parent or person acting as the parent is part of the period.” Further, when TN gave jurisdiction to OK they also indirectly held it, making final order difficult to understand, by a disclaimer quoting TCA 36-6-222 “inconvenient forum”, with TN being the obviously convenient forum, that being the incorporated “upholding” of *UCCJEA Statute Definition of Home State Between States* concerning the majority of dissolved family's members in determining home state jurisdiction.

- EXHIBIT 1Z7 Proof of erased/changed Tulsa District Court Docket Entry on Feb 19, 2003, as the only evidence of the ordering of the divorce and granting from the bench in 2003 is the OK Supreme Court Order, which memorializes it. Later it was alleged we filed decree of divorce that day, but we did not file it, what we haggled over in mediation and so that is a lie. The only parties privy to that would have been present at mediation and much later changed the docket sheet, as the first appealable order to argue jurisdiction wasn't until February 2004, as evidenced in first appeal to Oklahoma Supreme Court, not February 2003. It was only granted from the bench and memorialized in later orders that memorialized it.

JURISDICTION

For cases from federal courts: (primarily)

The date on which the United States Court of Appeals decided my case was 1/21/21.

No petition for rehearing was timely filed in my case.

A timely petition for rehearing was denied by the United States Court of Appeals on the following date: _____, and a copy of the order denying rehearing appears at Appendix _____.

An extension of time to file the petition for a writ of certiorari was granted to and including _____ (date) on _____ (date) in Application No. _____ A _____.

The jurisdiction of this Court is invoked under 28 U.S.C. Squid 1254(1).

Note- We are seeking expiation for denied Justice under DOJ, HHS, IRS-DOT, O Other Federal Bureaus and Federal Contracts of UIFSA and UCCJEA Child Support and IRS issues as those are Federal laws not State laws, and because of the multiplicity of the issues, cannot be sorted individually, but are 7 distinct grievances as previously plead and enclosed.

For cases from state courts:

The date on which the highest state court decided my case was 5/3/04; 2/23/18; Oklahoma State Supreme Court both decisions. A copy of that decision appears at Appendix B Exhibit 1T and 1W. Note- At this point, the issue is not that we want to remove jurisdiction from Oklahoma, but to point out the erroneous Jurisdiction decision, and to be awarded expiation for damages that resulted as a result of stolen Jurisdiction over almost 20 years. The parties are divorced and the child has reached the age of majority.

A timely petition for rehearing was thereafter denied on the following date: _____, and a copy of the order denying rehearing appears at Appendix _____.

An extension of time to file the petition for a writ of certiorari was granted to and including _____ (date) on _____ (date) in Application No. _____ A _____.

The jurisdiction of this Court is invoked under 28 U.S.C. Squid 1257(a).

Note- At this point, the issue is not that we want to remove jurisdiction from Oklahoma, but to point out the erroneous Jurisdiction decision, and to be awarded expiation for damages that resulted as a result of stolen Jurisdiction over almost 20 years. The parties are divorced and the child has reached the age of majority.

(PLEASE review any exhibit enclosed, as enclosure suggests importance on other issues as well, as many are intertwined, and the review of documents included as exhibits contributes to overall understanding of the case. I am very disappointed I could not force the agencies and courts to fulfill subpoenas, and am hoping that you have a way to access that information. I do realize that research isn't your job, but I cannot force them, and they have totally disrespected federally issued legitimate subpoenas. I can't do any more to make them not withhold evidence that is legal. It would be wonderful if you could enforce the subpoenas or issue your own, so that the evidence file is complete and the case stronger and more complete, and Justice is found and error reprimanded and others saved in our great country from errors and potential errors in courts and agencies and departments that don't follow law regarding subpoenas or even citizen's rights to their own records!!!!)

STATEMENT OF CASE

This case is about facts not feelings. When in the light of tyranny and abuse of power, we the people are afforded the right to restitution and damages peaceably. When the government, especially the judicial government is corrupt, and does not follow it's own local laws, state laws and federal laws, it violates the rights of the United States of America, it's Constitution, and everything we the people have fought for, FREEDOM, which is always essentially abuse of power, including the current issues of a progressive and modern society, ability thereof. We have been violated by corrupt judges and courts and agencies on the local, state and federal levels. On the federal level, initially alleging 7 distinct grievances. The grievances have been against mother and child, right to freedom and justice from aggravated assaulter with child in utero by Judge Darlene Crutchfield, forced prostitution of heart and body by Judge Clifford Smith for a new breastfeeding mother to see and not be separated from new baby and tender small child, unordered financial protection of alimony in pregnancy of marriage, unordered financial protection of mother and child in utero in the form of pregnancy support in subsequent pregnancy after bench ordered divorce of February 19, 2003, aforementioned prostitution of heart and body, hate and prejudiced judgments from the benches for setting forth of any rights, as "unable to get along with and the problem", the mother being less than 1% Greek/Italian and less than 1% Malian African, and a suspected Jew, but that Germans put Jews in ovens, the Germans can "smell" Jewish blood, African American blood, and also, some feel that way about Greek/Italian blood, as burnable, gasable, hangable, bodies all in one grave trash. This is a specific allegation towards not only all the judges encountered in person, as the unfavorable rulings consistent and without aggravation except request of rights gently, were perhaps possibly because of sexism, but especially provable in the example of Judge Owen Evans, who in 2018 at trial, in which the male aggravated assaulter of pregnant mother and child, who was allowed the right for 20 years to file in his home state any allegation at whim by actions of Darlene Crutchfield, Joe Morris, Oklahoma Supreme Court, all three being in direct violation of UCCJEA federal law, alleged the refusal of the mother to allow Christmas visitation December 2015, in an Emergency Order, opening in effect a closed and still case previously litigated at length, which resulted in pro se financial losses to myself from 2015-2019, including loss of Jubilee prayer and pilgrimage to Israel, something could barely but could afford, for prayer, and had fasted 40 days to attend, and the aggravated assault abuser, never brought to criminal court, but allowed to harass in any way possible, found in his heart to destroy. If you think white males of German descent cannot "smell" other races, you are very wrong. It is racism, a spiritual thing, and although there is separation of church and state, it is a religious issue of demons. Nevertheless, in the United States of America, we call it racism, genocide, and sexism. The United States of America has violated it's own UCCJEA, UIFSA state child support laws, IRS laws to protect primary custodial parent, ignored the criminal actions of provable aggravated assaults of mother and child in utero, not providing safety to mother and child or society at large, subjecting the mother and her family to financial devastation and hardship, as well as physical danger at the hands of aggravated assaulter, and empirically proven stress and physical trauma. The United States of America must pay for that. After almost twenty years of UCCJEA law dismissal, of home-state jurisdiction being where the majority of family was, 2 of 3 or 3 of 4, both numbers being easily addable to majority were in TN, not OK. The United States of America gave jurisdiction to OK. The United States of America cheated the mother of alimony, pregnancy support in utero of unwed mother and child in utero, and also halved her child support for almost 18 years in violation of it's own state laws, TN and OK being comparable. That is violation of federal UIFSA and state child support laws that are not and should not, but in practice obviously occur, be negotiable even by parental consent under duress and in this case forced to do so in

order to escape aggravated assaulter in a prostitution of heart and body situation, so mother could help with confused and tender and failing potty training of child, because of emotional instability to the child ordered by courts regarding the joint custody ordered by Judge Clifford Smith in around February 14, 2003, ignoring the aggravated assaults and criminal actions, and the mother and child, in which the father said he would not allow them to leave without agreeing to those illegal terms, the mother and child needing the required and lawful protection of the family law courts according to UCCJEA and UIFSA standards, but not afforded any protection or upholding of the laws already put in place that significantly help the economic and financial situation of mother and child. The United States of America took her IRS child tax dependency credit every other year, awarding to the father who never visited or saw his child at length long, provable and proven before later Judge Owen Evans in 2018 trial. Judge Owen Evans awarded father IRS offset of child support already approximately halved from child support computation, because of claims father made that because the IRS didn't award him his IRS child tax credit, then he shouldn't have to pay halved child support of approximately 3-4 months. That is blatant UIFSA and IRS violations. All these trials at expense of mother and child in OK from TN at her expense, a blatant UCCJEA violation, as the majority of the "family" resided in TN. Bottom line, after years and years of continuous unfavorable rulings, judgements against for no known reasonable reason, the mother suffered 3 seizures, her body completely gave out, and the United States of America is responsible. Those three seizures occurred in 2018 March and May, before 2018 trial regarding allegation made in 2015, never proven, and never justified, the Judge ignoring her requests for financial remuneration so she could go to Israel late. That is racism, not sexism. Those three seizures required over two years of neurological testing and also one year of physical therapy, as nerves overcircuited and episodic epilepsy was the result. There were 3 ER visits, in which the doctors search for different things, giving antispasmodic drugs at each visit. Those three seizures were stabbing, acute and throbbing. They resulted in loss of hand function and foot and calf sensitivity. There is no EMG of nerve damage made at that time in 2018, but almost a year later, after a year of physical therapy, there was still measurable nerve damage, empirically proven in evidence of exhibits, in the right hand and right sural calf. There were 2 MRIs given to find or rule out Parkinson's or any other neurological disorder. I could not push my body up with my right arm, my right hand began to draw up when not in pain and it had to be forced back into alignment. The nerves did grow back and function was restored, mostly in part to my personal will and determination. But that is not the case in many others oppressed. One thing that has moved me to not stop in this fight has been a lady at the child support enforcement office in the State of TN, who I had never met before, who following a meeting I had there, in which I threatened nothing, followed me downstairs, and spoke with me, explaining, now I know why, how that there were women raising children with \$10 a month in child support in the United States of America. About 5% of USA population is in limbo in child support and divorce law courts any given time. How can the federal UIFSA demand states provide child support, so the government is not solely responsible for every child in an unwed or in a broken family in the department of HHS, and there be forced federally and state child support laws, but the courts and child support enforcement agencies do not enforce it? I can only state my case, but the gravity of the issue is much more far reaching than just myself and my daughter and family. It is abuse of power. The United States claims to protect it's citizens but in practical effect, does not do so. So for following the law for almost twenty years, my reward was stolen rights to putting aggravated assaulter behind bars, stolen jurisdiction which resulted in heavy cost, stolen alimony, pregnancy support, IRS child tax credit rights, child support computation rights, continued allowed abuse in the form of continued litigation over duration 2001-2020, stolen Jubilee in Israel which occurs once every fifty years, no recompense for false litigation accusations or remuneration of any kind for excessive litigation against, and the pain of three episodic seizures which could easily have ended in complete loss and deformity of writing or use of right hand and foot. And forced prostitution of heart and body for child, as the insanity of the child was not an option to the mother, which is absolutely unrecompensable, and beyond the value of \$900

million expiation in all, \$300 million for child in utero, as requested in federal court filing regarding 7 Grievances, and the forced prostitution of body and heart by the court is ultimately in the hands of God's eternal judgment. We demand satisfaction from the United States of America for these grievances against us, as United States of America citizens, our state, federal and constitutional rights not awarded, with such bias and such affliction that to have suffered losses including that of empirically proven episodic epilepsy, never before and never since, as a result of the oppressions of the United States of America's actions against mother and children. We respectfully request the hiding of the issues of prostitution acts and privacy of social security in any pleading or document made available to public and in judgment.

REASONS FOR GRANTING THE PETITION

Reasonings for anything are essential. Let me begin by saying that I respectfully request this court to grant us the justice and relief we have repeatedly and consistently requested once at Federal level. I believe in our country, and the due process of law, and I have not given up faith and hope that our country cares for us still and will do the right thing by us.

Reasons are:

1. Fear of the Lord, and although many do not claim faith, or that it should enter a government and judicial arena, all of my God is Truth and also Fear of the Lord as in we are all subject to one another in faith, and love, and caring for our neighbor, and being active to fight injustice where we find it. Further, the United States of America is fundamentally a Judeo-Christian nation, always has been since colonization, and will remain so. As in the majority of it's citizens claim a Jewish or Christian or Judeo-Christian faith of some branch or denomination. The Fear of the Lord abhors evil, and runs to Truth, quickly and plainly, perhaps in debate, to see all sides and to discern the Truth from every angle, yet, Truth is Truth. It is the responsibility of the United States to make wrongs right, to it's citizens, and to follow Constitutional Law, and what I have been through and subjected to as a USA citizen, without equal rights to standardization and Justice is wrong, and deserves an apology in the form of economic restitution according to the value of myself and my daughter who were both robbed of rights to criminal protection from aggravated assaulter.
2. The Supreme Court is the endall for lower courts. They have no master other than the Supreme Court and God Almighty. Therefore, noone suspects a little person to file to Supreme Court, and they think they can run over everyone at their will. I would not be complaining to you and wasting your time, if our rights had not been REPEATEDLY ignored. It's almost as though I have no choice and still keep my head up. I hate strife. I was a sincere and faithful wife, a sincere and faithful mother, a sincere and faithful citizen; I am an evangelist, hopefully still now, and my name is not smut by filing this, as the heart and body prostitution acts are very embarrassing to me and I am sure my family as well. Again, I respectfully request privacy of those sensitive issues. But my life has been ruined by actions of the United States of America courts, judges and agencies for almost twenty years, economically, socially, and physically harmed by abuse endured and seizures in 2018. Those records from St. Francis, listed as exhibit, cannot rule out an anterior heart attack, and my BNP levels more than doubled, a heart attack being 400, not 227. I believe I had seizures, but regardless, it is not right to put citizens through such when the law protects them clearly in Federal UIFSA and UCCJEA statutes. Further, the 2015 reopening of a case, without proof, simple proof such as an email or proof of attempted communication of visitation request and the denial thereof, on a lie for panicked "Emergency Enforcement" modification, is like me saying, "I turn Sally in, she killed Michelle Obama yesterday!", and the courts believing it, and arresting Sally while Michelle Obama standing there alive. It's utter madness. Opening a closed, still as in quited litigation after much litigation prolonged, covenant/contractual case, and destroying me for 4 years, robbing Jubilee, just because they can. Again, those grievances are all listed, but it is grievance after grievance after grievance. The lower courts and child support enforcement are madness. Point 2 reasoning is that the Supreme Court must govern the lower courts, as well as federal agencies, most importantly when they are in violation of blatant

federal laws and statutes that are enforced supposedly by UIFSA child support enforcement, UCCJEA child custody between interstates, and Department of Homeland Security, which deals with the safety of the United States citizens and the uniformity of respect between states on federal issues that are designed not to take away the rights of the states, but to enforce laws that make this the United States of America. Examples are such as IRS computation of child tax dependency credits standards mandatory and the standardization of child support enforcement mandatory according to each individual state's guidelines and most importantly, the separation of the criminal court from the domestic law court, and the refusal to roll criminal issues like aggravated assault into an atmosphere of family and domestic law "he said, she said", belittling the crimes as anger and retaliation between exes, which doesn't make sense, because the filing of divorce in my case came after the aggravated assaults I have listed here, and subjecting the nation and internationally to violent offenders who should be in prison. I have told you, so it is in your hands. Please mention, admonish and enforce laws already put into place to protect USA citizens. Many single parents do not have the energy to complain to you, do not know they can, do not believe they can, and most children have no idea they are entitled to more than dollar general cereal every other week in child support. But that lack of enforcement problem issue I am raising now, is why you have youth who raise themselves, lack energetic tutorage from the primary parent who overworks to stay afloat, and why your crime and violence stats are so high. Many young people, their fathers are the judges who put them behind bars once they have committed a crime, and that is their positive discipline and guidance in this life, their natural birth father nowhere to be seen and child support unenforceable. Our crime stats are more than 5 times as high as Europe, and cities like New Orleans and Memphis are very murderous statistically. When I complained of assault, repeatedly, referring to Vintage on Yale incident in which the aggravated assault involved a hot iron, the police came later, saw it, gave my ex husband and I 24 hours to separate. He admitted it. They did not arrest him or anything. Tulsa has high crime stats for a midwest city. At trial in July 2018, the morning of, as my daughter and I were staying in a hotel room in a good area by the mall on 71st St, my car was broken into and the windows smashed, the morning of trial! You must do all you can to get crime under control in this country. I fear because of lack of border control and military and caribbean hostilities and bad governments, influx of cocaine, and that our nation will become addicted, cocaine eating up our youth, and our roads unsafe by cokeheads. My daughter is precious, a premed student now at Union University, having survived COVID and it's hurdles academically, and what if after all we have been through, she refuses drugs and a car with a driver on drugs hits her? My great uncle was killed by being hit headon by a hopped up on vet anesthesia driver and killed and one of his young twin granddaughters died with him. I am totally cheating and taking this rare opportunity to share my concern and in prayer for us as a nation, Democrat or Republican, we must enforce DEA and immigrations filters and dismiss corrupt DEA and immigration, remembering cocaine is a \$500 billion dollar business, and some people can be bought. Back to my case. My case is an example of others who have been robbed from, either because of sexism or racism by the judges themselves, who often judge women as too emotional and unstable or men and women by race and income. That is not the love of a family. Most of United States of America is not New England, progressive in racial and sexist issues. Those issues become difficult to prove, but the lack of reason remains, and that is the proof of a bias that is ill. So the Supreme Court of the United States must uphold, admonish and enforce the Constitution, the Federal Laws UIFSA and UCCJEA and IRS et al, and interpret law that reveals bias in state and lower courts. I am begging

you to do so in the issues I have raised before you, small or great, as the ends never justify the means, meaning we cannot live where there is no Justice. I have been economically devastated. Right out of college, with a great future, for no reason. And the laws set in place to protect me were not laid out to my exhusband that he had to follow strictly, but my children became pawns and negotiating pieces for relinquishment from financial duties he had and rights afforded to me by law, when interpreted and enforced strictly. Rather, our criminal case against him in OK was rolled into family law, by order of consolidation, NOT BY AGREEMENT, that is a lie from domestic law judge Darlene Crutchfield, I wasn't even there, and my baby was due in a few weeks, and we were filing in TN, jurisdiction being there, where children were born safely, see exhibits, divorce to be legally filed there, and then while breastfeeding newborn, OK assumed jurisdiction in blatant violation of UCCJEA Federal law, warrants were issued for my arrest in OK by Darlene Crutchfield, stealing my right to joy under Amendment 14, and causing undue stress to mother and child, and then the entire criminal case was dropped on a technicality of hired lawyer in Tulsa facilitating the criminal trial in the then domestic law court, and advising of jurisdiction in TN, not showing up for a hearing. So it was as though the assaults never happened and they subjected me to my abuser for almost twenty years forcing me to share custody and visitation rights with someone who obviously did not want it, according to his actual record of visitations also in this filing as exhibit and admitted to in court in July 2018 on record. Those Tulsa District Court subpoenas were not responded to, to be provided to you as relevant evidence for you, as I was ignored after sending federal issued subpoenas according to their instructions. We would make plans and he would not show, or change at last minute, or never request, leaving my daughter to wonder if he was coming for his weekend. It has been abuse for years. An assaulter is someone who is an abuser. They will continue to abuse in any way they can. How do the judges NOT know that? Why would they subject us to him and no money for years and years and demand trial after trial and hearing after hearing in OK, upon pains of arrest or loss of custody, which requires financing of transportation additional to visitation, legal fees if can afford, a safe hotel stay expense and costs of fees and fines to even be pro se and loss of income from employment, if able to hold a normal job with the plethora of legal activity. The case is found at oscn.net and there are three under Duncan and Johnson, one is a protective order case from around 2001-2002, which was rolled into domestic law and dropped, no justice of criminal prosecution being made available to victimized mother and in utero child whatsoever, so that OK could maintain jurisdiction of father's filing for divorce illegally, forced by his attorney Lynn Worley, but in Truth the criminal case could be tried in OK and the divorce law in TN, as they are separate issues. And that is the legal thing to do under UIFSA and UCCJEA law. Another on oscn.net is the lengthy divorce and litigation I endured without any recompense FD-2002-728, and the third is my son, born out of wedlock, who they had no right to, whatsoever, but they filed a case for. That case is an exhibit in this document as attached evidence and the protective order is federally subpoenaed information that the Tulsa police refuse to give to me. All that is violation of Amendment 14, it is irrational, it becomes impossible to ever buy a home or remain afloat. I have leased purchased repeatedly and worked two jobs at once to keep my head above water and raise my children the best I could, and love them both dearly, although we lost one in an accidental drowning. I have nothing financially now. No savings, not money for Israel, no money for charities I love, no clothes, no decent supplies, barely enough for food, and no home, living with my parents splitting rent. I hold a BSBA from Oral Roberts University and a license in cosmetology, and I care for two sick parents who need more help than Medicare will

afford them. I homeschooled my daughter since third grade also. She graduated class of 2020, amidst COVID pandemic. I have not burdened the public school system, and aside from the seizure's care I endured at the hands of evil ex and evil judges who allowed it and also not recompensing once discovered the Truth of false allegation of denied 2015 Christmas visitation, which opened the whole closed and still case to begin with, very rarely ever needed socialized medicine. When courts do not follow the law, it hurts people like me. Irreparably without a filing such as this. Judges have GOT to enforce full child support according to federal or state child support computation guidelines, for each and every child, whether the father has parental rights or not, and that can't be offset because it is used to finance primary parent's mortgages and maintain budgets, IRS child tax credits to primary parent according to law as tax software does not always allow for a split of that if the primary parent had the child 12 months or the majority of the year, standardized alimony computation based on net worth and length of marriage and standardized computation pregnancy support for mothers with children in utero, wed or not, and that none of those things can offset child support, or one another, all separate issues, and if paternity in dispute, caught up after paternity established, by a standard unnegotiable way and by legal IRS records. When courts do not follow those laws, it hurts everyone except greedy arguing lawyers, it hurts pregnant mothers in need of safety and nutrition, babies, children, youth, and approximately 5% of the USA population at any time in limbo in these courts and agencies. Then also the other approximately 95% who have to pay for additional HHS programs to make up the slack, and for the criminal justice system because the youth are angry because they are unloved, begrudged and hated by one or both parents, when standardization of these issues makes everything simpler and acceptable. If non custodial parents pay more money in support, they will be inclined to be involved, if allowed, and that benefits the child as long as the parents aren't criminals. Also, standardization of those things removes children as pawns, and the True primary custodial parent is easy to see, and that is for the child, not the greedy lawyers and judges with political agendas. If marriages that end require alimony, there will be less divorce and less adultery as a nation, because it's not that easy. And if it is standardized then there remains protection for either party from lawyer poaching in agreement with judges corrupt. Who do they have to answer to? Because divorce law courts are a mess right now, and there is gross lack of child support enforcement or criminal protection in the police force, and it has been going on for years. And juvenile courts and rehabilitation and prisons are approximately \$40,000 a year, whenever the fathers or non custodial mothers should be footing the bill, and not provoking children unto wrath by no love or not caring if basic needs met. Again, it is up to the Supreme Court to force them to adjudge. What can I do but complain and bring my case? Thank you for hearing my reasonings.

CONCLUSION

The petition for a writ of certiorari should be granted.
