No.

In The Supreme Court Of The United States

JANE DOE,

Petitioner

v.

BOSTON CELTICS, JAYSON TATUM, AND, MARCUS SMART,

Respondents.

ON PETITION FOR A WRIT OF CERTIORARI TO
THE UNITED STATES COURT OF APPEALS
FOR THE FIRST CIRCUIT

PETITION FOR A WRIT OF CERTIORARI

Jane Doe
Victim of Sex Trafficking

Petitioner is "Pro Se"

i. QUESTION(S) PRESENTED

Has sex trafficking been legalized by the First Circuit when the First Circuit affirmed the ruling of the District Court that all of the elements of sex trafficking taken together, -- with the inclusion of dates, locations, names, conduct, damage, and verified circumstances that make the claim possible -- , and asserted to be connected as part of organized sexual abuse that was carried out by the Boston Celtics NBA Franchise and damaged me "fails to state a claim" when assumed to be true? In doing so, have my human rights and constitutional rights been violated? Is allowing the ruling to stand a violation of my human rights and constitutional rights?

Is denying me, as the Victim of Sex Trafficking, my right to gather additional evidence to support my claims of sex trafficking and present my "case" to a Jury of my Peers for Judgement, and, instead requiring me to prove my claim to a Federal Judge at the pleading stage, a violation of my human rights and constitutional rights? At what point is denying me, as the Victim of Sex Trafficking, my right to gather additional evidence to support my claims of sex trafficking and present my "case" to a Jury of my Peers for Judgement when I, as the Victim of Sex Trafficking, am without representation, have never been offered or given any legal assistance in getting remedy and relief for the sex trafficking related damages from any governmental or non-governmental organization, and the wrong determination of my "status" has been made and is resulting in more damage to me, a criminal and liable act?

What safeguards exist when the United States' system is failing to properly identify a Victim of Sex Trafficking as the Victim of Sex Trafficking during sex trafficking legal proceedings, and is leaving the Victim without assistance from any United States organization while up against a organization as big as a NBA Basketball team? What safeguards exist when the United States' system is failing to properly identify a Victim of Sex Trafficking as the Victim of Sex Trafficking, ongoing damage is taking place (both systematically and deliberately), and the Victim is not living a life they choose with all of their rights? Is allowing an unrepresented Victim of Sexual Trafficking the option to gather more evidence and tell their story to a Jury of Peers without legal nonsense, delays, and the intentional inflection of damage during the legal process a reasonable safeguard to aid in ending sex trafficking worldwide, learning more about how the crime is being committed, and actually helping the Victims? Is not doing so is a violation of this Country's "values and ideals", violation of human and constitutional rights, and violation of guaranteed protections to Victims of these situations under Federal and International Law?

ii. LIST OF PARTIES

Jane Doe, Born United States Citizen, Victim of Sex Trafficking and Plaintiff/Petitioner
Boston Celtics, NBA Basketball Franchise and Defendant/Respondent (Civil and Criminal Liability)
Jayson Tatum, NBA Player and Defendant/Respondent (Civil Liability, No Criminal Liability)
Marcus Smart, NBA Player and Defendant/Respondent (Civil Liability, No Criminal Liability)

Jaylen Brown is no longer a named Defendant of this case. I requested to the lower court that Jaylen Brown be removed from this case. I requested to the lower court that the caption of this case be "Jane Doe v. Boston Celtics, et al". Both requests occurred before the Appeals Court decision. As far as I know, the requests were not acknowledged. Keeping the case as Jane Doe v. Brown et al is confusing. I kindly ask this Court to please refer to this case by its correct caption and name, which is "Jane doe v. Boston Celtics, et al". I assert that I no longer acknowledge, recognize, and/or identify damages that are the result of the individual conduct of Jaylen Brown and/or for which I hold Jaylen Brown liable for. I assert the Players and Involved Individuals were forced to engage and/or carry out conducts that damaged me, and for that reason, civil liability is the correct extent of their responsibility. I assert that high level executives operating the Boston Celtics franchise are the ones whom, in an official capacity, applied the force to damage me, served as a facilitator, and forced involvement of the Players and Involved individuals, and is whom I identify as having criminal and civil liability. I assert that high level executives operating the Boston Celtics franchise and other similarly powerful organizations are the ones whom are the true collective organizer or "head" of the scheme, and in their own respective official capacities, apply damaging forces, serve as a facilitators of the sex trafficking network at large, connect various industries into the scheme, force involvement of others including the Involved Individuals, and *that I am a witness to this*. I take moral and ethical issue with criminal punishment, and for that reason, ask to please not be involved in the process.

iii. RELATED CASES

Federal District Case Number: 1:25-cv-10446 (Appeal Case Number: 25-1992)

Federal District Case Number: 1:25-cv-10444 (Appeal Case Number: 25-1717)

Both of the above referenced cases are sex trafficking related cases that have risen from the claims of this case and directly relate to this case. The cases attempt to hold the identified organizations and individuals responsible and liable for their conduct that intentionally damaged me while the legal proceedings for this case were taking place. The conducts constitute as severe mistreatment of me as the Victim of Sex Trafficking, and occurred for the purposes of helping the traffickers and hurting me during the legal proceedings intending to hold the traffickers responsible.

Federal District Case Number: 1:26-cv-11205 (in appeal. I am not receiving notifications of its status)

The above referenced case combined this case and the two previously referenced related cases into one lawsuit with additional evidence that the claims are possible and plausible. This occurred after all 3 cases were dismissed in the pleading stage and without direct acknowledgment of the claim that the three cases are related and part of one situation that is causing me damage. The purpose was to officialize the connection between all three cases, to identify the circumstances of each of the three cases as collective components of one ongoing situation that is damaging me and is the crime of organized sex trafficking, and, to hold the Defendants of this case responsible and liable for their part in the two previously referenced related cases. The District Court ruled that the evidence should be assumed to have been already known by the Court [even though it was not submitted by any of the parties] and therefore is not new. By doing so, the District Court has taken responsibility for knowing all existing evidence, including what was not submitted by me or any party. The District Court attempted to ban me from filing any new related sex trafficking complaints, making it unclear whether they are in fact aware of the sex trafficking situation that is damaging me and protecting its continuous.

Federal District Case Number: 1:26-cv-xxxxx (case number was never given to me)

The above referenced case was filed to hold a Federal Judge and the Defendants of this case liable for blocking all complaints claiming sex trafficking related damages to me from going forward. At the time, the lower courts had refused to let me submit evidence, refused to acknowledge changes to Defendants, and refused to let any case be heard.

VII. REASONS FOR GRANTING THE WRIT	25
A. To avoid erroneous deprivations of the right to represent oneself when making a Federal Complaint without unjust disadvantage that effectively deprives an unrepresented Victim of Sex Trafficking full use of the Federal legal process, this Court should clarify and expand upon the "pro se" standard and make special considerations for what happened to me as a Victim of Sex Trafficking when I filed a sex trafficking complaint against a protected United States organization without representation, rights, and my protections.	
B. To avoid erroneous delays in restoring fundamental human rights back to Victims of Sex Trafficking, this Court should clarify what evidence is actually required at the pleading stage, for sex trafficking complaints, and for pro se sex trafficking complaints.	
C. To avoid confusion on the United States' position regarding sex trafficking, this Court should clarify whether or not they allow Victims of Sex Trafficking to come forward in Federal Court against "protected" US Organizations, what the actual process being used is, and what safeguards for the Victims exist, with special considerations that Victims in these situations: are likely unable to get assistance and/or will feel like they are unable to, and, will be damaged and blocked from their needed "protected" status by delays and wrong determinations.	
D. To avoid confusion on the United States' position regarding human and animal rights, this Court should begin consideration about whether the same unregulated "system" making Wagyu "process" should be used to sex traffick women or on animals at all, and if it warrants regulation.

III. OPINIONS BELOW

On June 9, 2025, the Federal District Court of Massachusetts denied me my right to the Jury Trial I demanded for Judgement of my "status" and determination of remedy and relief for sex trafficking related damages I have endured and suffered. This was done at the pleading stage, and before allowing me to present the evidence I already have or gather more evidence in Discovery. The reason was "failure to state a claim" and the basis was "lack of evidence" after details were provided. The statements in the claim were proven possible at least after evidence as "support" was given to the Court that proved and/or showed: I lived in the same building structure that all of the Defendants worked in, that I was at nightlife establishments the Defendants frequented at the time but for which was not publicly known and for which was out of the norm for me to be at, the existence of contact between me and at least 1 of the Identified Individuals who connected me to the Defendants *and* who could be verified to operate in a position and/or manner for which the claims I made are in fact possible to have occurred in the way I described them, and none of the Defendants' Counsels ever expressed that their Client denied or did not admit to knowing who I was and instead the Defendants' Counsels showed an effort to make and/or maintain the existence of a "grey area" about the nature of how or why we know each other. Before the final dismissal, and on December 9, 2024, the situation as I wrote it was described by the District Court Judge during the pleading stage to be "indeed criminal" and thereby in fact describing a claim in which relief can be granted. A preliminary dismissal was made at this time, on the basis of needing more details while implying to remove the Boston Celtics franchise. I provided additional details, which did not disprove statements I had previously given. Exactly 6 months later, a final dismissal was issued. The District Court did not hold any hearings before making either decision. The First Circuit affirmed the decision on March 9, 2026. The First Circuit did not hold any hearings before making the decision. The First Circuit denied a rehearing. The District Case Number is 1:24-cv-11461. The Appeals Case Number is 25-1565. I respectfully petition this Court to issue a "Writ of Certiorari" to review the previously mentioned judgment and answer the call to productively engage in a correct answer to my Prayers.

IV. JURISDICTION

My petition for hearing to the Federal Court of Appeals was denied on March 9, 2026. I invoke this Court's jurisdiction under 28 U.S.C. § 1257, having timely filed this petition for a writ of certiorari within ninety days of the Federal Court of Appeal's judgment. This petition was sent on June 1, 2026, and then given 60 days to make procedural, aesthetic, and/or non material corrections.

V. CONSTITUTIONAL PROVISIONS INVOLVED

United States Constitution, Article III, Section 2:

The judicial Power shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority; -to all Cases affecting Ambassadors, other public Ministers and Consuls; -to all Cases of admiralty and maritime Jurisdiction; -to Controversies to which the United States shall be a Party; -to Controversies between two or more States; -[between a State and Citizens of another State;]* between Citizens of different States, -between Citizens of the same State claiming Lands under Grants of different States, [and between a State, or the Citizens thereof; -and foreign States, Citizens or Subjects.]*

United States Constitution, Amendment VII:

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re- examined in any Court of the United States, than according to the rules of the common law.

United States Constitution, Amendment IX:

The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people.

United States Constitution, Amendment XIII:

Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

United States Constitution, Amendment XIV:

All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

VI. STATEMENT OF THE CASE

A. Introduction

This case is about whether I, as an unrepresented "self declared" and actual Victim of Sex Trafficking, can be offered a Jury Trial in Federal Civil Court if I insist on keeping the Boston Celtics as the official NBA Franchise in Massachusetts as a named Defendant and refuse to only hold the Players responsible or "liable." The Players were forced to engage. They owe me something, but not their careers, dreams, or freedoms. Doesn't that matter? That information did not matter whatsoever to the Federal Judges in Massachusetts that have been blocking me from a Jury of my Peers, and I suffer for it. My character and credibility has been misrepresented and lied about. It is not a secret in the area that I have been damaged. I have been damaged by an evolved and "sophisticated" form of slavery and involuntary servitude in the form of sex trafficking. What I am talking about is no secret at this point either. Many have either failed at starting a honest conversation about it or are too afraid to. I have put it into raw and plain english, and this country is supposed to protect me and my right to demand a Jury Trial for Judgement and the determination of related damages. But I am being denied a Jury Trial, the wrong determination of my "status" is being made and in a process that is very different than the one written to be occurring in this Country, and I am not being offered any remedy and relief. Meanwhile, I am still not allowed to be keep what I earn to break away from this situation. I am not allowed to keep what I earn to move somewhere else. I am actually being kept in this country against my own free will.

I could "sell my soul" to the "devil" and put aside my earned accomplishment as a women and accept marrying a wealthy or connected person as my only option to get the protection I otherwise earned. I could "sell my soul" to the "devil" and remove the Boston Celtics as a named Defendant. But I don't have to. There was always another way. There is always another way. In the Battle of Good v Evil, Good wins. The Truth of that is subtle, but everlasting. Good needs People to See it and Embody it. As I write this paper, I can't help wondering, where is the United States in this? My experience in the legal system after coming forward got me thinking, constantly, "what is this country?" and "what has it ever been?"

B. Questions Presented (Additional)

In a situation where sex trafficking has actually occurred, can the United States Federal Courts engage in conduct to attempt to claim that it has not? Is refusing an unrepresented Victim of Sex Trafficking counsel and any assistance from the United States during sex trafficking legal proceedings, refusing an unrepresented Victim of Sex Trafficking access to additional evidence to support her claims in Discovery, refusing to review evidence of the claims of sex trafficking in the possession of an unrepresented Victim of Sex Trafficking, refusing an unrepresented Victim of Sex Trafficking a Jury Trial of peers to make a final judgement, and forcing a 2 year delay (and counting) in the legal pleading stage while the Victim of Sex Trafficking asserts she is being damaged and refused resources to rebuild her life to force her to stay in the country so that harm against her can continue and as harm is verifiably happening to her during the delay, conduct by the Federal Court to attempt to claim sex trafficking has not occurred when it has in fact occurred to knowingly delay and/or deny fundamental human rights to the Victim?

What does it mean for this Country if a Victim of Sex Trafficking identifies a prominent United States organization to be the trafficking group that damaged her; the United States refuses to look at evidence, refused to gather evidence of the claim on their own and/or refused to admit to the existence of evidence of crimes against the Victim; the Victim is effectively denied access to any Jury Trial including in Civil Court while representing herself and blocked from obtaining counsel representing her and not the trafficking group; and the situation is effectively blocked from public awareness?

Were an organization such as an NBA Basketball Team is accused of sex trafficking by a *pro se* Victim, and when sex trafficking has actually occurred, can the Federal Court block evidence from being shared and the case from being heard to protect the traffickers and/or ban the Victim from refiling? Even after all named Defendants and the Victim were confirmed to be living and/or working in the same building complex, and contact between the Victim and the individual who acts as an intermediary in electronic communication was confirmed?

Were an organization is accused of sex trafficking by a *pro se* Victim, and issues with identifying the Victim have come up because of the influence of the accused, and the Victim asserts to have evidence in the form of photos, videos, records, physical objects and witnesses, and the Court is refusing to accept and/or review evidence from the Victim, can the lower courts block the case from sharing and gathering evidence on the basis of "lack of evidence" as the entire argument to support a "failure to state a claim" decision?

In a situation were Counsel for the traffickers (Boston Celtics) admits in a conference call to have interfered with a *pro se* Victim's efforts to get Counsel, the Federal Court refused at least 3 of her requests to have Counsel appointed to her after her disadvantaged position was made clear through district dismissals, and no one on behalf of the United States was ever representing or assisting her in her situation as the *pro se* Victim of Sex Trafficking, can and/should a district court be able to block her from sharing the evidence she already had and gathering more in Discovery to support her claims? What does it mean for the legal process if this is allowed to stand?

If a country gives itself and its favored organizations "immunity" from acknowledgement and responsibility for conduct expressed to be conduct the country is against and prohibits (aka "crime"), then is the country actually against the conduct or prohibiting it? Does it actually help anyone or anything to say one thing while doing the other? When this country began to do the opposite of written statements in line with how this world actually works while self declaring to be "embodying" these ideals, did it not become impossible for this country to actually be embodying it? When the real right answer is not the United States' answer, how can this country be trusted to, or even able to, train or judge?

Who has the responsibility to find a solution in a situation where a woman has been sex trafficked by a United States organization that is a member of their protected Sports Industry; the Victim has identified catastrophic damage to herself as result of being sex trafficked with her current doctor (aware of the situation) stating that she in particular will go to the proper channel for help if ever in need; the Victim identified the legal process as the proper channel and is being denied assistance in the proper channel while also being refused access to a Jury Trial for judgment from her peers when without assistance; and the Victim is now asserting she is being refused resources to rebuild her life to force her to stay in the country so that harm against her can continue? Is two years after coming forward without any process towards a resolution and veritable harm to the Victim of Sex Trafficking during the process acceptable practice in this country?

Should the United States have a stronger responsibility to a pro se actual Victim of Sex Trafficking or one of their leading and protected organizations? With the Federal legal system favoring top United States corporations and organizations generally, pro se litigants clearly disadvantaged in legal process, Victims of Sex Trafficking in need of special care and consideration while all systems struggle with implementing this enough to end the crime all together or help enough to produce an actual positive and lasting change in Victim's lives, criminal procedure having a track record of creating problems for everyone and is subject of moral and ethical concerns with respect to criminal punishment, and the United States not offering *Civil Federal Prosecutors*, in a matter with a pro se Victim of Sex Trafficking v top United States organization when the Victim does not want involvement in criminal procedure and should be assumed to have difficulty getting help, could or *should* the United States take special care of the Victim of Sex Trafficking and not the organization, in ways including but limited to keep the Victim safe during the process, offer to help her with legal writing, offer to obtain evidence if she needs it, maintain a direct relationship, etc, instead of looking into *her*, initiating no direct contact that intends to help her whatsoever, and interfering and denying her access to the Federal Legal process all together? Would offering treble damages for all severely damaging incidents that occur to the Victim (ie murder of loved one including but not limited to pets, attempts to murder Victim, displacing the Victim, interference with Victim's work, interference with Victim's finances, attempts to legally punish the Victim, etc) once the process starts with a "no tolerance policy" (ie if it happened, its related to the case to help the accused unless proven otherwise) be effective in keeping an unrepresented Victim of Sex Trafficking safe during Civil Federal Procedure that is intending to effectively recognize sex trafficking, deter organizations from doing it, and actually help the involved Victim and all Victims?

If this country's "systems" were to be tested, would they not be tested in a way that could include a modern day *actual* Victim of Sex Trafficking coming forward representing herself, and against an organization such as a NBA franchise? Does this case not include a bulk of this country's true current issues that are being silenced? How easy was it for this country to get distracted with its own consciousness of guilt to sidetrack completely off base? How much did I suffer for it? How much money was spent between all of the Defendants and all United States and/or state branches to do what ends up being absolutely nothing for me as the Victim of Sex Trafficking and only another cause of harm to me? Is it collectively more or less than the identified cost of my freedom at this point? How does this Country expect to operate properly and regulate its organizations when its organizations know more than them about what is actually going on (very slightly but technically true) and thereby show disrespect towards governmental process, and Federal Judges are literally too afraid to stand up to them? What score would this Court give the "systems" after having failed to identify my situation for me, putting me in the position to have to come forward, and then with my "experience" through the legal system? Does this Country actually require an official "administer" of a test to reflect? Could the Country and its systems benefit from approaching every situation as if it were a "test", and should doing so be the norm?

If this case is allowed to be denied a Jury Trial, and if then I as the Victim of Sex Trafficking am never offered what I need to rebuild my life and cannot peacefully leave this country in my own free will with everything the law defines as mine to rebuild my life with, and if then I am also damaged by the same group and/or its associates, and/or in a related matter, and/or in a similar way in which harm is foreseeable and/or inevitable, then is it possible for the United States to actually be considered a free country?

Is this country wrapped up in self created delusion of importance and has this country always been the wrong that others need protection from? The Founding Fathers were known to have an religious "experience" that lead them put a symbol on the currency that represents a force that protects others from evil, to feel a strong calling to language of a civilization known to have fallen and been destroyed, and to pyramids which are known to be a "magical" or unexplainable creation by the people of the time and "spirit" of the earth. Did they simply misunderstand the meaning of these items and miss their call to free the people stolen from Africa and make peace with the Native Americans? Did this misunderstanding lay as the foundation to a delusion that the United States has some sort of spiritual backing that it does not actually have but has fueled a controversial way of operating consistently met with resistance and disapproval, *everywhere*, to the point of self imposed "immunity"? Was the Founding Father leaving with a statement titled "Farewell Address" where he projected a sad and somber feeling, declined to stay any longer, expressed concerns with the future of the country, and told the country essentially to "beware" of itself (as the true intended meaning of the warning of the two party system) indication of the delusion, and not validation of it? Are the Founding Fathers simply just the third and final attempt at getting someone to fix the situation with the Native Americans and free the stolen people from Africa, and was fixing the situation actually the only thing of importance? Was the first attempt with the colonists whom came after Christopher Columbus, and did they only prove to be too cowardly to speak up or give a reasonable response to actual horror taking place? Was it the colonists' failure that led to the King of England taking charge, who then perhaps was meant to "regulate" the situation with respect to fix relations with the Native Americans and help free the people stolen from Africa and with nothing to do with tea or taxing, and was it his failure to "figure it out" the real reason why he is said to have gone "mad"?

Which brings the situation to the "Founding Fathers" in the American Revolution, whom, --as slave holders themselves-- are believed to have felt a special calling or had a certain "experience" in a dark room somewhere that led this country to picking certain symbols for its currency, feeling a strong connection parts of history centered around the fall of civilizations, and be the self-declared embodiment of ideals (later to give themselves immunity from actually doing). The American Revolution was done with a sense of urgency and with the promise of freeing the people stolen from Africa. At the very same time of the Founding Fathers religious "experience", the Native Americans and people stolen from Africa being enslaved were also known to have publicly displayed religious "experiences" *everywhere and all of the time*. Although slightly different from each other, both can undeniable be described as having projected a feeling of embodied presence, strength, freedom, proper values and ideals, and togetherness, and was visibly expressed as something come through the individuals hurting in various dances and songs being sung to actually help them endure and persevere. Whose side are the forces of the earth actually on? The Native Americans were never actually allowed to be removed permanently from the area, and are officially welcome everywhere. The people stolen from Africa and/or their descendants were made free, and when they were crammed into disadvantaged neighborhoods instead actually being given real freedom and remedy and relief, an effort to bring that to light existed until *freed again*. To this day, there is still calling to do better on rectifying the harm caused to both groups through demand of rewriting the accounts of history in textbooks, demand to literally give money to ancestors of those effected, and reminder that Native Americans that practice their area of expertise still decline any involvement in this country's government. This Country's expansion effort *was* stopped as this country did not "conquer" all of North America. Taxation without approval or consensus openly exists today and is duplicative and out of control.

The true meaning of the American Revolution being about taxation, expansion or for this Country remains less than likely. This Country's presence in the World today is even a topic of controversy, and met with resistance. Every "accomplishment" or "innovation" this country believes it has can be argued to have a greater consequence to the point of being described as "unsustainable". Every "innovation" created something that previously had a solution (ie cars replace horses) and with an increasing amount of natural resources (aka "mass production"). Last time a new earth element was discovered was during the time of cavemen, and before human to human cruelty and human to animal harm cruelty. It was created by an individual simply picking up an object in its space and making a motion, and did not require nonsense equations or insanity. While copy cat items are plentiful, is anything actually *new*? Was all of the "innovation" happening here just to rid this country of its natural resources essentially making the same thing over and over again, and literally taking the "magic" beneath their feet with a giant suction for what is ultimately disregarded and thrown away? Was this country only given a taste of what real innovation is just to be reminded the needed natural resources are not being regenerated and its all going to stop? Even their most convented "innovation" of the human made system webbing everyone together and forcing/controlling "experiences" is essentially an inferior copycat of what already existed the right way. Is it not another creation of a solution that already existed and is only draining essential natural resources without replacement now able to *stop* all innovation and not lead in it? Is this country and anyone who partners with it really being blocked from true and lasting innovation, and is that part of the true consequence for what this country has done? Is it possible that this country was never overtaken, -- and won't ever be overtaken--, because it is being required to acknowledge these wrongs outright and directly as its actual greatest fear and part of actually fixing the wrong to harmony and balance these events created?

Would a giant wave taking out this country or another group overtaking it actually be letting this country off too easy? Does that explain that? Is it possible that the hieroglyphic with the people bonded together was meant to represent the existence of a connection or "bond" between all humans, -- which everyone now knows is real and exists through the air --, and was *never about slavery*? Civilizations attempting to use enslavement and conquerors have been taken out in the past, -- and were always taken out --, but the problems continued. Did that response prove to not be effective enough? Does this country essentially exist only in shame as a means to rid the world of this evil present during its inception once and for all because of its "contribution" to the expansion of it? Do most of the major "contributors" acknowledge that they chose their "contribution" to this system that caused pain and suffering on mass levels without ever doing right by it, systematically, over their own families, health, ethics and morals, --literally over everything? Would having to face it was all for nothing because none of it was ever going to work not be their *actual* worst fear? Were simple messages being misunderstood? Would facing this epic and true failure be effective in righting the wrongs humans have inflicted since after the cavemen? Would facing this epic and true failure be effective in actually preventing wrong with respect to infringements on free will and cruelty based from happening again or worsening without allowing this country, who attempted to "benefit" and/or did not fairly share "benefit" from cruelty and enslavement, to individually "benefit" at all or more than humanity at large and to instead exist as effective consequence that restores true balance? Is this reality not the actual worst fear of all those responsible for operating in and/or spreading the delusion this country created, and thereby exactly what consequence for such a grave mistake would look like? Is it possible everyone was wrong in their "interpretation" of this country's use of these symbols, and really this country was branded the "evil" for which people and animals need protection *from*?

For over 250 years, has this Country been celebrating and memorializing the wrong side of History by celebrating Christopher Columbus, Landlord Owners, Founding Fathers etc, and not the individuals Stolen from Africa and Native Americans who suffered, persevered, endured, prevailed no matter how long it took, and are the true representatives of the Spirit of this Country and what it looks like to be protected by something larger than humans? Is that indication of what this Country really is?

If one country printed out 1 Trillion dollars for itself and then every year "debates" about whether to throw some of the unbacked money away or print out more, with the only requirement of its "financial system" being that it needs to record how much is printed without being backed or rightfully produced and how much is thrown away without replacement when "paying its national debt" (while still refusing to pay back any of the unpaid labor stolen to "start" this country and refusing to acknowledge where its true debts lay), then should all countries be allowed to do the same? What does it mean that the Organizations of this Country do not even give to its government, which unknowingly, and in turn, becomes the reason this Country even needs to print out money and delegitimize its whole "system"? Is taking action that in actuality undoes the "success" of the economy of this Country the only thing the Organizations of this Country have ever actually gotten right? Is Country v Organization just another example of the warning that this Country is a threat to itself? And is this Government too afraid to stand up to Organizations because they know they got something right, but simply couldn't extract that information correctly either?

Are these misunderstandings the true root and explanation as to why the First Circuit and others have had so much trouble making the right and correct determination? Is the real reason for the lack of support, assistance, and proper response I have received because the truth of the situation is inconvenient for those who have benefitted from it, too much for those who have been on the wrong side, and this Country is still not ready to face the reality of what it *has been doing wrong all along*?

C. *The Complaint*

The Final Complaint (herein, "the Complaint") filed with the District Court did not have "defects" that warrant a dismissal. Essential points when evaluating the Complaint for "defectiveness" are as follows:

- The Complaint includes the statutory and legal language of sex trafficking with the inclusion of dates, locations, conduct, and identified persons involved/responsible. The Complaint includes details to expand upon the claims and further illustrate the situation. Evidence that make the claims plausible and possible was provided and established.
- The Complaint specifically acknowledges that communication between myself and the involved Players was intentionally made overly complicated and less than direct for the purposes of deniability. Third parties were expressed to be used in lei of direct communication. My claims assumed to be true means there are no records of me and the involved Players texting or calling each other directly, but we can be verified to be at the same places at the same time. My claims assumed to be true means at least one individuals identified to connect the involved Players and me for "contact" should be verified to have had contact with me and to operate in the way described and/or possible to operate in the way in which was described. These individuals included the Boston Celtics franchise itself, and/or various other individuals. Evidence of contact between myself and an identified individual was submitted to the Federal Court.
- The Complaint claims that the Boston Celtics franchise is forcing the situation and behind it. This claim is at least plausible with the severe sex trafficking indicating events as additional damages that have been occurring after filing, and that has been reported.
- For over 2 years, and throughout all of the sex trafficking legal proceedings, the sex trafficking situation that has damaged me has been described by me, from start to finish, multiple times at this point. The circumstances I am in while preparing these papers have been reported by me and "verified" to be severe, and at times life threatening. Even so, there is not one instance of a substantial and material discrepancy between any of the papers I have written that is without legitimate explanation or that can effectively disprove my claims. I am veritably not being coached, directed, or trained. This is highly indicative that the claims I have made are true, and a real situation that is hurting me and for which others are liable and responsible for exists.
- The Compliant was written by me, who is not an Attorney and is the Victim of Sex Trafficking. I identified a protected organization as a responsible and liable party. Being able to string two words together that make any sense at all means more from me than a practiced and seasoned attorney because of my lack of experience and the severity of challenge and difficulty I face when doing anything as part of my circumstances related to my situation as a trafficked person.

D. Evidence

The following evidence was filed in the lower courts, proving the claims are possible and plausible:

- My testimony as the Victim of Sex Trafficking, provided in the form of written statements.
- Housing Court record between myself and Hub50House as evidence: that I lived in the same building structure that all of the Defendants worked in, indicative of the Involuntary Servitude Claim through legal abuse, and as a sex trafficking indicating event occurring during the legal process.
- "Verified" existence of at least 3 severe and sex trafficking indicating events occurring to me after filing the complaint *and* with connection to the sex trafficking lawsuit as proof that my experiences during the legal process indicate that the claims are true. Some of these events include: death of my dog in unusual circumstances indicative of murder (October 2024); severe life threatening electrical wire tampering as attempt to murder me (January 2025); forced eviction without allowing me to pack my belongings as a measure to displace me and tamper with evidence (February 2025).
- Copy of a Letter from my Doctor that was made with intent to submit and share during sex trafficking legal proceedings. The Letter from my Doctor says, in summary, that I do not have mental illness, it is my Doctor's medical opinion that I do not require mental health care and I am not showing any signs of mental illness requiring medical attention, and that it is my Doctor's opinion that I will seek help in the proper channels when and/or if I need it. When my Doctor wrote the Letter, she was aware of my effort to seek help in the legal channel for damages. When discussing what should be included in the letter, my Doctor said something along the lines of, "it is good to not give them too much". When discussing the situation, my Doctor has expressed that she is proud of me with respect to the efforts I have made in the legal proceedings including for doing it myself.
- Photo of text message exchange between me and a phone number that belongs to one of the identified individuals in the complaint as evidence of the existence of contact between me and at least 1 of the identified individuals who connected me to the Defendants and makes the claims plausible and possible to occur in the way I have claimed.
- Photo of part of one of my bank statements for the timeframe of the claims as evidence that I was at nightlife establishments that the Defendants frequented during the timeframe of the claims, and for which were not publicly known, not something I could reasonably have known or found on my own, and for which was out of the ordinary for me. Affidavits and/or legal writings prepared by Counsel for the Player Defendants reveal that I am not someone the Player Defendants consider a friend and/or publicly associate with, while at the same time not denying they know who I am. When this combined evidence is properly considered together, the claims I have made *are* supported and shown to be possible and plausible.
- Photos of the building structure that the apartment complex I lived in and all of the named defendants worked in at least during the timeframes indicated in the complaint are located.

Evidence (continued)

I told the Federal District Court that "discovery would further prove my claims" several times in the pleading stage with respect to the existence of evidence of the claims.

I told the Federal Court of Appeals that I have evidence of the claims in the form of videos, photos, physical objects, etc.

An effort to tamper with and destroy *some* evidence I had in my apartment home occurred approximately 7-8 months after the complaint of this lawsuit was filed. This was facilitated by a Massachusetts state housing court system, which issued an order banning me from being present at my apartment home where the evidence was and then forcing eviction on me without cause. My entire apartment home was left unattended for several days with the knowledge that I could not return unannounced, and then was packed entirely by a third party without me being present. This allowed the opportunity for evidence to be tampered with and/or destroyed, which it was. The Federal Court was made aware. There was no aiding response from any Federal department.

I was told *not* to file evidence at the pleading stage in the sex trafficking related matters by a Federal Judge. A Federal Judge in one of the related sex trafficking lawsuits refused to accept evidence in the pleading stage. A ruling was made to this effect.

E. Request for Counsel

I requested help in obtaining counsel with this and the other related sex trafficking matters on more than 3 separate occasions to the Federal Courts in Massachusetts, and each request has been denied.

The requests were made in both the District Court and Court of Appeals, which in Massachusetts are in the same building. The requests were made after this case was dismissed. The requests were made because it was no longer possible to say I had not been disadvantaged for representing myself after the dismissal of a true claim. Help or guidance was never provided to me. I do not understand the rulings for not assigning counsel. The fact that my financials are not the entirety of the basis for the request was not acknowledged by the lower courts. The fact that my financials provide eligibility for the request was not acknowledged and was denied by the lower courts even though it was mathematically proven true. The lower courts refused to acknowledge that I was proven to be substantially disadvantaged with the existence of three dismissals of three of my sex trafficking lawsuits, each describing a new circumstance related to my situation as a trafficked person that's caused severe damage to me, at the pleading stage. I was proven to be substantially disadvantaged by this because a pattern of dismissals of true sex trafficking related claims was established. The pattern proved that the lower courts are unable to make the correct determination about my situation as a trafficked person when I represent myself. Their error has resulted in continued damage to me instead of the remedy and relief I requested and that is mandatory in situations such as the one I am in. Being substantially disadvantaged is grounds for the appointment of counsel in itself, and without need to consider my financials. I have not been given the option to obtain more evidence in Discovery for any of my 3+ sex trafficking lawsuits, and I have represented myself in each of them. I have not been offered the Jury Trial I requested in any of my 3+ sex trafficking lawsuits, and I have represented myself in each of them. I have not been offered any remedy or relief in any of my 3+ sex trafficking lawsuits, and I have represented myself in each of them.

The Boston Celtics franchise interfered with an effort made on my part to seek advice from counsel and sought to "represent" me without disclosing the conflict of interest.

For at least the above mentioned reasons, I have been effectively blocked from obtaining counsel while at the same time being seriously disadvantaged to the point of being required to have one.

F. Severe Mistreatment and Damage During Legal Proceedings

I came forward without: representation, my rights in tact, and my protections recognized. While doing so, I have been severely mistreated and damaged. According to the Victims of Trafficking and Violence Protection Act of 2000, when sex trafficking has occurred, a sex trafficking group may attempt to use corruption in governmental and non governmental organizations to interfere with a Victim and affect legal proceedings. Several expressed examples as "Sex Trafficking indicating acts" have occurred, -- if not all at this point -- , and on over 3 separate occasions. They include but are not limited to: murder of my dog (October 2024); multiple attempts to murder me including a circumstance "verified" to be "life-threatening" and "criminal" (January 2025); regular displacement including forced eviction (February 2025); attempt to use legal process against me (February 2025- present time); attempt to label me as criminal and legally punish me for things I am not responsible for (February 2025- present time); effort to prevent me from engaging in the legal process (April/May 2025- September 2025). I experienced complete ruin: financially, professionally, socially, economically, etc; the Federal Judges and Federal branches assumed my complaint to be false instead of true to protect the Organization; Federal Judges showed complete favoritism of the Organization; and after over 2 years, I have not been offered the Jury Trial I demanded or remedy and relief. My circumstances have been severe and life threatening, *without any assistance*. My apartment home has been found with severe and "life threatening" electrical wire tampering in tangent with filings of the lawsuit; I was blocked from my own monies while on vacation outside of the country and forced into homelessness; I collapsed unconscious for the first time in my life while blocked from my monies outside of the country; and more. An effort to blame me for the circumstances exists. I am not responsible, and theories otherwise are not plausible, possible and/or realistic. Each instance gave benefit to the traffickers. The sex trafficking claim is the common thread. The claim as true is the only thing that makes sense of everything. Two "related" sex trafficking lawsuits have been filed in Federal Court as a result. These are all severe "Sex Trafficking indicating acts" against me that are not a coincidence, and would not have occurred if it weren't for the fact that I have actually been sex trafficked. Thereby, all of these circumstances are actually evidence of the claims *and* damage.

G. *Legal Writing of Pro Se Victim of Sex Trafficking*

I do not write my legal papers like a licensed attorney. I am not a licensed attorney. The statements I write are always literally true. Sometime I write short and concise sentences and paragraphs without repetition. Sometimes I do not. It depends on several factors including but not limited to the material, how many times I have written the information, how long it has been since I wrote a paper, if I am unknowingly speaking to multiple levels of truth actually applicable, etc. I do not intend to or mean to be speaking to multiple levels of truth persay, but sometimes it comes out that way. Everything I write is always literally true to my situation and my accounts. It is always true on all levels that I am aware of at the time. Everything I have written has remained true on all levels I think of after or can see better later. There is no rhyme or reason to it. I am always just me, as I am, attempting to communicate something severely damaging that actually happened to me to licensed attorneys serving in whatever roles within the "legal community". Out of all of the words in the english language, these words are the ones coming to my head, determined as literally true, and written. Cherry picking statements and phrases of mine with intent to try to disregard that and apply them to a situation that is not this situation in effort to try to discrete me doesn't affect the validity of my claims or what I write because everything I said still remains consistent with previous statements, is sex trafficking indicating, is true to my claims, and can be explained within the scope of my claims. The use of first person v 3rd person is intentional, and to aid in perspective. Interpreting these papers is not my job, but even I can see that it is not a good idea to pressure me into only writing short and concise statements or in a certain way because to do so would take away from additional meaning that is relevant and true. Congress wrote something to the effect of a need for those who care about actually ending the crime of sex trafficking to be open to learning *from* the Victims in the Victims of Trafficking and Violence Protection Act of 2000. I would never make or force anyone to be open to learning about what happened to me as a Victim of Sex Trafficking, but I have shared. Punishing me or discrediting me for it is a mistake. A Federal Judge referring to my legal papers as "failure" of me is outright inappropriate and insensitive. A little practical understanding that this topic should be assumed to be difficult for me to discuss, and then to just be fine with my format, is not asking for too much.

VII. REASONS FOR GRANTING THE WRIT

- A. *To avoid erroneous deprivations of the right to represent oneself when making a Federal Complaint without unjust disadvantage that effectively deprives an unrepresented Victim of Sex Trafficking full use of the Federal legal process, this Court should clarify and expand upon the "pro se" standard and make special considerations for what happened to me as a Victim of Sex Trafficking when I filed a sex trafficking complaint against a protected United States organization without representation, rights, and my protections.*

This Court should clarify its position on denying an unrepresented individual who is an actual Victim of Sex Trafficking but for which the system is failing to properly identify as so the right to obtain additional evidence of the claims in Discovery (were resources and tools such as subpoenas and depositions could be made available that are not otherwise available to person in this position), denying the Victim the right to a Jury Trial all together (were a decision made by a Jury of Peers can be made, which is especially important when the system is failing to properly identify the situation and general consensus from the People of the Country is that the legal process will protect the Organization over the Victim unless that County can gain and its way of operating is supported), etc. This Court should clarify its position on whether individuals in high level government positions, such as Judges, can openly take action for the purposes of confusing the correct determination while the incorrect determination continues to be made and the Victim continues to be damaged. This Court should clarify the existence of and/or establish safeguards for a Victim of Sex Trafficking who: has come forward and has identified a protected US organization as the responsible party, the system is failing to properly identify as the Victim of Sex Trafficking before a Trial and in a way affecting the process, and has been disadvantaged by conduct of individuals in high level and protected positions such as Judges.

- B. *To avoid erroneous delays in restoring fundamental human rights back to Victims of Sex Trafficking, this Court should clarify what evidence is actually required at the pleading stage, for sex trafficking complaints, and for pro se sex trafficking complaints.*
- C. *To avoid confusion on the United States' position regarding sex trafficking, this Court should clarify whether or not they allow Victims of Sex Trafficking to come forward in Federal Court against "protected" US Organizations, what the actual process being used is, and what safeguards for the Victims exist, with special considerations that Victims in these situations: are likely unable to get assistance and/or will feel like they are unable to, and, will be damaged and blocked from their needed "protected" status by delays and wrong determinations.*
-

D. To avoid confusion on the United States' position regarding human and animal rights, this Court should begin consideration about whether the same unregulated "system" making Wagyu "process" should be used to sex traffick women or on animals at all, and if it warrants regulation.

The same "process" this Country has advocated for worldwide to be used on animals to get the ideal "marbling" -- while the animal is still alive-- is being used on women for the purposes of sex trafficking them. I know this because it happened to me. This is being done without consent, awareness, and even after expressed demands to stop are made. It was used to assist in carrying out the crime of sex trafficking against me without any regulation or even direct acknowledgment. I had to learn it all on my own, resulting in efforts to set me up and kill me to be carried out in a specific way. Some Sex Trafficking related damages would not have occurred to me if it weren't for this "process". District Judges showed awareness of this, and failed to do anything. This "system" and its processes completely take away free will and is the source of damage. This Court should begin consideration of the moral, ethical, legal, and Worldwide consequences to continue to use it on Animals and Women, or at all.

I ask this Court to consider how this happened. What does it mean that this country attempts animal cruelty and enslavement as means to produce food to begin with, then acknowledges it is wrong and makes laws to ban it, and then "loop holes" is back by partnering with another country so that it is "made" outside of the United States and can be given to the Elite society of this country as a "delicacy" known as "wagyu"? Does it make more sense that animals that are eaten should live the best lives when possible -- with their own buffet of healthy food that they would not have otherwise, baths, belly and muscle rubs, wide open spaces, care, love, protection, milking at their comfort, etc. Is eating something that suffered in a prolonged manner the worst thing to eat? Does it make more sense that belly rubs and love to reduce signs of stress as gratitude for their contribution was the intended solution for "stressed meat" as opposed to forcing them into confine spaces to reduce life activity all together, endure severe physical abuse, and simply live just to be eaten in a daze? What gives anyone the right to blame a cow for their ridiculous and over analyzed preferences of marbling, when the HVAC air systems after-the-fact would be the actual appropriate source of their "displeasure?" Is the delusion that life forms live just for the "ruling class" of this country and wrongfully interpreted signs not the timeless problem at hand? When does it end?

E. Petition for "Writ of Certiorari"

I, Jane Doe, a self declared and actual Victim of Sex Trafficking, and pro se litigant, respectfully petition this court for a "writ of certiorari" to review the judgment of the Federal Court of Appeals for the First District in Massachusetts.

I require this Country's support, agreement and acknowledgment in allowing me access to the rest of my freedom so that I can live a life I chose where I chose (within reasonable parameters of not wanting to do anything which reasonably can be assumed will cause harm to another and not wanting to be somewhere not actually available for me to be, etc), with actual free will, and free from foreseeable and inevitable harm and disadvantages for which I would continue to not be able to do anything about expect preserve and endure. What I earn to achieve this end is taken from me without cause to force me into this pattern of abuse, -- where I am in fact abused and damaged for the benefit of organizations and individuals in this country. There has not been any offer to replace it and there is no acknowledgment and/or indication of any intent of it actually stopping. As a result, I am a person not living within physical restraints and detainment or to be known to have had some of my freedoms taken away or to be without, but yet I am still living with only some of the freedoms available in present time instead of all, despite having "earned" all of them as this country requires. I require all of them, which should include all rewards, benefits, privileges and protections a person in todays time can have available to them, and automative life "enhancements" that come with it that are indicative of my "desires" and preferences, and not that of others. I require the system that follows me around and that this country has created be indicative of my actual 'level' of "achievement" so that all of the freedoms and protections a person can have are in fact available to me all of the time.

"Writ Of Certiorari"

I require that I only engage in conducts under my own free will and without the use of fraud, force, and/or coercion. I require nothing personalized to and/or directed at me follows me around, for it all be turned off and/or done, and to stop using me to benefit others. If it must continue when I am here in this Country and is unable to be turned off at my request and "desire", then it be my "desires" and preferences following me around as life "enhancements" instead of damages, unwanted interference, disturbances and desires of others. I demand damage to me be stopped and that my "desires" and preferences stop being overridden and replaced without my permission. I demand that I, and I alone, am the sole controller and "handler" of me, that my explicit permission is required with all things relating to me, and no one is authorized to override me on matters relating to, affecting, and/or involving me. I demand my permission be required before another intentionally enters and/or interferes with the air pathways around me and/or in my personal space, and to have access to what is going on and by whom in the air pathways around me, with no exceptions in the place I am sleeping or living. I demand my Independence.

When all remaining freedoms were not automatically guaranteed or given to me, I earned it rightfully and lawfully by all of this Country's standards, on multiple separate occasion, more than anyone else here, and including with respect to enlightenment. Organizations that have figured out how to steal advancement for its employees in this system and cheat the system to inflict intentional damage onto the innocent and actually right for their own self interest have enjoyed rewards and benefits while I endured abuse and restriction I would otherwise be protected from and rid of. What was once a coincidence is now a pattern. I've awaited "correction" through the formal process for over 2 years, advancing through enlightenment even during this time without proper "reward" or regard for my "desires" and preferences and instead while enduring damages, unwanted interference, disturbances and/or desires of others I should be rid of, should not be possible to do to me, and all still clearly with the end result of keeping me able to be abused and damaged while benefitting a favored United States organization. I demand my Freedom.

I am being kept in this Country against my own free will and blocked from the things I earn to live with complete freedom and protection from what has been damaging me just so that United States' organizations and individuals can force connection to me that causes me damage and benefits them. This framework of harm has extended to sex trafficking and sexual abuse of a perverse nature were I am unable to do anything about it except endure it even though I know I have earned what this Country has required to block the mere attempt and free me from it entirely. I decline taking the burden from the United States of explaining what all of this means on any level aside from of sex trafficking, which has in fact occurred.

I currently have some freedoms available in modern time and for which I earned, but not all of them. I have demanded all of them. Knowing I am living without all my earned freedoms and human rights and am instead living in fear of having more freedoms I already have or earned and instances of fundamental human rights taken from me is not the final outcome of this situation, it is within the nature of each claim. It is the reason for this. I will never accept or agree to it with free will. Illegal force, fraud, coercion and/or detainment will never constitute as consent or agreement or do anything but result in another claim. I believe the Boston Celtics franchise is being cheap, and should have offered everything I need on behalf of themselves and the involved Players without putting me in the position to explain a situation they know about. The United States has not done anything it has promised to do in this exact type of situation, and is enabling this.

This Court asserts to be the one to answer to this and be entrusted to correct this grave mistake.

I believe the actual issues of the case are a) the word choice I used to describe sexual abuse, b) my decision to be forthright about the fact that Boston Celtics executives forced the Players to engage in the conducts that damaged me instead of blame the Players, c) some of the measures used to inflict damage onto me that *could* be touched upon if this case fully opened up. The issues come from aa) the Players not liking the word choice; bb) the Boston Celtics franchise and Federal Judges not liking that I was honest about the part where the executives have made the Players engage in the conducts that damaged me, are responsible, and that the Players would not have engaged in these conducts if it weren't for the executives; and; cc) organizations operating the United States believing that some measures used to inflict damage will never be talked about and could forever remain "unspoken". The words I used are literally true, and I never asked to talk about any of this. I asked for a private conversation at the Boston Headquarters to discuss remedy and relief with the involved. My claim can be proven without getting into c). I refuse to accept the burden of explaining c) or following into organizational traps on this subject. The wrong responses *accelerated* my ability to address c). There is no denying sex trafficking occurred, the sexual abuse component of sex trafficking that damaged me was "conduct that most if not all reasonable individual would find offensive", and that I have been damaged. It is provable. There was nothing I could do about it. Sometimes I would go along because I was just tired, but that doesn't change the fact that my expressed requests to stop were being ignored, there was nothing I could do about it, and even going along with it left me feeling humiliated and with absolute destruction to my sense of self and self esteem. Everyone being able to walk by as if everything is okay, --or to blame me for pettiness or things not actually my fault-- and do nothing to help or address the actual issue at hand was a cruelty so damaging and timeless that it cut straight to the true Spirit of this Country. What happened to me once I came politely forward and asked for it to stop and be given what I need to heal and move forward was so severe and damaging that it has completely destroyed by sense of belonging here. I do not desire to be apart of something still so unable to identify right from wrong. This was beyond damaging, dehumanizing, degrading, humiliating and traumatizing for me, just as it would be for literally anyone else experiencing what I went through.

The job I am currently in "sets the framework" for organizations in this Country to use me and even abuse me, as the Boston Celtics have done. It is extremely effective at keeping me dependent, my self esteem and confidence down, and deterring or confusing the much needed assistance from others I require. It operates this like this just below the level of detectable. Its patterns are repetitive and predictable at this point. On multiple occasions, I have submitted over 100 applications for other jobs. One round of 100 applications was for "call center jobs" over 10 years after graduating from the University of Delaware. All were denied. Strangers have literally come up to me and told me I should just work in the job I am in, and its just the way it is. I can give more information about this if necessary. When the way organizations in this Country benefitting from this situation evolved to overt and severe sex trafficking, I found a way out despite it seemingly being impossible. I don't have to know everything or be able to explain the crazy that is conduct of others to know this happened. Without the Supreme Court overruling the Federal Courts and/or as long as I am in this Country, I will continue to be abused and damaged in sex trafficking related situations (either sex trafficking itself or to get away with it), and what I need to escape the situation will continue to be outright taken from me each time I earn it through overt cheating and reckless conduct carried out by the doing of another human. The conduct is in violation of expressed federal and international laws, rules and understandings, and even this "systems" own design and "credibility" of when the kind of damage being inflicted onto me can no longer be attempted and/or must end, each time I earn it, just so that the cycle continues. To rid myself of this situation:

- I *survived* being severely sex trafficked without ever actually doing anything wrong and then became able to articulate and/or acknowledge it properly which was supposed to be enough to get it stop;
- when damage continued anyways and while being damaged (and thereby in the hardest circumstances), I learned a skill that 99% of people who attempt fail at and then got approval to perform it lawfully, which would protect me from the type of damage I suffered from by being the reason why 99% of future attempts to damage in a similar manner would never be attempted and would also provide me my remaining freedoms and restore my fundamental human rights. This was taken from my doing of another human to continue abuse;

-
- after I earned what I properly identified was needed to protect myself from being sex trafficked or damaged in a similar manner again, to have my fundamental human rights restored, and my remaining earned freedoms actually made available to me, and it was improperly taken from me to keep damaging me, again, because of how effective it stood to be at protecting me and ending everything that was going on. An attempt to limit to my foreseeable "reward" was actually considered. I was blamed, and then I, --on my own--, and *on over 3 separate occasions*, earned remedy and relief in three separate but related sex trafficking claims that *each* should have, again, effectively stopped the situation at least with respect to damage to me, restoration of my fundamental human rights, and given me my remaining earned freedoms in Federal Court. I properly wrote 3 separate federal claims that each accurately identified that liable parties, provided enough true and accurate details and facts so that relief *must be granted*, and with enough preliminary evidence and support to warrant Discovery/Trial and/or immediate remedy and relief. The corresponding "earned" affect was blocked from me by doing of another human;
 - When the rest of my freedoms were not given to me for simply bringing up a true situation that warrants the mandatory issuing of them in the proper channel to do so, on over 3 separate occasions, I explained this situation in every way possible including were even the "unarticulated" has now been articulated, accurately, *by me*. I earned the rest of my freedoms, again, this time *within* a measure that should already allowed me the rest of my freedoms.
 - And, finally, perhaps just to make it unambiguously clear, when cheating to keep me in this situation continued anyways, I achieved *actual* enlightenment able to bring shame onto any "enlightenment" said to be existing here in that it undeniably exceeds that of anyone here, was done in a "fast track" kind of manner, and, was achieved while being damaged and accelerated while being denied "enrichment" and "reward" by its "embodiment" here.

I am within a group of people who actually needs positive reinforcement. But in every instance were an outright accomplishment has occurred, not only do I not get my *earned* remaining freedoms or the appropriate portion of "reward" with respect to "standards" established by others that anyone else would have gotten, but an effort to abuse me and make me think I have done something wrong is allowed to exist in its place just to keep me here and in this system of abuse.

The way the system in this country operates is that because the claims I have made are true, and because my freedom from it all and rewards were taken just to keep me abused, if I don't have the crimes against me acknowledged as wrong at this point and get back what is mine, then the situation will never stop, I will never keep what is mine, and I will never have real freedom. I will be a magnet to this new worsened degree of damage to me. This will all continue to repeat at this worsened degree.

The United States has had the burden to either prove my case for me or show acknowledgment that what has happened to me is wrong to facilitate remedy and relief that is required for me to have my full freedom and fundamental human rights restored. The entrusted entities have failed to do so. Their failure does not override reality or rid the United States of its burden and responsibility. But their failure to not acknowledge reality that I know is true because I was there does make me feel and know that I am unsafe in this Country. The burden and responsibility of the United States to acknowledge that what has happened to me is wrong, facilitate remedy and relief, and ensure I have my full freedom and fundamental human rights still exists. No one has done anything except look into me instead of look into my claims; violate my privacy, freedom and human rights; disturb my healing; and, unspokenly threaten me with legal punishment by setting me up and/or framing me for having committed crimes I did not commit or make up that I committed crimes that did not occur. Meanwhile, I currently I do not live in the country I choose or state I choose; I do not work at the job I am trained to perform, want to perform and otherwise would be performing if it weren't for this situation; I continue to be blocked from money, reward, benefit and protections I earn which is infringing on my freedom and human rights; I am still being forced into a state of dependency to keep me controlled, vulnerable and in the United States against my free will; the rich and famous network, and/or corporations and/or organizations of Massachusetts and/or the United States' still intend to use my dependent state for their benefit with intent to force to me engage in sexual relations and/or contact at some point or another that infringes on my freedom and human rights while benefiting them; and the Federal Court continues to block every sex trafficking related claim I make from Discovery and from being in front of a Jury, and has given immunity to Defendants of my sex trafficking related claims that are outright proven in the pleading stage in violation of federal and international law. I survived being severely sex trafficked, how have I not "survived" the system in place to "help me"? Words and phrases such as as "defect" "failure" "to survive" and other language used in the pleading stage has been thoughtless, and offensive.

To not overrule the Federal Court in Massachusetts is to knowingly deprive me of my fundamental human rights in perpetuity with my complete awareness of the situation and to block me from mandatory legal remedy with my awareness just to keep me in the United State against my own free will were I will be forced to knowingly be damaged in this deranged manner for the benefit of United States' organizations and corporations without anything I can do about it until someone else gives me money so that I can leave this Country to find safety from such abuse and mistreatment and to build a new life without any signed Non Disclosure Agreements. Non Disclosure Agreements exists through legal process. If everyone is upset with me expressing my accounts of my "experiences", then reasonably they require them. But the Boston Celtics Franchise and Federal Judges as the United States' organization and corporations are not thinking clearly. They are all too self-involved to accept that they were wrong to not end this at least 1 year before I came forward when indication of my ability to do just this if necessary and if they don't was first presented. Sex trafficking me and damaging me into silence and complicity in no uncertain terms has been legalized at least in the state of Massachusetts as a direct result of the rulings associated with this and the related lawsuits.

This situation took from me any and all reasonable expectation that governmental and non governmental organizations will ever do right in their positions to actually serve and protect as they promise, or be entrusted to actually embody something that is good as they insist on being able do the exact opposite of the fragment of what they get actually get right in expressing is what the embodiment is expected to do and/or believe. The Constitution itself showed grave inabilities to extract all information correctly with its incorrect calculation of persons after expressly understanding All People are Created Equal. This has only worsened.

With everything I have been through, and everything I now know, I desire to live in another country. This is the reasonable response from anyone hurt and damaged to the degree I have been and who trusted someone or something only to find out that it is actual limitless insanity and usually just wrong. I cannot heal from what I have been through in this country. I must be somewhere were there are less upsets all around me, and I do not accept the "delusion" in the form of an "experience" as a possible solution to it. The "delusion" in the form of an "experience" is what facilitated sex trafficking me in what is perverse, grotesque, disgusting and a defect of humanity, and serves as the basis to severe animal cruelty to prepare food known as "waygu" that will forever sadden the soul of this Earth. It not only violated essential and fundamental human and animal rights, but it also managed to violate the spirit of "innovation" and everything this country pretends to hold dear and embody. It will bring shame to humanity forever, as simply a thing that did in fact occur in place of anything better, and whether this country acknowledges it or not. For any good it ever did, the bad far exceeds it. My awareness of this does not make me responsible for anything damaging in nature, although efforts to this end have already occurred. Attempts to murder me are being ignored because of traffickers and conspirators' consciousness of guilt and discomfort with my awareness of a means to inflict damage on me, and as if that ever logically could make me the responsible person. It is actual insanity. Straightforward practical reasoning is ignored. The response to me coming forward showed no growth in this country. Gaslighting effort and "prove it" attitude for this followed by an attempt to give immunity or ignore the issue when proven will forever be another stain on humanity by this country.

I desire to heal somewhere less overtaken, and to try to find peace in what is a destroyed world until others are better in their positions, or resources run out worldwide as the Earth's consequence for this atrocity, which has effectively rolled out into the world through this country's misrepresented influence. Lasting true enlightenment requires departure as to not make the same mistake everyone who effectively received a single line or phrase did here, which is to ultimately use it to partner with and/or support doers of wrong and wrong ideas at large and/or become blind and/or ignorant of the people, animals, earth around them, and in the world at large. This country continues to make plans for me against my desires and in disregard of the situation, and intends to be effective at keeping me here. I find discomfort in this. Is any doctor actually going to disagree with my process of addressing and facing the issue head on, going through a physiotherapy process to ensure the trauma I have endured is accessible but contained and organized, and then determining that true and lasting healing is unrealistic for me in this Country at least because of the widespread degrees of damage I endured would mean I have strong reminders of my pain in everything if I don't move elsewhere?

That is not me being a "traitor", that is a testament to the true degrees of damages I have endured only to see that what happened to me actually is "common practice" and has been happening in one or another this whole time. There is not a timely and fair practice in place to protect real time Victims from this degree of damage, -- there never has been --, and it is not right to punish me for stating it. I should be supported and encouraged to live wherever is available for me to live to find peace. And I should always be welcome back. But it is clear everyone else's interest are coming before that simple truth, again. And it is saddening. This Country has a "Journey" of its own to go on, and I am not "enemy" for saying it. I am a Friend to All, and enemy of none.

"Everyone wants to milk the village goat, but no one wants to feed it." This is a proverb I came across in Berigamo, Italy. I am owed a lump sum of money to rebuild my life and for all forced contact, interference with my life, and infringements of my freedom and fundamental human rights to stop. I identified appropriate individuals to issue me remedy and relief that I need and require to rebuild my life and that would automatically help restore my freedom and fundamental human rights. There is a growing list of "appropriate" people and groups. In one way or another, I require remedy and relief, and my freedom. Without it, I am being held in this country against my own free will and sex trafficked with the intent to continue to sexually violate me and unjustifiably restrict my fundamental human rights with the United States' awareness and requirement for me to "prove it" at the pleading stage while with intent to give unrecognized "immunity" for each instance that is proven outright at the pleading stage, and/or at any stage. I never needed to prove any of it because I live it. I know it is happening. Overt and out of line measures to keep me in the system of abuse that I otherwise effectively escaped from continue to exist and escalate: I am being denied legal representation while at the same time I am being denied use of the legal system without it. If there was any chance that my claims were not true, there would be allowance for hearings at this point. But that is not what is happening. At least 3 federal sex trafficking related complaints involving sex trafficking related damage to me have been erroneously dismissed without offering me a Jury Trial, one of which immunity was actually attempted to be given. The Federal Court is blocking me access from all claims of sex trafficking even when the damage and incidents are new. This is cheating to keep abusing me, keep me from actually being able to rebuild my life, and to keep me dependent and in this country for this country's organizations' benefit against my own free will.

Cruelty based operation and enslavement are in actually, just as bad as it seems. Harmony and balance are not just yoga poses -- these are essential components of this planet. The suffering of one form of life in one area of the world actually does affect everyone everywhere. A foundation where all humans actually live in free will with their fundamental human rights, freedoms, and access to modern day necessities intact while able to pursue a life of their own choosing; where all animals are either living free with light care from humans that protects them and their environments (such as planting food bearing trees and plants, ensuring safe water supplies remain available, dropping food when natural food supplies are low, providing medical services in their environment, etc) or choosing to be cared for and that care is actually enriching their lives; and with reasonable care of and connection with the planet, is actually essential and mandatory because that is the foundation were true and lasting innovation is built from. Anything built on anything else is rotten, and not what it seems. No human or animal suffering should exist anywhere, but if it does, nothing that lasts will be built on top of it or while those suffering await rescue. True correction must be offered first. Offering me Jury Trial or remedy and relief should not be this hard. In today's time, it is not expected that someone endure what I endure and be able to see a path forwards afterwards or find peace. Isn't finding some degree of peace or sense of a life again what everyone is supposed to want for someone in my position? Is it not actually required? I identified what I need to find some degree of peace and a sense of life, and for it to be met with such resistance is disheartening and shocking. Supporting me by ensuring that I live where I want to live that is available to me, doing what I choose to do and having available to me what I expressed I need, -- all of which is very easily accessible and able to occur -- is a no brainer. It is still taking those entrusted in the roles to help individuals like myself too long to come to the right conclusions. People like myself and like the animals being victimized by Wagyu and animal cruelty process suffer for it, but so does everything everywhere. Is knowing that we all really have been in it all together, and the whole time, so much so that everything will be halted or collapsed before the infliction of pain to another slides by without consequence, not what actually keeps us all safe and the best "security"?

Around the corner from the Federal Courthouse, the self-titled "Mastros" in Boston (restaurant) serves Wagyu meat, Wagyu sushi, and boasts on their menu to be "proudly" frying even their vegetables is animal abuse product, "Wagyu" oil as I lay nearby remembering made into a form of Wagyu myself using its same system to induce me into a sexual abuse "experience" I didn't consent to and cannot do anything about in combination with in-person sex trafficking to benefit the Boston Celtics Franchise and devastate me. While doing so, I can't help but wonder, is this the MIA WMD? Was this phrase just a warning about the intended use of the oil? Was it actually being made here in this country by and for its governmental and non governmental organizations the whole time? 50% of the world population and the animals as the first round of victims during its rollout is pretty "mass". It is pretty clear that what this country pretends to embody has distain for this, and is willing to rid the entire Earth of these resources by next generation if change does not happen. Instead of "Mastros" has everyone not in actuality revealed to be the Wizards of Oz?

I began this process believing the Judges of these cases would do the right thing. But here I am. This is a real Federal Claim. This is what the "legal process" is supposed to be for. Why should I think anyone is going to help now? Why should I think anyone is going to stop doing the wrong thing and start doing the right thing? Why should I think this Country cares about me? I have been living this for years without anyone doing anything they are supposed to or that has been effective in restoring my fundamental rights. No one has even acknowledged the situation properly. Is everyone's inability to do right in these situations not the timeless Curse of this Country? My future is foreseeable abuse and loneliness in a life I don't choose and this is not reflective of what I earned. I stand to become barren before ever having a Valentine's Day date, New Years kiss, and the Freedom I earned. The point that no one involved cares about me has been made. I will try to raise the money I need to rebuild a new life and relocate somewhere else through a fundraiser and a self published book explaining all of my "Experiences". I have been to hell and back, several times. I have been enlightened during it. I know where I am. I finish this Petition considering my sharing won't change the legal outcome, and with a heavy heart of doubts on whether the Supreme Court is actually any different than the Federal Court.

VIII. CONCLUSION

Wherefore the foregoing reasons, I respectfully request that this Court issue a Writ of Certiorari to review the judgment of the First Circuit.

DATED this 8th day of July, 2026.

Respectfully submitted,

Jane Doe
Victim of Sex Trafficking
as "Pro Se" aka without
assistance or support

PROOF OF SERVICE

I, Jane Doe, do swear or declare that on this date, July xx, 2026, as required by Supreme Court Rule 29 I have served the enclosed i) MOTION FOR LEAVE TO PROCEED IN FORMA PAUPERIS, ii) PETITION FOR A WRIT OF CERTIORARI, and iii) APPENDICES, on each party to the above proceeding or that party's counsel, and on every other person required to be served, by sending an email containing the above documents to at least the lead attorney for each Defendant/Respondent after being made to believe that each of the party's counsel has agreed to electronic service of process.

The names and email addresses of those served are as follows:

On behalf of Boston Celtics: Keith P. Carroll, keith.carroll@hklaw.com

On behalf of Jayson Tatum: Joshua Louis Solomon, jsolomon@psdfirm.com

On behalf of Marcus Smart: Mitchell B. Schuster, ms@msf-law.com, and,
Sara E.Silva, sara.silva@skpboston.com

As a courtesy, on behalf of Jaylen Brown: J.W. Carney Jr., jcarney@carneydefense.com

I declare under penalty of perjury that the foregoing is true and correct.

Executed on July 08, 2026

Jane Doe
