## Maine Health Care Worker COVID-19 Vaccination Dashboard

This dashboard provides medical facility and Long-Term Care facility staff vaccination rates. The dashboard shows the percentage of facility staff who are fully vaccinated, as reported by each facility on a monthly basis.

This information is updated monthly by mid-month with COVID-19 staff vaccination data as of the last day of the previous month. Facilities required to report include nursing homes, ambulatory surgical centers (ASC), and certain assisted housing providers, including intermediate care facilities for individuals with intellectual disabilities (ICF/IDD). These facilities are required by the U.S. Centers for Medicare & Medicaid Services (CMS) to self-report COVID-19 staff vaccination rates into the Federal Centers for Disease Control and Prevention's (CDC) National Healthcare Safety Network (NHSN) on a weekly basis. CMS posts this data for the public to view for every state [on their website](#). Maine is additionally requiring hospitals to publicly report staff COVID-19 vaccination rates.

Facility "staff" includes all employees, temporary or contracted personnel, and volunteers and students who are providing care, services, and interacting with facility residents and staff.

To see details for an individual facility, hover over the bar next to its name. A blank indicates that the facility did not report data.

For an FAQ on Maine's requirement that health care workers be vaccinated against COVID-19, please visit the [state's vaccine website](#).
