RE: Second request for extension of time to file response to petition
Jasmine Younge v. Fulton Judicial Circuit District Attorney's Office
S.C. No. 25-352

Dear Mr. Harris,

I am counsel for respondents in this case. On November 10, 2025, the Court requested that respondent file a Response to the petition filed in this matter by December 10, 2025. On November 26, 2025, respondent requested and was granted an extension through January 21, 2026. On January 30, Respondent requested and was granted an extension until February 6, 2026. Respondent now respectfully asks for an additional seven days from the date of this request, until February 13, 2026, due to a serious medical emergency.

This is the respondent's third and final request for an extension of time to file a response. On January 10, 2026, counsel for respondent was involved in an accident, which resulted in injuries to the head, back, and torso. Counsel returned to work on February 2, 2026. On February 3, counsel suffered a medical emergency, which resulted in hospitalization. Since then, counsel has been working to obtain assistance from a fellow attorney to complete his work on the response as soon as possible. As of today, February 6, 2026, counsel has retained an attorney to assist him with the response while he recovers.

Counsel recognizes that the patience of the Court is not endless. If the Court would like additional information regarding the seriousness of the medical emergency, counsel would provide such. Now that the assistance of fellow counsel has been retained and the work can be

supervised by the undersigned while recovering in the hospital and, hopefully, soon from home, there will be no further requests for extensions. Therefore, based on the seriousness of the medical issue, counsel requests one additional extension for a week, until February 13, 2026.

Respondent respectfully requests that the time for filing a response to the petition for writ of certiorari be extended up to and including February 13, 2026.

Sincerely,

/s/ Noah Green
