## PD COMBAT MUNITIONS

### Non-Lethal Systems

NON-LETHAL CAPABILITIES SET (NLCS) ▼

Support Equipment

Acoustic Hailing Device (AHD)

Individual Serviceman's Non-Lethal  
Systems (ISNLS)

Launched Electrode Stun Device (LESD)

### Launched Electrode Stun Device (LESD)

The LESD is an electro-muscular incapacitation device, used to propel wired-probes or to conduct energy directly to affect sensory and motor functions, allowing control over a targeted individual. It can deliver an electrical shock capable of arching up through two inches of clothing and can incapacitate a target without permanent injury or known side effects. The effective range is up to 35 feet.
