Yes, I agree with what Jesse wrote below. I would add that the 30 day before and after applies to DelDOT maintained roadways. I also included some information that DelDOT has provided. Hope this helps.

All the best,

Bo

Investigative Narrative

On May 13, 2020 at approximately 1151 hours, I was dispatched to respond to 34012 Shawnee Drive Dagsboro Delaware in reference to a non criminal complaint. Upon arrival, I made contact with RP-Meghan Kelly who advised me that she put up political signs in her yard which face the roadway. RP-Meghan explained that she had written authorization from the HOA president that she could place the signs in her yard. When RP-Meghan placed a large banner in her front yard, she was confronted by her neighbor PC-Frank Bolen. RP-Meghan advised me that PC-Frank yelled at her and told her to take the sign down because it was disgusting.

I made contact with PC-Frank at his residence across the street from RP-Meghan's residence. PC-Frank said that RP-Meghan is crazy and he hated her signs because they were a disgrace. I advised PC-Frank that he needed to ignore RP-Meghan and any political signs she puts up in her yard. PC-Frank acknowledged my request and advised me that there would be no further issue today. No further police action was taken by this department.

Troopers Investigating Shots Fired Complaint- Camden

Camden – The Delaware State Police are investigating a shots fired complaint that occurred last evening.

The incident occurred on April 22, 2020, at approximately 9:14 p.m., when Troopers were dispatched to the 9000 block of Willow Grove Road, Camden, for reports of shots fired. Upon arrival, contact was made with the two victims who reside at the residence. The investigation revealed the residents were sitting inside when they heard gunshots coming from outside. After hearing the shots, they discovered a projectile hole in the wall above their heads. A search of the area conducted by Troopers located shell casings outside the residence and along the roadway. No one was injured during the incident.

Anyone with information regarding this incident is asked to contact Troop 3, Criminal Investigations Unit, Detective D. Blomquist at (302)697-4454. Information may also be provided by calling Delaware crime stoppers at 1-800-TIP-3333 or via the internet at <http://www.delaware.crimestoppersweb.com>

If you or someone you know is a victim or witness of crime or have lost a loved one to a sudden death and are in need of assistance, the Delaware State Police Victim Services Unit/Delaware Victim Center is available to offer you support and resources 24 hours a day through a toll free hotline 1800 VICTIM-1. (1800 842-8461). You may also email the unit Director at debra.reed@state.de.us.

5. Meghan Kelly's redacted undergraduate college transcript to show she took relevant courses related to

- a. History of Western Medicine
- b. Economics
- c. Medieval Philosophy
- d. Psychology courses

6. Evidence of the surgery that inspired me to study healthcare issues.

Due to the surgery referred to therein, I am (self) required to drink water, rest, exercise and eat. So, I do not faint or die due to dehydration when I have my period. I lose five pounds of water weight every month. This is still a challenge. I must assert my right to live because many people serve Satan by hardness of heart. Many do not want to be inconvenienced to care, to adapt to safeguard the lives and health of others, including my own. I am a child of God. My body is not my own. I am commanded to be holy because God is holy, to care for and treasure my body, and the lives and health of others too. "I am not my own." Other people are loved by God too.

Guest Column

Representative candidate says health is wealth

By Meghan Kelly, Esq.
Candidate, Delaware House
of Representatives, 38th District

My name is Meghan Kelly, Esq. I am a candidate for the House of Representatives in the Nov. 6 race in the 38th District. I am running, in part, because I have a desire to draft laws to create better health care for Delawareans, and I want to persuade the federal legislators to draft specific legislation to reduce the price of care instead of eliminating care to those who need it most by rendering it unaffordable.

I am uniquely qualified to propose solutions in this area as an attorney who studied the history of medicine at University of Delaware, and health care finance and health care law at Duquesne School of Law School. I even received a small scholarship for healthcare law.

So, I thank you for your kind consideration, as I truly care about serving the people in the community I grew up in, and love and protecting their life and health.

This week, I will write about improving health care concerning the state of Delaware. Next week, I will submit a suggestion to our federal legislators regarding making health care more affordable. Instead of reducing the

amount of care, I respectfully urge our federal legislators to reduce the price of care. Only they have the power to do so, I will not.

In Delaware, I specifically want to draft legislation to improve the quality of health care, instead of merely getting massive bad care. Funding is more easily received when health care entities and professionals are researching cutting-edge techniques, which is dangerous for patients since they are still working out the kinks.

Think of the National Institute of the Health (NIH), charities who accept funding from the army and NIH, and private research or health care entities who make money on analysis. So they can use patient's records to sell alleged health care miracles in bulk, based on data. Part of the HIPPA waiver we sign at each doctor's visit allows our information to be used in this scientific research. So, patients may be lawfully used as lab rats.

I want to draft legislation to prevent the abuses we have seen by doctors like Dr. Earl Bradley, who allegedly molested hundreds of children; repeal the involuntary sterilization statute; and make it easier to prevent doctor and health care abuse of patients for a buck...

I want to prevent doctors from prescribing addictive drugs under the facade of benefiting the patient, but in truth to benefit their own pockets, to keep patients coming back for prescriptions for their addiction, not for good health.

I want to stop doctors like the local Delaware doctor who used cutting-edge treatments, hip replacements, on people, including my father. He said everything was fine for years, despite readily available information to the contrary, to cover his own back, instead of serving the patients like my father, the legendary retired teacher, lifeguard and coach Pat Kelly of Indian River High School.

No care is better than bad care. Thus, I desire to create legislation to ensure our health care providers are taking care of the patients, not taking advantage of the patients for profit. Our laws serve money — not people, not patients.

I want to create laws that penalize health care professionals for drugging the elderly at the elderly homes to make them easier to tend, like vegetables. We need to value and respect our elderly, (not keep them in an institution for our convenience). These institutions should

Kelly

Continued from page A14

be developed to serve and respect the elderly, not take advantage of them for a profit.

Now is the time to value human life and health more than money. Now is the time to hold health care professionals accountable for their bad choices to harm instead of heal patients.

I desire to repeal the involuntary sterilization statute in Delaware under Title 16, Chapter 57 of the Delaware Code. There is too much incentive to sterilize people to use their stem cells for profit and research, instead of a alleged need. Besides, the fact is sterilization is barbaric and arguably violates Delawareans' right to life, liberty and pursuit of happiness, despite the United States Supreme Court decision in Buck v Bell, 274 US 200 (1927).

I desire to amend the medical mal-

practice act. It is very difficult to correct doctors under this act. In Delaware, a patient has two years from the date of the medical provider's misconduct, if a patient is younger than 6, until the patient's sixth birthday. The time may be extended in limited circumstances — for instance, if a doctor left a foreign object in a patient's body.

In addition to the short statute of limitations, in Delaware, you also need to get another health care professional to give an expert opinion concerning the malpractice of the medical provider. This is very tough to get because doctors do not want to give an opinion against a peer when they know they are capable of mistakes or a sloppy job, too.

The requirements of the expert opinion are also hard to meet. So, a lot of lawsuits are kicked out for failure to adhere to the requirements. For instance, if an expert says the doctor's act was a substantial factor in causing the harm, the opinion will get kicked out. In

Delaware, the expert must state the "but for" the doctor's conduct the harm would not have occurred.

Overall, if a doctor messes up on you, you most likely will be out of luck. The longer you wait to pursue legal relief, the tougher it will be for the attorney to find an expert required to have a case.

It is important to correct doctors, as the treatment they provide may harm other people for life or kill them. Since it's so difficult to sue, it's hard to prevent further harm by showing how certain treatments make people worse off. That's why we must amend the medical malpractice act in Delaware. We must prevent further patient harm and deaths.

By electing me you will be electing a candidate that will fight for your life and health. You are priceless — more valuable than all the money in the world. By electing me, you will be electing someone who serves people, not greed.

**Your Health is Your Wealth
You are Priceless. Not a price Tag!**

Kelly seeks Federal Consideration of Health Care Proposal

My name is Meghan Kelly. I am an attorney running in the November 6, 2018 race for the House of Representatives seat in the 38th District, which includes Bethany Beach, Fenwick, Millville, Frankford, Ocean View, Selbyville and parts of Dagsboro.

I am running, in part, because I discovered I had a deep passion to change the laws to better serve people. I have had the opportunity to review proposed laws for more than ten years, starting at Richards, Layton and Finger, PA. I have proposed comments on legislation to other attorneys in different bar sections, such as Corporate Law, E-Discovery, Personal and Real Property. Each section votes by majority. Unfortunately, I always get voted out since I tend to seek what serves Delawareans better, instead of what is convenient and profitable to our own practice. So, I continued to look at alternative ways to improve the laws.

I made calls to legislators, met with people, sent emails and letters in an attempt to amend the laws. Unfortunately, I was not successful. Yet, every time I observed corruption, abuse or misuse of power, my desire to improve the laws grew stronger. So, I found myself paying the filing fee to run for office. So, here I am.

I am running for a state legislative position. Nevertheless, the point of this letter is to discuss a suggestion relating to affordable health care that I submitted to our **federal legislators and President Trump's Delaware liaison, Councilman Rob Arlett**, in an attempt to gain their kind consideration at the federal level. Only the federal legislators will be able to address this issue, I will not. I am printing parts of some emails I sent to Rob Arlett in hopes the **federal officials** will reduce the price of health care instead of eliminating care to those who need it the most by rendering it unaffordable.

"...President Trump's initial idea was brilliant. Focus on reducing the cost of care instead of indirectly eliminating care, due to the astronomical cost. I understand your concern about appealing to emotion, but I believe people will die if they cannot afford care, just like many did prior to 1986.

Prior to 1986, Emergency Rooms ("ERs"), were turning away pregnant ladies and people in need of immediate care, due to their lack of insurance and inability to pay. Babies had complications, lots of pregnant moms died. It created public outrage.

So, Congress enacted Emergency Medical Treatment & Labor Act (EMTALA) in 1986, by using its power under Article 1 Section 8 of the Constitution, (the spending power), to require all hospitals with Emergency Rooms accept all patients regardless of their lack of insurance and inability to pay. Congress attached strings to such entities, by requiring the ERs accept all patients if they receive any Medicare or Medicaid, or be penalized financially.

Similarly, Congress can create price ceilings for drugs or health care for any entity receiving Medicare and Medicaid. This will extend to uninsured people as well.

The National Institute of the Health (NIH), is another vehicle the federal government may use to

implement President Trump's initial plan. This entity provides grants and subsidies for drug research. The Federal Government through basic contract law may condition the acceptance of such money upon the drug company's agreement to price ceilings. Should the drug company not honor such ceiling, they may draft a provision requiring the company to pay all such money back in addition to a penalty." (citation to email omitted). Medical providers may still choose to reduce the price of care to stay competitive. The price ceilings prevent entities from rendering people worthless or too expensive to care for.

"Instead of indirectly taking away care from people who cannot afford it, let's make it more affordable for people. So, like you said, Americans can assume more responsibility and autonomy in their own care.

Artificial entities without hearts care more about the bottom line than those they serve, unless caring will affect the bottom line. Congress has the ability to affect the bottom line to reduce the cost of healthcare instead of eliminating care indirectly by making it unaffordable.

Healthcare is an inelastic good, a necessity, meaning no matter how rich or poor you are, you would probably give all you had, including your home, to pay for care to save the life of your child, a loved one, or even your own life. The demand does not change with price. This is an exception to normal market theories of supply and demand dictating prices. Artificial entities will get as much money as they can, at the expense of lives.

The board members are far removed from those they serve. They most likely are thinking about how they can afford to pay for their kid's schooling instead of the individuals they serve. Since they are focused on the bottom line," please use your power federal legislators to affect the bottom. (citations to email omitted). Only you have the power to do so, I will not.

The federal legislators have Medicare, Medicaid, NIH and other mechanisms of federal funding to use as bargaining chips. They should use the bargaining chips to reduce the price of healthcare (and improve care), instead of threatening to reduce Medicare, Medicaid, or take those chips away. What will they have left to bargain with if they take everything away.

Thank you for your kind consideration.

TRANSCRIPT LEGEND

ACADEMIC YEAR
 The University follows a semester plan. In addition to the summer semester, a 5-week spring semester and a 7-week summer semester are held. The unit of credit is the semester credit hour which is generally based on one period (50 minutes) of lecture, laboratory or other sessions. For other sessions, the number of sessions and/or number of students per week is also determined to show equivalent time spent to that of a regular semester.

Unearned credit hours are awarded in a grading system according to Fall 1991 Final Grades.

GRADE
 A Excellent
 B Very Good
 C Good
 D Fair
 F Fail
 W Withdrawn
 I Incomplete
 NC Not Completed
 S Satisfactory
 U Unsatisfactory
 P Probation
 R Readmitted
 L Lapsed
 C Canceled
 X Expulsion
 * Denial of readmission

TECHNICAL GRADES
 1 Honorable
 2 Satisfactory Progress
 3 No Grade Reported by Instructor

POSSIBLE NUMBERS
 001-499 Other degree courses
 100-199 Interdisciplinary courses
 200-299 Undergraduate certificate courses
 300-499 Graduate courses
 500-599 Ph.D. level courses

GRADE
 Grade average is calculated at the University of Delaware only to those students who are presently registered or formerly admitted students in a graduate program.

DISCHARGE SUMMARY

FINAL DIAGNOSIS:

Serous cyst of the left ovary with torsion.

HISTORY: She is a 17 year old white female, Gravida 0, Para 0-0-0-0, whose last menstrual period was early October 1995. She was admitted for an exploratory laparotomy because of a large cyst in her left pelvic adnexa. She had abrupt onset of left lower quadrant abdominal pain on the morning of admission. She also had some nausea and vomiting.

PHYSICAL EXAM: She is a healthy white female in some distress. Blood pressure was 110/64. On the abdominal exam, the abdomen was flat, soft with hypoactive bowel sounds. Pelvic exam - The vagina showed normal mucosa. Cervix showed no inflammation. The uterus was midline and felt small. Adnexa on the right side was negative. The left side showed a large, irregular cyst. Rectal exam was confirmatory.

LAB DATA: Admitting CBC shows a hemoglobin of 15.2 gm/dl, hematocrit 43.3%. Serum pregnancy test was negative.

HOSPITAL COURSE: The patient had an exploratory laparotomy on 11-1-95 with excision of a large cystic left ovary plus the fallopian tube, both of which had torsion at their base. Postoperatively, the patient's hemoglobin was 12.9 gm/dl, hematocrit 35.5%. She had a normal postop course and was discharged on 11-4-95 to return to the office in two weeks.
