below is a table that shows under all three scenarios there is 50% approval." *Id.* These three scenarios included counting (1) all \$110 million consenting votes (\$11.4 million tendered bonds plus the \$98.6 million Platinum-controlled bonds that voted to consent only); (2) all consenting votes except the approximately \$18 million PPVA-owned bonds; and (3) all consenting votes except the approximately \$18 million PPVA-owned bonds and the approximately \$43 million PPCO- and

PPLO-owned bonds (which Small classified as “PPVA and Possible Affil”). *Id.* None of these three scenarios disclosed that the Black Elk bonds that Beechwood owned were bonds that should be excluded. *Id.* At 8:51 a.m. the next day, August 14, 2014, Small resent his email to Nordlicht and Levy, writing: “Trustee wants to see this this morning in order to finalize results of tender/consent which ended last night. U ok with language?” *Id.* Nordlicht responded to Small and Levy: “K.” *Id.*

Later that day, at 12:36 p.m., Small sent the Officer’s Certificate to Shearer with a copy to Shulse. Small wrote: “Rob, see attached officer’s certificate and below analysis which is also set forth on the attached spreadsheet. Let me know if you have any comments and we will have executed.” GA.772-73. The email contained a table outlining the same three scenarios Small had shared with Nordlicht and Levy, except that Small referred to the PPCO- and PPLO-owned bonds as “Not Deemed Affil.” GA.772.

Shearer testified that, after receiving this email, he had a telephone conversation with Shulse and Small because he had questions regarding the newly disclosed information. In response to Shearer’s questions, Small indicated that there was a different group of bonds held by entities that Platinum had relationships with and that they could be considered affiliates, but that he did not think that they were affiliates like PPVA was. In light of the lack of clear information regarding these entities and their relationship to PPVA and Black Elk, Shearer could not conclude that the PPCO- and PPLO-owned bonds were eligible to be counted. Shearer

therefore decided to exclude the PPCO- and PPLO-owned bonds from the consent calculation in the Officer's Certificate.

Despite the exclusion from the consent calculation of the bonds held by PPVA, PPLO, and PPCO, the amendments to the Indenture ultimately passed. As a result of the exclusion of the Platinum fund-held bonds, \$61 million (\$18.3 million PPVA-held bonds, plus \$43 million PPLO- and PPCO-held bonds) worth of the \$150 million outstanding bonds were ineligible to vote, leaving only \$89 million worth of the bonds that were eligible. In order to receive a majority, only \$44.5 million worth of the bonds needed to consent to the amendments. Shearer determined that the Consent Solicitation had passed based on the following votes: \$37,017,000 held by the Beechwood funds (which had consented and not tendered); \$600,000 of bonds held by unidentified bondholders (which had also consented and not tendered); and \$11,333,000 of bonds held by unidentified bondholders (which had tendered and thus consented). Over 99% of the bonds that voted to consent but not tender were controlled by Platinum and Beechwood, which was Platinum-affiliated and controlled. The Consent Solicitation would not have passed without the Beechwood-held bonds that voted to consent. *See* GA.541-43.

e) Black Elk Uses the Proceeds from the Renaissance Sale to Pay the Preferred Equity Holders

Three days after the Consent Solicitation vote closed, on August 16, 2014, Manela emailed Levy, asking "did Black Elk sale [i.e., the Renaissance Sale]

go thru yesterday??” Levy responded seven minutes later: “Sale closed. 135 mln Cash will be in the account at black elk Monday am.” GA.779.

On the morning of August 18, 2014, PPVA CFO Joseph SanFilippo sent an email to Nordlicht, copying Levy and Manela, with the subject heading “Series E as of August 18.” GA.780. The email contained a list of the Black Elk preferred equity holders, which included PPVA, PPLO, PPCO, and PPVA Black Elk Equity LLC.

On August 18, 2014, Shearer advised that Texas law might prohibit distribution of the proceeds of the Renaissance Sale. He wrote to Shulse and Black Elk General Counsel Stephen Fuerst advising them to review Texas Business Organizations Code section 101.206. The statute prohibits a limited liability company from making distributions to its members if such a distribution would render the company insolvent. Tex. Bus. Org. § 101.206.

Shulse forwarded Shearer’s email to Nordlicht, Small, Levy, and Samuel Salfati and stated: “Advice of counsel . . . we need to be mindful of this in our planning.” GA.781. At 4:23 pm that same day, Nordlicht forwarded Shulse’s email to Levy, changing the subject heading of the email to “urgent” and writing: “David – get these wires out!!!! Call him right now please!!!!” *Id.* Twenty minutes later, at 4:43 p.m. on August 18, 2014, Small wrote to Shulse with a copy to Salfati — who had recently joined Small on the three-person Black Elk Board of Directors — with the subject heading “Wires”: “Jeff, on behalf of Sam Salfati and myself constituting a majority of the board of

managers you are hereby authorized to wire \$70MM in partial payment of Preferred E units.” GA.783.

Between August 18 and August 21, 2014, Black Elk transferred proceeds from the Renaissance Sale to the defendants and the Platinum-related entities. Black Elk transferred: (1) on August 18, 2014, approximately \$32.5 million to PPVA’s “Black Elk” Sterling account and \$15.3 million to PPVA’s Sterling account; (2) on August 20, 2014, \$24.6 million to PPCO’s Capital One account; and (3) on August 21, 2014, \$5 million to PPLO’s Sterling account. In addition, on August 21, 2014, PPCO transferred – through various accounts – approximately \$7.7 million to Mark Nordlicht’s parents, Jules and Barbara Nordlicht, including approximately \$500,000 to the Jules and Barbara Nordlicht Family Foundation; \$256,679 to Levy; \$102,672 to Small; and approximately \$1 million to the Huberfeld Family Foundation.

After the Platinum entities received the proceeds from the Renaissance Sale, Levy informed Platinum CFO Daniel Mandelbaum that Platinum would not be providing any more financing to Black Elk. In light of Black Elk’s outstanding bills, Mandelbaum asked Levy if Black Elk would be declaring bankruptcy. Levy indicated that Black Elk had to wait twelve months to declare bankruptcy to avoid the risk that the proceeds from the Renaissance Sale could be clawed back during the bankruptcy proceedings. A year later, in August 2015, Black Elk’s creditors initiated an involuntary bankruptcy proceeding against the company.

Procedural History

On December 14, 2016, a grand jury returned an eight-count indictment in the United States District Court for the Eastern District of New York against seven individuals, including Nordlicht and Levy, relating to their alleged participation in two fraudulent schemes – one of which was the Black Elk Scheme. Count Six (conspiracy to commit securities fraud), Count Seven (conspiracy to commit wire fraud), and Count Eight (securities fraud) all related to the Black Elk Scheme.

Trial began on April 23, 2019, before Judge Cogan. On July 9, 2019, the jury returned its verdict, acquitting Nordlicht and Levy on Counts One through Five,⁴ and convicting them on Counts Six through Eight. Following the verdict, Nordlicht and Levy both moved for judgments of acquittal pursuant to Federal Rule of Criminal Procedure 29, and, in the alternative, for new trials pursuant to Federal Rule of Criminal Procedure 33.

⁴ Counts One through Five related to a different alleged scheme involving the Platinum entities. The indictment alleged, *inter alia*, that Platinum fraudulently overvalued its investment assets in order to attract new investors and obtain unearned management fees from its investors; that the overvaluation led to a liquidity crisis that Platinum concealed from its investors; and that the defendants made material misrepresentations and omissions to current and prospective investors to keep the scheme from being exposed. In connection with this alleged scheme, Levy and Nordlicht were charged with conspiracy to commit securities fraud and investment adviser fraud (Count One); conspiracy to commit wire fraud (Count Two); two counts of securities fraud (Counts Three and Four); and investment adviser fraud (Count Five).

On September 27, 2019, the district court issued an opinion and order granting Levy's motion for a judgment of acquittal, and conditionally granting his motion for a new trial "in the event that the judgment of acquittal is later vacated or reversed." *United States v. Nordlicht*, No. 16-cr-00640 (BMC), 2019 WL 4736957, at *18 (E.D.N.Y. Sept. 27, 2019). The district court denied Nordlicht's motion for a judgment of acquittal but granted his motion for a new trial. *Id.* at *9-14, 16-18.

In granting Levy's motion for a judgment of acquittal, the court concluded that "[e]ven making reasonable inferences in favor of the Government, and deferring to the role of the jury in weighing evidence and assessing credibility, the Government failed to meet its burden of proving beyond a reasonable doubt that Levy had criminal intent." *Id.* at *14. The district court explained that the evidence "f[ell] into the following categories: testimony from Bruno and Mandelbaum; evidence that Levy was involved in processing wire transfers after the Renaissance [S]ale; and evidence that Levy received emails about Black Elk bonds and the consent solicitation." *Id.* The district court considered each category of evidence and found it either "too speculative" or insufficient to sustain a guilty verdict. *Id.* at *14-16. The district court emphasized that there was nothing inherently unlawful about structuring a transaction to avoid a claw-back or "processing wire transfers, which are a routine aspect of transactions like the Renaissance [S]ale." *Id.* at *15. Similarly, the district court reasoned that the emails on which Levy was copied had limited probative value because "even assuming Levy read

these emails, the[y] . . . merely show that Levy knew or should have known that Beechwood held Black Elk bonds.” *Id.* Lastly, the court found that the government had “adduced no evidence that Levy: considered Beechwood to be an affiliate of Platinum; played any role in shifting Black Elk bonds to Beechwood; or played any role in Beechwood voting its bonds.” *Id.* The district court also emphasized witness testimony that Levy had been present during a meeting where individuals discussed how Beechwood was not a Platinum affiliate. *Id.* The district court therefore concluded that there was insufficient evidence of Levy’s criminal intent. *Id.* at *15-16.

The district court also conditionally granted Levy’s motion for a new trial. *Id.* at *18. The court stated that, for the same reasons it granted Levy’s Rule 29 motion, “the jury’s guilty verdict was a manifest injustice because there was insufficient evidence that Levy possessed criminal intent.” *Id.*

With respect to Nordlicht’s motion for a judgment of acquittal, the district court concluded that “when viewed in the light most favorable to the Government, the Government adduced sufficient evidence . . . to make a judgment of acquittal under Rule 29 inappropriate.” *Id.* at *9. The court reasoned that there was sufficient evidence for the jury to conclude that: Nordlicht knew about the Affiliate Rule; Beechwood was an affiliate under the Indenture and that Nordlicht knew or should have known that Beechwood was an affiliate; and that the defendants’ disclosures regarding the amount of affiliate-held bonds were material misrepresentations. *Id.* at *9-14.

As to Nordlicht's motion for a new trial, however, the district court concluded that "[a]lthough the Government adduced sufficient evidence for a judgment of acquittal to be unwarranted, letting the verdict stand against Nordlicht would be a manifest injustice." *Id.* at *16. The court reasoned that while the evidence suggested that Nordlicht knew about the Affiliate Rule, "he and Beechwood went to great lengths to comply with [it]." *Id.* The court also found that even if the jury could fairly conclude that the Beechwood entities were affiliates, there was "insufficient evidence that Nordlicht was on notice of their affiliate status." *Id.* at *17. The court also concluded that it would be a manifest injustice to sustain Nordlicht's conviction based on his failure to disclose that PPCO and PPLO were affiliates, because "[u]nder all of the facts and circumstances of the case, Black Elk provided Shearer with sufficient information that the jury could not fairly conclude that Nordlicht intended to conceal PPCO's and PPLO's affiliate status from Shearer." *Id.* at *18.

The government timely appealed.

DISCUSSION

I. Standard of Review

"We review *de novo* a district court's grant of a Rule 29 motion based on a finding that the trial evidence was insufficient to support the jury's verdict, applying the same standard the district court applies in review of the evidence." *United States v. Pauling*, 924 F.3d 649, 656 (2d Cir. 2019).

“We review a district court’s grant of a new trial for abuse of discretion.” *United States v. Truman*, 688 F.3d 129, 141 (2d Cir. 2012); *see also United States v. Polouizzi*, 564 F.3d 142, 159 (2d Cir. 2009) (“[Rule 33] ‘confers broad discretion upon a trial court to set aside a jury verdict and order a new trial to avert a perceived miscarriage of justice.’” (quoting *United States v. Sanchez*, 969 F.2d 1409, 1413 (2d Cir. 1992))). A district court “abuses its discretion when its decision rests on an error of law or a clearly erroneous factual finding, or when its decision . . . cannot be located within the range of permissible decisions.” *Truman*, 688 F.3d at 141 (ellipsis in original) (quoting *United States v. Gonzalez*, 647 F.3d 41, 57 (2d Cir. 2011)). It does not, however, “abuse[] [its] discretion simply because [it] has made a different decision than we would have made in the first instance.” *United States v. Robinson*, 430 F.3d 537, 543 (2d Cir. 2005) (quoting *United States v. Ferguson*, 246 F.3d 129, 133 (2d Cir. 2001)).

II. Levy’s Rule 29 Motion

A. Legal Standard

Federal Rule of Criminal Procedure 29 provides that “[i]f the jury has returned a guilty verdict, the court may set aside the verdict and enter an acquittal.” Fed. R. Crim. P. 29(c)(2).

“[A] defendant challenging the sufficiency of the evidence ‘bears a heavy burden.’” *United States v. Martoma*, 894 F.3d 64, 72 (2d Cir. 2017) (quoting *United States v. Coplan*, 703 F.3d 46, 62 (2d Cir. 2012)). We “must determine whether upon the evidence, giving full play to the right of the jury to

determine credibility, weigh the evidence, and draw justifiable inferences of fact, a reasonable mind might fairly conclude guilt beyond a reasonable doubt.” *United States v. Autuori*, 212 F.3d 105, 114 (2d Cir. 2000) (quoting *United States v. Mariani*, 725 F.2d 862, 865 (2d Cir. 1984)). In so doing, we “view the evidence presented in the light most favorable to the government[,]” and “[a]ll permissible inferences must be drawn in the government’s favor.” *United States v. Guadagna*, 183 F.3d 122, 129 (2d Cir. 1999). Moreover, “the evidence must be viewed in its totality, ‘as each fact may gain color from others,’” *United States v. Cassese*, 428 F.3d 92, 98-99 (2d Cir. 2005) (internal citations omitted), and “the Government need not negate every theory of innocence,” *United States v. Lorenzo*, 534 F.3d 153, 159 (2d Cir. 2008) (internal quotation marks omitted). “[I]f the court concludes that either of the two results, a reasonable doubt or no reasonable doubt, is fairly possible, [the court] must let the jury decide the matter.” *Autuori*, 212 F.3d at 114 (alterations in original) (internal quotation marks omitted). The verdict “must [therefore] be upheld if ‘any rational trier of fact could have found the essential elements of the crime beyond a reasonable doubt.’” *Guadagna*, 183 F.3d at 130 (emphasis in original) (quoting *United States v. Resto*, 824 F.2d 210, 212 (2d Cir. 1987)).

A court must “defer to the jury’s determination of the weight of the evidence and the credibility of the witnesses, and to the jury’s choice of the competing inferences that can be drawn from the evidence.” *Klein*, 913 F.3d at 78 (quoting *United States v. Reifler*, 446 F.3d 65, 94 (2d Cir. 2006)). This “high degree of

deference we afford to a jury verdict is ‘especially important when reviewing a conviction of conspiracy.’” *United States v. Anderson*, 747 F.3d 51, 72-73 (2d Cir. 2014) (quoting *United States v. Pitre*, 960 F.2d 1112, 1121 (2d Cir. 1992)). “This is so because a conspiracy by its very nature is a secretive operation, and it is a rare case where all aspects of a conspiracy can be laid bare in court with the precision of a surgeon’s scalpel.” *Id.* at 73 (internal quotation marks omitted). The “agreement [to participate in the conspiracy] may be inferred from the facts and circumstances of the case[,]” and “[b]oth the existence of the conspiracy and the defendant’s participation in it with the requisite criminal intent may be established through circumstantial evidence.” *United States v. Wexler*, 522 F.3d 194, 207-08 (2d Cir. 2008) (internal quotation marks omitted). Moreover, “[s]eemingly innocent acts taken individually may indicate complicity when viewed collectively and with reference to the circumstances in general.” *Mariani*, 725 F.2d at 865-66.

The jury’s inferences, however, must be reasonable. “[S]pecious inferences [should] not [be] indulged, because it would not satisfy the Constitution to have a jury determine that the defendant is *probably* guilty.” *United States v. Valle*, 807 F.3d 508, 515 (2d Cir. 2015) (emphasis in original) (quoting *United States v. Lorenzo*, 534 F.3d 153, 159 (2d Cir. 2008)); *see also* *United States v. D’Amato*, 39 F.3d 1249, 1256 (2d Cir. 1994) (“[A] conviction based on speculation and surmise alone cannot stand.”). “An inference is not a suspicion or a guess. It is a reasoned, logical decision to conclude that a disputed fact exists on the basis of another fact that is known to exist.” *Pauling*, 924 F.3d at 656

(internal quotation marks omitted). “Impermissible speculation, on the other hand, is ‘a complete absence of probative facts to support the conclusion reached.’” *Id.* (quoting *Lavender v. Kurn*, 327 U.S. 645, 653 (1946)).

“Where a fact to be proved is also an element of the offense . . . it is not enough that the inferences in the government’s favor are permissible,” but rather, the court “must also be satisfied that the inferences are sufficiently supported to permit a rational juror to find that the element, like all elements, is established beyond a reasonable doubt.” *Id.* at 657 (internal quotation marks and alteration omitted); *see also D’Amato*, 39 F.3d at 1256 (“[T]he government must introduce sufficient evidence to allow the jury to reasonably infer that each essential element of the crime charged has been proven beyond a reasonable doubt.”). “Direct evidence is not required; ‘[i]n fact, the government is entitled to prove its case solely through circumstantial evidence, provided, of course, that the government still demonstrates each element of the charged offense beyond a reasonable doubt.’” *Lorenzo*, 534 F.3d at 159 (alteration in original) (quoting *United States v. Rodriguez*, 392 F.3d 539, 544 (2d Cir. 2004)). “If the evidence viewed in the light most favorable to the prosecution gives equal or nearly equal circumstantial support to a theory of guilt and a theory of innocence, then a reasonable jury must necessarily entertain a reasonable doubt.” *United States v. Hawkins*, 547 F.3d 66, 71 (2d Cir. 2008) (alteration omitted) (quoting *United States v. Glenn*, 312 F.3d 58, 70 (2d Cir. 2002)).

*B. A Rational Jury Could Have Concluded that
Levy Participated in the Black Elk Scheme
with Criminal Intent*

Counts Six, Seven, and Eight, on which Levy was convicted, charged him with, respectively, conspiracy to commit securities fraud, conspiracy to commit wire fraud, securities fraud, and aiding and abetting securities fraud. The district court granted Levy's motion for a judgment of acquittal because it concluded that, even viewing the evidence in the light most favorable to the government, the government failed to prove beyond a reasonable doubt that Levy acted with criminal intent. The district court also concluded that there was insufficient evidence to establish "that Levy was a member of a conspiracy," as "evidence of his alleged co-conspirators' intent [did] not constitute evidence of Levy's intent." *Nordlicht*, 2019 WL 4736957, at *15 n.4.

To establish intent for purposes of the substantive securities fraud charge, the government was required to prove that Levy "acted willfully and knowingly and with the intent to defraud." *United States v. Rosen*, 409 F.3d 535, 549 (2d Cir. 2005). For purposes of aiding and abetting liability, the government was required to prove that "[the defendant] willfully and knowingly associate[d] himself in some way with the crime, and [sought] by some act to help make the crime succeed." *United States v. Prado*, 815 F.3d 93, 100 (2d Cir. 2016); see *Rosemond v. United States*, 572 U.S. 65, 76 (2014) ("[A] person aids and abets a crime when (in addition to taking the requisite act) he intends to facilitate that offense's commission."). To sustain the conspiracy

charge, the government was required to prove that Levy “willfully and knowingly became a member of the conspiracy, with intent to further its illegal purposes – that is, with the intent to commit the object of the charged conspiracy.” *Archer*, 977 F.3d at 190 (internal quotation marks omitted). In other words, “the government was required to show that [Levy] had ‘at least the degree of criminal intent necessary for the substantive offense itself,’ but was not required to show that he ‘knew all of the details of the conspiracy, so long as he knew its general nature and extent.’” *Id.* (internal citations omitted). And lastly, “[t]o sustain a conviction for . . . conspiracy to commit . . . wire fraud, the government must prove that [Levy] acted with specific intent to obtain money or property by means of a fraudulent scheme that contemplated harm to the property interests of the victim.” *United States v. Carlo*, 507 F.3d 799, 801 (2d Cir. 2007).

The government argues that the district court erred in granting Levy’s motion for a judgment of acquittal because the court failed to consider all the relevant evidence in context and improperly relied on isolated pieces of evidence. For the reasons explained below, we agree. We conclude that a rational jury could reasonably infer from the circumstantial evidence presented at trial that Levy was a member of the charged conspiracy and acted with the requisite intent.

1. *The Scope and Purpose of the Black Elk Scheme*

Criminal intent “may be proven entirely through circumstantial evidence.” *United States v. Romano*, 794 F.3d 317, 335 (2d Cir. 2015). “When the necessary

result of the [defendant]’s scheme is to injure others, fraudulent intent may be inferred from the scheme itself.” *Id.* (alteration in original) (quoting *D’Amato*, 39 F.3d at 1257).

At trial, the government adduced evidence that: the Black Elk scheme benefitted Platinum investors to the detriment of the Black Elk bondholders; the outcome of the vote was inconsistent with the actions of a rational bondholder; and the Consent Solicitation would not have passed without the votes of Beechwood, a Black Elk affiliate. Prior to the Consent Solicitation, Black Elk was headed towards bankruptcy, and PPVA – which had heavily invested in Black Elk – was in the midst of a liquidity crisis. The Consent Solicitation Statement’s proposed amendments allowed Black Elk to pay Black Elk’s preferred equity holders – which consisted of a significant number of Platinum-controlled entities and associates, including PPVA – with proceeds from the Renaissance Sale before paying the Black Elk bondholders.

Black Elk bondholders could respond to the Consent Solicitation in one of three ways: (1) tender their bonds at par (thereby consenting to the proposed amendments); (2) consent to the proposed amendments without tendering, thereby continuing to own their bonds; or (3) neither tender nor consent. Government witnesses Todd Pulvino and Dixon Yee – bondholders who lost money as a result of the Black Elk scheme – testified that the “consent only” option in the Consent Solicitation Statement (the option to consent to the amendments without tendering the bonds) was not a rational choice for a bondholder to select. Pulvino

explained that it made no financial sense for a bondholder to consent and retain his or her bonds because the bondholder would be giving up protections and allowing the preferred equity holders to have priority over the bondholders' interests without getting anything in exchange for giving up those protections. Yee similarly testified that it would have been "kind of stupid" for a bondholder to agree to the changes without tendering his or her bonds, because the bondholder would be giving up his or her rights without getting anything in return. GA.289-90.

Yet, the consent-only option received the majority of votes. Notably, that majority comprised \$37 million worth of bonds held by Beechwood, which voted to consent but declined to tender. In addition to the \$37 million of Beechwood-held bonds that voted to consent but not tender, approximately \$43 million of the PPCO- and PPLO-held bonds voted to consent but not tender. Aside from the bonds owned by the Platinum-related entities, only \$600,000 in bonds voted to consent but declined to tender. Thus, of all the bonds that voted to consent but not tender, over 99% were controlled by Platinum and Beechwood, which was Platinum-affiliated and controlled. And ultimately, the Consent Solicitation was only able to pass because the Beechwood-held bonds voted to consent.

As the district court did not dispute, *Nordlicht*, 2019 WL 4736957, at *10-14, this evidence could have led a rational jury to conclude beyond a reasonable doubt that the scheme was fraudulent and that those involved in it acted with criminal intent to defraud the bondholders.

2. Levy's Involvement and Role in the Black Elk Scheme

Having determined that the government presented sufficient evidence from which a rational jury could conclude beyond a reasonable doubt that the goal of the Black Elk scheme was to defraud bondholders, we consider whether there was sufficient evidence from which a rational jury could have concluded beyond a reasonable doubt that Levy willfully participated in the Black Elk scheme with criminal intent. We conclude that there was.

The evidence adduced at trial established that Levy was aware of Black Elk's dire financial straits and that a Black Elk bankruptcy would have negative ramifications for PPVA. As a portfolio manager at Platinum and later, as Beechwood's CIO, Levy oversaw PPVA's investments in Black Elk and knew that PPVA was heavily invested in the company. Even after Levy left Platinum to become CIO of Beechwood, he continued to work for Platinum to manage PPVA's investment in Black Elk. Levy continued to participate in meetings with Black Elk management and received updates regarding Black Elk's financial status. For example, Levy knew that there were major problems with Black Elk's oil production and that Black Elk was struggling to pay its bills. Levy also participated in a Black Elk management meeting at which the prospect of Black Elk filing for bankruptcy was discussed.

At that meeting, Levy said: "We cannot do that. It's a lot of money to lose." GA.238. Although motive is not an element of the crimes charged, it is probative of whether the defendant acted with criminal intent.

Here, Levy's knowledge of Black Elk's impending bankruptcy and its negative ramifications for PPVA provided Levy with a motive to seek to amend the Indenture to ensure that the proceeds of the Renaissance Sale would go to the preferred equity holders, which included the Platinum-related entities.

The evidence presented at trial also established that Levy was notified of the Affiliate Rule on several occasions. On March 5, 2014, in connection with the private consent solicitation process, Shulse forwarded an email from Shearer to Nordlicht, Levy, Small, and Hoffman, commenting, "We need to be mindful of this provision when assuming we control the bonds or not" GA.587. The email from Shearer indicated that under section 316(a) of the TIA, "securities owned by any obligor . . . or by any person directly or indirectly controlling or controlled by or under direct or indirect common control with any such obligor" must be excluded from the consent calculation. *Id.* (emphasis omitted). On July 3, 2014, Small forwarded an email exchange with Black Elk attorneys Shearer and Sakowitz to Nordlicht and Levy. Sakowitz, citing section 316(a) of the TIA, confirmed that "[s]ecurities owned by the obligor or by any person directly or indirectly controlling or controlled by or under direct or indirect common control with the obligor must be disregarded for purposes of calculating the vote required to approve the proposal." GA.636. And on July 7, 2014, Small again emailed Nordlicht and Levy, explaining that "[t]he company must disclose how many bonds are owned by affiliates in order to establish the requisite number to constitute a majority." GA.641.

Levy was also involved in the private consent solicitation process. He was copied on correspondence relating to the consents that were submitted as a part of the private consent solicitation process, supporting an inference that Levy was involved in Black Elk's initial efforts to amend the Indenture. This inference is further supported by the fact that, after the private consent solicitation process failed, Nordlicht demanded that Levy explain "what the hell is going on." GA.625-26. After Shulse explained that the trustee wanted to move forward with a public consent solicitation process because of concerns about the way in which the consents had been obtained, Nordlicht blamed Levy: "David, u f'd this one up bad for no reason. We will have one pager signed by 51% of bondholders, no trustee necessary. It's fine. We don't need any process. Bondholders are being taken out, this is all moot." GA.625. This evidence establishes that Levy was: aware of Black Elk's efforts to amend the Indenture; actively involved in the private consent solicitation process; aware that they might have to proceed with a public consent solicitation process because of concerns about the way in which the consents were obtained; and aware of Nordlicht's desire to circumvent the bondholders in order to ensure that Black Elk's proposed amendments to the Indenture quickly passed.

The evidence further appears to demonstrate that Levy remained involved in Black Elk's efforts to amend the Indenture through the public consent solicitation process after the private process failed. On June 23, 2014, for example, Small emailed Shearer Black Elk's proposed amendments to the Indenture – which included modification of the asset sale proceeds

provision to allow Black Elk to pay the preferred equity holders before the bondholders – and copied Levy. And in a July 7, 2014 email, Small forwarded a draft of the Consent Solicitation Statement to Nordlicht and Levy, explaining that they would have to disclose how many bonds were owned by affiliates for purposes of calculating whether a majority of the bondholders had consented to the proposed amendments to the Indenture. Small stated: “Let’s discuss asap in order to finalize and launch by Thursday.” GA.641. Two days later, on July 9, 2014, Small wrote to Shearer and Sakowitz, disclosing only that the \$18.3 million bonds controlled by PPVA should be excluded from the consent calculation. This email correspondence supports an inference that Levy was involved in the preparation of the Consent Solicitation Statement and the determination to disclose only the \$18.3 million of PPVA-controlled bonds to Shearer.

In addition, viewed in the light most favorable to the government, the evidence supports an inference that Levy was aware of Beechwood’s role in the Black Elk scheme and was actively involved in that scheme. By early 2014, Levy was CIO of Beechwood. Naftali Manela – who was CFO of PPCO through late 2014 – testified that, as CIO at Beechwood, Levy made the “final decision on which investments were made.” GA.205-06. And although there were no writings reflecting Levy himself directing Beechwood’s purchase of Black Elk bonds, he was aware of Beechwood’s purchases of a significant number of Black Elk bonds from Platinum, supporting an inference that he, as Beechwood’s CIO, had signed off on those transactions.

In April 2014, for example, Platinum trader Nicholas Marzella emailed Small and Levy a breakdown of the Black Elk bonds held by PPVA, PPCO, PPLO, and Beechwood, respectively. As of April 2014, Beechwood held only \$5 million in Black Elk bonds. Later, on July 2, 2014, Small forwarded Nordlicht and Levy a summary of Platinum and Beechwood's Black Elk bond holdings, which indicated that Beechwood now owned around \$30 million worth of bonds. And on July 23, 2014, Manela emailed Levy a chart entitled "Beechwood Investment related to Platinum." GA.749. These investments included \$31,051,000 in "Black Elk Energy Public Debt 13.75%," with the comment: "Purchased 3,335,000 each from PPCO and PPLO and 24,381,000 from PPVA." GA.749. While there was no direct evidence that Levy "played any role in shifting Black Elk bonds to Beechwood," *Nordlicht*, 2019 WL 4736957, at *15, circumstantial evidence from which the jury could draw rational inferences is sufficient. *See Wexler*, 522 F.3d at 207-08; *Lorenzo*, 534 F.3d at 159. The district court therefore was mistaken when it found that the government "adduced *no* evidence" of Levy's role in transferring Black Elk bonds to Beechwood. *Nordlicht*, 2019 WL 4736957, at *15 (emphasis added). Levy's dual role working at Beechwood and Platinum, coupled with his position as Beechwood's CIO and the email correspondence demonstrating that he was apprised of Beechwood's purchases of Black Elk bonds, supports an inference that he understood Beechwood's role in the Black Elk scheme, was a part of the conspiracy, and was acting in furtherance of the conspiracy as Beechwood's CIO.

Levy's involvement in the Black Elk scheme is further corroborated by the circumstantial evidence suggesting that he was responsible for directing the voting of Beechwood's Black Elk bonds. On July 28, 2014, Beechwood employee Samuel Adler wrote to Wilmington Trust, with a copy to Levy, stating that the Black Elk bonds held by BAM and BBIL were voting "consent without tendering." GA.750. The same day, Adler, with a blind copy to Levy, wrote to Nomura also stating that the Black Elk bonds held by BAM and BBIL were voting "consent without tendering." GA.753. Adler's open and blind copies to Levy, respectively, considered together with the evidence establishing that Levy was simultaneously working on Platinum's Black Elk investment while acting as Beechwood's CIO and that he was actively monitoring Beechwood's investment in Black Elk, supports an inference that Adler was voting Beechwood's Black Elk bonds "consent without tendering" based on instructions given to him by Levy.

Circumstantial evidence also supports an inference that Levy was aware, and was actively working to ensure, that Platinum controlled a sufficient number of bonds to ensure that the amendments would pass. On June 29, 2014, during the pendency of the public consent solicitation process, Nordlicht wrote to Small and Levy: "David [Levy]—I have Beechwood at 36,422,400 in terms of ownership of [Black Elk] bonds. Dan—Do u know respective funds?" GA.758. In response to that message, Small responded to Nordlicht and Levy and sent the following table:

App. 53

BlackElk Bond Holders					
	Nomura	Credit Suisse	Wilmington Trust	Total	
PPCO	29,582,000			29,582,000	
PPVA		18,321,000		18,321,000	
PPLO		13,711,000		13,711,000	
BAM			13,360,000	13,360,000	
BBIL			23,657,000	23,657,000	
Total				98,631,000	
				80,310,000	150,000,000
					131,679,000
					65,839,500.0

GA.764.

The table shows the Black Elk bonds collectively held by Beechwood and Platinum and sets forth the vote analysis that underlies the Black Elk Scheme. First, in the second column from the right, under the “Total” heading, the chart subtracts the \$18,321,000 in PPVA-held bonds that were disclosed in the Consent Solicitation Statement and excluded from the vote, resulting in \$80,310,000 bonds held by Platinum and Beechwood. The calculation in the far-right column subtracts the same \$18,321,000 in excluded PPVA-held bonds from the total number of outstanding bonds (150,000,000), yielding \$131,679,000. The chart then divides the latter figure in half, yielding \$65,839,500 – the number of “yes” votes needed in order for the Consent Solicitation to pass. The district court minimized this email evidence, concluding that it merely “show[s] that Levy knew or should have known

that Beechwood held Black Elk bonds.” *Nordlicht*, 2019 WL 4736957, at *15. But it also illustrates that Levy knew that Platinum and Beechwood controlled enough of the bonds to determine the outcome of the vote. Moreover, the fact that the table only excludes the \$18.3 million bonds held by PPVA supports an inference that Levy knew the PPCO-, PPLO-, and Beechwood-held bonds had been concealed from Shearer and the bondholders and were being voted to ensure that the amendment would pass.

The government did not present this evidence to the jury in isolation. As noted above, email correspondence illustrates that in July 2014, Small consulted with Nordlicht and Levy about which bonds to disclose to Shearer for purposes of the Consent Solicitation Statement. There was also trial testimony that during the public consent solicitation process, Black Elk CEO John Hoffman was skeptical about the notion that Black Elk bondholders would consent to the amendments to the Indenture. In response, Levy said to Shulse: “It’s covered.” GA.245. And on August 14, 2014, immediately following the bondholders’ vote, Small wrote to Nordlicht, copying Levy, to ask for their approval of the language to send to Shearer regarding the consent calculation for the Officer’s Certificate. Small’s proposed language identified the \$18.3 million in PPVA bonds as “affiliated,” and for the first time also flagged the PPCO- and PPLO-controlled bonds as “[p]ossible [a]ffil[iates]” to be excluded from the final vote count. GA.770. Small emphasized that regardless of whether they chose to then disclose the PPCO- and PPLO-controlled bonds, Black Elk had received a majority vote due to the votes cast by Beechwood. The

jury could reasonably infer from the context and timing of Levy's comment to Shulse, considered together with the voluminous email evidence presented, that Levy knew that the PPCO, PPLO, and Beechwood-held bonds had not been disclosed to Shearer or the bondholders; knew that the PPCO-, PPLO-, and Beechwood-held bonds were voted to ensure that the amendments to the Indenture would pass; and was deeply involved in the Black Elk Scheme.

Levy's role in disbursing the proceeds of the Black Elk Scheme, coupled with his efforts to ensure that these proceeds were protected from a claw-back in Black Elk's bankruptcy proceedings, provides further circumstantial evidence of Levy's knowledge of, involvement in, and intent to further the objectives of the Black Elk Scheme. On August 18, 2014, Shearer advised Shulse that Texas law might prohibit the distribution of the proceeds of the Renaissance Sale if that distribution would render Black Elk insolvent. Shulse forwarded this email to Nordlicht, Small, and Levy, writing: "Advice of counsel . . . we need to be mindful of this in our planning." GA.781. Immediately thereafter, Nordlicht forwarded this email to Levy, changing the subject heading to "urgent" and instructing Levy to "get these wires out!!!! Call him right now please!!!!" *Id.* Twenty minutes later, Small wrote to Shulse with a copy to Salfati — who had just joined Small on the three-person Black Elk Board of Directors — authorizing a wire transfer of \$70 million "in partial payment" to Black Elk's preferred equity holders. GA.783. Nordlicht's email to Levy, combined with the rapid sequence of events, supports a permissible inference that Levy subsequently spoke to

Small and directed him to initiate the wire transfer of the proceeds from the Renaissance Sale. The fact that Nordlicht did not have to explain to Levy what needed to be done, or why it needed to be done with such urgency, suggests that Levy was aware of and supported the object of the fraud. Moreover, Nordlicht and Levy's willingness to disburse the proceeds of the Renaissance Sale rapidly, notwithstanding the possible legal risks, supports a finding that both Nordlicht and Levy were willing to circumvent governing legal restrictions to ensure that the proceeds from the Renaissance Sale were paid to Black Elk's preferred equity holders.

Furthermore, after the proceeds from the Renaissance Sale were distributed, Levy had a conversation with Platinum CFO Daniel Mandelbaum regarding the timeline of Black Elk's bankruptcy. Levy indicated that, to prevent the proceeds from the Renaissance Sale from being clawed back during the bankruptcy proceedings, Black Elk would not declare bankruptcy for a year. This provides further support for the government's theory of the case because it illustrates that Levy apparently understood the importance to Platinum of securing the proceeds from the Renaissance Sale and was taking steps in furtherance of the Black Elk Scheme to ensure that this money would be protected.

The district court discounted the evidence of Levy's involvement in disbursing the Renaissance Sale proceeds and delaying Black Elk's bankruptcy, reasoning that there could have been innocent explanations for these acts. *Nordlicht*, 2019 WL

4736957, at *14-15. The district court explained that “[t]here is nothing unlawful about processing wire transfers, which are a routine aspect of transactions like the Renaissance [S]ale.” *Id.* at *15. Similarly, in dismissing the evidence that Levy sought to avoid a bankruptcy claw-back, the district court explained that “businesses may legitimately consider the risk of a claw-back when deciding when to conduct a certain transaction.” *Id.* at *14. But the government did not contend that the wire transfer or Levy’s efforts to avoid a claw-back were inherently inculpatory standing alone. Rather, the government argued that this evidence, considered in context alongside the other evidence establishing Levy’s knowledge of, and involvement in, the Black Elk Scheme, could have given rise to a rational inference of Levy’s intent to defraud the bondholders. *See Mariani*, 725 F.2d at 865-66 (“Seemingly innocent acts taken individually may indicate complicity when viewed collectively and with reference to the circumstances in general.”). The district court’s analysis suggests that it erroneously viewed the evidence in isolation, weighed the evidence, and drew inferences against the government. *See United States v. Tocco*, 135 F.3d 116, 123 (2d Cir. 1998) (cautioning that courts must “defer to the jury’s resolution of witness credibility and, where there is conflicting testimony, to its selection between competing inferences”).

Viewing the evidence as a whole and in the light most favorable to the government, we conclude that a rational jury could have found, beyond a reasonable doubt, that Levy participated in the Black Elk Scheme with criminal intent.

3. *The Exculpatory Evidence Cited by Levy Does Not Support the District Court's Decision*

Levy argues that despite the foregoing, there is insufficient evidence to support a conclusion that he acted with criminal intent because there was no evidence that he understood that Beechwood was an affiliate and other evidence in the record showed that he lacked the requisite criminal intent. In particular, Levy contends that he was told that Beechwood and Platinum were not affiliates, and that he was informed by the lawyers during the private consent solicitation process that Platinum was permitted to vote all of its Black Elk bonds. Levy's arguments are without merit.

As an initial matter, we find no evidence to support Levy's assertion that he was told during the private consent solicitation process that Platinum was permitted to vote the bonds held by PPVA, PPCO, and PPLO, nor do we find evidence that the lawyers involved in the transaction knew and approved of Platinum voting these bonds. To the contrary, Shearer testified that he did not know that the Platinum entities were voting their bonds, and that he did not believe the trustee's counsel or anyone else at BakerHostetler knew either. Shearer explained that the lawyers involved in the private consent solicitation process did not learn that Platinum was voting the Black Elk bonds held by PPVA, PPCO, and PPLO until after Platinum voted them and transmitted the consents to counsel for purposes of demonstrating that a majority of the bondholders had consented to the proposed amendments. And we find no evidence in the

record that Levy or Nordlicht provided any information to the lawyers regarding PPVA, PPCO, or PPLO's relationship with Black Elk or their possible status as affiliates, nor do we find evidence that any of the lawyers working on the private consent solicitation provided Levy with legal advice regarding whether these entities qualified as affiliates. While it is true that neither Shearer nor anyone else at BakerHostetler raised any concerns about PPVA, PPCO, or PPLO voting their Black Elk bonds after they received the consents, Shearer testified that they had not focused on the Affiliate Rule at the time and had mistakenly overlooked it. Moreover, Levy was aware that the trustee ultimately terminated the private consent solicitation process in light of concerns about the way in which the consents were obtained.

By contrast, in connection with the public consent solicitation process, Shearer and the other lawyers working on the transaction recognized that the Affiliate Rule applied and informed Black Elk that affiliates could not vote their bonds. And Small repeatedly notified Levy and Nordlicht, on July 3 and 7, 2014, that Black Elk was required to disclose how many bonds were owned by affiliates. Levy was therefore aware of the Affiliate Rule and Black Elk's obligation to disclose any bonds owned by affiliates—which included the Platinum and Beechwood entities.

Notwithstanding this legal advice, we are not aware of any evidence in the record that Levy, Nordlicht, or Small disclosed the PPLO-, PPCO-, or Beechwood-owned bonds to Shearer prior to the dissemination of the Consent Solicitation, or sought Shearer's – or any

other attorney's – advice regarding whether PPCO, PPLO, or Beechwood qualified as affiliates and should therefore be excluded from the consent calculation. Levy argues that, because none of the lawyers objected to PPVA, PPLO, or PPCO voting their Black Elk bonds during the private consent solicitation process, he had no reason to believe that Platinum could not vote the PPVA-, PPLO-, or PPCO-owned bonds. But the private consent solicitation process ultimately failed, and Levy was subsequently made aware on several occasions that bonds under direct or indirect common control with Black Elk had to be excluded from the consent calculation. Moreover, the fact that – after discussion with Levy and Nordlicht – Small ultimately disclosed the \$18.3 million PPVA-owned bonds to Shearer undercuts Levy's argument that he believed, based on the private consent solicitation process, that the Platinum entities could lawfully vote their bonds. Additionally, Small's August 13, 2014 email to Levy and Nordlicht – after the Consent Solicitation had passed – referred to the PPCO- and PPLO-held bonds as "Possible Affil" to be excluded from the consent calculation, and asked for Levy and Nordlicht's permission to disclose these bonds to Shearer now that they knew they had acquired sufficient votes to pass the amendments using solely the Beechwood-held bonds. Notably, the approximately \$37 million of Beechwood-held bonds were included in Small's email as consent votes to be counted, not excluded. The email evidence supports an inference that Levy understood the Platinum-controlled bonds, including those owned by PPCO, PPLO, and Beechwood, likely qualified as affiliates, and that they had concealed this information to ensure the amendments would pass.

There was also sufficient circumstantial evidence to support the conclusion that Levy knew Platinum controlled Beechwood. Most notably, Levy was working for Platinum on the Black Elk investment and assisting with the public consent solicitation process while he was working as Beechwood's CIO. As CIO, Levy controlled and exercised final authority over Beechwood's investment decisions. When Beechwood was first created, for example, Nordlicht and Levy jointly decided which investments would be purchased and transferred from Platinum to Beechwood, and Beechwood invested in many portfolio companies and securities in which Platinum was already invested, including Black Elk. Levy knew that Nordlicht was keeping tabs on how many Black Elk bonds were owned by Beechwood, was kept aware of Beechwood's purchases of Black Elk bonds from Platinum, and was actively monitoring the number of Beechwood-, PPVA-, PPCO-, and PPLO-held bonds to ensure that Platinum secured a sufficient number of votes to pass the amendments. In addition, Nordlicht gave Levy instructions while he was working at Beechwood, and Levy was aware that Nordlicht also directed and received reports from other Beechwood employees. As mentioned above, there was also evidence supporting an inference that Levy directed Beechwood's voting of Black Elk's bonds while he was simultaneously CIO of Beechwood and working for Platinum on Black Elk, and that Beechwood employees deferred to Levy and Nordlicht when voting Beechwood's Black Elk bonds. This evidence, viewed collectively, provides an ample basis to conclude that Levy understood that Black Elk and Beechwood were under the common control of

Platinum and that Beechwood therefore likely qualified as an affiliate.

Levy points out that he was involved in a conversation with Feuer and Taylor where they indicated that Beechwood was not an affiliate of Platinum. In particular, on cross-examination, Manela testified that Feuer and Taylor were very concerned about ensuring that Beechwood and Platinum were not “the technical word affiliates,” and that Feuer told Manela that he was working to ensure that Beechwood was not a Platinum affiliate. SA.55, GA.220. Manela agreed that “Beechwood had lawyers reviewing everything about the structure of Beechwood so it would not be an affiliate of Platinum.” SA.55. Manela also recalled “multiple conversations” with Feuer and Taylor where they discussed Beechwood’s affiliate status, and specifically recalled that Levy was present at one of those meetings. GA.220. According to Manela, Feuer and Taylor told him and Levy that Beechwood was not a Platinum affiliate. Manela, however, could not recall what went into the definition of “affiliate” or what the term “affiliate” meant in the context of that conversation. SA.60. Manela was not privy to, and did not testify to, the specifics of any of the legal advice that Feuer and Taylor purportedly received regarding Beechwood’s affiliate status. And it is unclear what, if any, facts Beechwood’s lawyers were provided to determine whether Beechwood was an affiliate of Platinum.

In light of the substantial evidence indicating that Levy knew that Platinum exercised control over Beechwood (and that Levy, in fact, played a pivotal role

in the exercise of such control), a jury could have rationally discounted Manela's vague recollection of Feuer and Taylor's conversation with him and Levy regarding Beechwood's status as a Platinum affiliate, particularly since there was no evidence that Feuer and Taylor were referring to Beechwood's status as an affiliate within the meaning of the Indenture. Viewing the evidence as a whole, a rational jury could have concluded (as this jury apparently did) that Levy understood that Platinum controlled Beechwood and that Beechwood likely qualified as an affiliate for purposes of the Indenture.

We conclude that the district court erred in granting Levy's Rule 29 motion.

III. The Rule 33 Motions

A. Legal Standard

Rule 33 provides that, "[u]pon the defendant's motion, the court may vacate any judgment and grant a new trial if the interest of justice so requires." Fed. R. Crim. P. 33(a). "Although a trial court has broader discretion to grant a new trial pursuant to Rule 33 than to grant a motion for a judgment of acquittal pursuant to Fed. R. Crim. P. 29, where the truth of the prosecution's evidence must be assumed, that discretion should be exercised sparingly" and only in the most extraordinary circumstances. *Sanchez*, 969 F.2d at 1414 (internal citation omitted); *see also Ferguson*, 246 F.3d at 134. "In evaluating a Rule 33 motion, the court must 'examine the entire case, take into account all facts and circumstances, and make an objective evaluation,' keeping in mind that the

‘ultimate test’ for such a motion is ‘whether letting a guilty verdict stand would be a manifest injustice.’” *United States v. Alston*, 899 F.3d 135, 146 (2d Cir. 2018) (quoting *United States v. Aguiar*, 737 F.3d 251, 264 (2d Cir. 2013)).

District courts have a duty to assure “that ‘competent, satisfactory and sufficient evidence’ in the record supports the jury verdict,” *Ferguson*, 246 F.3d at 134 (quoting *Sanchez*, 969 F.2d at 1414), and “a district court may [therefore] grant a new trial if the evidence does not support the verdict,” *Archer*, 977 F.3d at 187. While the district court “may weigh the evidence and credibility of witnesses,” *United States v. Cote*, 544 F.3d 88, 101 (2d Cir. 2008), it must take care “not to usurp the role of the jury,” *United States v. Canova*, 412 F.3d 331, 349 (2d Cir. 2005). And we have long recognized that courts should “generally . . . defer to the jury’s resolution of conflicting evidence and assessment of witness credibility.” *Ferguson*, 246 F.3d at 133. It is accordingly only in exceptional circumstances, where there is “a real concern that an innocent person may have been convicted,” that a court “may intrude upon the jury function of credibility assessment” and grant a Rule 33 motion. *United States v. McCourty*, 562 F.3d 458, 475-76 (2d Cir. 2009) (internal quotation marks omitted).

Although we have not defined exactly what constitutes an “extraordinary circumstance” sufficient to warrant Rule 33 relief, we recently provided further guidance: “[A] district court may not grant a Rule 33 motion based on the weight of the evidence alone unless the evidence preponderates heavily against the

verdict to such an extent that it would be manifest injustice to let the verdict stand.” *Archer*, 977 F.3d at 188 (internal quotation marks omitted); see *Sanchez*, 969 F.2d at 1415 (“It surely cannot be said in this case that the evidence ‘preponderates heavily against the verdict, such that it would be a miscarriage of justice to let the verdict stand.’” (alteration omitted) (quoting *United States v. Martinez*, 763 F.2d 1297, 1313 (11th Cir. 1985))).

We note that the district court did not have the benefit of our decision in *Archer* when it granted Levy and Nordlicht’s Rule 33 motions. Under the “preponderates heavily” standard, which was first articulated in *Sanchez* and later applied in *Archer*, “a district court may not reweigh the evidence and set aside the verdict simply because it feels some other result would be more reasonable.” *Archer*, 977 F.3d at 188 (internal quotation marks omitted). “To the contrary, absent a situation in which,” for example, “the evidence was ‘patently incredible or defie[d] physical realities,’ . . . where an evidentiary or instructional error compromised the reliability of the verdict,” *id.* (internal citation omitted) (quoting *Ferguson*, 246 F.3d at 134), or where the government’s case depends upon strained inferences drawn from uncorroborated testimony, “a district court must ‘defer to the jury’s resolution of conflicting evidence.’” *Id.* (quoting *McCourty*, 562 F.3d at 475-76); see also *Ferguson*, 246 F.3d at 136-37 (affirming district court’s grant of Rule 33 motion where, among other things, there was no evidence that the defendant participated in the gang’s activities and the only evidence supporting his gang membership was the speculative

testimony of one of the government’s witnesses). Of course, in *Archer* we provided the clearest examples of when it would be appropriate to grant a Rule 33 motion, but they were merely examples, and not an exhaustive list. Moreover, in applying the “preponderates heavily” standard, a district court “must be careful to consider any reliable trial evidence as a whole, rather than on a piecemeal basis.” *Archer*, 977 F.3d at 189; *see also Sanchez*, 969 F.2d at 1414 (explaining that when considering whether sufficient evidence “supports the jury’s finding that th[e] defendant is guilty beyond a reasonable doubt,” the district court must objectively “examine the totality of the case,” taking “[a]ll the facts and circumstances” into account (internal quotation marks omitted)).

B. Levy’s Motion for a New Trial

The district court conditionally granted Levy’s motion for a new trial for the same reasons it granted Levy’s motion for a judgment of acquittal, explaining that “the jury’s guilty verdict was a manifest injustice because there was insufficient evidence that Levy possessed criminal intent.” *Nordlicht*, 2019 WL 4736957, at *18. The government contends that there is no legal basis upon which to affirm the district court’s decision granting Levy a new trial because, if we agree that the district court erred in granting Levy’s Rule 29 motion, our rejection of the district court’s reasoning in the Rule 29 context must necessarily extend to the Rule 33 motion. We disagree.

While both the Rule 29 and Rule 33 analyses in this context require an assessment of evidentiary sufficiency, they have different governing legal

standards. As explained, the Rule 33 inquiry requires an objective evaluation of the evidence and an assessment of whether the evidence preponderates heavily against the verdict. Accordingly, a Rule 33 motion may properly be granted even where a Rule 29 motion is denied.

We conclude, however, that application of the “preponderates heavily” standard does not warrant a new trial here. In light of the wealth of evidence, circumstantial and otherwise, detailed above, there was ample basis for the jury to conclude that Levy acted with the requisite criminal intent. We therefore conclude that the district court erred in granting Levy a new trial.

C. Nordlicht’s Motion for a New Trial

In ruling on Nordlicht’s Rule 33 motion, the district court noted that “[t]he heart of the Government’s case against Nordlicht is that he knew – but concealed from the bondholders – that, under the Affiliate Rule, bonds held by BAM, BBIL, PPCO, and PPLO should be excluded from the consent solicitation.” *Nordlicht*, 2019 WL 4736957, at *16. The district court concluded that it would be a manifest injustice to let the verdict stand because (1) “although Nordlicht knew about the affiliate rule, he and Beechwood went to great lengths to comply with [it]”; (2) there was “insufficient evidence that Nordlicht was on notice of [Beechwood’s] affiliate status”; and (3) there was “insufficient evidence that the affiliate status of PPCO and PPLO was . . . concealed from BakerHostetler” or “that Nordlicht intended to conceal PPCO’s and PPLO’s affiliate status from Shearer.” *Id.* at *16-18.

Applying the “preponderates heavily” standard here, we conclude that letting the verdict stand as to Nordlicht would not result in manifest injustice. The district court’s factual findings in connection with Nordlicht’s Rule 29 motion, as well as the ample record evidence illustrating Nordlicht’s knowledge and intent, undermine the district court’s conclusions in the Rule 33 context and demonstrate that the evidence did not preponderate heavily against the verdict. The district court therefore abused its discretion in granting Nordlicht’s motion for a new trial.

1. Nordlicht Did Not Endeavor to Comply with the Affiliate Rule

The district court concluded, based on a March 2014 email in which Nordlicht stated that he would be “fully compliant with the affiliate rule,” that Nordlicht actually “went to great lengths to comply with the affiliate rule.” *Nordlicht*, 2019 WL 4736957, at *16. In particular, in connection with the private consent solicitation process, Shearer emailed Shulse, explaining that, in calculating consent, bonds owned “by any person directly or indirectly controlling or controlled by or under direct or indirect common control with any such obligor” must be excluded. GA.587. Shulse forwarded this email to Nordlicht, Levy, and others, stating: “We need to be mindful of this provision when assuming we control the bonds or not.” *Id.* Nordlicht responded: “I see u accidentally forgot to include Marizza and label this attorney client privilege. I have corrected But when we say we have friendly holders we will be fully compliant with this provision.” *Id.* While Nordlicht’s email could be subject to

innocuous interpretations, the jury was entitled to conclude that it was, in fact, a self-serving exculpatory statement that was intended to conceal, rather than reveal, his intentions. Nordlicht did not identify his “friendly holders” or explain why they were not considered “affiliates”; he did not ask any questions or seek further advice regarding the application of the Affiliate Rule; and he reprimanded Shulse for failing to label the email “attorney client privilege” and then changed the subject heading to “Atty client privilege” in what a rational jury could have concluded was an effort to shield this email from discovery. Indeed, as the district court noted in denying Nordlicht’s Rule 29 motion, the jury could have reasonably concluded that under the circumstances, Nordlicht’s email “indicated a desire to create a favorable paper trail, rather than a good faith desire to comply with the affiliate rule.” *Nordlicht*, 2019 WL 4736957, at *9; *id.* at *16 (acknowledging that Nordlicht may have been “dissembling” to create a “favorable paper trail”). It was not, we think, the province of the district court to grant a new trial “simply because it believes other inferences and conclusions are more reasonable.” *Van Steenburgh v. Rival Co.*, 171 F.3d 1155, 1160 (8th Cir. 1999); *see also Archer*, 977 F.3d at 188.

Moreover, the trial evidence as a whole undercuts any notion that Nordlicht was acting in good faith to comply with the Affiliate Rule. For example, after the private consent solicitation process was terminated based on concerns about the manner in which the consents had been obtained, Nordlicht expressed disdain for the rules and urged Shulse, Small, and Levy to cut out the lawyers and circumvent the

bondholders. Nordlicht wrote: “No more talking to lawyers. . . . We will have one pager signed by 51% of bondholders, no trustee necessary. It’s fine. We don’t need any process. Bondholders are being taken out, this is all moot.” GA.625. Similarly, once the amendments to the Indenture passed, Nordlicht was apprised that distribution of the proceeds from the Renaissance Sale might violate Texas law. Instead of seeking further guidance from Black Elk’s lawyers, Nordlicht immediately emailed Levy, directing him to “get th[o]se wires out!!!!” GA.781. This email evidence, viewed collectively, supports an inference that Nordlicht intended to secure the passage of the amendments to the Indenture, regardless of whether he violated any laws or harmed the bondholders in the process.

In addition, Nordlicht had a habit of labeling sensitive emails relating to Black Elk’s impending bankruptcy “attorney client privilege” even when they did not involve advice of counsel. Specifically, on May 20, 2013, Shulse emailed Nordlicht, Small, and Levy about Black Elk’s precarious financial situation and the need to generate liquidity through asset sales. Nordlicht responded, with a copy to Pichè, Black Elk’s in-house counsel, calling Shulse “hysterical” and reprimanding him for failing to label his email “atty client privilege.” GA.614. Nordlicht also changed the subject heading of the email to “atty client privilege.” *Id.* As Shulse noted, it is not clear why “a business issue such as cash flow would need to be covered by attorney client privilege.” *Id.* This email exchange further supports the inference that Nordlicht likely

knew he was engaged in wrongful conduct and was seeking to cover his tracks.

Taken together, these emails can reasonably be interpreted to demonstrate that Nordlicht did not intend to comply with the Affiliate Rule (or, for that matter, any other legal restriction preventing the distribution of the proceeds from the Renaissance Sale to the preferred equity holders). And viewed in context, there was ample support for a jury to conclude that Nordlicht's March 2014 email was simply a part of a cover-up to conceal the fraud perpetrated against the bondholders.

2. Sufficient Evidence Supports the Conclusion that Beechwood Was an Affiliate and that Nordlicht Was on Notice of its Affiliate Status

The district court also concluded that it would be a manifest injustice to let the verdict stand, because – even assuming that the Beechwood entities (BBIL and BAM) were considered Platinum entities and therefore Black Elk affiliates under the Affiliate Rule – there was insufficient evidence that Nordlicht was on notice of the Beechwood entities' affiliate status. *Nordlicht*, 2019 WL 4736957, at *17. Nordlicht contends that the district court did not abuse its discretion in granting his motion for a new trial because (1) the record does not support the conclusion that Beechwood was an affiliate; and (2) the district court correctly concluded that Nordlicht did not believe Beechwood was an affiliate. We disagree.

App. 72

Under the terms of the Indenture, in determining whether there is consent to any proposed amendment, bonds held “by the Permitted Holders, the Issuers or any Guarantor, or by any Person directly or indirectly controlling or controlled by or under direct or indirect common control with the Permitted Holders, the Issuers or any Guarantor, will be considered as though not outstanding.” GA.888. In other words, Black Elk – as the issuer – as well as entities that controlled, or were under common control with, Black Elk, were not entitled to have their votes counted in determining whether a majority of bonds consented to any proposed amendment. The Indenture defined the terms “affiliate” and “control” as follows:

“Affiliate” of any specified Person means any other Person directly or indirectly controlling or controlled by or under direct or indirect common control with such specified Person. For purposes of this definition, “control,” as used with respect to any Person, means the possession, directly or indirectly, of the power to direct or cause the direction of the management or policies of such Person, whether through the ownership of voting securities, by agreement or otherwise; provided that beneficial ownership of 10% or more of the Voting Stock of a Person will be deemed to be control. For purposes of this definition, the terms “controlling,” “controlled by” and “under common control with” have correlative meanings.

GA.861 (emphasis in original). These definitions of affiliate and control mirror those found in the TIA. *See*

17 C.F.R. § 260.0-2(b) (“The term ‘affiliate’ means a person controlling, controlled by, or under common control with, another person.”); *id.* § 260.0-2(f) (“The term ‘control’ means the power to direct the management and policies of a person, directly or through one or more intermediaries, whether through the ownership of voting securities, by contract, or otherwise.”).

It is undisputed that Platinum, through PPVA, controlled Black Elk, because PPVA owned 85% of the common equity of Black Elk. Accordingly, as the parties note, the relevant question is whether Beechwood was also under the common control of Platinum, such that it constituted an affiliate of Black Elk. Whether Beechwood was under Platinum’s control, in turn, depends on whether Platinum could in effect direct Beechwood’s management and policies.

Here, as the district court found in denying Nordlicht’s Rule 29 motion, there was sufficient evidence to support the jury’s conclusion that Beechwood was under the common control of Platinum and therefore was a Black Elk affiliate. *See Nordlicht*, 2019 WL 4736957, at *11. The government presented evidence that Nordlicht founded Beechwood with the same partners with whom he founded Platinum (Huberfeld and Bodner), as well as two additional investors – Mark Feuer and Scott Taylor. Upon the creation of Beechwood, Nordlicht filled several critical positions at Beechwood with Platinum employees. Levy (who had served as a portfolio manager at Platinum and had been heavily involved in managing Platinum’s investments in Black Elk) joined Beechwood as its CIO

and worked at Beechwood while continuing his work related to Black Elk at Platinum. Naftali Manela (who had served as Chief Financial Officer of PPCO from 2008 through 2014, and Chief Operating Officer of Platinum from late 2014 through 2015) was asked in early 2014 to assist in “set[ting] up [Beechwood’s] reporting,” determining how much money could be invested by Beechwood into Platinum, and assessing how those investments in Platinum could be made. GA.198-201. Will Slota – another Platinum employee – also worked at Beechwood, and Huberfeld acted as an advisor to Beechwood. And Beechwood investment manager Wallach, whom Nordlicht had assisted in obtaining a position at Beechwood, followed Nordlicht’s instructions regarding the tracking and purchase of Black Elk bonds.⁵ Nordlicht also occasionally worked out of Beechwood’s offices to take phone calls and participate in meetings.

⁵ Nordlicht relies on Wallach’s testimony for the proposition that Nordlicht merely held an advisory role at Beechwood and did not have the authority to direct Wallach to buy a particular position. But Wallach’s statements on cross-examination were inconsistent with his direct testimony and contemporaneous email communications with Nordlicht, which demonstrate that, on multiple occasions, Nordlicht directed Wallach to purchase Black Elk bonds from the Platinum funds, and that Wallach deferred to Nordlicht regarding how to vote Beechwood’s Black Elk bonds. Wallach also testified that he frequently communicated with Nordlicht about his work at Beechwood, and that Nordlicht told Wallach how much money Wallach and his partner could invest on behalf of BAM. In light of the documentary evidence and testimony suggesting that Nordlicht exercised significant control over Wallach and Beechwood, the jury was entitled to weigh Wallach’s testimony and discount Wallach’s statements that contradicted the documentary and other evidence presented at trial.

Moreover, pursuant to an email from Huberfeld outlining Beechwood's corporate terms, the "Nordlicht group" was responsible for "run[ning] the investment allocation side" of Beechwood, while the "Feuer group w[ould] run the insurance end." GA.582. Similarly, Manela testified that Feuer and Taylor were running the "insurance side" of the business, while Levy was "running the investment side [of the business]" and making the decisions regarding the "private equity type investments." Supp. GA.04-06. After Beechwood was founded, Nordlicht and Levy directed Beechwood's investments into portfolio companies and securities in which Platinum had already invested, and transferred certain investments from Platinum to Beechwood to benefit Platinum. And Nordlicht had sufficient control over Beechwood to be able to direct the trading of over \$37 million in Black Elk bonds from the Platinum funds to Beechwood over a three-month period prior to the public consent solicitation process.

Nordlicht himself acknowledged that Platinum exercised control over Beechwood. In a May 22, 2014 email chain, Nordlicht wrote to Peter Muehlsiegl – a potential business partner – regarding investment opportunities: "Get me good risk adjusted opportunity!! I feel like I sh[oul]d do some more due diligence on co before I answer rate. . . . On this one I w[oul]d do whole piece *by splitting up between our fund [PPVA] and our reinsurance mandate [(Beechwood)] so it's [P]latinum or designees.*" GA.620 (emphasis added). After Muehlsiegl notified Nordlicht of a potential investment, Nordlicht wrote to him: "Do you mind if I have my pm [(portfolio manager)] who handles specifics on these kind of trades, Bernie Hutman call u? Obviously it's

large amount, don't want to miss anything. *The issue is besides Platinum we have reinsurance mandate and I'd like to split it among entities, though all controlled by us.*" GA.618 (emphasis added). Later in the email chain, Nordlicht wrote to Hutman: "If it helps we sh[oul]d be b asset manager [(BAM)] as opposed to [P]latinum on these things." GA.617. Nordlicht's email correspondence confirms that Platinum exercised significant control over Beechwood's investment decisions. Viewed collectively with the other record evidence, there appears to have been ample evidence from which the jury could conclude that Platinum had "the power to direct or cause the direction of the management or policies of" Beechwood and that therefore Beechwood and Black Elk were under the common control of Platinum. Accordingly, the evidence does not preponderate heavily against a finding that Beechwood was an affiliate.⁶

⁶ The civil cases cited by Nordlicht do not compel a different result. Unlike in *Waldman ex rel. Elliott Waldman Pension Tr. v. Riedinger*, 423 F.3d 145, 151-52 (2d Cir. 2005), where there was no evidence that Riedinger actually exercised control over any of the relevant entities and his actions were subject to veto, there is no evidence that Nordlicht's decisions were subject to veto by anyone, either pursuant to Beechwood's corporate terms or in practice, and there is significant evidence in the record supporting the conclusion that Platinum had the power to cause the direction of Beechwood's management and policies. Similarly, in contrast to *Rothstein v. AIG*, 837 F.3d 195, 207-09 (2d Cir. 2016), where we found that AIG lacked control over several employee benefit plans because the Employee Retirement Income Security Act of 1974 ("ERISA") imposed stringent limitations on AIG's authority to manage the plans, here there was no complicated regulatory scheme that restricted Platinum's ability to control Beechwood. In *Grail Semiconductor, Inc. v. Stern*, No. 2:13-cv-03687-SJO-AGR,

In addition, based on all the foregoing evidence, there was sufficient evidence for the jury to conclude that Nordlicht knew Beechwood was an affiliate of Black Elk. Indeed, as the district court noted in connection with Nordlicht’s Rule 29 motion, there was ample evidence “to suggest that Nordlicht knew about the affiliate rule” and did not have a “good faith desire to comply with” it. *Nordlicht*, 2019 WL 4736957, at *9. As reflected in the May 2014 email chain, Nordlicht recognized that Platinum exercised control over Beechwood and that Beechwood’s relationship to Platinum could potentially implicate the Affiliate Rule. Nordlicht could have disclosed Beechwood’s relationship with Platinum to Shearer and sought legal advice. But instead, “Nordlicht and his colleagues played their cards close to their vests by providing limited and potentially contradictory information to Shearer about PPCO and PPLO while concealing the extent of Beechwood’s ties to Platinum.” *Id.* at *10. The district court discounted the May 2014 email exchange,

2014 WL 12647935, at *4-5 (C.D. Cal. Feb. 27, 2014), the court merely denied a motion for summary judgment because it concluded that there were material disputes of fact as to the defendant’s affiliate status for purposes of section 4(1) of the Securities Act; the court there made no determination as to what was necessary to qualify for affiliate status. Moreover, *Grail* did not involve a company, like Platinum, whose executives (here, Nordlicht and Levy) ran a core part of the alleged affiliate company’s business, controlled the alleged affiliate company’s investment decisions, and controlled the way in which the alleged affiliate company voted in connection with its investments. And lastly, *Emerson v. Mut. Fund Series Tr.*, 393 F. Supp. 3d 220 (E.D.N.Y. 2019), did not discuss in what circumstances an entity may qualify as an “affiliate” and therefore has no relevance here.

concluding that “[t]here is no reason to believe Nordlicht meant ‘controlled’ in the technical sense of ‘control’ under the TIA or the bond indenture,” and noted that there “would have been nothing unlawful about Nordlicht simply attempting to persuade individuals at Beechwood to vote in a certain manner” just like any stakeholder in the consent solicitation. *Id.* at *17. But it was reasonable for the jury to conclude that, in light of Nordlicht’s express statements recognizing that Platinum controlled Beechwood, Nordlicht understood that Beechwood likely qualified as an affiliate. While the language in the May 2014 email “could be subject to both legitimate and nefarious interpretations, the jury did not misinterpret[] the email[] in concluding the latter.” *Archer*, 977 F.3d at 191 (first alteration in original) (internal quotation marks omitted).

This conclusion is buttressed by the wealth of other circumstantial evidence supporting an inference that Nordlicht knew Beechwood was an affiliate and intended to use Beechwood to defraud the Black Elk bondholders. As discussed above, Nordlicht was notified of the Affiliate Rule on several occasions. Nordlicht expressed disdain for amending the indenture through any formal process and directed his co-conspirators not to talk to the lawyers working on the transaction. Nordlicht went out of his way to label communications with his alleged co-conspirators regarding the Affiliate Rule, Black Elk, and the Renaissance Sale “attorney client privilege” in what the jury could have reasonably concluded was an effort to cover his tracks. As one of the founders of both Platinum and Beechwood, Nordlicht actively monitored

the number of Black Elk bonds collectively and individually held by the Platinum and Beechwood entities, and exercised control over Beechwood's investments, including in Black Elk. And Nordlicht decided to inform Shearer of the affiliate status of the two other Platinum entities – PPCO and PPLO – only after confirming that the amendments would pass with just Beechwood's votes. The trial evidence, taken together, does not preponderate heavily against the conclusion that Nordlicht knew Beechwood was an affiliate and acted with criminal intent in concealing this information from the bondholders.

3. Nordlicht Concealed Platinum's Ownership of Black Elk Bonds

The district court further concluded that it would be a manifest injustice to sustain Nordlicht's conviction because it found that there was insufficient evidence for the jury to conclude that Platinum intended to conceal PPCO and PPLO's affiliate status from Shearer. *Nordlicht*, 2019 WL 4736957, at *17. In reaching this conclusion, the district court noted that (1) in or around May 2014, when Black Elk submitted its consents in connection with the private consent solicitation process, Shearer was made aware that PPCO, PPLO, and PPVA collectively owned about \$100 million of the Black Elk bonds; (2) a BakerHostetler memorandum, dated July 1, 2014, indicated that approximately \$90 million of Black Elk bonds were owned by companies that were "friendly" to Platinum; and (3) Small informed Shearer on August 14, 2014 about PPLO's and PPCO's bonds. *Id.* We have,

however, several problems with the district court's analysis.

First, even if the district court were correct that the evidence demonstrates that Nordlicht never intended to conceal PPCO and PPLO's affiliate status from Shearer (which we conclude it is not), there is, as we have discussed, substantial circumstantial evidence from which a jury could conclude that Nordlicht understood that Beechwood was an affiliate and intended to conceal its affiliate status from the bondholders in order to ensure that the proceeds from the Renaissance Sale would go to the preferred equity holders. Because Beechwood's Black Elk bonds were independently sufficient to fraudulently secure the passage of the amendments to the Indenture, any disclosures made by Nordlicht regarding the PPCO- and PPLO-held Black Elk bonds do not undermine the jury's verdict or lead us to conclude that the evidence preponderates heavily against the verdict.

Moreover, the purported disclosures upon which the district court relied do not preponderate heavily against the conclusion that Nordlicht acted with criminal intent. The May 2014 disclosure related solely to the private consent solicitation process and occurred three months prior to the public consent solicitation process. This alleged disclosure was not made by Nordlicht in the course of a discussion with Shearer about the Affiliate Rule. Instead, it simply consisted of an email sent to Shearer and Shulse – from outside counsel, not Nordlicht – towards the end of the private consent solicitation process for the purpose of demonstrating that the consents Black Elk had

received “constitute[d] a majority of the outstanding [n]otes.” SA.1402-08. To that end, the email disclosed the number of bonds held by PPVA, PPCO, and PPLO at that time and indicated that those bondholders had consented to the proposed amendments. *See id.* There is no evidence of which we are aware that after being notified of the Affiliate Rule in March 2014, Nordlicht disclosed the PPCO- or PPLO-held bonds as having a relationship with Platinum and Black Elk that could render them affiliates. Nor is there any evidence that Nordlicht solicited guidance from Shearer regarding PPCO or PPLO’s affiliate status. The email also disclosed the Platinum entities’ bond holdings as of May 2014, and Platinum transferred many of these bonds to Beechwood after this date. The May 2014 disclosure therefore did not accurately reflect the number of PPCO- and PPLO-held bonds prior to the public consent solicitation process.

In addition, in connection with the later public consent solicitation process, Shearer asked Small on several occasions to verify Platinum’s and its affiliates’ ownership of Black Elk bonds, and – after consulting with Nordlicht and Levy – Small repeatedly told Shearer that only PPVA’s \$18.3 million bonds should be disclosed and excluded from the calculation. Nordlicht was aware of how many Black Elk bonds PPCO and PPLO owned, and Small’s email disclosure of the PPCO- and PPLO-owned bonds to Shearer only after the Consent Solicitation had passed – when they knew they had enough votes to secure the passage of the amendments based on the Beechwood-held bonds – supports an inference that Nordlicht understood that PPCO and PPLO would likely be deemed affiliates and

chose not to disclose them. This inference is further corroborated by the email evidence that Nordlicht discouraged involving the lawyers and expressed a desire to circumvent the bondholders.

The BakerHostetler memo upon which the district court relied also does not render the verdict a manifest injustice. The memo was not admitted into evidence and is therefore not a part of the record; the district court excluded it as hearsay. On cross-examination, Shearer testified that after the public consent solicitation process terminated, he later learned of an internal BakerHostetler memo (dated July 1, 2014) that disclosed that Platinum, along with companies friendly to it, owned \$90 million of Black Elk bonds. That information, however, was not disclosed to Shearer at the time of the public consent solicitation process. Moreover, there is no evidence in the record that Nordlicht provided the information that formed the basis for this memo, that this memo was completed at Nordlicht's request, or that the memo opined on the affiliate status of any of the Platinum-related entities. Nor is there any evidence that Nordlicht received or relied on any such memo in formulating his views about the Affiliate Rule. It is unclear how a memo unrelated to Nordlicht, undisclosed (at the time) to Shearer and sent to lawyers who were not working on the public consent solicitation process negates Nordlicht's intent to conceal the PPCO- and PPLO-owned bonds, particularly where, as here, Nordlicht affirmatively concealed information related to PPCO, PPLO, and Beechwood in response to Shearer's inquiries related to the Affiliate Rule. While we agree with the district court that "BakerHostetler attorneys

could have communicated better internally . . . and externally” and that Shearer could have been more proactive in “spot[ting] and explor[ing] a significant legal issue,” *Nordlicht*, 2019 WL 4736957, at *18, we do not agree, in light of the record evidence as a whole, that Shearer’s perhaps less-than-exemplary legal work in this instance preponderates heavily against a finding that Nordlicht harbored criminal intent.

We find the district court’s reliance on Small’s August 14, 2014 email to Shearer disclosing the PPLO- and PPCO-owned bonds also to be misplaced. At this point, the public consent solicitation process had closed and Nordlicht and Levy had successfully obtained the votes necessary to secure the passage of the amendments to the Indenture notwithstanding the PPCO- and PPLO-owned bonds. Moreover, Small’s email gave no indication that Platinum also controlled the bonds held by Beechwood. The jury was entitled to infer that Small’s email – sent after the transaction closed and Platinum had secured a sufficient number of votes to ensure the amendments’ passage – was simply an effort to cover their tracks, rather than an act in good faith. Viewing the evidence as a whole, a reasonable jury could have concluded, we think, that Nordlicht acted with the intent to conceal the PPCO- and PPLO-owned bonds from Shearer. “[T]he mere fact that competing inferences existed does not compel a finding that the evidence preponderated heavily against the verdict.” *Archer*, 977 F.3d at 195.

*4. Nordlicht's Alternative Grounds for
Affirming the District Court's Decision
Are Unpersuasive*

On appeal, Nordlicht raises several additional bases for affirming the district court's decision. First, Nordlicht argues that a new trial is warranted because the government asked the jury to convict on a theory of "affiliate" that has no basis in law. Second, Nordlicht contends that the record does not support the inference that the \$18.3 million bond disclosure in the Consent Solicitation was material. Lastly, Nordlicht argues that the evidence weighed overwhelmingly against the conclusion that he had criminal intent. For all the reasons set forth above, the evidence does not preponderate against the conclusion that Nordlicht had criminal intent. We therefore turn to Nordlicht's first two arguments, which we also conclude lack merit.⁷

*a) The Government Did Not
Improperly Argue the Affiliate Rule*

Nordlicht argues that letting the verdict stand would result in manifest injustice because "the government openly encouraged the jury to apply a

⁷ The government argues that we should not reach Nordlicht's alternative grounds for affirmance because an appellate court may not affirm "the grant of a new trial under Rule 33 on a basis other than that identified by the district court." But as the government itself acknowledges, we have long held that "we may affirm on any basis for which there is sufficient support in the record, including grounds not relied on by the [d]istrict [c]ourt." *Havlish v. 650 Fifth Ave. Co.*, 934 F.3d 174, 183 n.10 (2d Cir. 2019) (quoting *Ferran v. Town of Nassau*, 471 F.3d 363, 365 (2d Cir. 2006)). We therefore reject the government's argument.

version of the affiliate rule that was entirely unmoored from the applicable legal definition.” Nordlicht Br. at 51. Nordlicht points out that the government argued and elicited testimony from Shearer and Dixon Yee, a Black Elk bondholder, that the purpose of the Indenture’s Affiliate Rule was to ensure that “affiliated” bondholders who were not looking out for the best interests of the bondholders could not vote in the consent solicitation process. *Id.* Nordlicht also faults the government for urging the jury – during its closing argument – to use common sense in evaluating the evidence of control. We find Nordlicht’s arguments to be unpersuasive.

As the district court noted in rejecting Nordlicht’s challenges to the government’s summation in connection with his Rule 29 motion, in addition to urging the jury to use their “common sense,” the government “also informed jurors that they ‘will have the definition of affiliate’ and ‘should ask for it, it is in the indenture, but it is the power to control.’” *Nordlicht*, 2019 WL 4736957, at *12; *see also* GA.568. The government further told the jury that “control” was “defined in the indenture, Government’s Exhibit 9507, page seven.” GA.525. As the district court explained: “There is nothing improper about the Government directing the jury to use the proper standard but also reminding the jury not to leave its common sense at the door.” *Nordlicht*, 2019 WL 4736957, at *12.

Nor was the government’s argument or witness testimony regarding the purpose of the Affiliate Rule and the TIA so prejudicial that it would be a manifest injustice to let the verdict stand. The government’s

evidence concerning the Affiliate Rule was based on the text of the Indenture, the Consent Solicitation, and the TIA. Shearer testified that the TIA seeks

to make sure the bondholders who are voting[] are looking out for the best interest of the bondholders, not looking out for the best interest of Black Elk. So if Black Elk held bonds, you wouldn't count those bonds in a vote. In other words, Black Elk couldn't vote its own bonds to amend the indenture to help itself and, by the same token, entities that controlled Black Elk and held bonds, you couldn't vote those bonds either. . . . [A]nybody that was under a common control with Black Elk, would be picked up by th[e Affiliate] [R]ule.

GA.432–33. Yee testified that “affiliated” or “interested” bondholders were not permitted to vote in the consent solicitation process. SA.119–20. Similarly, the government argued in summation that “the whole point” of the Affiliate Rule is that a person who is “an insider who’s voting for their own separate interests and not the bondholders’ interest” cannot be counted. GA.525. There was nothing improper about this line of testimony or argument. It merely conveyed the obvious fact that, under the Black Elk Indenture, affiliated bondholders who are looking out for the interests of Black Elk, instead of the larger interests of the Black Elk bondholders, are not permitted to vote on something that alters the rights of all the bondholders.

b) The Defendants' Fraudulent Disclosures and Omissions Were Material

Nordlicht also argues that the government failed to prove that the misrepresentation in the Consent Solicitation that PPVA and its affiliates held \$18.3 million Black Elk bonds was material, because the evidence does not establish that a reasonable investor would find it important in making an investment decision. We disagree.

Whether a given omission or misrepresentation is material “is a mixed question of law and fact that the Supreme Court has identified as especially ‘well suited for jury determination.’” *United States v. Litvak*, 808 F.3d 160, 175 (2d Cir. 2015) (quoting *TSC Indus., Inc. v. Northway, Inc.*, 426 U.S. 438, 450 (1976)). To fulfill the materiality requirement, the defendant must show “a substantial likelihood that the disclosure of the omitted fact would have been viewed by the reasonable investor as having significantly altered the total mix of information made available.” *Basic Inc. v. Levinson*, 485 U.S. 224, 231-32 (1988) (internal quotation marks omitted); *see also Litvak*, 808 F.3d at 175 (finding that a misrepresentation is material “where there is a substantial likelihood that a reasonable investor would find the . . . misrepresentation important in making an investment decision.” (ellipsis in original) (internal quotation marks omitted)).

Here, there was ample evidence to support the conclusion that the defendants’ misrepresentation in the Consent Solicitation Statement was material. The Consent Solicitation Statement provided that the

proposed amendments would pass only if a majority of the outstanding bonds, excluding any bonds affiliated with Black Elk, voted in favor of the amendments. Yet the defendants and their co-conspirators disclosed only the \$18.3 million bonds owned by PPVA and otherwise indicated that “neither we, nor any person directly or indirectly controlled by or under direct or indirect common control with us, nor, to our knowledge, any person directly or indirectly controlling us, held any Notes.” GA.819. By misrepresenting the number of bonds held by affiliates under common control with Black Elk, the defendants misled the bondholders into thinking that the outcome of the public consent solicitation process would be a product of a legitimate vote when, in fact, it was predetermined based on the votes of the PPCO-, PPLO-, and Beechwood-held bonds, over which Platinum exercised control.

The number of affiliated bonds was “material to [the] bondholders because it altered the calculus of consent.” *Nordlicht*, 2019 WL 4736957, at *12. As the district court explained in rejecting Nordlicht’s argument in connection with his Rule 29 motion:

The bondholders knew the total number of bonds involved in the vote – \$150 million. If no bonds were held by Platinum affiliates, then the consent solicitation would only pass if the bondholders representing over \$75 million in bonds voted in favor of it.

But the more bonds held by Platinum affiliates, the lower the threshold for the consent solicitation to pass since fewer bondholders have to vote in favor of the amendment for it to pass.

If the bondholders who opposed the amendment but thought it would fail had known that PPCO, PPLO, BAM, or BBIL – in addition to PPVA – were Platinum affiliates, they would have inferred that the amendment would be more likely to pass. The probability that the amendment would pass mattered to Black Elk bondholders because of the stakes of the amendment: the bondholders gave up their rights to get paid before the preferred equity holders from the Renaissance [S]ale. If the bondholders who opposed the amendment knew the amendment was more likely to pass, they would then be more likely to tender their bonds in the consent solicitation if they decided it would not be worth investing in Black Elk in light of the amended indenture.

Id.

This conclusion is buttressed by testimony from victim bondholders who explained at trial that accurate information regarding the number of bonds controlled by Platinum would have been important to them in deciding whether to tender their bonds. Yee, for example, testified that he would have found that information to be important. Pulvino, another Black Elk bondholder, similarly testified that the number of affiliated bondholders “had a lot of significance . . . because [he] w[as] trying to figure out the probability that the consents would pass” and that probability increased based on the number of affiliated bonds that were excluded from the vote. GA.487-88. Pulvino reasoned that if only \$18.3 million bonds were affiliates

“that meant there were 132 million [bonds] left outstanding, 150 million minus the 18,” and therefore, in order to get a majority vote, Black Elk would need “66 million bonds to vote in favor” of the amendments. *Id.* Based on this calculus, Pulvino concluded that “that was too many bonds to convince to remove the restricted covenants on the bonds” and he therefore thought that the likelihood of the amendments’ passage was slim. GA.488-89. If, instead, he had known that a much larger number of bonds were affiliates and would therefore be excluded from the vote, the probability of the amendments’ passage would have increased and he “would have thought more about tendering [his] notes” because he “wouldn’t have wanted to hold th[o]se notes without the protective covenants that were in place.” GA.501-02.

The trial evidence as to materiality leads us to conclude that the evidence does not preponderate heavily against the verdict.

CONCLUSION

We have considered the parties’ remaining arguments on appeal and conclude that they are without merit. For the reasons explained above, we VACATE the district court’s order and judgment and REMAND for further proceedings consistent with this opinion.

APPENDIX B

**UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF NEW YORK**

16-cr-00640 (BMC)

[Filed: September 27, 2019]

UNITED STATES OF AMERICA,)
)
- against -)
)
MARK NORDLICHT and)
DAVID LEVY,)
)
Defendants.)

MEMORANDUM DECISION AND ORDER

COGAN, District Judge.

Defendants Mark Nordlicht and David Levy were both convicted of securities fraud, conspiracy to commit securities fraud, and conspiracy to commit wire fraud. They have both moved for a judgment of acquittal, or in the alternative, for a new trial. They have also both moved for the Court to direct the Government to provide them with grand jury minutes. For the reasons stated below, Nordlicht's motion for acquittal is denied but his motion for a new trial is granted; Levy's motion for acquittal is granted and his motion for a new trial is granted in the alternative; and Nordlicht's and

Levy's motion to inspect the grand jury minutes is denied as moot.

BACKGROUND

The indictment in this case charged Mark Nordlicht, David Levy, and Joseph SanFilippo, among others, with participation in two alleged schemes: the "Investment Fraud Scheme" and the "Black Elk Scheme." Nordlicht, Levy, and SanFilippo were tried separately from their co-defendants. From *voir dire* to verdict, the trial lasted almost three months and included witness testimony and other evidence relating to both schemes. Nordlicht and Levy were only convicted of the counts relating to the Black Elk Scheme. Below is a summary of aspects of the indictment and trial related to the Black Elk Scheme.

I. The Indictment

On December 14, 2016, seven individuals were indicted for their alleged participation in the Fraudulent Investment and Black Elk Schemes. Both schemes related to Platinum Partners ("Platinum"), a New York-based hedge fund that was founded in 2003.

Platinum managed multiple funds, including Platinum Partners Value Arbitrage Fund, L.P. ("PPVA"), Platinum Partners Credit Opportunities Master Fund, L.P. ("PPCO"), and Platinum Partners Liquid Opportunity Master Fund L.P. ("PPLO"). The Black Elk Scheme also involved Black Elk – an oil and gas company that Platinum controlled from August 2010 through September 2015 – and Beechwood, a group of entities that was established in 2013. Beechwood included: Beechwood Re, Ltd.; Beechwood

Bermuda International Ltd. (“BBIL”); Beechwood Bermuda Investment Holdings; and B Asset Manager L.P. (“BAM”).

The indictment charged the following individuals:

- Mark Nordlicht, one of Platinum’s founding partners and its Chief Investment Officer (“CIO”). Nordlicht also became a stakeholder in Beechwood in 2013.
- David Levy, a senior executive at Platinum who: served as Platinum’s co-portfolio manager for Black Elk from 2011 to 2014; became a minority partner in Beechwood in 2013; served as BAM’s Chief Investment Officer in 2014; and became co-CIO of Platinum in 2014.
- Uri Landesman, the Managing Partner and President of PPVA.
- Joseph SanFilippo, PPVA’s Chief Financial Officer (“CFO”) from 2005 through 2016.
- Joseph Mann, who worked in Platinum’s marketing department from 2013 until 2016.
- Daniel Small, who was a managing director at Platinum and a co-portfolio manager for Black Elk.
- And Jeffrey Shulse, who was Black Elk’s Chief Financial Officer from January 2014 through September 2014 and Black Elk’s Chief Executive Officer from September 2014 until April 2015.

In the portion dedicated to the Black Elk Scheme, the indictment alleges that, between November 2011 and December 2016, Nordlicht and Levy, among others, engaged in a scheme to defraud holders of Black Elk bonds and deprive them of the proceeds of the sale of a significant portion of Black Elk's most lucrative assets. Beginning in July 2009, PPVA entered into various agreements and transactions with Black Elk that led to Platinum's ownership of a majority of Black Elk's common equity and control of Black Elk's operations.

In November 2010, Black Elk raised \$150 million by issuing bonds. In the first quarter of 2013, Platinum invested \$50 million into Black Elk in exchange for the vast majority of its Series E preferred stock. According to the indictment, by late 2013, defendants realized that Black Elk was effectively insolvent but still possessed valuable assets. Defendants allegedly then pursued opportunities to sell Black Elk's assets while diverting the funds of any asset sale to the preferred equity holders, including Platinum, rather than the bondholders – although under Black Elk's indenture agreement, the bondholders would be paid ahead of the equity holders in the event of a significant asset sale.

In March 19, 2014, Platinum and related parties purchased \$19 million of Black Elk bonds. By April 2014, \$98,730,500 of Black Elk bonds was controlled by Platinum and Beechwood entities. Around March and April 2014, Platinum and related parties also purchased additional preferred equity to obtain almost 100% of the preferred equity.

By May 2014, defendants transferred some Black Elk bonds owned by PPVA to Beechwood. On July 26,

App. 95

2014, Black Elk announced that it commenced a public offer for the Black Elk bonds. The consent solicitation provided, among other things, that:

- Black Elk had commenced a cash tender offer to purchase outstanding Black Elk bonds at par value;
- Black Elk was soliciting the consent of the bondholders to modify certain restrictive covenants contained in the indenture agreement governing the Black Elk bonds;
- The bondholders who tendered their Black Elk bonds would be considered to have consented to amending the indenture agreement;
- Bondholders could also consent to the proposed amendments without tendering their bonds;
- The consent solicitation was being made in connection with a sale of Black Elk assets and Black Elk would use the net proceeds of the sale to purchase the tendered Black Elk bonds;
- The offer expires at 5:00 PM New York time on August 13, 2014;
- Under Section 316(a) of the Trust Indenture Act of 1939 (the “TIA”), any Black Elk bonds “owned by the Company or any person directly or indirectly controlling by or under direct or indirect common control with the Company shall be disregarded for the purposes of determining the majority” (the “affiliate rule”); and
- PPVA “and its affiliates, which own approximately 85% of our outstanding voting membership

interests, own[ed] approximately \$18,321,000 principal amount of the outstanding” Black Elk bonds. “Otherwise, neither we, nor any person directly or indirectly controlled by or under direct or indirect common control with us, nor, to our knowledge, any person directly or indirectly controlling us, held any” Black Elk bonds.

Defendants, together with others, caused PPCO, PPLO, BAM, and BBIL to consent to the proposed amendments to the indenture agreement but not tender their Black Elk bonds. When the offer expired on August 13, 2014, bondholders holding \$11,333,000 of Black Elk bonds had tendered and were paid. In total, the holders of \$110,565,000 in Black Elk bonds (about 73.71% of the bonds) had consented to the consent solicitation.

Thus, the indenture agreement was amended to allow the preferred equity holders to get paid from the proceeds of Black Elk’s sale of its assets. On August 11, 2015, Black Elk’s creditors filed a petition to place the company into an involuntary Chapter 7 bankruptcy, which was converted on September 1, 2015 to a voluntary Chapter 11 bankruptcy. As of December 2016 (the month of the indictment), a number of bondholders who did not tender their bonds had not received the principal amount of their holdings.

The indictment included eight separate counts. Counts one to five of the indictment related to the Investment Fraud Scheme and counts six to eight related to the Black Elk Scheme. Specifically, count six charged Nordlicht and Levy, among others, with conspiracy to commit securities fraud; count seven

charged Nordlicht and Levy, among others, with conspiracy to commit wire fraud; and count eight charged Nordlicht and Levy, among others, with securities fraud.

II. The Government's Opening

When describing the Black Elk Scheme, the Government indicated that “to get the money from the asset sale, Platinum had to leapfrog the bondholders in line.” Thus, according to the Government, “Nordlicht and Levy hatched a plan to get the money from the asset sale ... [b]y lying to the bondholders.” The Government claimed that the evidence would show that, under this plan, defendants rigged the Black Elk bond consent solicitation. Specifically, the Government alleged:

The defendants wanted to leave no doubt that they would win the vote and get the money. So what did they do? They rigged the vote behind the scenes by hiding over half of the voting bonds in companies they secretly controlled. By doing that, they made it look like they weren't participating in the vote, like the rules were being followed. They then promised unsuspecting bondholders that Platinum would not participate in the vote and that the vote would be fair, but when the vote took place, it was a complete sham. The result was guaranteed from the start. This is because the defendants actually voted all of those bonds that they hid away in companies they secretly controlled, bonds that alone made up more than

half of the total number of bonds and guaranteed the vote would pass.

As a result of the defendants' fraud, the vote passed and Platinum, including PPVA, got millions and millions of dollars from the sale of Black Elk's best assets, money the defendants stole.

III. Testimony of Daniel Mandelbaum

Mandelbaum was a Chief Financial Officer at Platinum. Mandelbaum testified that Levy informed him that there was insufficient cash to pay Black Elk invoices, and Mandelbaum asked Levy if Black Elk would go bankrupt. Levy indicated that they would wait a year before declaring bankruptcy because in June or July of 2014, Platinum had obtained \$100 million from Black Elk. Levy explained that if they did not wait a year before declaring bankruptcy, then the \$100 million could be clawed back.

IV. Testimony of Naftali Manela

Manela was an employee of both Platinum and Beechwood. When Manela was at Platinum, Nordlicht asked Manela to also work at Beechwood, a reinsurance company with offices a few blocks away from Platinum's offices. Beechwood was founded by Mark Nordlicht, as well as Murray Huberfeld, David Bodner, Mark Feuer, and Scott Taylor. David Levy was going to be the CIO of Beechwood. Nordlicht and Levy decided which investments would be transferred from Platinum to Beechwood.

Manela confirmed that “Nordlicht didn’t have the final say and Beechwood could have said no as to whatever Nordlicht recommended.” Feuer and Taylor ran the reinsurance aspect of Beechwood and were the “ultimate bosses at Beechwood in that sense.”

Feuer and Taylor wanted Beechwood to be set up to not be an affiliate of Platinum, and had lawyers review the structure of Beechwood to ensure that it would not be a Platinum affiliate. Feuer told Manela that lawyers were working to create a clear division between Beechwood and Platinum, such that they are not affiliates. When Feuer and Taylor told Manela that Platinum and Beechwood were not affiliates, Manela took them at their word. Levy was present during a meeting when individuals talked about how Beechwood was not a Platinum affiliate.

Manela also testified that Platinum sold Black Elk bonds to Beechwood. Further, on July 8, 2019, Levy or Small asked Manela to send them a list of the amount of Black Elk bonds held by Platinum and Beechwood. A trader for Platinum then compiled this information and sent it to Manela, who sent the information to Levy and Small.

On July 23, 2014, Manela emailed Levy a list of investments Beechwood held that were related to Platinum, including \$31,051,000 in “Black Elk Energy Public Debt 13.75%,” with the following comment: “Purchased 3,335,000 each from PPCO and PPLO and 24,381,000 from PPVA.” On August 16, 2014, Manela emailed Levy to ask, “did Black Elk sale go thru yesterday??” and Levy responded: “Sale closed. 135 mln Cash will be in the account at black elk Monday am.”

V. Testimony of Arthur Garza

Garza was the Chief Technical Officer at Black Elk. Garza testified that Black Elk began selling several oil and gas wells in 2014. One of the buyers was a company called Renaissance Offshore, LLC (“Renaissance”).

VI. Testimony of Clifford Joseph Bruno

Bruno was the Vice President of Operations at Black Elk. Bruno indicated that Black Elk faced serious challenges, including its debt and inability to pay vendors. Bruno told Levy that Black Elk may have to file for bankruptcy and Levy responded that “[w]e cannot do that. It’s a lot of money to lose.”

Bruno also testified that, at a Black Elk management meeting in early 2014, an individual stated, in relation to bondholders consenting to the consent solicitation, “no one in their right mind will do it. You’re not going to hear anything.” Bruno testified that Levy appeared “a little agitated” and walked with Shulse towards Shulse’s office. While Levy and Shulse were speaking, Bruno heard Levy say, “[i]t’s covered, covered.” When discussing the consent solicitation, Bruno also testified that he “had no idea what it meant, what it is.”

VII. Testimony of Israel Wallach

Wallach was a portfolio manager at Beechwood from January 2014 until March 2016. Nordlicht introduced Wallach to Beechwood. Wallach believed Nordlicht was trying to help Beechwood when it was a startup. Wallach focused on high-yield debt, whereas Levy, who

was CIO, had a different focus. Wallach did not need Levy's permission to make trades.

Wallach testified that Feuer and Taylor ran Beechwood the whole time Wallach worked there, including the spring and summer of 2014. Wallach did not perceive Nordlicht as having the authority to order Wallach to buy a particular position; Wallach never believed that Nordlicht forced him to do anything; and Nordlicht did not instruct Wallach to vote the Black Elk bonds. Rather, Wallach testified that Nordlicht "maintained an advisory role" at Beechwood. Nonetheless, Levy and Nordlicht both worked at and had offices at both Platinum and Beechwood.

Wallach first learned about Black Elk when Nordlicht asked Wallach to get the third-party market pricing for the Black Elk bonds so that they could see the price on a daily basis. During April 2014 and May 2014, Nordlicht asked Wallach multiple times about the price of the Black Elk bonds and whether Beechwood had the capacity to purchase those bonds. On May 13, 2014, Nordlicht instructed Wallach to purchase \$8 million Black Elk bonds on Beechwood's behalf, and instructed a trader at Platinum to sell \$4 million Black Elk bonds from Platinum accounts at Credit Suisse and Nomura.

On June 23, 2014, the public consent solicitation process began. Also on June 23, 2014, Nordlicht asked Wallach how many Black Elk bonds Beechwood owned, and Wallach informed him the figure was \$13,360,000. Between April 8, 2014 and July 7, 2014, Nordlicht directed the sale of almost \$32 million in Black Elk bonds from Platinum funds to Beechwood. On July 28,

2014, Beechwood voted its Black Elk bonds to consent without tendering.

On August 11, 2014, Wallach reminded Nordlicht of the August 13, 2014 at 5:00 p.m. voting deadline for the consent solicitation. Nordlicht replied the same day to Wallach on August 11, 2014: “Will let u know our advice.” Wallach replied: “You can just let us know what you decided to do. Just wanted to make sure u didn’t forget.” Having not heard again from Nordlicht regarding the consent solicitation vote, Wallach wrote Nordlicht and Levy at 10:46 a.m. on August 13, 2014: “Assuming we are allowing 5pm deadline for BLELK bonds tender to expire w/o us tendering any of them, correct? If u need us to do anything, just let us know.” Nordlicht replied at 12:12 a.m. on August 14, 2014: “Thx.”

VIII. Testimony of Rob Shearer

Shearer, an attorney who had been a partner at BakerHostetler and counsel to Black Elk during the relevant time period, administered the consent solicitation. It was his job to ensure that the number of bonds voted were sufficient for the consent to pass. However, Shearer relied on Black Elk to provide the number of Black Elk bonds that PPVA and its affiliates owned. Shearer would then exclude votes by Platinum affiliates because they could not be counted under the Trust Indenture Act or the bond indenture.

The bond indenture defined an “affiliate” of “any specified Person” as “any other Person directly or indirectly controlling or controlled by or under direct or indirect common control with such specified Person,”

and defined “control” as “the possession, directly or indirectly, of the power to direct or cause the direction of the management or policies of such Person, whether through the ownership of voting securities, by agreement or otherwise; *provided* that beneficial ownership of 10% or more of the Voting Stock of a Person will be deemed to be control.”

Shearer knew that Platinum had purchased Black Elk bonds with an eye toward “flipping [them] to friendlies who will [d]o right by the company” in case Black Elk later sought to change the covenants. Mr. Shearer understood “friendlies” to mean bondholders that had a relationship with Platinum “such that if Platinum asked these friendly bondholders to vote in a certain way, that the friendly bondholders would then vote in that way” Shearer indicated that flipping bonds to “friendlies” was proper as long as the “friendlies” were not Platinum affiliates.

In April or May 2014, Shulse told Shearer that Platinum owned about \$100 million out of the \$150 million in Black Elk bonds. Shearer had no reason to doubt the information Shulse gave him and did not attempt to independently verify the information.

Black Elk initially attempted to carry out a private consent process to amend the bond indenture in the spring of 2014. However, the private process never closed because the trustee was uncomfortable with the way in which it was conducted. In June 2014, Nordlicht emailed Levy, Shulse, and Small about the failed private process and stated, “David you f’d this up bad for no reason.”

Black Elk then pursued a public consent solicitation process, in which all of the independent bondholders would be informed of the proposed amendments to the indenture and would be given an opportunity to vote on them. The amendments would, among other things, modify the restrictions on Black Elk's use of proceeds from the Renaissance sale. Before the amendments, the bond indenture required Black Elk to use proceeds from the sale to either pay Black Elk's indebtedness or invest in the oil and gas industry. After the amendments, if they passed, Black Elk could also use the proceeds of an asset sale to purchase at par value any Black Elk bonds that the bondholders elected to tender and then use the remaining asset sale proceeds to repurchase or redeem preferred equity of Black Elk.

The public consent solicitation process began on June 23, 2014, when Small sent Shearer an email and copied Levy. On July 1, 2014, BakerHostetler prepared a memorandum to Black Elk personnel indicating that \$90 million in Black Elk bonds were held by companies "friendly" to Platinum. The July 1, 2014 memo was based on discussions between BakerHostetler attorneys and Black Elk. However, Shearer did not receive this memo while he was administering the public consent process.

On July 3, 2014, Small asked Shearer and his colleague, Brittany Sakowitz, to confirm "that under the TIA if \$5MM of the bonds were owned by an affiliate then in order for the consent to be approved a majority of \$145MM (greater than \$72.5MM) would need to consent rather than greater than \$75MM." Sakowitz replied: "Correct. Securities owned by the

obligor or by any person directly or indirectly controlling or controlled by or under direct or indirect common control with the obligor must be disregarded for purposes of calculating the vote required to approve the proposal. (Trust Indenture Act, Section 316(a)).” Small then forwarded this exchange to Nordlicht and Levy, stating “[s]ee below regarding the majority consent calculation.”

On Monday, July 7, 2014, Small forwarded the draft consent solicitation from Shearer to Nordlicht and Levy, stating “[a]ttached is the next turn of the consent which we are reviewing. The company must disclose how many bonds are owned by affiliates in order to establish the requisite number to constitute a majority. . . . Let’s discuss asap in order to finalize and launch by Thursday.” On July 9, 2014, Small wrote to Shearer and Sakowitz, among others, that “\$18,321,000 bonds are controlled by PPVA and should be disclosed and excluded from the calculation. I believe this implies that \$65,840,000 bonds are required to obtain a majority consent.”

On July 13, 2014, Small reiterated to Shearer and Sakowitz that “\$18,321,000 bonds are controlled by and should be disclosed and excluded from the calculation.” On July 16, 2014, Shearer’s firm distributed the consent solicitation statement to the bondholders. The consent solicitation statement offered to buy back Black Elk bonds at par value and sought the bondholders’ consent to amend the indenture to, among other things, allow Black Elk to use the proceeds of an asset sale to redeem preferred equity of Black Elk.

The consent solicitation statement disclosed that there were \$150 million worth of Black Elk bonds outstanding under the bond indenture. Out of those \$150 million, PPVA and its affiliates – which owned 85% of Black Elk’s outstanding voting membership interests – owned \$18,321,000 of the Black Elk bonds. The consent solicitation added that “[o]therwise, neither we, nor any person directly or indirectly controlled by or under direct or indirect common control with us, nor, to our knowledge, any person directly or indirectly controlling us, held any” Black Elk bonds.

On August 1, 2014, Shearer requested that Small provide Shearer with a signed Officer Certificate that affirmed the amount of Black Elk bonds that PPVA and its affiliates owned. Shearer recommended “Platinum go ahead and submit its consent in the consent solicitation” since Shearer “would like to be able to show that we have a majority both including and excluding the Notes held by Platinum.”

Shearer followed up on his August 1, 2014 email on August 13, 2014, at 6:05 p.m – approximately an hour after the consent voting period expired. Twenty minutes later, Small wrote to Nordlicht and Levy with the subject heading “Officer Certificate” and stated “[s]ee attached wording and let me know if you are ok. Below is a table that shows under all three scenarios there is 50% approval.”¹

¹ These three scenarios included counting (1) all \$110 million consenting votes (\$11.4 million tendered bonds plus the \$98.6 million bonds that voted to consent only); (2) all consenting votes

At 8:51 a.m. the next morning, August 14, 2014, Small resent his email to Nordlicht and Levy and wrote “[t]rustee wants to see this this morning in order to finalize results of tender/consent which ended last night. U ok with language?” Nordlicht responded to Small and Levy at 11:08 a.m. on August 14, 2014 by writing “K”. On August 14, 2014, at 12:36 p.m., Small wrote to Shearer with a cc to Shulse: “Rob, see attached officer’s certificate and below analysis which is also set forth on the attached spreadsheet. Let me know if you have any comments and we will have executed.”

The three scenarios included in a table in this email were largely identical to those Small had shared with Nordlicht and Levy approximately an hour and a half earlier. Small’s email identified the \$43 million in bonds held by PPCO and PPLO as held by entities “Not Deemed Affiliates” of Black Elk. Small and Shearer believed it was ambiguous whether those bonds should be excluded from the vote, but decided to exclude those bonds when determining whether the consent solicitation passed.

Shearer planned on releasing a press release shortly after he received Small’s email. The first draft of the press release indicated that \$18.3 bonds had been excluded from the calculation. In the final draft of the

except the \$18 million PPVA-owned bonds; and (3) all consenting votes except the \$18 million PPVA-owned bonds and the \$43 million PPCO- and PPLO-owned bonds (although Small referred to these bonds as owned by entities that were “Not Deemed Affiliates”). In none of these three scenarios did Small include the \$37 million Black Elk bonds that Beechwood owned as bonds held by a Platinum affiliate.

press release, Shearer removed all references to the amount of bonds affiliated with Platinum in light of the uncertainty about which entities were Platinum affiliates.

However, Shearer did not stop the consent solicitation process or reissue the consent solicitation statement, which only disclosed the \$18.3 in PPVA bonds as bonds held by a Platinum affiliate. Shearer testified that he did not stop the consent solicitation process because “[t]he goal of the process was to get a majority vote” and the amendment would have passed even excluding bonds held by PPVA, PPLO, and PPCO.

IX. Testimony of Dixon Yee

Yee worked for Phoenix Investment Adviser, a fund that invested in Black Elk bonds. In the consent solicitation, Yee decided not to consent to the amendments or tender his bonds. Yee was “shocked and flabbergasted” when he learned that many bondholders would consent to the amendment to the bond indenture without tendering since they “g[a]ve up ... their rights for nothing,” which would be “kind of stupid.” Yee testified that whether “a dominating portion of the \$150 million in Black Elk bonds was controlled by Platinum and voted to consent to paying the Black Elk preferred security first” would have been “important information” to know at the time of the consent solicitation process.

X. Testimony of Todd Pulvino

Pulvino worked for CNH, another fund that invested in Black Elk bonds. Pulvino decided not to tender these Black Elk bonds in the consent

solicitation, at least in part because of his assessment of the probability that the amendments would pass. If CNH had known that more than \$18.3 million were controlled by Platinum affiliates, then CNH “would have thought more about tendering our notes because we wouldn’t have wanted to hold these notes without the protective covenants that were in place.” Pulvino explained:

Suppose that rather than 18 million they owned a 120 million, just suppose, this is our thinking, then so that would mean there’s 30 million bonds, only 30 million that get to vote. That means if you divide that by two you need only 15 million to vote for the consents. Well, that’s a lot more likely than getting 66 million to vote. So in that case we would have thought more about tendering our notes because we wouldn’t have wanted to hold these notes without the protective covenants that were in place. So that was a key – that was a key part of our thinking. And I think if we – you know, if the numbers were different we would have either tendered our notes or I mean if we – if we thought that there were notes that were not properly categorized, we would have contacted the indenture trustee to make sure that the notes that were being voted were not affiliate notes.

XI. Additional Emails Regarding Beechwood and the Consent Solicitation

On March 20, 2013, Murray Huberfeld wrote to Mark Feuer, in reference to Beechwood, that “Nordlicht group will run the invest allocation side.” On March 5,

2014, Shulse forwarded to Nordlicht an email from Shearer regarding the affiliate rule. Nordlicht stated, “when we say we have friendly holders we will be fully compliant with this provision.”

On May 28, 2014, Nordlicht wrote to a potential investor that “besides Platinum we have [a] reinsurance mandate and I’d like to split it among entities, though all controlled by us.” When discussing a potential investment with this individual, Nordlicht later wrote “[i]f it helps we shd be b asset manager as opposed to platinum on these things.”

On July 29, 2014, during the public consent solicitation, Nordlicht wrote to himself with the subject heading “To do today”: “Black elk – 1 – need budget for post renaissance properties. We need immediate p and a plan. We need plan as to how to distribute money to the right places (preferred, preferred, preferred[.])” Later that day, Nordlicht asked Small and Levy, “how is partial close renaissance talks going?” and also wrote, “David – I have Beechwood at 36,422,400 in terms of ownership of bee bonds. Dan – Do u know respective funds?” Small replied with the following spreadsheet:

BlackElk Bond Holders					
	Nomura	Credit Suisse	Wilmington Trust	Total	
PPCO	29,582,000			29,582,000	
PPVA		18,321,000		18,321,000	
PPLO		13,711,000		13,711,000	
BAM			13,360,000	13,360,000	
BBIL			23,657,000	23,657,000	
Total				98,631,000	
				80,310,000	150,000,000
					131,679,000
					65,839,500.0

On August 18, 2014, Shearer wrote to Shulse and another individual advising them to review a provision of a Texas statute regarding prohibited distributions to members. Shulse forwarded his email to Nordlicht, Small, Levy and Samuel Salfati and stated: “Advice of counsel . . . we need to be mindful of this in our planning.” Nordlicht then forwarded Shulse’s email to Levy and stated “David – get these wires out!!!! Call him right now please!!!!” Twenty minutes after this email, Small wrote to Shulse and Salfati that Shulse is “hereby authorized to wire \$70MM in partial payments of Preferred E units.”

In April 2015, in response to a request for information about Beechwood from Platinum’s auditor, Elliot Feit, the Finance Director of Beechwood, wrote, “we have no obligation to provide this information to you nor do we characterize any Beechwood Investor (as we have defined below) as a related party or an affiliate of any Platinum Entity.”

XII. The Government's Summation

During its summation, the Government claimed that defendants told a “big lie to the bondholders that only \$18.3 million in bonds were affiliated or insider bonds.” The Government also claimed that defendants “also lied by leaving out [] bonds held by that company, Beechwood.” The Government indicated that “[t]he reason that was also a lie is the defendants controlled Beechwood, just like they did Platinum, and that meant Beechwood’s bonds were ban[ne]d from influencing this vote.” The Government also told the jury that “[c]ontrol is pretty cut and dry. You can use your common sense, your experience in your own lives, when you think about control.”

However, the Government acknowledged that “[a]t the end of the day, there were certain bonds that were not counted” because Shearer removed “61 million in bonds ... out of the math” after defendants disclosed that those bonds were affiliated with Platinum. The Government suggested that the defendants disclosed the bonds held by PPLO and PPCO but not Beechwood because the vote would still pass excluding the PPLO and PPCO bonds, but not by excluding the Beechwood bonds.

XIII. Jury Verdict

The jury found Nordlicht and Levy guilty on counts six to eight – which related to the Black Elk Scheme – but not guilty on counts one to five – which related to the Investment Fraud Scheme. The jury also found SanFilippo not guilty on counts one to five; he was not charged in counts six to eight. Nordlicht and Levy

moved for a judgment of acquittal under Federal Rule of Criminal Procedure 29 and for a new trial under Federal Rule of Criminal Procedure 33 on the day of the verdict. The Court deferred ruling on these motions until Nordlicht, Levy, and the Government fully briefed their respective positions.

DISCUSSION

I. Motions for a Judgment of Acquittal

Under Rule 29(c), “[i]f the jury has returned a guilty verdict, the court may set aside the verdict and enter an acquittal.” “When a defendant moves for a judgment of acquittal, the Court must determine whether upon the evidence, giving full play to the right of the jury to determine credibility, weigh the evidence, and draw justifiable inferences of fact, a reasonable mind might fairly conclude guilt beyond a reasonable doubt.” United States v. Mariani, 725 F.2d 862, 865 (2d Cir. 1984).

“A reasonable mind must be able to conclude guilt on each and every element of the charged offense.” Id. “However, all reasonable inferences are to be resolved in favor of the prosecution and the trial court is required to view the evidence in the light most favorable to the Government with respect to each element of the offense.” Id. (internal quotation marks omitted). “The evidence is to be viewed not in isolation but in conjunction.” Id. (internal quotation marks omitted).

Thus, a convicted defendant “bears a heavy burden” when challenging the sufficiency of the evidence. United States v. Martoma, 894 F.3d 64, 72 (2d Cir.

2017) (internal quotation marks omitted). This standard is particularly important in a conspiracy case “because a conspiracy by its very nature is a secretive operation, and it is a rare case where all aspects of a conspiracy can be laid bare in court with the precision of a surgeon’s scalpel.” United States v. Pitre, 960 F.2d 1112, 1121 (2d Cir. 1992) (internal quotation marks omitted).

A. Nordlicht’s Motion for a Judgment of Acquittal

Nordlicht claims there was insufficient evidence for the jury to determine: that he had criminal intent; that Beechwood was affiliated with Platinum; or that the consent solicitation statement lacked material information. But when viewed in the light most favorable to the Government, the Government adduced sufficient evidence as to each of these grounds as to make a judgment of acquittal under Rule 29 inappropriate.

First, viewing the evidence in the light most favorable to the Government, Nordlicht’s actions during and leading up to the consent solicitation were sufficient for the jury to find that he acted with criminal intent. Nordlicht knew about the affiliate rule and he indicated as much in the March 2014 email in which he said that he will be “fully compliant” with the affiliate rule. Drawing reasonable inferences in the Government’s favor, this email indicated a desire to create a favorable paper trail, rather than a good faith desire to comply with the affiliate rule.

Nordlicht also indicated that Platinum had purchased Black Elk bonds with an eye toward “flipping [them] to friendlies who will [d]o right by the company.” Between April 8, 2014 and July 7, 2014, Nordlicht directed the sale of almost \$32 million in Black Elk bonds from Platinum funds to Beechwood. If Beechwood had been merely a “friendly” company but not a Platinum affiliate, there may not have been anything inculpatory about Nordlicht’s decision to move the bonds to Beechwood. However, the Government adduced evidence to suggest that Nordlicht knew or should have known that Beechwood was not only “friendly” with Platinum but also a Platinum affiliate.

On May 28, 2014 – shortly before the public consent solicitation – Nordlicht wrote to a potential investor that “besides Platinum we have reinsurance mandate and I’d like to split it among entities, though all controlled by us.” On its face, the email is ambiguous about whether Nordlicht meant “control” in a colloquial sense here or “control” as the legal term under the TIA and the bond indenture. But drawing inferences in the Government’s favor, Nordlicht was at least on notice that Beechwood’s status could potentially implicate the affiliate rule. Nordlicht thus could have disclosed the extent of Platinum’s ties to Beechwood and sought Shearer’s advice as to whether Beechwood qualified as a Platinum affiliate.

Instead, Nordlicht and his colleagues played their cards close to their vests by providing limited and potentially contradictory information to Shearer about PPCO and PPLO while concealing the extent of

Beechwood's ties to Platinum. On the one hand, in April or May 2014, Shulse told Shearer that Platinum owned about \$100 million out of the \$150 million in Black Elk bonds. Further, on July 1, 2014, BakerHostetler prepared a memorandum to Black Elk personnel indicating that Platinum owned approximately \$90 million Black Elk bonds that were "friendly" to Platinum – although Shearer did not receive this memo while he was administering the consent solicitation.

But on the other hand, on multiple occasions, Small emailed Shearer and Sakowitz and indicated that the \$18 million in PPVA bonds should be excluded from the vote, but did not mention excluding the PPLO, PPCO, BAM, or BIL bonds. Nordlicht contends that these disclosures were sufficient to inform Shearer about PPLO's and PPCO's affiliate status, but it is the role of the jury, not the Court, to weigh evidence of the mixed signals Shearer received.

Nordlicht also failed to timely correct the July 16, 2014 consent solicitation statement, which only disclosed that Platinum held the approximately \$18 million in PPVA bonds but did not disclose the bonds held by PPLO, PPCO, BAM, and BBIL. Although Small disclosed to Shearer that PPLO and PPCO may be PPVA affiliates² on August 14, 2014 – almost a month

² Specifically, Small identified bonds held by PPCO and PPLO as bonds held by entities "Not Deemed Affiliates" of Platinum. Drawing inferences in favor of the Government, the jury could have reasonably inferred that this was a half-hearted disclosure meant to maintain the façade that Beechwood was not a Platinum affiliate.

after the consent solicitation and a day after the voting deadline – this untimely disclosure was too little and too late to sanitize the process. Drawing inferences in favor of the Government, the jury could have reasonably concluded that Small waited until after the voting deadline and identified PPLO and PPCO – but not BAM or BBIL – as potential affiliates because the consent solicitation would have passed by counting votes from BAM and BBIL but not PPLO or PPCO.

Nordlicht nonetheless claims that he and his co-defendant, Small, were justified in relying on Shearer to advise them on the administration of the consent solicitation. Had Nordlicht and his colleagues been more communicative with Shearer – for instance, by asking him which entities qualify as Platinum affiliates, or by disclosing the close relationship between Platinum and Beechwood – Shearer may have been in a position to provide advice that Nordlicht could rely on in this case. See United States v. Scully, 877 F.3d 464, 476 (2d Cir. 2017) (“In a fraud case ... the claimed advice of counsel is evidence that, if believed, can raise a reasonable doubt in the minds of the jurors about whether the government has proved the required element of the offense that the defendant had an unlawful intent.”) (internal quotation marks omitted). Since Shearer was kept in the dark instead, his involvement is not sufficient to support a judgment of acquittal.

Nordlicht also questions what motive he could have had to enter into the Black Elk Scheme in the first place. If Black Elk paid the proceeds of the Renaissance sale to the preferred equity holders rather than the

bondholders, Black Elk would have violated the bond indenture. But the bondholders' recourse would be to receive par value of the bonds plus accrued interest – which is exactly what Black Elk offered to bondholders in the tender offer. Nordlicht also indicates that the evidence showed that he hoped and expected the bondholders to tender and receive par value plus accrued interest.

Nordlicht is correct that, under the Government's theory, he had a motive to not only commit fraud but also breach the bond indenture. But the possibility that Nordlicht could have obtained the same result by breaching a contract rather than committing a crime does not preclude the jury from concluding that Nordlicht nonetheless had a motive to commit fraud.

To the extent Nordlicht seeks for the Court to infer that he could not have committed a crime because he could have breached a contract instead, his argument requires the Court to draw an inference in his favor – which the Court cannot do when resolving his Rule 29 motion. Further, the jury could reasonably have concluded that Nordlicht would have rather secretly defrauded investors – provided he thought he could get away with it – than openly caused Black Elk to breach the bond indenture, which would have further damaged Black Elk's reputation among investors.

Second, viewed in the light most favorable to the Government, the Government adduced sufficient evidence for the jury to conclude that Beechwood was under common control with Platinum. Specifically, the Government adduced evidence that: Beechwood and Platinum shared personnel, including Nordlicht, Levy

(Beechwood's CIO), and Manela; Nordlicht was one of Beechwood's founders; Feuer and Taylor ran Beechwood's reinsurance side, whereas Nordlicht and Levy ran the investment side; Beechwood and Platinum had offices a few blocks away from each other; and Wallach looked to Nordlicht for guidance on how Black Elk should vote its Beechwood bonds.

Whether Nordlicht actually influenced how Beechwood voted is not dispositive or even particularly significant here. Nordlicht may have had the authority to direct Beechwood how to vote its Black Elk bonds without possessing overall control of Beechwood. But drawing inferences in the Government's favor, and deferring to the jury's role in weighing evidence, the Government adduced sufficient evidence of Beechwood's common control with Platinum for the jury to conclude that Beechwood was a Platinum affiliate under the bond indenture and TIA.

The email in which Nordlicht described Beechwood as "controlled by us" also strengthens the Government's case but is not dispositive here, notwithstanding the Government's argument that this "email alone, without more, surpassed Rule 29's standard of establishing Beechwood's affiliate status." Although this email is probative of Nordlicht's state of mind – *i.e.*, whether he considered Beechwood to be a Platinum affiliate – it does not establish whether Beechwood was actually an affiliate of Platinum under the TIA or the bond indenture. Allowing Nordlicht's views about Beechwood's affiliate status to control whether Beechwood is an affiliate would usurp the role of the

jury as the factfinder.³ But viewed in the light most favorable to the Government, Nordlicht's email, in conjunction with the additional evidence the Government adduced, was sufficient for the jury to determine that Beechwood was a Platinum affiliate.

Nordlicht nonetheless contends that the Government misled the jury into applying the wrong standard when determining whether Beechwood and Platinum were under common control. In particular, Nordlicht admonishes the Government for arguing to the jury that the jury should use "common sense" to determine "[w]hat is control" under the affiliate rule. However, the Government also informed jurors that they "will have the definition of affiliate" and "should ask for it, it is in the indenture, but it is the power to control."

There is nothing improper about the Government directing the jury to use the proper standard but also reminding the jury not to leave its common sense at the door. To the extent Nordlicht suggests that the jury took one part of the Government's directive to heart (to use common sense when applying the affiliate rule) but totally disregarded another part (to look up the definition of "affiliate"), Nordlicht's argument is too speculative to be the basis of a judgment of acquittal under Rule 29.

³ Similarly, the fact that the Finance Director of Beechwood wrote to Platinum's auditor that "we ... do [not] characterize any Beechwood Investor (as we have defined below) as a related party or an affiliate of any Platinum Entity" is of limited probative value regarding whether Beechwood was, in fact, a Platinum affiliate.

Third, the amount of bonds held by Platinum affiliates was material to bondholders because it altered the calculus of consent. The bondholders knew the total number of bonds involved in the vote – \$150 million. If no bonds were held by Platinum affiliates, then the consent solicitation would only pass if the bondholders representing over \$75 million in bonds voted in favor of it.

But the more bonds held by Platinum affiliates, the lower the threshold for the consent solicitation to pass since fewer bondholders have to vote in favor of the amendment for it to pass. If the bondholders who opposed the amendment but thought it would fail had known that PPCO, PPLO, BAM, or BBIL – in addition to PPVA – were Platinum affiliates, they would have inferred that the amendment would be more likely to pass. The probability that the amendment would pass mattered to Black Elk bondholders because of the stakes of the amendment: the bondholders gave up their rights to get paid before the preferred equity holders from the Renaissance sale. If the bondholders who opposed the amendment knew the amendment was more likely to pass, they would then be more likely to tender their bonds in the consent solicitation if they decided it would not be worth investing in Black Elk in light of the amended indenture.

Even if Black Elk had taken the position that Beechwood was not a Platinum affiliate, Black Elk could have disclosed the relationship between Platinum and Beechwood in the consent solicitation – thereby putting bondholders on notice about a potentially contentious legal issue at the heart of the consent

solicitation. The fact that the consent solicitation only passed by counting votes from BAM and BBIL further underscores the materiality of Beechwood's potential status as a Platinum affiliate. If reasonable Black Elk bondholders knew about the increased probability of the amendment passing because of Platinum's close relationship with Beechwood, they would have considered this information in deciding how to respond – including by potentially tendering their bonds, contacting the trustee to ensure the propriety of the vote (as Pulvino suggested he would have done), or even instigating litigation.

The Court need not, and does not, decide whether it would have been sufficient for Black Elk to disclose the relationship between Beechwood and Platinum without identifying Beechwood as a Platinum affiliate. But Black Elk could not conceal the relationship between Beechwood and Platinum in light of the importance of this relationship to the bondholders affected by the consent solicitation. See Basic Inc. v. Levinson, 485 U.S. 224, 231–32 (1988) (“[T]o fulfill the materiality requirement there must be a substantial likelihood that the disclosure of the omitted fact would have been viewed by the reasonable investor as having significantly altered the total mix of information made available.”) (internal quotation marks omitted); United States v. Litvak, 808 F.3d 160, 175 (2d Cir. 2015) (“A misrepresentation is material ... where there is a substantial likelihood that a reasonable investor would find the misrepresentation important in making an investment decision.”) (internal quotation marks and alterations omitted). Pulvino and Yee echoed this reasoning on the witness stand, and the jury acted

within its discretion in deciding this information was material. See id. (“Determination of materiality under the securities laws is a mixed question of law and fact that the Supreme Court has identified as especially well suited for jury determination.”) (internal quotation marks omitted).

Nordlicht contends that the amount of Platinum-affiliated bonds was immaterial, but his arguments are not persuasive. Nordlicht claims that the “amount of bonds that would not be counted in the vote—whether \$18.3 million or \$98.6 million—makes no difference” since these “bonds would not be counted anyway.” This argument proves too much, since it suggests that the amount of affiliate-held bonds is never material. To the contrary, the jury reasonably could have adopted Pulvino’s reasoning for why the amount of bonds needed for the consent solicitation to pass was important:

Suppose that rather than 18 million they owned a 120 million, just suppose, this is our thinking, then so that would mean there’s 30 million bonds, only 30 million that get to vote. That means if you divide that by two you need only 15 million to vote for the consents. Well, that’s a lot more likely than getting 66 million to vote. So in that case we would have thought more about tendering our notes because we wouldn’t have wanted to hold these notes without the protective covenants that were in place. So that was a key – that was a key part of our thinking. And I think if we – you know, if the numbers were different we would have either tendered

our notes or I mean if we – if we thought that there were notes that were not properly categorized, we would have contacted the indenture trustee to make sure that the notes that were being voted were not affiliate notes.

In other words, it was important for bondholders to know the number of bonds excluded from the vote because the more votes that were excluded, the lower the threshold for the amendment to pass.

Nordlicht also observes that the July 16, 2014 offering circular disclosed additional risks about Black Elk, and it was no secret that Black Elk was in distress. Nonetheless, both Pulvino and Lee continued to acquire more Black Elk debt after the consent solicitation. Although Nordlicht's observation is correct, he merely demonstrates that the total mix of available information included, among other things, the risks associated with investing in Black Elk. These risks do not preclude the jury from concluding that the total mix of available information for Black Elk bondholders also included the number of Black Elk bonds held by Platinum affiliates.

Nordlicht further observes that Shearer decided not to reissue the consent solicitation to inform bondholders that \$62 million in bonds – not \$18.3 million in bonds – were controlled by Platinum. When asked whether Shearer did not reissue the consent solicitation because he “did not believe the \$18.3 million number was material for the bondholders to know,” Shearer replied, “[t]he goal of the process was to get a majority vote, right.” Nordlicht seeks for the Court to infer that Shearer thus did not believe that

the amount of bonds held by Platinum-affiliates was material.

This argument is unsuccessful for multiple reasons. First, even if Shearer truly believed that the amount of Black Elk bonds held by Platinum affiliates was immaterial, his beliefs are only relevant here to the extent they are probative of those of a reasonable investor. Although the jury may consider Shearer's beliefs when determining what a reasonable investor would have believed, weighing evidence is for the jury, not the Court.

Second, drawing inferences in the Government's favor, Shearer's testimony that "[t]he goal of the process was to get a majority vote" reflected what was material for Shearer – a lawyer administering the consent solicitation – and not a bondholder deciding how to vote in the consent solicitation. Since Shearer's goal was determining whether there were enough votes for the amendment to pass, whether PPCO and PPVO bonds should be excluded from the vote was immaterial to Shearer since there were enough votes for the amendment to pass anyway.

Third, even if Shearer believed that PPCO's and PPLO's affiliate status was immaterial, nothing in the record suggests that Shearer thought it was immaterial whether BAM and BBIL – whose votes were necessary for the consent solicitation to pass – were Platinum affiliates. Of course, Nordlicht's position is that BAM and BBIL were not Platinum affiliates – but as noted above, the Government adduced sufficient evidence for the jury to find that they were.

B. Levy's Motion for a Judgment of Acquittal

Levy's motion for a judgment of acquittal is granted. Even making reasonable inferences in favor of the Government, and deferring to the role of the jury in weighing evidence and assessing credibility, the Government failed to meet its burden of proving beyond a reasonable doubt that Levy had criminal intent.

The Government's evidence of Levy's criminal intent falls into the following categories: testimony from Bruno and Mandelbaum; evidence that Levy was involved in processing wire transfers after the Renaissance sale; and evidence that Levy received emails about Black Elk bonds and the consent solicitation. Even taken as a whole, and viewed in the light most favorable to the Government, this evidence of Levy's criminal intent is insufficient to sustain a guilty verdict.

First, Bruno and Mandelbaum testified that Levy made comments that the Government contends are inculpatory, but the Government's interpretation is too speculative to sustain a guilty verdict. Bruno testified that, when he suggested to Levy that Black Elk may have to file for bankruptcy, Levy indicated that they "cannot do that" since "[i]t's a lot of money to lose." The Government interprets this email as evidence of "Levy's corresponding willingness to resort to defrauding the Bondholders," but the mere recognition that bankruptcy may harm stakeholders in Black Elk – including the bondholders – does not indicate intent to break the law to salvage Black Elk. To the extent the

Government seeks for the Court to infer that Levy was implying that fraud was preferable to bankruptcy as a means of addressing Black Elk's financial difficulties, the Government's interpretation is too speculative to sustain a guilty verdict.

The Government also seeks for the Court to draw a similarly speculative inference from another comment that Levy made about Black Elk's potential bankruptcy. Specifically, the Government points to Mandelbaum's testimony that Levy informed Mandelbaum that Black Elk would wait until a year after June or July 2014 (the approximate time period for the consent solicitation) to avoid a claw-back of \$100 million that Platinum took out of Black Elk. But as the Court indicated at trial, businesses may legitimately consider the risk of a claw-back when deciding when to conduct a certain transaction. The intent to schedule a transaction to avoid a claw-back does not indicate that Levy had criminal intent.

Further, the Government characterizes Bruno's testimony that Levy told Shulse "[i]t's covered," in early 2014 after a meeting in which Black Elk officers discussed the consent solicitation, as "directly show[ing] Levy's deep involvement in the Black Elk Bond Scheme and his leadership role within, given his ability to reassure co-conspirator Shulse that the vote was guaranteed to pass in Platinum's favor." The Government's interpretation is based on multiple layers of speculation, not reasonable inferences from witness testimony.

Bruno testified that this conversation occurred in early 2014, which is around the time of the failed

private consent solicitation but not the public consent solicitation that began in June 2014. Further, and in part for that reason, there is no reason to believe that the “[i]t” was a reference to the public consent solicitation. Bruno did not connect this comment to the consent solicitation; rather, Bruno testified that he “didn’t know what it all meant” Even assuming Levy was referring to the public consent solicitation, there is no reason to believe that “covered” meant “rigged” – as opposed to indicating that Levy believed that the amendments would pass in a legitimate manner because there were enough votes for it to pass.

Second, the Government also notes that Nordlicht asked Levy to process the wire transfers with the proceeds from the Renaissance sale after the indenture was amended. There is nothing unlawful about processing wire transfers, which are a routine aspect of transactions like the Renaissance sale. At most, a jury could reasonably consider the wire transfer as evidence of an action Levy took that furthered a conspiracy, but not intent to join a conspiracy in the first place.

Third, the evidence that Levy received emails about the consent solicitation is insufficient to establish that Levy had criminal intent, even viewed in a light most favorable to the Government and in conjunction with the additional evidence the Government adduced. The Government identifies an email about the consent solicitation as demonstrating Levy’s motive to commit a crime. In this email, Nordlicht holds himself, Small, and Levy responsible for Black Elk’s problems and, in reference to the failed private consent solicitation, tells Levy that he “f’d this up bad for no reason”

The Government seeks for the Court to infer that Levy agreed to enter a criminal conspiracy to “redeem himself with Nordlicht.” The inference that Levy was so deeply affected by Nordlicht’s cursory criticism, and so concerned about Nordlicht’s opinion, that he would enter into a criminal conspiracy to redeem himself is too speculative to sustain a conviction, even in conjunction with additional evidence the Government adduced.

The Government also notes that multiple individuals copied Levy on emails pertaining to the consent solicitation and the number of Black Elk bonds held by Beechwood, but even assuming Levy read these emails, these emails merely show that Levy knew or should have known that Beechwood held Black Elk bonds. The mere knowledge that Beechwood held Black Elk bonds falls well short of criminal intent. Many individuals employed at Beechwood, Black Elk, and elsewhere knew or should have known that Beechwood held Black Elk bonds. That is not enough to prove beyond a reasonable doubt that they intended to commit a crime, at least not without additional evidence of intent – which the Government has failed to adduce.

Specifically, the Government has adduced no evidence that Levy: considered Beechwood to be an affiliate of Platinum; played any role in shifting Black Elk bonds to Beechwood; or played any role in Beechwood voting its bonds. Manela even testified that Levy was present during a meeting where individuals talked about how Beechwood was not a Platinum

affiliate. The Government has not presented any evidence that Levy believed anything to the contrary.

That is why Levy's Rule 29 motion succeeds whereas Nordlicht's does not. The Government introduced evidence that Nordlicht knew about the affiliate rule and considered Beechwood to be under "our control" but nonetheless parked Black Elk bonds at Beechwood right in time for the bondholder vote. There is no comparable evidence to demonstrate Levy's criminal intent.

Perhaps in recognition of this asymmetry between the evidence against Nordlicht and against Levy, the Government claims that all of the evidence against Nordlicht also constitutes evidence against Levy. The Government's theory is that Levy and Nordlicht were co-conspirators, so evidence considered against Nordlicht is relevant to Levy as well. But the Government's argument begs the question of whether Levy and Nordlicht were co-conspirators in the first place. The Government cannot evade its obligation to present evidence of a defendant's *mens rea* by adducing evidence of an alleged co-conspirator's *mens rea* because the Government needs to adduce evidence of intent to show that Levy was part of a conspiracy as a threshold matter.⁴

⁴ The two cases the Government cites here do not hold otherwise. The Government cites United States v. Bruno, 873 F.2d 555, 562 (2d Cir. 1989), in which the Second Circuit held that "there was abundant evidence that [defendant] was a participant in a conspiracy to sell cocaine" so "[t]he statements and the acts of his co-conspirators were evidence to be considered by the jury in reaching their verdict." Similarly, the Government cites United

The Government also attempts to salvage its case against Levy by noting that Levy was also charged with aiding and abetting securities fraud, but this attempt is not successful. “Guilt may not be inferred from mere association with a guilty party.” United States v. Johnson, 513 F.2d 819, 824 (2d Cir. 1975). Rather, “a person aids and abets a crime when (in addition to taking the requisite act) he intends to facilitate that offense’s commission.” Rosemond v. United States, 572 U.S. 65, 77 (2014). “[F]or purposes of aiding and abetting law, a person who actively participates in a criminal scheme knowing its extent and character intends that scheme’s commission.” Id. For the reasons above, the evidence of intent the Government adduced is not sufficient to sustain Levy’s conviction even under an aiding and abetting theory.⁵

II. Motions for a New Trial

Federal Rule of Criminal Procedure 33(a) provides that, “[u]pon the defendant’s motion, the court may vacate any judgment and grant a new trial if the interest of justice so requires.” Unlike the strict

States v. Villegas, 899 F.2d 1324, 1347 (2d Cir. 1990), in which the Second Circuit held that because “there was sufficient evidence to connect each [defendant] with the conspiracy, all of the evidence as to each of the other defendants’ acts in furtherance of the conspiracy was admissible against each of them.” Here, because the Government failed to meet its burden in showing that Levy was a member of a conspiracy, evidence of his alleged co-conspirators’ intent does not constitute evidence of Levy’s intent.

⁵ Because the Court grants the motion for a judgment of acquittal, the Court need not and does not reach Levy’s additional grounds for moving for a judgment of acquittal.

confines within which a court must examine a defendant's Rule 29 motion for judgment of acquittal, a court has "broad discretion in ruling on a new trial motion." United States v. Canova, 412 F.3d 331, 348 (2d Cir. 2005) (internal quotation marks omitted).

"In considering whether to grant a new trial, a district court may itself weigh the evidence and the credibility of witnesses, but in doing so, it must be careful not to usurp the role of the jury." Id. at 348-49. "The ultimate test is whether letting a guilty verdict stand would be a manifest injustice. ... There must be a real concern that an innocent person may have been convicted." Id. at 349 (internal quotation marks omitted).

"The trial court must be satisfied that competent, satisfactory and sufficient evidence in the record supports the jury verdict." United States v. Ferguson, 246 F.3d 129, 134 (2d Cir. 2001) (internal quotation marks omitted). "The district court must examine the entire case, take into account all facts and circumstances, and make an objective evaluation." Id. Courts "nonetheless must exercise the Rule 33 authority sparingly and in the most extraordinary circumstances." Id. (internal quotation marks omitted).

Further, under Federal Rule of Criminal Procedure 29(d), "[i]f the court enters a judgment of acquittal after a guilty verdict, the court must also conditionally determine whether any motion for a new trial should be granted if the judgment of acquittal is later vacated or reversed."

A. Nordlicht's Motion for a New Trial

Although the Government adduced sufficient evidence for a judgment of acquittal to be unwarranted, letting the verdict stand against Nordlicht would be a manifest injustice. Thus, Nordlicht's motion for a new trial is granted.

The heart of the Government's case against Nordlicht is that he knew – but concealed from the bondholders – that, under the affiliate rule, bonds held by BAM, BBIL, PPCO, and PPLO should be excluded from the consent solicitation. The evidence suggests that, although Nordlicht knew about the affiliate rule, he and Beechwood went to great lengths to comply with the affiliate rule. Indeed, Nordlicht stated as much in a March 2014 email when he said that, although some Black Elk bonds are in the hands of “friendly” bondholders, he will be “fully compliant with the affiliate rule.”

Of course, Nordlicht's potentially self-serving statement that he will comply with the law does little to indicate that he actually intended to comply with the law. As noted above, Nordlicht could have attempted to create a favorable paper trail in the event he is accused of not following the rule, which is the precise situation he is in right now. But for the Court to sustain the conviction, the Government had to adduce sufficient evidence for the jury to conclude beyond a reasonable doubt that Nordlicht was dissembling, and in light of all of the facts and circumstances, the Government failed to do so.

Even if the jury could fairly conclude that BBIL and BAM were, in fact, properly considered Platinum affiliates under the affiliate rule, there is insufficient evidence that Nordlicht was on notice of their affiliate status. Although Nordlicht clearly played a role at Beechwood, there is insufficient evidence that his role was so extensive that he realized, or ought to have realized, that Platinum and Beechwood were affiliates in virtue of Nordlicht's role at both companies.

Specifically, as noted above, Manela testified that: Nordlicht gave recommendations to Beechwood but did not have the final say; Feuer and Taylor were the "ultimate bosses at Beechwood;" and Feuer and Taylor worked to ensure that Platinum and Beechwood were not affiliates. Wallach also testified that: Nordlicht maintained an "advisory role" at Beechwood; Nordlicht did not have the authority to order Wallach to buy a particular position or force Wallach to do anything; and Feuer and Taylor "were the ones who ran" Beechwood.

The Government also points to an email in which Nordlicht described Beechwood as "controlled by us." The Government takes this email as an admission of guilt, even though the Government also maintains that Nordlicht's email indicating his intention to comply with the affiliate rule was merely an attempt to build a favorable paper trail. The Government does not explain why Nordlicht would dissemble about his intention to comply with the affiliate rule in one email to build a favorable paper trail, but then effectively reveal his intent to break this rule in another email.

There is no reason to believe Nordlicht meant "controlled" in the technical sense of "control" under

the TIA or the bond indenture rather than in the more colloquial sense of “friendly” to Platinum. There would have been nothing unlawful about Nordlicht simply attempting to persuade individuals at Beechwood to vote in a certain manner – Nordlicht may campaign for votes just like any other stakeholder in the consent solicitation.

For this reason, Nordlicht’s role in trading in Black Elk bonds, and even his potential role in the manner in which Beechwood voted its Black Elk bonds, does not require the Court to sustain the verdict. As the Court noted above, Nordlicht may have been able to direct trading in particular bonds at Beechwood without having the power to direct or cause the direction of Beechwood’s management or policies. The Government has adduced no evidence showing that the Black Elk bonds were sufficiently significant for Beechwood that control over these bonds entailed control over Beechwood itself. And there would have been nothing improper about shifting bonds from Platinum to Beechwood to influence the consent solicitation if Beechwood was not a Platinum affiliate.

It would also be a manifest injustice to sustain Nordlicht’s conviction on the basis that Platinum’s alleged failure to disclose that PPCO and PPLO were PPVA affiliates demonstrates his intent to defraud the bondholders. To the contrary, there is insufficient evidence that the affiliate status of PPCO and PPLO was even concealed from BakerHostetler, which was responsible for communication with bondholders and which distributed the July 16, 2014 consent solicitation

statement that did not disclose PPCO's and PPLO's affiliate status.

First, Platinum disclosed to Shearer in April or May 2014 that Platinum owned about \$100 million of the Black Elk bonds.⁶ Second, on July 1, 2014, BakerHostetler prepared a memorandum indicating that approximately \$90 million Black Elk bonds that owned by companies that were "friendly" to Platinum. Third, Small again informed Shearer on August 14, 2014 about PPLO's and PPCO's bonds, and they decided to exclude these bonds from the consent solicitation vote in light of the potential that PPLO and PPCO were affiliated with PPVA.

Despite receiving this information, Shearer advised that Platinum vote all of its bonds and decided not to stop the consent solicitation process or reissue the consent solicitation statement, which only disclosed the bonds held by PPVA but not PPCO or PPLO. Black Elk and Platinum could have interpreted Shearer's conduct as demonstrating approval of the consent solicitation process, even if, in retrospect, the better course of action would have been to ask Shearer what entities counted as Platinum affiliates.

⁶ The Government notes that these bonds were freely tradeable, and in fact Platinum entities transferred bonds to Beechwood by the time of the public consent solicitation vote. The Government is correct that that the distribution of Black Elk bonds in April or May 2014 may not reflect the ownership of bonds during the consent solicitation. But even if the exact distribution changed by then, the disclosure from April or May 2014 was sufficient to put BakerHostetler on notice that a substantial portion of the outstanding bonds should not be counted in the vote.

Of course, the Court does not find that BakerHostetler and Black Elk had a model attorney-client relationship. Black Elk provided mixed signals to BakerHostetler about PPCO and PPLO when Small emailed Shearer and Sakowitz and only identified bonds held by PPVA – not PPCO or PPLO – as Platinum-affiliated. But BakerHostetler attorneys could have communicated better internally (e.g., by sharing the July 1, 2014 memo with Shearer) and externally (e.g., by seeking additional information from their client).

Even if Black Elk never asked Shearer to determine which entities were Platinum affiliates, an attorney may spot and explore a significant legal issue without being prompted by an explicit question from the client – particularly since Shearer’s role was to generally provide guidance about and administer the consent solicitation, not just answer isolated legal questions from Black Elk. Under all of the facts and circumstances of the case, Black Elk provided Shearer with sufficient information that the jury could not fairly conclude that Nordlicht intended to conceal PPCO’s and PPLO’s affiliate status from Shearer.⁷

B. Levy’s Motion for a New Trial

The Court conditionally grants Levy’s motion for a new trial in the event that the judgment of acquittal is later vacated or reversed. For the reasons stated when the Court granted Levy’s Rule 29 motion, the jury’s

⁷ Because the Court grants the motion for a new trial, the Court need not and does not reach Nordlicht’s additional grounds for seeking a new trial.

guilty verdict was a manifest injustice because there was insufficient evidence that Levy possessed criminal intent.

CONCLUSION

Nordlicht's [786] motion for a judgment of acquittal is denied and his motion for a new trial is granted. Levy's [785] motion for acquittal is granted and his motion for a new trial is conditionally granted. The [782] motion to inspect grand jury minutes is denied as moot.

SO ORDERED.

APPENDIX D

Federal Rules of Criminal Procedure

Rule 29. Motion for a Judgment of Acquittal

(a) Before Submission to the Jury. After the government closes its evidence or after the close of all the evidence, the court on the defendant's motion must enter a judgment of acquittal of any offense for which the evidence is insufficient to sustain a conviction. The court may on its own consider whether the evidence is insufficient to sustain a conviction. If the court denies a motion for a judgment of acquittal at the close of the government's evidence, the defendant may offer evidence without having reserved the right to do so.

(b) Reserving Decision. The court may reserve decision on the motion, proceed with the trial (where the motion is made before the close of all the evidence), submit the case to the jury, and decide the motion either before the jury returns a verdict or after it returns a verdict of guilty or is discharged without having returned a verdict. If the court reserves decision, it must decide the motion on the basis of the evidence at the time the ruling was reserved.

(c) After Jury Verdict or Discharge.

(1) Time for a Motion. A defendant may move for a judgment of acquittal, or renew such a motion, within 14 days after a guilty verdict or after the court discharges the jury, whichever is later.

(2) Ruling on the Motion. If the jury has returned a guilty verdict, the court may set aside the verdict and enter an acquittal. If the jury has failed to return a verdict, the court may enter a judgment of acquittal.

(3) No Prior Motion Required. A defendant is not required to move for a judgment of acquittal before the court submits the case to the jury as a prerequisite for making such a motion after jury discharge.

(d) Conditional Ruling on a Motion for a New Trial.

(1) Motion for a New Trial. If the court enters a judgment of acquittal after a guilty verdict, the court must also conditionally determine whether any motion for a new trial should be granted if the judgment of acquittal is later vacated or reversed. The court must specify the reasons for that determination.

(2) Finality. The court's order conditionally granting a motion for a new trial does not affect the finality of the judgment of acquittal.

(3) Appeal.

(A) Grant of a Motion for a New Trial. If the court conditionally grants a motion for a new trial and an appellate court later reverses the judgment of acquittal, the trial court must proceed with the new trial unless the appellate court orders otherwise.

(B) Denial of a Motion for a New Trial. If the court conditionally denies a motion for a new trial, an appellee may assert that the denial was erroneous. If the appellate court later reverses the judgment of acquittal, the trial court must proceed as the appellate court directs.

Rule 33. New Trial

(a) Defendant's Motion. Upon the defendant's motion, the court may vacate any judgment and grant a new trial if the interest of justice so requires. If the case was tried without a jury, the court may take additional testimony and enter a new judgment.

(b) Time to File.

(1) Newly Discovered Evidence. Any motion for a new trial grounded on newly discovered evidence must be filed within 3 years after the verdict or finding of guilty. If an appeal is pending, the court may not grant a motion for a new trial until the appellate court remands the case.

(2) Other Grounds. Any motion for a new trial grounded on any reason other than newly discovered evidence must be filed within 14 days after the verdict or finding of guilty.
