

Maloid vs Texas NO. 23-7193

Petition for a Rehearing

I waited 2 years for May 20th 2024 to get here, to just get an opinion from a justice about my first amendment claims and didn't get not even one, I was just plain ~~out~~ denied. That hurt my stomach more than the sour milk we drink in prison, it hurt as much as waiting a year for another parole hearing and being denied especially when you have a fair argument that should be settled by this court; The state of Texas won't give anyone a fair shot at anything so I really need my claims to be settled by this court.

A rehearing should be granted because all around the world prisoners and probationers have been affected by the *Packingham vs North Carolina* decision thinking that we have a first amendment right to access social media while under supervision, one of the most important and very first motion to adjudicate was because I was using social media I kept using it because I thought it was OK because of The 2017 *Packingham* ~~others~~ ruling, me and so many others have made the same mistake which led to incarceration, its very unclear and unsettled I don't have a need to file a Federal habeas because its not clearly established federal law and the court can settle the first amendment claims.

and settle this once and for all, my court reporter record that I sent shows that the lower courts had problems with the claims it was up and down up and down, United States v Eaglin ^{913 F.3d 88} states and backs the Supreme Court ruling in Packingham, in Eaglin United States Court of Appeals for the Second Circuit; In light of our precedent, and as emphasized by Packingham's recognition of a First Amendment right to access certain social networking websites, the imposition of a total internet ban as a condition of supervised release inflicts a severe deprivation of liberty" and this case was remanded, Can I get an opinion from at least one Justice??

Everyone is silent on my case except for the prosecutors who ~~combative~~ ^{argues} makes no sense who ~~walks~~ ^{take} the right to argue against me to the United States Supreme Court.

I'm asking a Justice of this court to suspend the previous denial of Writ for Certiorari¹⁰ and give me a rehearing please. Or just to reverse the decision of lower court just flat out reverse it without a rehearing, I present this petition in Good Faith and not for delay honesty and true, I pray that this court take the time for consideration.

Jared Maloid
