1366 PROCEEDINGS 2 SPECIAL MASTER LANCASTER: Good morning, 1364 3 counsel. SUPREME COURT OF THE UNITED STATES No. 142, Original MR. ECHOLS: Good morning, your Honor. MR. PERRY: Good morning, your Honor. STATE OF FLORIDA, 6 MR. ECHOLS: Proceed? Plaintiff. SPECIAL MASTER LANCASTER: Sure. VOLUME VI STATE OF GEORGIA 8 CROSS-EXAMINATION Defendants. 9 BY MR. ECHOLS: 10 Good morning, Mr. Sutton. The above-entitled matter came on for HEARING 11 Good morning. before SPECIAL MASTER RALPH I. LANCASTER, held in the 12 Mr. Sutton, I'm going to do things a little bit U. S. Bankruptcy Court, at 537 Congress Street, Portland, Maine, on November 8, 2016, commencing at 13 differently than I did yesterday because it was 8:57 a.m., before Claudette G. Mason, RMR, CRR, a 14 getting a bit slow. So I'm going to skip some Notary Public in and for the State of Maine. 15 documents, and I'm going to go in other documents APPEARANCES: For the State of Florida: PHILIP J. PERRY, ESQ.
JAMME L. WINE, ESQ.
ABID R. QURESHI, ESQ.
CHRISTOPHER J. FAWAL, ESQ.
NATALLE HARDWICK RAO, ESQ. 16 just to individual sentences or parts and not 17 read the entirety of the paragraphs. Okay? 18 That's not to say that in order to answer a For the State of Georgia: 19 question, you should feel free to look at 20 whatever you need to look at; but I just don't 21 want to be accused of misleading you or not Also Present . JOSHUA D. DUNLAP, ESO. 22 reading some section to you in the document. I'm 23 trying to make it go a little quicker. THE REPORTING GROUP Mason & Lockhart 24 So where we left off yesterday, sir, we were 25 in binder number -- your first binder here of the THE REPORTING GROUP Mason & Lockhart 1365 1367 INDEX 1 cross documents. And I believe we were at tab Witness Direct Cross Redirect Recross 2 P. Eric Sutton 1366 1434 1488 3 And, you know, as I said, what I'm going David L. Kimbro, Ph.D. 1503 1504 1572 1610 4 to do is I'm going to skip tab 16. I'm not 5 going to ask any more questions about that. 6 Similarly, I'm going to pass tab 17, EXHIBITS 7 which is GX-562. I'm going to pass tab 18 <u>Number</u> Page Referenced 8 and go to tab 19, if you could, with me, sir. JX-50 1611 JX-77 1387, 1519 9 A. Yes, sir. I'm there. 1X - 9 0 1419 JX-96 1429, 1455, 1491 10 Q. Okay. Now, one thing that I don't know that we 1484 JX-111 JX-163 1376 11 touched on vesterday is that while FWC has 12 FX-412 1403, 1448, 1596, 1615 enforcement responsibility on the water, FDACS FX-413 1435 13 FX-423 1443 also has some enforcement responsibility with FX-485 1475, 1497 14 respect to inspecting in plants and such; is that FX-797 1532 FX-798 1549 15 correct? GX-486 1506, 1599 That's my understanding. 16 A. GX-568 1575, 1611 GX-569 1413, 1446 17 $\boldsymbol{Q}_{\hspace{-0.1em}\boldsymbol{.}}$ And sometimes in the course of performing those G X - 5 7 5 1421 GX-584 1425 18 inspections, FDACS may bring to the attention of GX-589 1483 19 FWC if it runs across undersized oysters or GX-593 1427 GX-595 1428 20 ovsters that have been harvested contrary to the GX-644 1431 GX-676 GX-677 1368 21 regulations; is that right? 1371 G X - 734 22 Α. I would expect them to communicate that. GX-1244 1425 GX-1248 1392, 1473 23 Q. I think you said that's part and parcel of the GX-1304 1486 GX-1306 1370 24 agencies working together, you know, on these GX-1312 1496 GX-1313 25 types of issues. Correct? GX-1318 1565 THE REPORTING GROUP THE REPORTING GROUP

Mason & Lockhart

Mason & Lockhart

TRIAL - November 8, 2016 (Vol. VI) Florida v. Georgia 1370 A. Correct. A. I -- I expect them to communicate any of their 2 2 **Q.** If we look, please, at the document in tab 19, findings. 3 which is GX-676, if you would see here, sir, we 3 Q. Okay. Can we turn to tab 20, please. have Joe Shields, who is a DACS employee. 4 Now, in tab 20 --4 5 Correct? 5 MR. ECHOLS: This is not -- it's 1306. 6 A. I -- I think so, yes. A. I'm there. 7 Q. And he's e-mailing Kal Knickerbocker, who is his 7 Q. Okay. It's GX-1306. You will see that you have 8 supervisor at DACS. Right? 8 at the bottom of the first page the e-mail from 9 A. I know Kal is employed with DACS. I'm not sure 9 Joe Shields to Mr. Knickerbocker that we just 10 of the supervisory relationship. 10 read. And then in the -- two-thirds of the way 11 **Q.** My understanding, correct me if I'm wrong, is 11 down Mr. Knickerbocker forwards it to Jim Estes of FWC. Correct? 12 that Mr. Knickerbocker succeeded Mr. Berrigan. 12 13 Generally does that sound right? 13 A. Yes. 14 A. I think so. 14 **Q.** And he says, Jim, these pictures were taken by 15 Q. Now, here we have Mr. Shields is e-mailing 15 our processing plant inspector today. 16 16 It proceeds up to Mr. Estes, who sends this Mr. Knickerbocker. It says, Kal, the attached 17 17 pictures were taken by Inspector Nancy Horton and to a Louie Roberson? 18 are of oysters received by Water Street Seafood, 18 A. Roberson. 19 from Susan Reeder. Obviously they are 19 **Q.** Roberson, I'm sorry. Who is Mr. Roberson? 20 20 undersized, but they coincide with what we A. At the time Mr. Roberson was the regional 21 discovered with our assessments. And the result 21 director for the Northwest Region at FWC. 22 22 Q. Okay. So he's a FWC person. Right? is a 60-pound bag comprised of undersized 23 oysters, dead shell, and shell hash matrix. I 23 A. He has since retired. 24 have no information on where these particular 24 **Q.** At the time Mr. Roberson, the regional manager of 25 oysters are from, but these pictures could be 25 FWC, he, above there, e-mails back to Jim Estes, THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1369 1371 1 forwarded to FWC and utilized when they are 1 this is ridiculous. The oystermen can have 20 2 2 making oyster resource based decisions. percent shorts in a bag anyway. This doesn't 3 Do you see that? 3 prove much of anything. Louie. 4 A. I do. Do you see that? 4 A. I do. 5 **Q.** And this is the type of thing that we just talked 5 6 about where if DACS ran across undersized oysters 6 Q. And this is Mr. Roberson writing back to 7 in its surveys of dealers, it would pass that 7 Mr. Estes. Mr. Estes responds, thought you would 8 8 like it, above. Correct? information along to FWC? 9 A. I would expect so. 9 A. Correct. Q. And there is nothing wrong with that. In fact, 10 10 Q. If we could turn, please, to tab 21, in tab 21 is 11 11 that's probably part of their responsibility; GX-677. And we have here an e-mail from -- at 12 wouldn't you say? 12 the bottom, from David Heil to Jim Estes. And 13 A. I would expect that in routine coordination. 13 then it looks like above that, he re-sent the 14 **Q.** And just to have some nice color pictures, you 14 e-mail -- reforwarded it to Mr. Estes. That's at 15 can see, if you turn to the next pages, you have 15 least the way it appears here. 16 got apparently what Ms. Horton -- Inspector 16 If we start at the bottom, please, Mr. Heil,

17 Horton passed along, pictures of what she found 18 with these undersized oysters in the plants or in 19 the -- rather, in the dealer. And she puts a pen 20 next to it.

> You can flip to the next one here, too, to give a sample of what the size is.

So -- and, again, this is relatively ordinary course what you would expect them to do.

Correct?

23

24

25

THE REPORTING GROUP Mason & Lockhart

17 who is of FWC; is that correct? 18 A. That's correct. 19

Q. And he's e-mailing Mr. Estes. And he says in the 20 paragraph, several calls today from oyster

21 fishers requesting Apalachicola Bay to be closed. 22 Rationale, fishers taking too many very small

23 oysters and taking unculled oysters, including

24 shell material, in that first couple of

25 sentences.

> THE REPORTING GROUP Mason & Lockhart

TRIAL - November 8, 2016 (Vol. VI) Florida v. Georgia 1374 1 And then at the very bottom it says, of the 1 noting that the taking of shell material can 2 2 above, taking shell material results in long-term cause long-term damage. And as you said, it 3 damage. 3 would perhaps depend upon the scale. But I 4 Now, Mr. Heil is familiar with oysters and wanted to use that to move into the restoration 5 the oyster fishery; would you agree? activities that the State of Florida would engage 6 A. Yes, I would. 6 in in the process called reshelling. Are you 7 Q. And do you read his statement here, taking shell 7 familiar with that? 8 material results in long-term damage, to be that 8 A. Reshelling, cultching, yes, sir. 9 if oystermen are removing shell from the reef, 9 Q. And you would agree with me, would you not, that 10 that that is damaging to the reef structure? 10 reshelling and cultching are best management 11 A. I think it would depend on the amount that that 11 practices when dealing with oysters? 12 12 would occur at. I would assume they are filling A. It's a best management practice that's been 13 their bags and trying to sell bags, and they're 13 employed for many, many decades. Correct. 14 collecting shell. 14 Q. And similarly, reshelling and cultching are part 15 **Q.** And would you agree with Mr. Heil that taking 15 of the restoration efforts of oyster reefs to 16 16 shell material results in long-term damage? enhance those reefs? 17 A. I don't think that I would reach that same 17 A. It's part of the restoration and maintenance of 18 conclusion. I wouldn't even know to what degree, 18 the resource. 19 what scale that's occurring. 19 Q. Similarly, the reshelling, the cultching is part 20 20 Q. Would you agree that Mr. Heil is more familiar of the process to assist the substrate of 21 and knowledgeable of the oyster reefs and fishery 21 portions of the reef; is that correct? 22 22 than you, yourself, are? A. Right. Substrate for attachment of spat. 23 A. I would agree with that. 23 Q. As Mr. Berrigan was explaining to us yesterday --24 Q. And if we go to the e-mail above then where 24 actually, I guess on Friday, you need to have the 25 Mr. Heil re-emails Mr. Estes, he notes, for what 25 hard surface, the substrate, for the spat to land THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1373 1375 1 it is worth, Mark Berrigan told me that one of 1 on to then be able to grow up to become adult 2 2 the Apalachicola dealers told him that there is oysters. Right? 3 3 indeed a large-scale harvest of 1-inch oysters A. I would certainly defer to Mr. Berrigan on that. 4 **Q.** Do you recall, sir, that in the August 2012 DACS occurring. 4 5 5 report that was attached to the Governor's letter Now, yesterday we talked about whether the 6 6 harvest of sub-legal and small oysters could have for the disaster declaration, that report noted 7 7 an impact on the health of the oyster fishery. that the reef substrate had been degraded to some 8 8 Do you recall that? extent? 9 A. I recall. 9 A. Yes. To some extent I recall that statement. 10 10 **Q.** Now, would the large-scale harvest of 1-inch **Q.** And in your written direct, sir, you state -- and 11 11 oysters have an impact on the biological ability this is in paragraph 35 of your written direct --12 of the oysters to reproduce and grow to adult and 12 you state that hundreds of acres were cultched in 13 13 harvestable stage? Franklin County between 2010 and 2015. A. Again, it would depend on the scale you're 14 14 Do you recollect that? 15 expressing. Large scale is a little bit vague as 15 Right. For example, hundreds of acres were Α. 16 to what that is. 16 culched just in Franklin County between the 17 Q. And we had the brief discussions about the 17 beginning of 2010 and 2015. Right. So here we are in paragraph 35, you go 18 millions of gametes and such that oysters use 18 Q. 19 when they reproduce. Do you know whether 1-inch 19 down six lines; and there's the sentence 20 oysters have reached the point at which they are 20 beginning, for example, hundreds of acres were

22 A. I would defer that question to others testifying. 23 Q. All right. I would like to change topics, if we

24 could, please, sir. Now, what we just looked at,

reproductive age?

25 I guess it was two documents back, was Mr. Heil

Mason & Lockhart

But now, sir, it is not the case, is it, that

beginning of 2010 and the end of 2015.

1378 1 collapse; is it? 1 Florida state records. It is accurate, is it 2 2 A. I would want to refer to the logs to verify that. not, that it was not hundreds of acres that were 3 Q. Okay. Let's refer to the logs then --3 shelled or culched prior to the collapse; in fact, for the years of 2011, 2012, and 2013 A. Okay. 5 Q. -- to verify that. 5 there were only 70 acres shelled in total. Is 6 And we have, if you would turn to tab 22 in 6 that accurate? 7 your binder --7 Between what years again? 8 A. Yes, sir. I'm there. 8 Q. The ones I have reflected here, sir, 2011, 2012, 9 Q. And can you please identify tab 22, which is 9 and 2013, all combined and added together. 10 JX-163, as the official log that the State of 10 A. I'm assuming that you calculated the acreage 11 Florida provided us, which identifies the amount 11 correctly. That would be 70 total for those 12 of cultching or reshelling that took place 12 years you identified. 13 between 2010 and 2015. 13 Q. Okay. And then I provided your counsel the 14 A. Yes. I'm reviewing that here right now. 14 numbers I would be using. And if I have got them 15 Q. And this, sir, is the actual -- and it's in a 15 wrong, I'm sure she will let me know. 16 16 joint exhibit meaning that both Florida and So let's look at 2013 specifically. In 2013 17 17 Georgia have identified it to be entered into there were 16 total acres shelled in Apalachicola 18 evidence. This is the actual state true and 18 Bay according to official state records; is that 19 accurate record of the shelling and cultching 19 right? 20 20 activity that was done between 2010 and 2015? A. That's what I see here. 21 A. Yes. That's what my direct testimony references, 21 **Q.** And to make sure that we're all looking at the 22 this exhibit. 22 same thing in the official state record, in 23 **Q.** All right. Because it is awfully difficult to 23 tab 22 where we were, JX-163, I would ask you, 24 read this as a spread sheet, in advance of 24 please, to turn in -- you have got the cover 25 getting to this area I sent your counsel some bar 25 page. Then turn in one page, two pages, three THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1377 1379 1 charts that turned these numbers into bars so we 1 pages to where you get to the table that has on 2 2 could look at them and understand them more the far left date column, 2013, if you could look 3 3 easily. And we have got them turned into some at that, please. slides, which I would like to distribute here. A. Okay. I'm there. 4 4 5 A. Thank you. 5 **Q.** Okay. And would it be accurate for the Court to understand this record as showing, beginning at 6 MS. WINE: Your Honor, I don't want to 6 7 7 be picky; I just want to note for the record that point, the cultching, the reshelling that 8 8 was done in 2013 at that top portion of this page that what was just handed to me was not 9 provided prior to the testimony. We were 9 of JX-163? 10 10 A. That's what the record shows, yes, beginning in given some bar charts the other evening --11 I'm not sure if you're getting to those as 11 February. 12 well -- but these four documents were not 12 Q. And that's where -- you know, we don't have to do 13 13 the math together -- feel free if you like -provided to us beforehand. 14 SPECIAL MASTER LANCASTER: Thank you. 14 where we got the 16 acres for 2013. Do you see 15 MR. ECHOLS: Judge, what I did is I 15 2 and 2.8 running down there? 16 provided the data for the entire period. And 16 A. I see those numbers, yes. 17 for purposes of this, I changed the colors 17 Q. Now, the other thing that's shown on this 18 and added some words. So I wanted to make 18 particular page of JX-163 is the cost, the amount 19 sure that counsel had all of the data that 19 of money that was spent for the reshelling. Do 20 would be being referred to, and then I turned 20 you see that about five columns in? 21 21 A. I do. that data into demonstratives. 22 22 Q. And in order for us to be able to read this, I BY MR. ECHOLS: 23 23 **Q.** So, sir, if you would look, please, at -- we have have had this blown up, this particular section 24 got on slide 7 the first demonstrative that I 24 for 2013. If we could please look at slide 25 have provided here based on JX-163, the official 25 No. 8. THE REPORTING GROUP THE REPORTING GROUP

10

18

1

2

4

10

12

15

- 1 And you should have that handed to you, I 2 believe, in your set.
- 3 A. I'm referring -- I'm looking at -- you referenced 4
- 5 Q. So when we look at 2013, sir, based on the
- 6 official state record, is it accurate that in all
- 7 of 2013, the total amounts of money spent for
- 8 shelling and cultching was \$109,375?
- 9 A. I'll assume you did the math correct there.
- 10 **Q.** And that's accurate, \$110,000, shall we say, is 11 all that the State of Florida spent on shelling
- 12 in 2013?
- 13 A. Based on this record.
- 14 **Q.** And this is in the midst of the historic collapse 15 of the oyster fishery. Correct?
- 16 A. In the midst?
- 17 **Q.** 2012-2013, the collapse is happening.
- A. After the collapse, yes. 18
- 19 **Q.** And you testified in your direct, I believe, FWC
- 20 is one of the largest and most well-funded state
- 21 wildlife management agencies in the nation. Is
- 22 that accurate?
- 23 A. That's accurate.
- 24 **Q.** But FWC didn't spend any more than \$110,000 here?
- 25 A. They spent 110 based on this record.

THE REPORTING GROUP

Mason & Lockhart

- 1381
- Q. And I take it there was no special request for a
- 2 legislative appropriation for additional moneys
- 3 to reshell in 2013 here that would have allowed
- FWC to spend more than \$110,000? 4
- 5 A. I'm not aware of any LBR. I'm only aware of
- 6 requests for fishery disaster and looking to use
- 7 those funds.
- 8 **Q.** And FWC didn't get any money from the Department
- 9 of Environmental Protection, DEP, to do more
- 10 shelling than this \$110,000?
- 11 A. I -- I don't recall. I can tell you that in the
- 12 budget development process, there's a lot of
- 13 precursors to your final submittal. So I don't
- 14 recall the details of drafts or what might have

legislative budget request to the legislature.

- 15 been proposed before it made its final
- 17 Q. Now, Apalachicola Bay principally is in Franklin
- 18 County. Right?
- 19 A. Correct.

16

- 20 **Q.** And Franklin County, is that part of the
- 21 Northwest Florida Water Management District?
- 22 A. That's within their -- the boundaries; correct.
- 23 Q. And that's -- but FWC did not obtain any moneys
- 24 in the Northwest Florida Water Management
- 25 District for reshelling in 2013 either?

THE REPORTING GROUP

Mason & Lockhart

- A. I would want to refer to our budget to confirm or
- 2 not on that statement, sir. I'm not able to be
 - well-versed on our budget. It's a very large
- 4 budget, very complicated.
- 5 Q. At a certain point in time around this exact
- 6 time, 2012-2013, that's when Secretary Steverson
- 7 and Secretary Cyphers took over the Northwest
 - Florida Water Management District. Correct?
- 9 A. I'm not sure at what point they took --
 - Mr. Steverson took the executive director job and
- 11 Mr. Cyphers took the assistant executive job.
- 12 Q. But I take it you are aware, are you not, that
- 13 when they came into those positions, they
- 14 determined that the Northwest Florida Management
- 15 Water District had built up a reserve of 70 to
- 16 \$80 million for restoration that hadn't been
- 17 spent? You're aware of that? A. I'm not aware of that.
- 19 **Q.** You're not aware of the fact that when they came
- 20 in in this 2012 time period, they determined that
- 21 the prior executive director had stored some of
- 22 the restoration funds; and they hadn't been
- 23 spent. So there was a bank account basically of
- 24 \$70 million there available for restoration
- 25 activities?

THE REPORTING GROUP Mason & Lockhart

1383

I'm saying I don't have direct knowledge of that.

A. I'm not saying I don't -- that wasn't the case.

- **Q.** In any event, none of that money was appropriated 3
 - to reshelling in 2013?
- 5 A. I would refer to this chart to show what was
- 6 shelled into our fish log.
- 7 **Q.** Now, if we go back a decade before the collapse
- 8 of the oyster fishery, if we flip to the next
- 9 slide, please. So I'm not just looking at the
 - three years; I'm going for the entire decade now.
- 11 And, again, we have turned into bar chart the
 - information that's in JX-163, the official state
- 13 record. And that shows that in that entire
- 14 decade beginning in 2004, it was not hundreds of
 - acres that were reshelled; it was a total of 180
- 16 acres. Isn't that true?
- 17 Α. From 2004 to 2013?
- Q. Yes. 18
- 19 So it says 178 acres based on your chart.
- 20 Q. I think I might have rounded it up or else I did
- 21 the math wrong. But in fact, there were years in
- 22 the early 2000's or, rather, the mid-2000's when
- 23 there was no reshelling done at all. Correct?
- 25 Q. But consistent with your testimony, there was

THE REPORTING GROUP

A. That's -- yes. That's what your chart reflects.

Mason & Lockhart

1 some reshelling done after this point in time, if 2 we can look at the next slide, please. And you 3 should have it there also in front of you.

> And so in order for us to get to the hundreds of acres being reshelled, we have to go to 2014 and 2015. And, again, this information comes from JX-163. And it shows that the state did do some reshelling in those years in 2014 and 2015. Correct?

10 A. That's what it shows, yes.

4

5

6

7

8

9

- 11 **Q.** And that's accurate; is it not?
- 12 A. I would assume if it's drawn from this spread 13 sheet, it is.
- 14 **Q.** And, in fact, the moneys that the State used to 15 do that reshelling it received as part of the 16 disaster declaration request that had been --17
- 18 and provided those funds. Is that right?
- 19 A. I know that we received a significant amount of 20 funding from that disaster declaration.

when the federal government declared a disaster

21 **Q.** And at that point in time FWC and the State of 22 Florida believed that it did make sense to engage 23 in this reshelling activity because it's a best 24 management practice and would, hopefully, assist 25 with the restoration of the oyster resource?

THE REPORTING GROUP Mason & Lockhart

1385

- A. Well, as I think you mentioned, it's a best 2 management practice that's been employed for decades. And when the environmental conditions 3 are correct, it helps in recovery. 4
- 5 **Q.** And especially as is the case here, now for 2013, 6 we know we were out of the drought. Right?
- 7 A. You know, I -- I'm not that familiar with the 8 climatic data. All I know is I'm familiar with 9 the low flows and high salinities.

I want to be cautious not to testify when I'm not an expert on the meteorological side of this equation. So --

- 13 **Q.** And, in fact, I'm going to change topics now.
- 14 A. Okav.

10

11

12

- 15 Q. But in order for us to get this out of the way, 16 since I won't be reading every sentence in every 17 paragraph, we can agree that there was a drought
- 18 in 2011 and 2012?
- 19 A. Based on everything I reviewed, yes; that's 20 correct.
- 21 **Q.** And we can agree, too, that because of this 22 drought, there were low flows coming into the --23 from the river into the bay?
- 24 A. I would agree there was a high salinity in the 25 bay.

THE REPORTING GROUP Mason & Lockhart

Q. Yes, exactly. There were low flows and there was

2 high salinity and there were predators. That's

3 what happens in droughts. Right?

A. Well, again, I'm not testifying as from the 4

5 causal perspective. I can give you qualitative

6 and say, yes, there was high salinity. And

7 certainly drought would be part and parcel to

8 high salinity. That would seem to make logical

9 sense.

10 Q. Now, sir, it is the responsibility of FWC to 11 manage the fishery both in years of drought as

12 well as in years of good environmental

13 conditions; is it not?

- 14 A. That's what we do throughout the state through 15 many droughts, through many floods, yes.
- 16 **Q.** And similarly, with respect to Apalachicola Bay,
- 17 it is the responsibility of FWC to manage the
- 18 fishing of any of the oyster reefs in the bay,
- 19 including the most commercially productive reefs
- 20 like Cat Point and East Hole; is it not?
- 21 A. That's correct.
- 22 **Q.** Let's then change topics. And I would like to
- 23 ask you about landings, about FWC's collection
- 24 and tracking of landings and licenses. And is it
- 25 correct, sir, that FWC is the responsible agency

THE REPORTING GROUP

Mason & Lockhart

1 for issuing fishing licenses?

- 2 A. We are. And in this instance, it would be the
- 3 saltwater products license; and in the
- 4 Apalachicola Bay, a harvesting license. It's a
 - special license.
- 6 Q. And when -- once somebody obtains this license,
 - then they are permitted to go and harvest oysters
- 8 anywhere in the bay subject to whatever the
- 9 restrictions are that are imposed by FWC; is that
- 10 right?

5

7

- 11 A. Subject to the restrictions, which can be 12 geographic, and certainly the bags and size.
- 13 **Q.** And, now, can we go back briefly to JX-77, which 14 is behind tab 4 of your binder.
- 15 A. Okay. I'm there, sir.
- 16 Q. And in that tab I would ask you to page back to 17 the second page of the August 2012 DACS report.
- 18 A. I'm sorry. What page are you on, sir?
- 19 **Q.** I'm sorry. Page 2 of the DACS report that has
- the table in it. 21 A. Okay. Table 1, I assume?
- 22 Now, you see here, sir, in the 2012 DACS report
 - this table 1. It reports the years, running down
- 24 the left, the pounds of meats that are harvested,
- 25 trips, and then there is the column No Licenses.

THE REPORTING GROUP

23

1388 1390 1 Do you see that? collapse as indicated on the chart. Right? 2 A. I do. 2 A. Yes. 2012 is the collapse; correct. 3 Q. Do you understand that, sir, to identify how many 3 And so more fishermen could lawfully fish in 4 licenses had been issued by FWC in any particular those years than in any of the prior years; is 5 given year? 5 that right? 6 A. That's my understanding. 6 Α. And, based on your chart, until 2000, yes. 7 Q. And similarly, the pounds of meats, that's to be 7 Now, in that table 1 we also talked about and 8 the pounds of oysters that the oystermen 8 referred to landings. And landings is what gets 9 harvested from the reefs and brought to the dock 9 brought to the dock. Right? 10 as part of their catch; is that right? 10 That's my understanding, yes. 11 As part of the reporting requirements. 11 Now, we -- when I had Mr. Berrigan here on 12 Q. The reporting requirements, okay. 12 Friday, we had put up the landings running 13 Okay. If we could look at tab 4, please. I 13 through, I believe, 2012. You know, so what I 14 have turned this into a bar chart with respect to 14 have done now is based on the Florida records, 15 the -- I'm sorry. Not tab 4, slide 4. 15 you know, I have extended that through 2015, if 16 A. Do I have that? 16 we could flip, please, to the next slide. 17 Q. I'm going to hand it up to you so you have it in 17 And you have that slide with you? Did I give 18 18 hard copy. that to you? 19 A. Thank you. 19 Α. Yes. 20 20 Q. Okay. And the -- the landings that FWC tracks --MR. ECHOLS: If you could put, please, 21 21 slide 4 up. now, those are official data; aren't they? 22 22 And what we have here -- and this -- I It's my understanding that it is. Α. 23 23 Q. provided this chart without the colors on it And these data are supposed to be accurate? 24 and the -- the dotted lines to counsel two 24 Α. They are. 25 25 Q. nights ago. The State relies on these data; do they not? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1389 1391 BY MR. ECHOLS: The State relies on this for reporting; correct. 1 2 **Q.** So this is turning this table 1 into a bar chart. 2 **Q.** And in fact, when the State applied for the 3 3 And feel free, if you want to refer back, to see federal disaster declaration, it submitted data 4 if I listed the numbers correctly from table 1. 4 concerning landings to the federal government; is 5 5 A. It's the licenses right now. Correct? that right? 6 6 Α. **Q.** Is it accurate, sir, that there is no restriction When we submitted the disaster request, we 7 7 concerning the number of licenses that can be included this entire report, correct, which would 8 issued in any given year? 8 have had table 1 in it. 9 A. I don't believe this to be a limited entry 9 Q. Since -- and there were -- as you know, the 10 10 license system. process that took place with requesting the 11 11 **Q.** That is so long as someone comes and pays and disaster declaration, there were subsequent 12 12 fills out the forms, does whatever they're communications to the federal government that 13 13 required to do, there could be an unlimited updated -- updated some of the landings data; 14 number of licenses issued? 14 you're aware of that? 15 A. Theoretically. However, if it exceeded a certain 15 Α. I'm aware there was correspondence back and forth 16 point, I'm sure our commission would take up 16 as they were making their determination, yes. 17 17 Q. should it be a limited entry. And since Mr. Berrigan was no longer an employee Q. Could you confirm for me, sir, that based on this 18 18 when we had him here on Friday, could you please 19 data, that the three years prior to the collapse 19 confirm for me that based on the official FWC 20 were the three highest years of the number of 20 landings data, the two highest years of harvest, 21 21 licenses being issued, at least going back going back 25 years as reported in the official 22 22 approximately there a decade? data, were in 2011 and 2012. Is that right? 23 23 A. In the time scale you provided, those are the That's, I think, important that you said 24 within -- since 1988; correct. 24 highest numbers. 25 25 **Q.** And these are the years leading up to the fishery Right. And so that it's written in the text of THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

1395

3

202

- the record, 2011, there are 2.81 million pounds
- 2 harvested; is that right?
- 3 A. That's correct.
- **4 Q.** And in 2012, 3.03 million pounds harvested.
- 5 Correct?

8

25

1

- 6 A. Just -- I would just add that the 2012 data, I
- 7 don't see that on the table 1 that you're
 - referring to that I believe you said you drew --
- 9 you drew your information from this exhibit as
- 10 well as another?
- 11 Q. Well, actually, I have -- for the Court's
- 12 purposes, you know, here at the very bottom,
- there are exhibits that are the data files that
- 14 contain the full period of time. So we have
- identified on this chart, there is a GX-1248 --
- meaning it's a Georgia exhibit -- which is also
- identical to a Florida exhibit, FX-839. And so
- that there wouldn't be any confusion of what I
- 19 was using, I sent that to your counsel to be able
- 20 to confirm that these are the appropriate
- 21 numbers. Okay?
- 22 A. Okay. I'm not trying to be argumentative. I
- just want to make sure -- if I'm referring to
- table 1 in this chart that I hadn't seen, I want
 - to make sure that I understood what you were

THE REPORTING GROUP

Mason & Lockhart

decade or two?

- 2 A. Sure. I mean, there's -- the bars show you that
 - it's -- again, going back to 1988, show you that
- 4 it varies.
- **Q.** And it's not the case that the same amount of
- **6** oysters are harvested in every single year.
- **7** There can be substantial variation. Right?
- 8 A. Correct. Again, you're going back to 1988. The
- 9 fishery has been active for much longer than
- 10 that.
- 11 Q. Okay. I'm finished with this topic, this area.
- I want to move to another section, if we could.
- And now, sir, what I'm going to ask you aboutnext is the process by which the disaster
- declaration was requested and the communications
- with the federal government and the development
- 17 of the FWC report. And in order to do that, I
 - have got different documents for you. Okay?
- 19 A. Okay.

18

- 20 Q. Okay, sir. And I think, as you testified
- 21 yesterday, you, yourself, were not personally
- involved in the drafting of the FWC report that
- was used in the disaster declaration; but as part
- 24 of your responsibilities, you may have seen it
- 25 along the way. Is that correct?

THE REPORTING GROUP

Mason & Lockhart

1393

- referring to.
- 2 Q. Sure. We're off of table 1 now.
- 3 A. Okay. Thank you.
- 4 Q. And it is also accurate, as Mr. Berrigan
- testified -- and I'm not sure if you were here
- 6 for that part or not -- that then after this
- 7 historically high amount of landings in -- that
- **8** were harvested in 2011 and 2012, there was a
- **9** significant drop-off in subsequent years.
- 10 Correct?
- 11 A. That's what this table reflects.
- **12 Q.** And that's what the official State of Florida
- 13 landings data reflects. Correct?
- 14 A. I'll take your word based on these docs,
- 15 correct -- on the exhibits.
- **16 Q.** Just by way of characterization of this stretch
- of this time period of data, would you agree with
- me, sir, that it is not the case that it's the
- same rate of harvest in every year over the
- **20** period of these decades?
- 21 A. I'm sorry. Can you repeat that?
- **22 Q.** Sure. These bars differ, in some cases
- substantially, by as much as three or four times;
- there's different amounts of pounds that are
- 25 harvested in different years over this past

THE REPORTING GROUP
Mason & Lockhart

- A. It's possible that I had. But I was not directly
 involved in developing that. Correct.
- 3 Q. All right. Let's talk about the process that the
- 4 FWC report and the request for the disaster
- **5** declaration was conducted. And I believe, as you
- 6 testified, it's David Heil and Jim Estes of FWC
- 7 were generally the principal people involved in
- **8** the drafting of the disaster declaration?
- 9 A. That's my understanding, yes.
- 10 $\,$ Q. I'm sorry. Not the declaration, but the FWC
- 11 report?
- 12 A. Yes. In drafting the report, correct.
- **13 Q.** Now, the -- at the beginning of this process when
- 14 FWC and DACS identified that there was a
- 15 significant problem with the oyster population,
- when Florida wanted to request the disaster
- declaration, the first thing they did was to go
- 18 to Georgia to ask for some assistance in drafting
- 19 the request. Isn't that true?
- 20 A. I'm not aware of that.
- 21 Q. You're not aware of the fact that -- that
- 22 Florida, when they wanted to put together their
 - letter to the Department of Commerce, asked
- **24** Georgia for help?
- 25 A. I -- I am not. I'm not aware of that.

THE REPORTING GROUP

Mason & Lockhart

5

11

13

24

2

- **Q.** If we could please turn, sir, to tab 32 in your 2
- 3 A. Okay. I'm there. Sorry.
- Q. You're there. No problem.
- A. Yes.
- 6 MR. ECHOLS: And tab 32, this is the 7 first tab in the new binder, your Honor.
- 8 BY MR. ECHOLS:
- 9 Q. And you'll see here that we have got an e-mail.
- 10 If you go down to the -- near the bottom of this 11 page, you can see here, sir, an e-mail from a Pat
- 12 Geer from the Georgia Department of Natural
- 13 Resources to a Jim Page and to Mr. Heil -- to
- 14 David Heil. Correct?
- 15 A. I see that.
- 16 **Q.** And what Mr. Geer sends to Mr. Heil and says is
- 17 attached is a document containing the original
- 18 letter from our Governor at the time requesting a
- 19 disaster be declared, and response from NMFS
- 20 requesting additional info and our response with 21 supporting info. Hope this helps.
- 22 Do you see that?
- 23 A. I do.
- 24 **Q.** If you turn in to the attachment, do you see
- 25 there, sir, that what Mr. Geer, from the Georgia

THE REPORTING GROUP

Mason & Lockhart

- 1397
- 1 Department of Natural Resources, is sending
 - Mr. Heil of FWC is the letter that the Georgia
- 3 Governor, at that point Roy Barnes, sent to the
- 4 Department of Commerce in connection with the --
- 5 their blue crab disaster request. Do you see
- 6 that?

2

- 7 A. I see a letter from Roy Barnes. I hadn't seen
- 8 this before. If you would like me to read it, I
- 9 certainly can.
- Q. You certainly can. I'm -- as I said before, I'm 10
- 11 going to refer to just a couple of things; but I
- 12 don't want to cut you off from looking at 13 whatever you would like to look at.
- 14 A. I hadn't seen it, so I apologize; but I would 15 like to review it.
- Q. Sure. 16
- 17 A. Okay, sir. I have read it. Thank you.
- 18 **Q.** Very good. And we don't need to turn back to it;
- 19 but, you know, of course, that in September 2012,
- 20 Governor Scott wrote to the U.S. Department of
- 21 Commerce requesting a disaster declaration for 22 the oyster fishery. Right?
- 23 That's our principal document we have looked 24 at many times.
- 25 A. Yes, I'm aware of that letter.

THE REPORTING GROUP Mason & Lockhart

- **Q.** There are a couple things that I just briefly
- 2 wanted to touch upon that related to the Georgia
- 3 request as compared to the Florida request. And
- 4 I think you can just keep this one in front of
 - you, you know, because I have put together a
- 6 comparison that, hopefully, will make this
- 7 easier.
- 8 A. Thank you.
- 9 **Q.** And so if we could look at the first -- the slide
- 10 11 here. Do you see we have the Georgia letter
 - which was provided by Mr. Geer to Mr. Heil to
- 12 assist in Florida's request for the disaster
 - declaration. And I'm looking here at what I
- 14 believe is the second paragraph, if you have that
- 15 Georgia letter in front of you. And I have put
- 16 on the table, so that you can see it, the similar
- 17 text from Governor Scott's letter requesting a
- 18 disaster declaration.
- 19 A. Okay.
- 20 **Q.** And as you can see, would you agree with me that
- 21 we have got quite a bit of similarity between
- 22 these two letters. So in the Georgia letter, it
- 23 says, the State of Georgia has experienced an
 - unprecedented decline in the abundance of blue
- 25 crabs within our coastal estuaries, a direct

THE REPORTING GROUP

Mason & Lockhart

- 1 consequence of which has been a significant loss
 - of income to commercial fishermen, in that
- 3 sentence. Right?
- A. Right. 4
- 5 Q. And I'm not going to read the entirety of
- 6 Governor Scott's letter; but do you see that in
- 7 Governor Scott's letter it says basically the
- 8 same thing, that Florida had experienced an
- 9 unprecedented decline in the abundance -- but 10
 - instead of blue crab, it says oysters. Right?
- 11 A. In general that's -- they're similar in that 12 regard.
- 13 **Q.** Okay. And I'll just refer to one other section
- 14 of the letter, if we can go to the next slide, 15 please.
- 16 And so we have here on the bottom of the page 17 of the State of Georgia's letter the line that begins disaster relief funds. Are you there,
- sir? 19

18

- A. Yes. 20
- 21 **Q.** And do you see in the State of Georgia's letter
- 22 that the Georgia Department of Natural Resources
- 23 gave to Mr. Heil to assist Florida, it states,
- 24 disaster relief funds authorized by the relevant
- 25 statutes are needed to, 1, further assess the

THE REPORTING GROUP

Q. On page 7 of the Laura Petes memo?

TRIAL - November 8, 2016 (Vol. VI) Florida v. Georgia 1406 Q. And Ms. Petes or Dr. Petes in her conclusions --**Q.** And you don't have any information that anyone at her conclusions are reflected at the very bottom 2 FWC has spoken to Dr. Petes and asked her what 2 3 of that page 7. Do you see that? 3 she meant when she wrote what she did. Right? A. I do. Under the subheading Conclusions? A. I'm not aware of that. Q. Yes. Conclusions and looking to the future, Q. All right. And so, briefly, just to, again, get 6 colon. 6 us in the right chronology of this, the e-mails 7 A. Yes. 7 at the front of this FX-412 -- it's a little 8 **Q.** And at the very bottom of that page in this 8 confusing because we have the e-mail forwarding 9 conclusion section of Dr. Petes's memo there is a 9 situation; but if you go to the second page of FX-412 --10 paragraph that begins it is difficult. 10 11 A. Yes. I'm there. 11 A. Okay. 12 Q. All right. And in that paragraph of Dr. Petes's 12 Q. -- in the very middle of that page, if you would 13 memo in her conclusions she states, it is 13 see there it says forwarded message. And that's 14 difficult to assess the relative magnitude of the 14 from Dr. Petes; and the date is September 21, 15 impacts caused by each of the major contributing 15 2012. So that would be shortly after the 16 factors, paren, drought versus harvesting, to 16 Governor's letter went in to the Department of 17 17 recent population declines in Apalachicola Bay. Commerce. You would agree with me? 18 The rapidity of the decline is likely due to the 18 A. Yes. Our letter went in --19 simultaneous occurrence of changes in harvesting 19 **Q.** September 6? 20 20 practices and prolonged poor environmental A. -- September 6, correct. 21 conditions. As indicated in the FDACS report, 21 Q. All right. So this is two weeks and one day 22 22 quote, overharvesting is most damaging when afterwards. And here, as Dr. Petes says in the 23 environmental conditions are less than optimal --23 first paragraph there, attached is my assessment 24 it continues to the next page -- recruitment is 24 pertaining to this request. 25 low and natural mortality is high. Harvesting 25 You understand that to be the original THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1407 1405 1 pressure has likely had a particularly 1 e-mail, because you're familiar with these 2 2 detrimental effect on Cat Point and East Hole documents, that Ms. -- Dr. Petes sent attaching 3 Bars. 3 her memo. Right? A. I would assume so. 4 Do you see that? 4 A. I do. 5 5 Q. Let's go back into her memo two more pages in, please. 6 Q. That is what Dr. Petes put in her conclusions, 6 7 having reviewed the initial submission of 7 A. Can you -- okay. That's under 33? 8 8 material by the State of Florida; isn't that **Q.** It's still in FX-412, at the very top of her memo 9 true? 9 it says, Laura Petes, NOAA Climate Program A. That's -- that is one statement within her memo. 10 10 Office. Do you see that? 11 11 A. I do. Correct. 12 **Q.** That's one statement in the conclusions? 12 Q. Page 1 of the Petes memo. 13 A. It's -- yes. I read the same as you did. 13 A. Yes, I'm there, sir. 14 **Q.** To give ourselves a time-set for when this is all 14 **Q.** And at the very top of this memo you see her 15 taking place, in FX-412 -- now, this document, 15 introduction, which says, quote, this assessment 16 this Laura Petes memo, this is nothing that you 16 reflects findings from the Florida Department of 17 saw in the ordinary course of your duties back in 17 Agriculture and Consumer Services FDACS report 18 2012. Right? 18 accompanying the letter from Governor Scott, as A. No. I likely would not have seen that at that 19 19 well as additional information. And I'm not 20 going to read all of that. Do you see that? 20 point in time. 21 **Q.** And, in fact, this document is nothing that ever 21 A. I do. 22 was in the files of Florida Fish and Wildlife 22 Q. You do understand, being familiar with this 23 until we got it as part of this case and the 23 document, that this was her assessment based on discovery in this case. Right? 24 the DACS report and the submission by Governor 24 25 A. I -- I don't know the answer to that, sir. 25 Scott in September?

1410 A. And her experience and postdoctoral work in this Q. Yes. I'm paraphrasing. 2 2 area as well. Yes. I stand by -- she's discussing in certain 3 **Q.** Have you talked to her? 3 bars it could contribute. A. I didn't talk to her. I have seen her Q. Now, let me look at just one other thing that 4 credentials. 5 Dr. Petes says is part of her assessment of the 6 **Q.** She told you that she was basing this on her 6 cause of this collapse. If we could turn to 7 experience and postdoctoral work? 7 page 4 of her memo, which at the top, that page 8 A. I think it's a logical conclusion that it's 8 says less certain. And then below that part 9 submitted to her because of her expertise. 9 there is a section that says upstream dam 10 Q. As I said, I'm not going to read everything in 10 operations. 11 the document. I'll leave it to your counsel to 11 Yes. I'm there. 12 read the parts that she wants to. 12 Q. And it's -- and, again, I'm not going to read all 13 Let me go in the summary. And in the 13 of these sentences. We're in the section 14 summary, if you go down to the bottom two 14 Upstream Dam Operations in ACF Basin. And let's 15 bullets, so the second to last bullet in 15 do -- the first two sentences here state, this 16 Dr. Petes's summary, based on her experience and 16 recent drought has caused significantly-reduced 17 postdoctoral work states, harvesting pressure and 17 local inflows from both the Chattahoochee River 18 18 practices are also contributing to low oyster and the Flint River into the Lake Seminole 19 numbers on certain bars in Apalachicola Bay. 19 reservoir. In turn, low flow has forced the 20 20 USACE -- that's the U.S. Army Corps of Pressure on some of the oyster bars increased 21 21 during and after the Deepwater Horizon event due Engineers -- to restrict outflows downstream of 22 22 to concentrated, intensive harvesting and opening Woodruff Dam into the Apalachicola River. 23 of areas that would normally be seasonally 23 And that's consistent with Florida's 24 closed. Harvesting of sub-legal-size oysters, 24 understanding of what was taking place at this 25 below the legal size limit of 3 inches, has also 25 point in time; right? Because there was a THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1409 1411 1 been occurring due to lack of enforcement and low 1 drought and there wasn't much rain and there 2 numbers of legal-size oysters available for 2 wasn't much water, the Corps of Engineers, under 3 3 harvest. its operating rules, had to restrict outflows 4 coming from Woodruff Dam into the Apalachicola And that is part of Dr. Petes's conclusion 4 5 based on her initial review of the information 5 River? 6 provided. Right? 6 A. That certainly is what Ms. -- Dr. Petes reports 7 7 A. That certainly is how it reads in her summary. here. 8 **Q.** And then in the next paragraph below notes that Q. But it's true; isn't it? 8 9 we're in a drought. It's severe. And some 9 A. I believe I testified yesterday that I'm not 10 10 familiar with the Corps' operational plan and oysters would be dying, you know, even if they 11 11 weren't being harvested. defer to others that perhaps have expertise in 12 12 That happens in drought. Right? that. 13 A. High mortality would be occurring. 13 **Q.** It's not inconsistent with your understanding of Q. High mortality? 14 14 the way it works? 15 A. Even in the absence of harvesting pressures is 15 It's not inconsistent with my direct testimony Α. 16 how I read that. 16 that speaks of high salinities and low flows. 17 **Q.** But as she concludes, the decline here is likely 17 Q. But I don't think you mentioned the Corps and the 18 due because of the simultaneous occurrence of 18 dams. You know they're involved? 19 changes in harvesting practices, and 19 A. I -- I stand by my direct testimony. I 20 overharvesting is most damaging in drought 20 understand there is high salinity and low flows. 21 21 conditions like this? The extent and the operations of the dams and the 22 22 A. I read it to say that some bars could have Corps, again, I would want to defer to someone 23 23 experienced some overharvesting. that understands those complexities better than I Q. So you're looking back at her conclusions? 24 25 A. Is that what you were referring to, sir? 25 Okay. Well, let me just do -- I'll skip the THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

2

3

1 middle part of the last two sentences of this 2 paragraph here that says, the USACE officially. 3 Do you see that --A. Yes, sir. 4 5 Q. -- line there? 6 And so Dr. Petes, based on her assessment and 7

evaluation with her knowledge and training writes, the USACE officially began drought operations on May 1, 2012. The USACE is still in drought operations and expects that releases from Woodruff will remain near 5,000 cfs for at least the next several weeks.

And I take it you don't have any understanding whether Dr. Petes is accurate or inaccurate in this statement?

16 A. I -- I would expect someone of her caliber would 17 not report that without looking at some 18 documents. But I'm not directly knowledgeable 19 about it.

20 Q. Okay. That's all I have on this particular 21 exhibit.

> Now, I want to move into the direct dealings that FWC and Mr. Heil had with the federal government in the course of drafting the FWC report on the oyster collapse. Okay?

> > THE REPORTING GROUP

Mason & Lockhart

advises Mr. Branstetter that our agency is drafting the report containing the information in support of the Florida Governor's request for the oyster fishery failure. I anticipate the report will be sent to Roy on May 1, 2013.

6 And that's what was taking place in April. 7 Right?

8 A. Yes. That's my understanding.

9 Q. And the plan at that point in time was for the 10 report to go to the Department of Commerce in 11 May?

12 A. That's what David reports. That's his time 13 frame.

14 **Q.** And if you go back one page, the very bottom, it 15 would be numbered 12 in this string of e-mails.

16 This page at the very top left-hand side says

17 Florida's Governor?

18 A. Yes.

Q. Okay. But in order for us to keep in the 19 20 chronology of the conversation, we have to start 21 at the bottom.

22 A. Okay.

23 ${f Q}.$ And so you see at the very bottom it appears that

24 Mr. Heil sent a copy of the draft report to

25 Mr. Branstetter. It says, attached draft is in

THE REPORTING GROUP Mason & Lockhart

1415

1 A. Okay.

8

9

10

11

12

13

14

15

22

23

24

25

2 **Q.** And that's something that you're here to testify 3 about?

A. I am. 4

5 **Q.** If you wouldn't mind, please, sir, looking at 6 tab 34 of your binder.

7 A. Okay. I'm there.

8 **Q.** And it's a little bit of an odd document because 9 you have a combination of an e-mail with some 10 things pasted into it. But since it is e-mails 11 and a string of e-mails, it's probably easiest if 12 you go to the very end. And this is GX-569.

13 A. To the e-mail in the e-mail chain?

14 **Q.** Yes. For some reason we have got three or four 15 instances of Steve Branstetter, Ph.D. -- his 16 signature line pops up three or four different times. But then above that we have an April 22, 2013 -- I'm sorry -- yes, 2013 e-mail from David Heil to Mr. Branstetter. Do you see that?

19 20 A. I do. I -- it's -- you're right; it is confusing 21 with all of the headings. But I think I'm there. 22 That's at the top of page 13.

23 **Q.** Yes. I don't know why it printed out this way.

> So we have got the -- these two together. You see from Mr. Heil to Mr. Branstetter, he

THE REPORTING GROUP Mason & Lockhart

1 review and subject to change.

Do you see that?

A. I do. 3

2

8

9

10

11

12

13

14

1413

4 Q. And I will state that we haven't, after lots of 5 work, been able to identify this particular 6 draft; but I don't think that will affect 7 anything here.

> Above that, you have got the response by Mr. Branstetter to David Heil where he says in the second line, you state that in 2010 and 2011 the State allowed harvest of undersized oysters and continues to do so. And now in 2013, you have minimal harvestable oysters in the system. Let's see, three years, dot, dot, dot, dot, hmmm.

15 This is Mr. -- I'm sorry, Dr. Branstetter, 16 the Gulf branch chief of NMFS part of NOAA.

17

18 A. That's what I understand him to be, yes.

19 Q. Mr. Heil responds above to Dr. Branstetter and 20 states that I -- to Steve, I will address.

21 Thanks. There was and is no allowable undersize

22 harvest above the tolerances allowed by rule. 23

Industry pushes undersize harvest at times, and 24 law enforcement responds appropriately. I will

25 make that crystal clear.

> THE REPORTING GROUP Mason & Lockhart

17

18

24

10

11

22

23

Again, thank you. Please keep reviewing. I would rather take care of all misconceptions and explain anything needed before we submit report.

And this is then the responsive chain. And for whatever reason, these print out so odd.

You have got Mr. Branstetter responding to Mr. Heil that the submission to NOAA includes some information related to Executive Orders at the top there. Do you see that?

10 A. I'm sorry. I got lost there.

11 **Q.** Yes. We're back on the page -- because we had to 12 flip back and forth; but we're back on the page 13 that has at the top Florida's Governor.

14 A. Okay.

1

2

3

4

5

6

7

8

9

1

Q. And at -- to paraphrase this paragraph, he's 15 16 noting that the information that's provided to 17 NOAA indicates that the Governor issued Executive 18 Orders that allowed for departures from the 19 standard limits on harvesting. Right?

20 A. That's what it states.

21 **Q.** And then at the very bottom of that e-mail, he 22 says, nevertheless, a disaster has to be beyond 23 the scope and control of management. This 24 relaxation of harvest restrictions in 2010 could 25 be a reason for lack of oysters in 2013.

> THE REPORTING GROUP Mason & Lockhart

1 now we're just internal to FWC. Mr. Branstetter

2 is not on this part of it. And Mr. Estes --

Mr. Heil tells Mr. Estes, as he's forwarding all

4 of this with some other things that we'll just

5 touch on briefly, see latest e-mail response

6 below from NOAA Fisheries Service. And then in

7 all caps and all bold and underlined, I will need

8 assistance to address this. Then it says below

9 are highlighted excerpts from the DACS report

addressing fishery practices, overharvest, and/or undersize harvest. Correct?

12 A. Yes. I read that the same.

Q. And I'm not going to go through and read any of 13 this; but, you know, I'll just give you and the 14 15 Court an opportunity to flip through what 16 Mr. Heil pasted into this e-mail to Mr. Estes. 17 And I think you'll see that it's a copy of the 18 August 2012 report with his highlighting on every 19 instance that harvesting, fishing pressure, 20 extensive harvesting, continuous harvesting 21 occurs.

> Let me know when you have had a chance to review.

24 A. Well, as you suggested, I'm just scanning the 25 highlighted portions.

THE REPORTING GROUP Mason & Lockhart

1417

Right?

A. That's what I read.

Q. All right. Now, we have to continue further up 3 4 to Mr. Heil responding to Mr. Branstetter. And I 5 will paraphrase rather than read. He responds 6 and says, none of the oyster rules were deviated 7 or waived. And if that had been asked for, it 8 would have been denied. Right?

9 A. That's how I understand that. Correct.

10 Q. And then Dr. Branstetter tells Mr. Heil in the 11 e-mail in the center of that page, just remember, 12 your agriculture report states such harvest did 13 occur.

Do you see that?

15 A. I do.

14

Q. And this is part of the back and forth 16 17 communications that the federal government and 18 FWC had in connection with the disaster declaration? 19

A. It is a portion of it. Correct. 20

21 **Q.** All right. Now, we have to flip all the way to 22 the very front page, please, still in GX-569.

23 A. Okay.

24 **Q.** And in the middle of that page, we have an 25 April 23 e-mail from David Heil to Jim Estes. So THE REPORTING GROUP

Mason & Lockhart

1 Q. Sure.

A. Okay.

Q. Okay. All right. Let's -- let's look at 4 another exhibit. This is a joint exhibit, Joint 5 Exhibit 90. It should be behind tab 35 of your binder. 6

7 A. Okay.

8 **Q.** Okay. And Joint Exhibit 90 is another series of 9 e-mails -- and I'm only going to look at a very 10 couple of them -- between Mr. Branstetter --11 Dr. Branstetter and David Heil. Correct?

A. Yes. 12

13 **Q.** And let's go, if we could, just on the very first 14 page -- I'm only going to look at part of this 15 page and the next. On the very first page at the 16 bottom we have on April 24 the -- on Wednesday, 17 April 24, down below there from -- where it says from Mr. Heil. And Mr. Heil writes to 18 19

Mr. Branstetter, information received.

And here we are in the very, very, very bottom paragraph. It is my understanding that FWC will respectfully disagree that oysters have undergone overfishing. Because there is no prescribed threshold, oysters are not considered overfished. FWC recognizes that in recent

> THE REPORTING GROUP Mason & Lockhart

22

23

24

25

1422 1 months, harvesting pressure has been more evident 1 still waiting on data? 2 2 Do you see that? due to less than optimal environmental 3 conditions, lowered recruit, and higher 3 A. I do. 4 4 Q. Okay. Then we go up. And it appears the e-mail natural -- the next page -- mortality, 5 parentheses, reason FWC closed commercial harvest 5 must have at least gone to Mr. Heil, but we have 6 on Saturdays and Sundays November 12 through May 6 Mr. Heil responding to her cc'ing Mr. Estes. And 7 7 2013. FWC concludes that fishing efforts merely he states that the documents has been sent. 8 exacerbated natural mortality over this extended 8 Target to have it completed and sent to NOAA is 9 drought and lower river flows. Correct? 9 May 1. And then there is the sentence that 10 A. That's how I read that, yes. 10 begins as planned there. Do you see that? 11 **Q.** This is part of the conversation between FWC and 11 A. I see that. 12 the federal government? 12 **Q.** And Mr. Heil writes back, as planned, draft was 13 A. A portion. 13 sent to Steve Branstetter -- misspelled -- to be 14 **Q.** A portion of it. So then we have to go back to 14 sure what he needed was there. His initial 15 the first page to get Mr. Branstetter's response. 15 conclusion was overharvesting. I respectfully 16 disagreed. If overharvest or lack of -- I think And it's nearly two-thirds down the page. And we 16 17 have got from Mr. Branstetter back to Mr. Heil. 17 this is supposed to be enforcement or judicial 18 LOL, which my girls tell me means laugh out loud. ignorance or any other fishery management action 18 19 A. Could be lots of love. 19 or lack of action, the disaster request will be 20 20 denied. Please weigh in with all the influence **Q.** Or lots of love. Okay. 21 21 we have. I can buy that overfishing may not be 22 22 occurring; but you have a resource that is And that's Mr. Heil's response to 23 projected to have -- to have, or will have, no 23 Ms. McCawley. Correct? 24 harvest in a couple of months because of low 24 A. That's what I read, yes. 25 population density, yet you wouldn't say it's 25 **Q.** Let's go then, if we can go up the chain one more THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1421 1423 1 overfished simply because there is no threshold, 1 e-mail on this. At the very top then we have got 2 2 question mark? David Heil e-mailing Mr. Barbieri, Luiz Barbieri. 3 This is still part of the back and forth 3 Do you see that? 4 between Florida and the federal government about A. I do. 4 5 5 the disaster request? **Q.** And Mr. Barbieri is one of the people who was 6 A. Correct. Which is -- which is, looks to me, very 6 identified when we looked at the interrogatories 7 good civil dialogue between them. 7 as having played a role in putting together the **Q.** Okay. Especially if it's the lots of love. 8 8 disaster report? 9 Okay. If we could go to the next exhibit, 9 A. Yes. Mr. Barbieri worked for Fish and Wildlife 10 10 Research Institute. please, tab 36 in your binder, which is GX-575. 11 11 A. Yes, sir. I'm there. Q. And if we go down to the e-mail to Mr. Barbieri 12 Q. All right. And more e-mails. If you could flip 12 where he has got Steve Geiger is reviewing the 13 13 to the second page so that we can follow the FWC report, are you with me? 14 chain. And now, at the very, very bottom we have 14 A. Yes, sir. 15 Jessica McCawley. You mentioned her yesterday. 15 Q. And if you continue down below that, he tells --16 You have got her title as director of Division of 16 David Heil is telling Luiz Barbieri, a 17 Fisheries Management. What generally was her 17 preliminary draft of the FWC report was sent as 18 18 planned to Steve Branstetter with NOAA Fisheries 19 A. She oversees the entire division of Marine 19 Service last week. He has responded that it Fisheries Management. And Mr. Jim Estes is one 20 20 appears to be overfishing. If NOAA Fisheries 21 21 of her staff. Service concludes that the Governor's disaster 22 Q. Okay. And we have here then -- I'm not clear who 22 request was due to fishery management actions, 23 she is e-mailing to; but she states, where are we 23 high harvest levels, lack of enforcement, lack of 24 on the disaster declaration? Have we provided 24 judicial prosecution, the disaster request will 25 all the info that NOAA needs to them? Are we 25 be denied. Do you see that?

1430 1428 A. I see that. 1 please. 2 BY MR. ECHOLS: 2 **Q.** Okay. If we could go to tab 40, please. 3 **Q.** So just as one example -- and we have only got Q. And tab 40, here we have got, again, Dr. Conti 4 two here. In the July draft, as I show at the 5 and Mr. Knickerbocker. top of this slide, the summary attributed the 6 MR. ECHOLS: And for the record this is 6 decline to severe drought conditions; but then in 7 GX-595. 7 the August final which went to the federal 8 BY MR. ECHOLS: 8 government, it attributed the decline to upstream 9 Q. And you will see in the e-mail below 9 consumption and water management policies. Do 10 Mr. Knickerbocker is telling Dr. Conti that he 10 you see that? 11 had a meeting with Jim Estes. And in particular, 11 A. I do. 12 in the middle paragraph he communicated to 12 Q. And then, similarly, I have got one other slide 13 Mr. Estes that DACS could not support the FWC 13 showing how this report changed between July and 14 conclusions with the harvesting issue and that 14 the final August one that went in. 15 this was resolved at the end of the day by having 15 If you could -- actually, to see it, I guess 16 the complete DACS report attached. Do you see 16 you have to see that there's two pieces. So what 17 that? 17 we have got in this slide in the green portion --A. If I may have a minute. 18 and this is a -- this is from JX-96 -- is the 18 19 **Q.** Sure. 19 text that was in the July one, which refers to 20 20 A. I see -- I think the thing that Mr. Knickerbocker the Corps of Engineers' operations and flows; but 21 is saying is that we told him that we do not 21 in the final report, this yellow block was 22 22 support the FWC conclusions; is that your inserted. At some point between July and August, 23 specific reference, or were you just asking if I 23 this paragraph attributing the collapse to 24 24 upstream consumption in Georgia was added to the saw that? 25 25 **Q.** Yes. Just if you saw that. final report that went to the federal government. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1429 1431 1 A. Yes. 1 Do you see that? 2 **Q.** So a conversation took place between Mr. Estes 2 A. I see -- I see it on the slide. Yes. and Mr. Knickerbocker? 3 3 Q. Okay. And then if we go to the second to last tab in your binder, tab 43. 4 A. That's what he's reporting here, yes. 4 5 **Q.** Okay. If we could go to tab 41, please. 5 A. Yes, sir. 6 A. Yes. 6 **Q.** And in tab 43, we have GX-644. This is an e-mail 7 **Q.** You see we have GX-1313; and this reflects that 7 from Bill Pine to Jim Estes. This is dated 8 8 at this point in July, the report still is in August 8. And he identifies to Mr. Estes in the 9 draft. And at some point here in July, Mr. Heil 9 first couple of sentences that he was surprised 10 10 sends the report to the Governor's office; is that water management policies were identified as 11 11 that right -- Mr. Grayson? making the drought worse and that the reservoirs 12 A. Yes. I believe Mr. Grayson was at the Governor's 12 were supplementing flows. Correct? 13 office at the time. 13 A. Sorry. Sir, I hadn't seen this. I'm almost 14 **Q.** Okay. And the actual final, final report, if we 14 through. 15 go to tab 42, is JX-96. And can you identify 15 Okay. What is your question, sir? 16 that, please, sir, as being the official 16 Q. I'm sorry. It's just that Dr. Pine is noting 17 transmission by Mr. Estes to Dr. Crabtree of the 17 that he disagrees that water management policies 18 final FWC report? 18 were the cause and that the reservoirs were 19 A. Yes. It appears to be that, yes. 19 supplementing flows. Correct? 20 20 Q. Okay. Now, what I have done is I have just a A. He was surprised. 21 21 Q. Okay. couple of slides that are the comparison between 22 the July draft that went to the Governor's office 22 MR. ECHOLS: We can take that down. 23 and the final report. 23 BY MR. ECHOLS: 24 A. Thank you. 24 Q. Now, Mr. Sutton, just generally, recognizing here 25 MR. ECHOLS: If we could put that up, 25 that hindsight is 20/20, but knowing what we do THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

1434 1 today that the oil never got to Apalachicola Bay, A. In the sense of cultching? 2 would you agree with me that it was a mistake for 2 3 Florida to have opened up the bay for as long as 3 Α. Yes, I would agree. it did after the oil spill to harvesting? Q. Okay. Those are all Florida -- Florida FWC and 4 5 A. I would not agree with that. 5 DACS responsibilities. Right? 6 Q. Would you agree that it was a mistake to relax 6 A. That's correct. 7 enforcement on sub-legal harvesting? 7 MR. ECHOLS: I have no further 8 A. I don't agree with relaxed enforcement of 8 questions, your Honor. 9 sub-legal harvesting. 9 SPECIAL MASTER LANCASTER: Thank you. 10 **Q.** Would you agree with me that the State of Florida 10 Ms. Wine? 11 would have been better served to the oyster 11 MS. WINE: Sorry, your Honor. We're 12 12 resource if it had done more reshelling in 2011 just getting our materials together. 13 and '12 and '13? 13 **EXAMINATION** 14 A. I wouldn't agree with that. I would say that the 14 BY MS. WINE: 15 shelling went along with the environmental 15 **Q.** Good morning, Mr. Sutton. 16 16 conditions. A. Good morning. 17 **Q.** So after we have the collapse and once -- you 17 Q. We have talked about the NOAA disaster 18 18 knew immediately in August of 2012 that the declaration here today. Are you familiar with 19 fishery was collapsing, would you agree with me 19 the NOAA decision memorandum that was issued in 20 20 connection with that disaster declaration? that at that point in time the State of Florida 21 should have closed the bay or limited fishing 21 A. Iam. 22 22 more than it did? MS. WINE: And, your Honor, if I may 23 A. I would state that from that point forward, we 23 approach, I would like to hand that to the 24 had a number of actions that continually reduced 24 witness. 25 and put in management policies that to this day I 25 SPECIAL MASTER LANCASTER: Please. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1433 1435 1 still stand by that were prudent. A. Thank you. 2 2 **Q.** And at the very least, sir, would you agree with **Q.** Sir, after the cover e-mail in what is Exhibit 3 me that Georgia has no responsibility for 3 FX-413, you will find that the third page of that 4 document, the document dated August 20, 2013, the 4 managing the Apalachicola Bay oyster fishery? 5 5 A. Georgia has no authority; correct. subject is Florida request for federal fishery 6 Q. Yes. And Georgia has no responsibility or 6 disaster relief decision memorandum. Do you see 7 authority to enforce the Florida laws on the 7 that, sir? 8 8 books that say it's legal to harvest small Yes, ma'am. 9 ovsters? 9 Q. And do you know what this is? 10 A. I do. This is the memorandum that is the result 10 A. I would have to defer to counsel to answer that 11 11 and culmination of a process of review for appropriately. 12 Q. Really? 12 fishery failure or a determination of disaster. 13 13 And it's based within the, as it states, A. Well, can you restate it then. 14 Q. Sure. Georgia doesn't have any authority to 14 Magnuson-Stevens guidelines. And it's issuing 15 enforce Florida's laws about the illegal harvest 15 its approval and support for declaration of a 16 of small ovsters? 16 fishery disaster. 17 A. I would assume that they wouldn't; but I do know 17 Q. And, sir, you will see in the subject line it 18 18 that a lot of times law enforcement, including says draft. If you refer back to the cover 19 19 wildlife agencies, they have shared pact e-mail, it indicates that this is the final memo; 20 20 agreements. But that may be a bit of a stretch. and this is signed. Is it your understanding 21 21 That's why I'm a little hesitant to answer that, that this is the final NOAA decision memo? 22 22 A. Yes, ma'am. 23 Q. Okay. Can we agree that Georgia doesn't have 23 Q. And, sir, you reference the Magnuson-Stevens Act, 24 responsibilities for restoration of the reefs and 24 which is identified in the second paragraph of 25 the oyster resource? 25 this memo, and also something called the THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

1436 1438 1 Interjurisdictional Fisheries Act, IFA. Do you 1 A. That's basically that FWC has the primary 2 2 responsibilities. We do all the things that we 3 That's in the second paragraph of the memo. 3 can do as fishery managers to avoid those, in lay 4 A. Yes, I do. 4 5 Q. And the next paragraph, without reading it all, 5 Q. And, sir, do you have an understanding as to 6 goes on to talk about what is an allowable cause 6 whether, in a circumstance where poor fisheries 7 under these Acts. Sir, do you have an 7 management caused a decline, whether that can 8 understanding of what that means, allowable 8 qualify as an allowable cause? 9 cause? 9 A. That's my understanding that it can't in the 10 A. I do. 10 disaster declaration. 11 **Q.** And what is that? 11 Counsel, would you -- would you please 12 A. It has to be those that are natural, 12 restate that question again to make sure I 13 undetermined, or man-made beyond the control of 13 answered that correctly? 14 fisheries managers to mitigate through 14 Q. I think you did, but I will try to do that. I 15 conservation and management measures, including 15 don't have the transcript in front of me. 16 16 regulatory restrictions. I asked if you have an understanding based on 17 Q. And, sir, what does that mean to you? 17 that language about beyond the control of fishery 18 A. That means that the -- no matter what you do as a 18 managers that if NOAA concluded that poor fishery 19 fish and wildlife manager, you can't be 19 management were a cause of the oyster decline, 20 20 conducting practices or regulations or anything would that be -- would they be able to find 21 21 that would result in the termination -- or into a allowable cause and declare a disaster 22 fishery collapse. 22 declaration? 23 Q. So, sir, can NOAA declare a fishery collapse if 23 A. Okay. I stand by could not. 24 24 it determines that poor fisheries management Q. Thank you, sir. 25 25 caused the collapse? And, sir, are you familiar with this memo? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1437 1439 1 MR. ECHOLS: Objection. A. Yes, ma'am. 2 A. My understanding --2 Q. And, sir, do you recall that this memo identifies 3 3 MR. ECHOLS: Calls for a legal what the causes of the oyster collapse in 2012 in 4 conclusion. He just stated earlier, you the Gulf Coast was? 5 Honor, he's not a lawyer and can't opine on 5 A. Yes. It was a result of low flows, high 6 salinity, and an increased predation that results that. 6 7 SPECIAL MASTER LANCASTER: Sustained. 7 from high salinities primarily. 8 BY MS. WINE: 8 Q. And, sir, if you look at the top of page 2 --9 ${\bf Q.}\;\;$ Sir, are you familiar with the Magnuson-Stevens 9 this is within the background section after the 10 Act? 10 memo cites low flows as a causal factor -- if you 11 11 A. Iam. could, sir, just look at one sentence at the top 12 12 Q. And are you familiar with NOAA's determination of of page 2 that begins the low discharge rate. 13 13 allowable causes under that Act? A. Yes, ma'am. I'm there. 14 A. Generally, yes. 14 Q. And, sir, do you see that it says, the low 15 Q. And do you have an understanding of what the 15 discharge rate is compounded by increased 16 phrase "beyond the control of fishery managers to 16 upstream water consumption during the drought 17 17 periods? mitigate through conservation and management 18 measures" means in the context of determining 18 A. Yes, I do. 19 allowable cause? 19 Q. And, sir, is this consistent with your 20 MR. ECHOLS: Objection, your Honor. 20 understanding of part of NOAA's conclusions in 21 This is, again, asking for a legal 21 this memo? 22 conclusion. 22 23 23 SPECIAL MASTER LANCASTER: You may Sir, if you would, turn now to the top of page 3 in this memo. 24 24 answer. 25 THE WITNESS: Thank you, sir. 25 A. Okay. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

1442 Q. You will see, sir, that at the top of page 3, cheat -- Service. It's on the -- in the 2 2 NOAA discusses the prolonged drought conditions. beginning of the exhibit. 3 And I know the Court can read that, so I will not 3 Q. I didn't mean it to be a test. I thought you 4 continue with that. But if you would, sir, just could help us out. 5 look at the second paragraph in that page that 5 Okay. If I could just read that, it says, 6 begins the DACS report. 6 according to NMFS's policy guidance for disaster 7 A. Yes, ma'am. 7 assistance, the fact that overfishing may have 8 Q. Do you see there it says two times that the DACS 8 occurred or is occurring does not preclude a 9 report acknowledges that there's been an increase 9 determination that a fishery disaster occurred, 10 in harvesting pressure and that the DACS report 10 if other factors are more central to the 11 acknowledges the harvest of undersize and 11 disaster. 12 12 sub-legal oysters. Do you see that, sir? Do you see that language, sir? 13 A. I do. 13 A. I do. 14 Q. And do you understand what the DACS report is 14 And what is your understanding of that language? 15 that's being referenced in that paragraph? 15 Well, as it states, if -- the fact that 16 A. Yes. 16 overfishing may have occurred does not preclude a 17 17 Q. And what is that, sir? determination, particularly if there are more 18 A. That's the report that we have discussed quite a 18 primal or central reasons for the disaster. 19 bit here; but that was -- accompanied not only 19 Q. And, sir, did Florida let NOAA know that some 20 20 the Governor's letter, but also accompanied our overfishing had occurred? 21 21 A. Yes. We were very transparent with our data, our submittal to NOAA for consideration. 22 22 Q. And, sir, that's Mr. Berrigan's August 2012 information, and the opinions in the reports of 23 23 oyster assessment report? others. 24 A. That's my understanding. 24 Q. Now, sir, are you familiar with the process that 25 Q. And as you just testified, sir, that was provided 25 NOAA undertakes for approval of these types of THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1441 1443 1 to NOAA two times in connection with this request 1 requests? 2 for a disaster declaration? 2 Α. Yes. 3 3 Q. And do you understand that there are sometimes A. At a minimum I know of two times. 4 Q. And the two times you just mentioned are hearings in connection with these disaster 5 initially with Governor Scott's September 6 5 declaration requests? 6 letter? 6 A. I do understand that to be the case. 7 A. That's correct. 7 Q. And are you familiar that such a hearing occurred Q. And when was the second time? 8 8 in connection with this particular request? 9 A. I believe that would be in our correspondence 9 A. Yes. 10 10 with -- and back and forth in discussion with MS. WINE: Your Honor, may we approach 11 11 NOAA. And I would need to refer -to hand out another exhibit? 12 Q. And we can look at that later. Do you recall it 12 SPECIAL MASTER LANCASTER: Yes. 13 as being around the time that FWC submitted its 13 MS. WINE: Thank you, sir. A. Thank you. 14 own report? 14 15 A. That's correct. There was an appendix actually 15 Q. Sir, I have handed you FX-423, which is written 16 16 in the FWC report. testimony of Emily Menashes, acting director of 17 Q. Okay. Thank you, sir. 17 the Office of Sustainable Fisheries for NOAA. Do 18 And if you could, just one last thing on this 18 you see that, sir? 19 NOAA letter. If you look at the second to last 19 A. I do. 20 sentence of the paragraph that we have been in, 20 And this is dated August 13, 2013? 21 do you see the line that starts according to NMFS 21 Α. Yes, that's what I see. 22 22 policy guidance? Q. And, sir, do you understand that this is around 23 the time that NOAA issued the declaration of a 23 A. Yes. Q. Sir, first of all, what was NMFS? 24 disaster for Apalachicola Bay? A. The National Marine Fisheries -- I need to 25 Yes, it is. TRIAL - November 8, 2016 (Vol. VI) Florida v. Georgia 1446 Q. Okay. And, sir, if you would, please, just turn 1 first we have Governor Scott's September 6, 2012, 2 to page 3 for me of this document. 2 letter. Correct? 3 A. Okav. 3 A. Correct. **Q.** Sir, you reviewed this before. Correct? Q. And, sir, do you understand that this letter A. I have. speaks about the lack of freshwater flow to 6 Q. And, sir, you understand that in this document --6 Apalachicola Bay? 7 and I don't want to read it all; but on page 3 7 Α. 8 here, Ms. Menashes goes through, again, the 8 **Q.** And do you recall that it also mentions 9 requirements that must be met in order to declare 9 harvesting pressures? 10 a fisheries disaster including that the causes 10 A. It does. 11 have to be beyond of control of fisheries 11 **Q.** And, sir, just again for the record, if you turn 12 12 management. Do you see that up in that top a few pages, you will see that the August 2012 13 section; and it's down in the bottom paragraph as 13 oyster assessment report is attached to that 14 well, sir? 14 Governor Scott letter. Correct? 15 A. Yes. I see that. 15 A. That's correct. Q. Now, this is -- again, just because it was 16 **Q.** I'm trying to not read it all to move things 16 17 17 along. referred to slightly differently, Georgia's A. Yes, I see that. 18 counsel showed you in Exhibit GX-569, which is 18 19 **Q.** And, sir, if you go to the end of the big 19 tab 34 -- I don't know if you need to go there, 20 20 paragraph on that page, so the paragraph that but it was a letter from -- an e-mail from 21 21 begins for the second requirement. Mr. Branstetter that was talking about Florida's, 22 A. Yes. 22 quote, agricultural report and some things in 23 **Q.** Go to the end of that paragraph there is a 23 there that he saw about overharvesting. 24 sentence that starts there is a presumption. Do 24 Sir, is it your understanding that that 25 25 you see that? agricultural report that Mr. Branstetter was THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1445 1447 1 A. Yes, ma'am. 1 referencing is this August 2012 oyster assessment 2 **Q.** And, sir, it says there -- this is Ms. Menashes's report? 2 3 testimony before Congress. It says, there is a 3 A. That's my understanding. 4 presumption against a finding of a fishery 4 **Q.** And we went through the oyster assessment report 5 5 resource disaster when overfishing is occurring in great detail with Mr. Berrigan, so we won't do 6 in a fishery. 6 that again here today. But you have reviewed it 7 Do you see that, sir? 7 as well, sir? 8 A. I do. 8 A. Yes, ma'am. 9 **Q.** And, sir, what do you understand that to mean? 9 Q. And do you recall that, again, the oyster A. That if, through their vetting process and 10 assessment report discusses both the lack of 10 11 11 through the review, they find that fishery is -freshwater flow and the impact on the bay from that as well as overharvesting? 12 overfishing is occurring, then they would have a 12 13 presumption to not issue the disaster relief or 13 A. Yes. Lack of freshwater flows, salinities, 14 declaration. 14 increased predation, yes. 15 Q. And, again, sir, Florida informed NOAA about the 15 **Q.** And just for reference, Mr. Berrigan's August 16 overfishing that occurred in Apalachicola Bay. 16 2012 oyster assessment report that was provided 17 Correct? 17 to NOAA at table 1 also provides the landings 18 A. Correct. 18 data and fisheries license data that you looked 19 **Q.** Now, if you would, sir, please turn to tab 4 in 19 at with Georgia's counsel that's on page 2 of the first binder that Georgia gave you yesterday. 20 20 that report? 21 21 A. I recall. And I just now want to very quickly go through 22 the chronology of the material that Florida 22 Q. Okay. Thank you. Now, sir, if you would, turn 23 provided to NOAA in connection with this request. 23 to tab 33 of the binder that Georgia gave you A. Okay. I'm at tab 4. 24 today. It's going to be the Petes memo. It's Q. Okay. So, sir, again, we won't belabor it; but 25 Exhibit FX-412.

TRIAL - November 8, 2016 (Vol. VI) Florida v. Georgia 1454 1 on oysters. It increases not only mortality, but 1 allows only tonging on the public bars in 2 2 disease and predation by stone crabs and oyster Apalachicola Bay? 3 drills and some of those. 3 Α. Correct. 4 Q. And, sir, do you see her very last paragraph of Q. And, sir, if you could just briefly turn to 5 this memo, it says, near term recovery of Florida 5 page 2 of the Petes memo that's in front of you. 6 Gulf Coast oyster population will depend in large 6 A. Okay. 7 part on the improvement of regional drought 7 And there's a paragraph right in the middle that 8 conditions and freshwater input? 8 begins Florida Gulf Coast oysters. Do you see 9 A. I do. 9 that? 10 Q. And, sir, what do you take that to mean? 10 A. I do. 11 A. Well, I think it's important in resiliency of a 11 Q. And the second sentence begins, oysters on public 12 system to look at if they're going to recover, 12 bars in this region are harvested using hand 13 first of all, the drought would have to end as 13 tongs -- and it describes what the tongs are. 14 well as other freshwater inputs that contribute 14 This practice leads to relatively localized, 15 to the system would have to increase or become at 15 nondestructive harvesting pressure, when compared 16 16 the right level. to methods such as dredging. 17 Q. Thank you, sir. 17 Do you see that, sir? 18 18 A. I do. Now, while we're on this memo, I just want to 19 ask you about one other slightly different 19 **Q.** And is that consistent with your view that the 20 20 related topic. Yesterday in response to some of tonging rule in Apalachicola Bay is conservative? 21 21 the questioning you received, you said that the A. Yes, ma'am. 22 22 harvesting of sub-legal oysters could not cause a **Q.** And, sir, do you agree that it is a relatively 23 23 crash unless it was a large-scale, unregulated nondestructive method of harvesting? A. I do. 24 24 dredging type operation. Do you recall saying 25 25 Q. Thank you, sir. that? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1453 1455 A. I do. 1 Now, sir, I want to go to the report that FWC Q. And, sir, why did you say that? 2 prepared. So if you would, sir, it's J -- I'm 3 3 A. Well, a number of factors. I think, one, in my going to use JX-96, which I believe is Georgia 4 testimony I defer to just having a general 4 tab 42. 5 5 knowledge of ecology and biology. And, secondly, Α. Okay. 6 **Q.** And, sir, I just want to note for the record that I -- in reviewing the University of Florida 6 7 7 report that we submitted as part of our disaster in your prefiled direct testimony when you speak 8 report, it states a similar sort of statement. 8 about the FWC report, you refer to JX-91. I'm 9 9 And then I guess another point of reference is if sure you don't remember that, but the lawyers 10 10 remember details like that. you look at our oyster rule in general and you 11 look at the methods of harvest that we allow with 11 MS. WINE: For the Court's information, 12 12 the tongs, which is really unique, it's a pretty that is also a copy of the FWC report; but it 13 13 conservative rule to begin with. is a copy that does not contain all of the **Q.** And why do you say that the tonging rule is a 14 14 appendices. JX-96 is the copy of the report 15 15 with all of the appendices that were conservative rule to begin with? 16 A. Well, the method is they -- and you may have 16 transmitted to NOAA. 17 heard -- I apologize if the Court has heard this; 17 BY MS. WINE: 18 but they have these long handles with these wide 18 Q. So, sir, if you could just please look at JX-96 19 rakes. And they go out there and just 19 and tell me if you recognize this document. 20 20 selectively harvest and cull. And that's much Α. I do. 21 less more impactful or intensive as I know some 21 **Q.** And what is this, sir? 22 other commercial oystermen around the nation may 22 A. This is the report produced by FWC that was 23 23 invoke. It's a traditional, over the generations submitted, as you see, by Nick Wiley to Dr. Crabtree of NOAA. method of harvesting out there. 24 24 25 Q. And, sir, you said this is an FWC rule that 25 Q. And, sir, if you would, turn to a couple pages

Q. And, sir, is it uncommon in your view for reports

A. Yes, I do.

24 25 24

25

Q. You will see right here -- this is just an

example. In the executive summary, if we go to

THE REPORTING GROUP

Florida v. Georgia 1462 1460 1 the third bullet on that page --1 yesterday? A. Yes, I see that. 2 A. Yes. 2 3 **Q.** -- it says, Florida's emergency actions in 2010 3 **Q.** And then, sir, it continues -- we don't have to in response to the Deepwater Horizon, DWH, oil read all these; but if you could just scan down 4 5 spill did not result in increased landings or 5 the next few sentences and let us know what that 6 overharvest. 6 is conveying to NOAA. 7 A. Yes, I see that. 7 A. What it's conveying to NOAA is the intent of or 8 **Q.** And is that consistent with your recollection 8 the -- I should say the order and actions that we 9 that NOAA was informed of the management actions 9 took. And it's conveying that if the fishery 10 that FWC took? 10 received modification of any other oyster 11 A. It is. 11 regulations, such requests would not have been 12 **Q.** And, sir, if you turn to pages 14 and 15 of this 12 deemed in the best interests of oyster 13 memo --13 conservation. 14 A. Okay. 14 **Q.** So it's detailing all of the management actions 15 **Q.** -- sir, on page 14 there is heading that says 15 that were taken after the Deepwater Horizon oil Modifications to Harvest Related to Deepwater 16 spill? 16 17 Horizon Oil Spill. Do you see that section of 17 A. Correct. 18 the memo? 18 Q. And, sir, if you would now just turn to page 16 19 A. I do. 19 of this memo. 20 20 **Q.** And, sir, there is a very long paragraph on A. Okay. 21 page 15 that details the chronology after the 21 **Q.** Do you recall yesterday you were asked some 22 spill. And I would like to direct your attention 22 questions about warnings FWC received via 23 to a sentence --23 Mr. Berrigan's September 2011 oyster assessment 24 MS. WINE: Mr. Walton, it's about midway 24 report, warnings about intense harvesting and the 25 through. 25 bay's perhaps not being able to take the THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1461 1463 1 BY MS. WINE: 1 harvesting pressure through the winter season? Q. It starts, FWC opened the Apalachicola Bay A. I do. 2 2 3 System. Do you see that? 3 **Q.** And he was asking you questions about why the 4 A. Midway -- a little more to midway, yes, I do. fishery was still open the next season. Do you 4 5 Q. Yes. recall that? 5 A. I do. 6 MS. WINE: Mr. Walton, we might -- we're 6 7 on -- I'm looking a little bit further down, 7 Q. And, sir, if you look at the second -- the first 8 8 I believe, to the one that references a full paragraph on this page that begins after the 9 May -- May 21, 2010. Do see that time 9 2010, if we look at the last sentence there it 10 period? 10 says, oyster harvesting seven days a week during 11 Yes, right -- maybe you can help him 11 the Apalachicola Bay System summer area, June, 12 out. I'm lost on where he is. 12 July, and August, was implemented in June 1, 13 Right there. See the FWC that starts 13 2012. 14 after the semicolon right at the end of that 14 Do you see that, sir? 15 sentence? 15 A. I do. 16 Thank you, Mr. Walton. 16 **Q.** And what is that a reference to, sir? 17 BY MS. WINE: 17 A. Current regulations require -- I have to read to 18 Q. So if we look at this sentence, Mr. Sutton, it 18 myself? 19 says, FWC opened the Apalachicola Bay System for 19 I'm sorry, counsel. Could you repeat the 20 harvesting from May 21, 2010, through June 1, 20 question? 21 2010, a total of 11 extra days. 21 **Q.** I'm wondering if you recall offhand what that is 22 Do you see that? 22 a reference to? A. I do. 23 And if you don't recall offhand, feel free to 23 24 Q. And, sir, do you recall that that's a reference 24 consult tab 2 in your binder yesterday that we 25 to one of the Executive Orders we looked at 25 looked at at page 13 of 17. I believe this is THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

TRIAL - November 8, 2016 (Vol. VI) Florida v. Georgia 1466 1464 1 one of the actions that Georgia's counsel A. I do. 2 2 directed you to. **Q.** Sir, what do you understand is being conveyed to 3 A. I think this is conveying the executive --3 NOAA via those 11 tables? referencing the Executive Order. A. We're conveying the amount of harvest via 4 5 Q. And, sir, is this the Order where the bay was landing, the data that we keep and collect for 6 opened for the summer season even after FWC 6 their information and their assessment. 7 received the warnings in the September 2011 7 Q. And you see, sir, it contains landings data for 8 oyster assessment report? 8 2008 through 2013? 9 A. It was implemented June 1, 2012; so that 9 A. Yes. 10 chronologically, yes. 10 **Q.** Okay, sir. If you now turn a few pages in this 11 **Q.** Okay. Thank you, sir. 11 lengthy exhibit, you will see another Florida 12 Now, sir, if you would, please turn to 12 Fish and Wildlife Conservation Commission, like, 13 page -- well, I'm going to call it 50 of this 13 heading page. It's at Bates 5265. 14 report. Unfortunately, not all of the pages were 14 A. I'm there. This supplemental document 15 printed with page numbers on them. But some of 15 appendices? 16 them have it, and 49 has a page number on it. 16 Q. Correct. 17 17 It's a graph. MS. WINE: Mr. Walton, are you there? A. I see that. 18 18 Can you just put up that page for us, 19 **Q.** So 50 would be the next page that says tables. 19 sir? It ends in 5265. 20 20 Do you see that, sir? Thank you. 21 21 BY MS. WINE: A. Ido. 22 **Q.** I want to make sure the Special Master is with us 22 **Q.** And, Mr. Sutton, what do you understand this part 23 as well. 23 of FWC's submission to be? MS. WINE: Sir? 24 24 A. This is making sure and attaching all of the 25 Okay. Thank you. 25 information that was referenced in the report to THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1465 1467 1 BY MS. WINE: 1 NOAA for their consideration and review. 2 **Q.** Sir, do you see that some tables were included **Q.** And, sir, if you turn to the next page. It ends 3 along with this FWC report to NOAA? 3 in Bates number 5266. A. Yes. Do you see it says List of Appendices? 4 4 A. Yes. 5 **Q.** And, sir, what is the first table indicated as? 5 6 A. Apalachicola Bay oyster harvesting licenses 6 **Q.** And these are the appendices that FWC provided to 7 issued 2007 through '12. 7 NOAA? **Q.** And if you look at the very next page, which I A. Correct. 8 8 9 believe should be labeled 51, can you tell me 9 Q. And, sir, in appendix 1 you will see, again, the 10 what that is? 10 Governor Scott letter with the 2012 oyster 11 11 A. It's a corresponding table showing licenses a assessment report attached that was provided to 12 year, and the number of licenses sold. 12 NOAA again. 13 **Q.** And it has the years 2011, 2012, 2013 on it. 13 So I think this is the second time --14 Correct? 14 A. Yes. 15 A. Correct. 15 Q. -- you were recalling? 16 **Q.** And this information was conveyed to NOAA. 16 A. Yes. 17 Correct? 17 Q. And, sir, are you familiar with what is in 18 A. Yes. 18 appendix 2? 19 **Q.** And, sir, if you look back at page 50, the 19 A. Yes, I am. 20 listing of the tables, do you see items 2 through 20 **Q.** And what is that? 21 12? 21 A. That was another report that was conducted 22 22 primarily by the University of Florida A. Yes. 23 Q. So, sir -- and I believe they all reference 23 professors. And so we had reviewed that in

1468 1470 1 Q. And, sir, I believe appendix 2 is found a few 1 some of their assumptions, and then essentially 2 2 pages in at -- the ending Bates numbers are convey some -- some findings, their findings, and 3 41113. It says Oyster Situation Report on the 3 some recommendations for what appears to be front cover. Let me know when you're there, sir. probably future research. 5 A. What number did you reference there again? 5 **Q.** And do you recall what their findings were? Q. It says 41113. It's after appendix 2. 6 A. Well, they aren't -- they are detailed on page 4. 7 A. Yes. I'm seeing 5285 is the last four digits. 7 But it essentially concurs with the FWC report of 8 Q. I'm sorry. I don't believe that this portion of 8 discharge levels and flows and predation and a 9 the appendices were included in the version of 9 number of the same things that I won't repeat. 10 JX-96 that Georgia's counsel provided to you. 10 But it's consistent with prior testimony. 11 And, instead, it is found at tab --11 **Q.** And, sir, just -- not to belabor it, we haven't 12 MS. WINE: It's not here at all? 12 looked at this document, but under findings on 13 BY MS. WINE: 13 that page, the second paragraph that begins water 14 Q. All right. They're telling me it's a different 14 quality data? 15 Bates number. I apologize for the confusion. 15 Α. Yes. 16 So you have a page that ends 5285 that looks 16 **Q.** That says water quality data indicate that 2012 17 like this? 17 was a year of high salinity at all monitoring 18 18 A. Yes, I do. stations in the bay likely caused by low river 19 MS. WINE: And, your Honor, I'm sorry 19 flows and limited local rainfall in most months. 20 20 for the confusion. Are you there as well? Do you see that, sir? 21 21 A. I do. The cover is being flashed on the screen. 22 SPECIAL MASTER LANCASTER: I am. 22 Q. And then it goes on to say, skipping a paragraph, 23 MS. WINE: Thank you. 23 the 2012 decline in oyster landings and BY MS. WINE: 24 recruitment of juvenile oysters is unprecedented 24 25 25 during the period of data analyzed and has likely **Q.** And, sir, you said that this is a report that was THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1469 1471 1 prepared by some professors from the University 1 involved recruitment failure or high mortality of 2 2 of Florida? small oysters. Do you see that, sir? A. Yes. The contributors are on the page that A. I do. 3 3 Q. And, sir, I think you also said that this article 4 follows. 4 5 5 does indicate that additional research might be **Q.** Okay. And so if we look at that page, we see 6 Karl Havens; is that correct? 6 needed; is that correct? 7 A. Correct. 7 A. Yes. I recall that. **Q.** And that was the conclusion of these authors? 8 **Q.** Who is a name that we have heard in the courtroom 8 9 a fair amount so far 9 Α. Yes. 10 And then Mr. Pine is second to last there. 10 Q. And this is a report that FWC provided to NOAA in 11 Do you see that? 11 the package of information for NOAA to consider? 12 A. I do. 12 Α. Correct. 13 13 MS. WINE: And, Jon, we're just at the **Q.** Now, sir, while we are on this document, I just 14 next page after the cover. 14 wanted to pause on a related topic. If you could 15 15 turn to -- I think I have different page numbers I think you -- yes. 16 BY MS. WINE: 16 than you, so there's a section that is titled 17 Q. And, sir, have you reviewed this University of 17 Fisheries-Dependent Data Summary. And what 18 Florida oyster situation report? 18 follows are some graphs on Apalachicola Bay 19 A. Thave. 19 landings and license holders. 20 Q. And what do you understand it to be? 20 MS. WINE: And, hopefully, Mr. Walton 21 A. It was the -- again, this -- the contributors 21 can find where I am and help us all get 22 reviewed the -- the Apalachicola oyster crash; 22 23 but also they reviewed some of the -- a number of 23 A. Is that within the University of Florida 24 different documents and worked as stakeholders 24 document? 25 and essentially developed some models to look at, 25 Q. It is, sir. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

TRIAL - November 8, 2016 (Vol. VI) Florida v. Georgia 1474 1472 1 MS. WINE: I have different Bates 1 bottom of that chart. Do you see that? 2 numbers, I think, so -- Jon, can you search 2 Do you see the reference to GX-1248 in their 3 for the heading Fisheries-Dependent Data 3 sources on the bottom of that page 2 chart? 4 A. I do. Summary. 5 Okay. So I'm being told that in the **Q.** And, sir, if you could turn three pages in on 6 version that you all have, it starts at Bates 6 Exhibit GX-1248 --7 ending 5294. 7 8 Yes. Thank you, Jon. 8 Q. -- a few lines down you will see for the year 9 A. Okay. 9 1987, do you see it says Franklin? 10 **Q.** And then it continues on page -- on the following 10 A. I do. Q. And that's Franklin County? 11 page; and there are some graphs. Do you see 11 A. That's correct. 12 that? 12 13 A. I do. 13 Q. Is that where Apalachicola Bay is? 14 **Q.** Now, sir, do you see that first draft that says 14 A. Primarily, yes. 15 annual reported AB landings in pounds? 15 **Q.** And do you see the number for the landings that 16 A. I do. 16 are reported there in pounds, which if you look Q. And AB is defined above as Apalachicola Bay? 17 17 at the front, that's the first number of columns there? A. Correct. 18 18 A. Yes, I do. 19 **Q.** And, sir, do you also recall the chart that 19 20 20 Q. And what does that say? Georgia's counsel gave to you of landings? 21 It's a chart that says -- it's No. 2 of all 21 A. 2,781,224. 22 the handouts that he gave you. 22 **Q.** And that's consistent with what you see right 23 A. I do. 23 there in the University of Florida situation Q. And, sir, do you see that counsel started their report. Correct? 24 24 25 chart in 1988? 25 A. Yes. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1473 1475 1 A. I do. Q. And, sir, I am not at all a good artist; but we **Q.** Sir, do you recall what the landings were just 2 took the liberty of just drawing that bar in for 3 prior to 1988? 3 1987 so we could see what it looked like if A. If I refer to this graph and the oyster situation 4 counsel just started it one year prior. 4 5 5 from the University of Florida. MS. WINE: Jon, if you could put that 6 **Q.** And I know that graph is hard to read, but what 6 up. 7 does that graph tell you when you look at that? 7 A. Thank you. A. In 1986, I believe, certainly prior to '88, the 8 8 **Q.** Sir, is the line that I not very ably drew 9 landings were -- looks to be close to -- close to 9 consistent with the number that you just looked 10 3 million. 10 at in GX-1248? 11 A. It is. Q. And, sir, if you -- actually, do you have -- I 11 Q. Okay. Thank you, sir. 12 just don't remember if this was provided to you. 12 13 Do you have Exhibit GX-1248, which was the backup 13 Sir, we talked about the Congressional 14 data to the chart that counsel prepared? 14 testimony that occurred in connection with the 15 I don't think you do, so let me just hand it 15 request for disaster declaration here. And is it 16 out. 16 your understanding that other people besides 17 A. I don't think so. 17 Ms. Menashes testified at that hearing? 18 MS. WINE: Your Honor, may we approach? 18 A. That's my understanding. 19 19 A. Thank you. **Q.** Okay, sir. 20 MS. WINE: If I could approach again,

Q. Sir, what I have handed you is Exhibit GX-1248. 20 21 It's a Georgia exhibit that contains the landings

22 data from 1980 to 2016. Do you see that, sir?

A. I do. 23

24 **Q.** And if you look at the chart they provided you on

25 page 2, they actually cite it as a source at the

conclusions of FWC?

Q. Sir, is that paragraph consistent with the

24

25

24

1480 1482 1 A. It is. 1 the bag limits, and we're down now to three, from 2 2 Q. And in what way, sir? 20 to three, which is a serious reduction. And 3 A. In the -- the prime reasons for the crash and 3 part of that calculation is to make sure that the fishermen out there are still able to at least loss of oysters was related to high salinity, low 5 river inflow, and predators and disease. maintain some sort of viability with equal 6 Q. And, sir, is it your understanding that that's 6 distribution. So some of that calculation is 7 consistent with the conclusion that NOAA reached 7 based on that, which is typical in fisheries 8 8 as well? management. 9 A. It is. 9 Q. We saw in the Executive Order yesterday there was 10 MS. WINE: Your Honor, I'm about to move 10 also some limits to harvesting days. Do you 11 to another topic. I don't have very much 11 recall that? 12 left in my examination; but if this would be 12 A. Yes. 13 a good time for a lunch break, I could make 13 **Q.** Is that part of the recovery goals? 14 sure that my last few questions are as 14 A. That's correct. 15 efficient and quick as we can make them. 15 **Q.** And check stations as well? 16 SPECIAL MASTER LANCASTER: We'll take a 16 A. They are invoked at times, yes. 17 break. 17 **Q.** And we also talked about reshelling today. 18 18 Correct? MS. WINE: Thank you, your Honor. 19 (Time Noted: 11:44 a.m.) 19 A. Correct. 20 20 Q. And you were asked yesterday some questions about (Recess Called) 21 21 (Time Noted: 12:52 p.m.) whether certain reefs in the bay were closed in 22 22 SPECIAL MASTER LANCASTER: Proceed, order to assist recovery. Do you remember being 23 23 counsel. asked those questions yesterday? A. I do. BY MS. WINE: 24 24 25 Q. Good afternoon, Mr. Sutton. I just have a few 25 Q. Okay. And do you recall, first -- we don't THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1481 1483 1 more questions. 1 necessarily need to turn to it; but, first, you 2 2 Mr. Sutton, after the oyster collapse in were shown an e-mail from Bill Pine to Nick Wiley 3 2012, what has been the focus of FWC management 3 where Bill Pine was suggesting why don't we close 4 some of these reefs that were in recovery. Do 4 5 5 A. Largely recovery and enforcing and putting forth you recall that e-mail? 6 regulatory options to try and recover population. 6 A. I do. 7 Q. And I believe you testified yesterday that there 7 MS. WINE: That was GX-589 just for the 8 were two goals to FWC's efforts in this regard. 8 record. 9 9 BY MS. WINE: One you said was progressive management to allow 10 10 Q. And then, if you would, sir, this is not in recovery, and the second was to equally 11 11 distribute oyster resources among harvesters. Do either binder; it's one of the loose documents 12 12 you were given, GX-734. Can you find that, sir? you recall that? 13 13 A. I do recall. A. I will. Q. And, sir, what are some of the things FWC has 14 14 **Q.** It says GX-734 in the upper right corner; and 15 15 it's a May 19, 2014, letter. done post the crash either to assist in the 16 recovery or facilitate the allocation of oyster 16 A. I'm having difficulty finding that right now. 17 resources among the harvesters? 17 MS. WINE: Do we happen to have another 18 A. I think the progression of the Executive Order 18 one marked? 19 lays out the regulatory approach. And I believe 19 Counsel, do you have -- this is one that 20 I testified that part of the beauty of the 20 you handed out. Do you have another copy? 21 Executive Order is it allows you to react and 21 BY MS. WINE: 22 respond and -- depending on the data. So we have 22 Q. Well, sir, I'll just --23 23 been responsive in that regard. MS. WINE: If the Court doesn't mind, 24 And if you looked at the beginning of -- as 24 we're pulling it up. 25 in my testimony, the beginning of the harvest and 25 Does the Court have it, or is it okay THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

		TRIAL - November	er 8, 20	16 (V	ol. VI) Florida v. Georgia
		1484			1486
1		that we're pulling it up on the screen?	1		requested by Mr. Ward and Mr. Hartsfield.
2		SPECIAL MASTER LANCASTER: On the screen	2		Correct?
3		is fine.	3	A.	That's correct.
4		MS. WINE: Okay. Let's just not delay.	4	Q.	And if you look, sir, Mr. Ward and Mr. Hartsfield
5		We don't need to find the hard copy.	5		also request two other things in those other

Order 15-18, same, prohibits commercial recreational harvesting of oysters in East Hole. The Order that follows also
8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. A. Q. A.	Okay. Tab 10 is JX-111. It's actually one of the Executive Orders that they showed you, but we didn't cover this part. Could you read this Executive Order, sir, and tell us what it says about East Hole. The I assume you don't want me to read it out loud? I don't want you to read it out loud. I just want you to tell us if it gives any indication with regard to actions taken with regards to East Hole. Okay. And what do you see, sir? That beginning on June 1 and continuing through August 31 of 2014, the area commonly known as East Hole in Apalachicola Bay System is hereby prohibited.	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. Q. A.	Okay. And I think at the top, if I'm correct, the second one will be the Executive Order that we just looked at. Yes, ma'am. I'm there. And, sir, just briefly, again please don't read it all; but if you could just scan the rest of that page and going on to page 15, could you please tell us, sir, whether there was additional management action with regard to East Hole over some period of time thereafter? Working down on the winter season in 14, East Hole was closed in order 1418 14-18. Again, in 15-14 closing commercial and recreational on East Hole. Order 15-18, same, prohibits commercial recreational harvesting of oysters in East Hole. The Order that follows also references closing commercial and recreational on East Hole; that's Executive Order 15-22.
8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	Q. A. Q. A.	Okay. Tab 10 is JX-111. It's actually one of the Executive Orders that they showed you, but we didn't cover this part. Could you read this Executive Order, sir, and tell us what it says about East Hole. The I assume you don't want me to read it out loud? I don't want you to read it out loud. I just want you to tell us if it gives any indication with regard to actions taken with regards to East Hole. Okay. And what do you see, sir? That beginning on June 1 and continuing through August 31 of 2014, the area commonly known as East Hole in Apalachicola Bay System is hereby prohibited. So East Hole was closed to harvesting as	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	A. Q. A.	Okay. And I think at the top, if I'm correct, the second one will be the Executive Order that we just looked at. Yes, ma'am. I'm there. And, sir, just briefly, again please don't read it all; but if you could just scan the rest of that page and going on to page 15, could you please tell us, sir, whether there was additional management action with regard to East Hole over some period of time thereafter? Working down on the winter season in 14, East Hole was closed in order 1418 14-18. Again, in 15-14 closing commercial and recreational on East Hole. Order 15-18, same, prohibits commercial recreational harvesting of oysters in East Hole. The Order that follows also references closing commercial and recreational on East Hole; that's Executive Order 15-22. Sir, I believe that might cover it; but please
8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	Q. A. Q. A.	Okay. Tab 10 is JX-111. It's actually one of the Executive Orders that they showed you, but we didn't cover this part. Could you read this Executive Order, sir, and tell us what it says about East Hole. The I assume you don't want me to read it out loud? I don't want you to read it out loud. I just want you to tell us if it gives any indication with regard to actions taken with regards to East Hole. Okay. And what do you see, sir? That beginning on June 1 and continuing through August 31 of 2014, the area commonly known as East Hole in Apalachicola Bay System is hereby prohibited.	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	A. Q. A.	Okay. And I think at the top, if I'm correct, the second one will be the Executive Order that we just looked at. Yes, ma'am. I'm there. And, sir, just briefly, again please don't read it all; but if you could just scan the rest of that page and going on to page 15, could you please tell us, sir, whether there was additional management action with regard to East Hole over some period of time thereafter? Working down on the winter season in 14, East Hole was closed in order 1418 14-18. Again, in 15-14 closing commercial and recreational on East Hole. Order 15-18, same, prohibits commercial recreational harvesting of oysters in East Hole. The Order that follows also references closing commercial and recreational on East Hole; that's Executive Order 15-22.

1 scan it.

- 2 A. Yes. I don't see it in the Orders that follow.
- **Q.** And just so the record is entirely clear, on
- 4 Order 15-18, which is the second to last one you
- 5 mentioned, I believe it says East Hole is closed
- **6** except Mondays. So for that one period of time
- 7 there was very limited harvesting allowed on East
- 8 Hole, correct, on Mondays?
- 9 A. That's correct.
- 10 Q. Okay. But, otherwise, it was closed during that11 period?
- 12 A. Correct.
- Q. Okay. Sir, why in your view hasn't the bay
 recovered despite the restoration efforts that
 FWC has undertaken since the crash?
- A. Well, as I have stated in my testimony, it's the environmental conditions. It's the water
 regime -- the salinity. Without that proper
 balance, it's -- restoration can't happen.
- 20 Q. Okay. Thank you, sir.
- 21 MS. WINE: I have no further questions.
- 22 SPECIAL MASTER LANCASTER: Recross?
- 23 RECROSS-EXAMINATION
- 24 BY MR. ECHOLS:
- **Q.** Mr. Sutton, if I mixed up the dates, I apologize. THE REPORTING GROUP

Mason & Lockhart

1489

- **1** But I have got on the screen right now the
- **2** exhibit where we tried to track all of the Orders
- 3 that were entered. And I thought that I had run
- 4 through all of them with you, and maybe there was
- 5 some confusion on my part. But I do have listed
- 6 here -- it says May-June 1, 2014, an Executive
 - Order that was entered at that time. And to the
- 8 extent that I didn't identify it as East Hole as
- 9 part of that Order or connected to the Tommy Ward
- 10 letter, then, you know, please accept my
- 11 apologies.

7

12

13

14

15

I want to go to, first -- if we can go back to my landings chart where we have the official state data of all the oysters harvested from 1988 through 2015. Now, do you recall, sir, when

- Ms. Wine -- Ms. Wine had one, which I don't havea copy of, where she drew in a bar that showed
- 18 2.7 million pounds harvested in 1987. I don't
- 40 1 15 1 11 11 1 2
- 19 know if you have the one that she wrote on?
- 20 A. I do.
- Q. Okay. Now, just to be clear, first off, the 2.87million, that's still less than was harvested in
- 23 2012 of 3 million pounds there. Right?
- A. Yes. It's -- since you don't have this, it's 25 2.78 on her drawing. But --

THE REPORTING GROUP
Mason & Lockhart

- **1 Q.** Okay. 2.78?
- 2 A. Correct.
- **Q.** Okay. So then it's also still less than what was
- 4 harvested in 2011. Right?
- 5 A. Yeah.
- **Q.** Do you notice in 1988 the amount harvested is
- 7 significantly lower, about 1.25 million?
- 8 A. I do.

13

16

19

21

1

2

7

18

- **9 Q.** And do you have any idea why that happened?
- 10 A. I'm not familiar with all of the variables that11 resulted in that.
- **Q.** I take it you're not aware then that after
 - Hurricane Elena when there was this massive
- 14 recovery effort put in place with massive
- reshelling and the like, that when they first
 - opened the bay back up to harvesting, they were
- 17 concerned that too many oysters were being
- harvested in 1987, and that that was what
 - sparked FWC to institute a licensing requirement,
- a check station requirement, and a seasons
 - requirement. You don't -- you were not aware of
- 22 that?
- 23 A. I recall reading that after Elena with the check 24 stations, yes.
- **Q.** And, in fact, Mr. Berrigan wrote an entire THE REPORTING GROUP

Mason & Lockhart

article -- two articles about it because he

- studied it because there was a concern that the
- 3 population was going to crash after it had
- 4 recovered from too much harvesting. And so FWC
- 5 put in place all of these limitations in order to
- **6** protect the resource so that it wouldn't
 - collapse. That generally accords with your
- 8 recollection?
- 9 A. I would certainly defer to Mr. Berrigan's recollection.
- 11 Q. All right. Now, if we could go to the FWC12 report, which is which tab?
- 13 It's the JX-96. The final report, JX-96
- behind tab 42 in your binder.
- 15 A. Okay.
- **16 Q.** And Ms. Wine referred you to page 52 in the
- appendices, which is the table listing the annual
 - landings of pounds of oyster meat. I don't know
- if you can flip back to find that.
- 20 A. That was the one that wasn't numbered.
- Q. No. Actually, this one is numbered. It has a 52on the bottom of it.
- 23 A. I'm there, yes.
- **Q.** And do you see, sir, that the pounds that are
- 25 listed here for 2012 of what was harvested,

25

1504

- 1 of exhibits. And I may also refer to some
- **2** from the prior binders we have already.
- 3 CROSS-EXAMINATION
- 4 BY MR. ECHOLS:
- **5 Q.** Good afternoon, Dr. Kimbro.
- 6 A. Good afternoon.
- ${f 7}$ ${f Q}$. Dr. Kimbro, as Mr. Qureshi introduced you, you're
- 8 an experimental ecologist; is that correct?
- 9 A. Yes.
- 10 Q. And I take it that -- I think you explained
- **11** before, although you're an experimental
- 12 ecologist, you're not a fisheries ecologist?
- 13 A. No, I'm not a fisheries biologist.
- **14 Q.** Not a fisheries biologist, and you haven't
- 15 studied any other fisheries separate and apart
- 16 from this particular work that you did for
- 17 Apalachicola Bay. Correct?
- 18 A. No.
- 19 Q. The method that you used and described in your
- written direct testimony is a three-part analysis
- 21 that includes observations, experiments, and
- 22 mathematical modeling; is that right?
- 23 A. Yes.
- **24 Q.** I would like to, as I go through this structure,
- go through each of those topics, if we could.

THE REPORTING GROUP

Mason & Lockhart

- 1505
- **1** First, when it comes to observations, you, sir,
- went down to Apalachicola Bay in late 2012 right
- **3** after the collapse was identified; did you not?
- 4 A. Yes. I began making observations in the fall of
- 5 2012.
- 6 Q. And, in fact, you went out on the water with
 - Mr. Berrigan and I think Mr. Shields, too, from
- 8 DACS?

7

- 9 A. And Mr. John Gunter.
- 10 Q. And Mr. Gunter, too, okay. And you made some
- observations when you were down there in or about
- **12** October 2012?
- 13 A. I recall it being late September. And as the
- 14 DACS was collecting their data to generate
- 15 their fishery-independent datasets, I monitored
- 16 how they went about actually doing that. And
- 17 I reprocessed the same sample just to see if
- 18 we were getting the exact same kind of
- 19 information.
- **20 Q.** I want to ask you about an observation that you
- 21 made when you were down there in September,
- 22 October 2012. If I could please direct you to
- tab 5 of your binder.
- MR. ECHOLS: And tab 5 for the record is
- **25** GX-486.

THE REPORTING GROUP

Mason & Lockhart

- 1 BY MR. ECHOLS:
- **2 Q.** And if you would, sir, obviously look at as much
- as you like, but the part I would like you to
- 4 read to yourself, if you would, is on the second
 - page at the bottom. There is an e-mail from you,
- 6 October 25, 2012, to Dr. Bill Pine.
- 7 A. Okay. I have read that e-mail.
- 8 Q. And it's accurate, is it not, sir, that when you
- **9** were down there shortly after the collapse was
- 10 identified, when you went to the open bars and
- 11 looked at them, your observation was that they
- 12 looked like gravel parking lots because they had
- **13** been harvested so much?
- 14 A. I did observe a lack of structure at some, but
- not all sites, as the rest of the e-mail goes on
 - to explain. And one of my preliminary hypotheses
- 17 about the collapse in 2012 was the influence of
- 18 harvesting. So, yes, this was the beginning of
 - my research program. I made an observation, and
- 20 I began making hypotheses. And the fishing
 - influence was one of the hypotheses that we
- 22 tested with our three-pronged research approach.
- 23 Q. That is what you saw with your eyes was gravel
- 24 parking lots?

A. I'm sorry? THE REPORTING GROUP

Mason & Lockhart

1 Q. I'm sorry. You saw that with your eyes?

- 2 A. I can't recall if I saw it or if I -- actually, I
- 3 couldn't have seen it because I was not diving at
- 4 that time. So it had to have been I saw it by
- 5 the samples that the divers from DACS brought up
- 6 to the boat. And so some samples had lots of
- 7 structure in it, and other samples had not much,
- 8 but kind of gravel, broken-up shell like you
- 9 would see in a dirt parking lot.
- **10 Q.** And a structure that is gravel and broken-up
- **11** shell, that's not good habitat for oysters to
- grow on. Would you agree with me?
- 13 A. Yes, I would agree.
- **14 Q.** Because you want to have some elevation, and you
 - want to have some live oysters and dead oysters,
- things for spat to settle on; is that accurate?
- 17 A. Yes.

15

- **18 Q.** Now, you were hired in -- is it January 2013 to
- 19 begin your work for the State of Florida; is that
- 20 right?
- 21 A. That's incorrect.
- 22 Q. Oh, I'm sorry. What is it then, sir?
- 23 A. I -- as part of the University of Florida Oyster
- 24 Recovery Task Force that was led by Dr. Karl
 - Havens, that's when I began my research. So in

THE REPORTING GROUP

Mason & Lockhart

25

TRIAL - November 8, 2016 (Vol. VI) Florida v. Georgia 1510 1 September, October 2012 I became a part of that 1 East Hole oyster bar -- that it was a -- it was 2 2 task force. I then presented my research ideas similar to what was flat or like a parking lot or 3 on what I thought needed to be done to establish 3 at least bad substrate. Correct? 4 cause and effect about what happened in 2012 to 4 A. I'm sorry. Could you repeat your question, 5 Dr. Havens. And he jumped at the idea and 5 please? 6 thought it was great. He then gave me a small 6 **Q.** Sure. Your graduate students assisting you with 7 starter grant of \$10,000 to initiate my research 7 your research found that the condition of the 8 program, and so the initiation process officially 8 substrate at East Hole Bar was poor in January 9 began in January of 2013. 9 2013? 10 Q. Got it. That must be what I was --10 A. May I look at the data for something that you're 11 A. So at that time -- may I finish? 11 referring to to make that inference, please? 12 Q. Yes. Sorry. Go ahead. 12 **Q.** That --13 A. At the time at that time I was not working under 13 A. In particular --14 a contract with the State of Florida. I was 14 **Q.** I'm looking at this picture. 15 getting my funding through the University of 15 These aren't data. This is just -- you know, 16 16 Florida. 5 feet away from us there could be a quadrat with 17 Q. Okay. And at January 2013, you had some of your 17 lots of reef structure. 18 18 graduate students also go and do some quadrat So I actually presented these preliminary 19 sampling in Apalachicola Bay? 19 data at the back end of the UF Oyster Recovery 20 A. Yes. That's correct. 20 Task Force. And in that there are images or 21 21 Q. And we had what Mr. Berrigan -- I'm not sure if graphs of the amount of biomass and restructure 22 22 you were here at the time when we looked at it; in an area. So we could look at that and talk 23 but some of this you put online, and there's 23 about hard data. 24 videos and pictures and everything of this. 24 Q. Let's -- I know this is the first time you have 25 Right? 25 ever testified. Right? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1509 1511 1 A. Yes. We wanted to try and keep the public 1 A. Yes. 2 informed of what we were doing. 2 **Q.** Yes. One of the ways this works is I'll ask my 3 3 MR. ECHOLS: Can we have the Berrigan questions, and then Mr. Qureshi will have the 4 demo 8. We have got some printout copies 4 chance to let you talk as much as you like about 5 5 here as well. whatever you would like, you know. So I just BY MR. ECHOLS: want to make sure it's clear that's how this 6 6 7 7 process works. Okay? **Q.** What you have in front of you, sir, would you 8 take a look at -- oh, there we have it on the 8 A. Clear. 9 9 **Q.** So looking at these pictures, would you agree screen. 10 10 with me that the quadrat sample that was being So this was a couple of snapshots taken out 11 of the research video that was posted online with 11 taken by your graduate students as part of this 12 your colleagues and graduate students who were 12 research looks like really poor substrate at this 13 13 doing the work. And it reflects, if you see in point? 14 the top left-hand side, the process of doing a 14 A. Yes. But this doesn't tell you where exactly it 15 quadrat sampling. Do you see that? 15 came from or how much of the sampling looked 16 A. Yes, I do. 16 exactly like this. So you can't make any kind of 17 Q. And there you also see, similar to what was 17 inference about how prevalent this kind of image 18 described earlier, that there's not much, if any, 18 was. 19 shell structure there. It's just little bits and 19 **Q.** Yes. And I'll represent to you, although I don't 20 pieces of shell hash and broken shell, not good 20 have the quote 100 percent in my head, that when 21 21 substrate. Would you agree with me? Stephanie is describing it, she says, here we are 22 22 A. Yes. at the center of East Hole Bar, one of the 23 Q. And so in January 2013 when you had your graduate 23 largest commercial bars in Apalachicola Bay. 24 students doing this research, they also were 24 So if that's correct and accurate, would you

finding that -- and this was at the center of

151

- 1 looks like it's got very poor substrate?
- 2 A. I'm sorry. I don't mean to be difficult. I just
- 3 don't want to generalize beyond this image to say
- 4 what a whole large oyster bar looks like.
- **5 Q.** No, I know. I'm asking about this quadrat.
- 6 A. This quadrat, yes; I completely agree that it
- 7 doesn't look like a good environment for oyster
 - larvae to settle on.
- **9 Q.** And you can see, if you look at what she pulled
- up in the mesh bags, we have got -- at the top
- 11 right-hand side you have this little bit of
- **12** gravel; and then at the bottom four quadrat
- samples, each of which has almost nothing in it.
- 14 Right?

8

- 15 A. Yes. So we laid out long transects and took
- 16 quadrat samples at every 5-meter increments. And
- 17 it appears along that one transect of four
- 18 quadrat samples there was not much reef
- 19 structure.
- **20 Q.** Now, one of the things that you conclude is that
- 21 it was predation that killed the oysters that
- 22 caused or is related to the collapse; is that
- 23 correct?
- 24 $\,$ A. My overall conclusion is that high salinity
- 25 allowed natural enemies of oysters to

THE REPORTING GROUP

Mason & Lockhart

any damage. So after it eats it, it leaves behind a box. And so in a perfect environment without any kind of disturbance, if you have a lot of snails eating a lot of oysters, you can see a lot of remnant boxes remaining. And that can be an indicator of snail predation.

However, in a environment like this with very strong currents and you do have tonging, storms, you can have physical factors that quickly cause the box to fall apart. And if that's the case, you just have two single shells laying on the ground. And at that point, the evidence of a box is destroyed.

- Q. And in here though, we don't have either complete boxes or two single shells, apparent at least in this quadrat. And if there are some, not very many at all in these four different quadrat samples that were pulled up. Correct?
- 19 A. Yes. But that's not representative of -- it's a20 large bay.
- Q. You -- you are telling me, are you, sir, that it
 would be improper to draw conclusions bay-wide
 from looking at a single oyster bar?
- A. It depends on what kind of conclusion you'retrying to draw.

THE REPORTING GROUP

Mason & Lockhart

1513

- proliferate. And these consist of multiple
- predator species, one of which is the drill. And
- 3 they killed the adults and this causes
- 4 recruitment failure. So that's my overall
- 5 conclusion.
- **6 Q.** When oyster drills kill the oysters, the shells
 - are left behind; are they not?
- 8 A. Yes.

1

2

7

- **9 Q.** So if there had been a predation event here with
- 10 a lot of oysters killed by oyster drills, you
- 11 would expect to see some shells; would you not?
- 12 A. It depends.
- ${f Q.}$ Typically when the drills kill the oysters, the
- **14** shell is left behind. Right?
- 15 A. Yes.

25

- **16 Q.** And this is January 2013, right in the height of
- what you are opining is the collapse caused by
- **18** predation by oyster drills?
- 19 A. So I think what you're referring to is when a
- 20 snail eats an oyster, the oyster dies; and there
- 21 is no tissue or muscle left in it. But the shell
- 22 still has two valves attached at the bottom. And
- 23 so oystermen and DACS call that a box because it
- 24 looks like an empty box.
 - And so a snail eats an oyster without causing

THE REPORTING GROUP

Mason & Lockhart

- 1 Q. I'm just picking up from what you said. You said
 - this is not representative of the bay, that you
 - **3** shouldn't draw conclusions from a single bar that
 - would be applicable to the entire bay.
 - 5 A. Right. So -- and with regards to the number of
 - 6 boxes or the biomass of reef structure in an
 - 7 area, I would -- as I would teach my students, I
 - 8 would not generalize based on these screen shots.
 - 9 I would look at data, look at averages and
 - variances, and make my conclusion based on that.
 - **11 Q.** No. And, I'm sorry. I didn't mean to be so
 - 12 limited to the screen shots.
 - 13 But we had Mr. Berrigan here on Friday. And
 - he was explaining to the Court and to us how each
 - reef is basically its own individual ecosystem.
 - 16 And things can differ substantially from one reef
 - 17 to another depending upon the shell structure,
 - depending upon where it is in the bay and
- **19** salinity and the like. You would agree with
 - that?

20

24

25

- 21 A. Absolutely.
- 22 MR. QURESHI: Your Honor, if he's going
- to ask Dr. Kimbro to opine on Mr. Berrigan's
 - testimony, I would request that he show him
 - the transcript rather than characterizing it,

THE REPORTING GROUP

Florida v. Georgia

1516 1518 1 because I don't think that's what 1 spat to settle on? 2 Mr. Berrigan said. 2 Α. Right. And from my processing of samples in 3 MR. ECHOLS: Judge, it was trial 3 2012, it looked like some of the sites were 4 testimony. 4 characterized by image C. But it also looked 5 BY MR. ECHOLS: 5 like some of the sites were characterized by 6 **Q.** Go ahead, sir. I think you were about to answer. 6 images B and A as well. 7 A. I was going to say looking at how things differ 7 Q. Right. Because each reef is different and you 8 over environmental gradients is actually my 8 can't generalize from one reef to another; that 9 specialty. So I wholeheartedly agree that oyster 9 would be improper? 10 reefs close to the Apalachicola River are going 10 A. You can -- if you have predictable biological and 11 to be functioning very differently than oyster 11 environmental pathways understood, you can make 12 reefs very far away from the Apalachicola River, 12 predictions about what conditions will be like in 13 primarily because salinity is lower closer to the 13 other portions of the estuary. 14 river and higher farther away. So I 14 Q. Let me ask you in a very layman's sense. Oyster 15 wholeheartedly agreement that oyster reefs are 15 spat settles in a reef that looks like C. It's 16 16 not all the same in Apalachicola Bay. not going to grow. Right? 17 **Q.** And oyster reefs are not the same anywhere; in 17 A. Correct. The larvae need hard substrate to 18 18 any large bay you're going to find them different attach to. 19 from location to location. Would you agree? 19 Q. If oyster spat settles on a reef that looks like 20 20 A. Yes. And most often, they're predictable A, it's probably got a pretty good chance to 21 21 differences. grow? 22 22 **Q.** So, for instance, this is something else that we A. Yes. 23 used with Mr. Berrigan as an example of the 23 MR. ECHOLS: Now, if I could refer the 24 24 Court and counsel to the tab 4 that we had different kinds of things you might find when 25 you're looking at an oyster reef. And you 25 of -- in Mr. Sutton's binder. And I'll hand THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1517 1519 1 have -- would you agree that this picture here, 1 this up. 2 the A, would represent a relatively healthy reef? 2 A. Should I read this? 3 3 **Q.** Well, I'm going to refer you to a couple specific It's got good structure, lots of oysters, 4 looks pretty good? 4 places. 5 5 A. Yes. I take it in the course of you having been 6 6 **Q.** And then B is kind of intermediate. You know, retained and working on the determination of what 7 7 there's not as much structure; but you do have caused the oyster fishery collapse, you're 8 some oysters there. I don't know how you would 8 familiar with the fact that there was a request 9 characterize it. Medium? Okay? 9 to the federal government that a fishery disaster 10 A. Yes. It looks like there's a gradient from A to 10 be declared? 11 11 B to C and decreasing oyster abundance. A. Yes. 12 **Q.** And C is closer to the type of gravel parking lot 12 Q. And I can't recall from when we did the 13 13 that you saw, at least from the samples that were deposition or not, but you saw the Governor's 14 tonged up when you were there in late 2012 and 14 letter; and you saw the 2012 DACS report in the 15 what your research assistants saw in January 2013 15 course of your work? 16 at East Hole? 16 Α. Yes. 17 A. And I can't remember exactly where we were 17 Q. And that's what we have here. It's JX-77. So 18 sampling. We sampled pretty much all over the 18 it's a joint exhibit that over the past four or 19 bay in 2012. So I don't -- I can't recall 19 five days we have looked at a number of times. 20 exactly what East Hole looked like in my mind. 20 And I wanted to direct you, if I could, to 21 I'm sorry. Could you repeat your question 21 ask you a question, if you agree -- this is in 22 22 please? the DACS report, the August 2012 attachment. If 23 23 Q. Yes. Sure. That the C, this is an example of a you wouldn't mind going to tab -- or, I'm sorry, 24 poor substrate surface. This is a reef that you 24 it's page 3 of that report. 25 25 would not expect to be very healthy for oyster Sorry. Front and back page 3 or --THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

1522 1 Q. It's 3 on the bottom, page 3 of the August 2012 1 structure when you were down there? 2 DACS report. 2 Α. When samples were brought up to me on the boat, I 3 Α. Okay. Got it. Thank you. 3 saw many -- or some samples that looked like a Q. And if you wouldn't mind reading the second to degraded reef, yes. I also saw many other last paragraph to yourself, the one that says Cat 5 samples that still had reef structure. 6 Point and East Hole Bar. 6 Q. Now, one of the reasons -- strike that. 7 A. Okay. 7 One way that you can assist degraded reef 8 **Q.** Do you see the discussion of substrate being 8 structure is to engage in reshelling. Would you 9 degraded? 9 agree with me? 10 A. Yes. 10 A. 11 **Q.** Would you agree with me that the pictures that we 11 Q. And that's an important restoration tool that's 12 were looking at, recognizing that they're 12 available to fisheries to help promote the 13 individual quadrat samples here and there, would 13 recovery of an oyster population? 14 be examples of degraded substrate that would not 14 A. Yes. 15 be good for spat settlement and recruitment? 15 Q. But as far as when you submitted your initial 16 16 A. I think I understand what you're asking me, but I report, you hadn't analyzed any of the shelling 17 think you -- you want me to establish a clear 17 data that Florida had done. Correct? 18 18 connection to those images and text written by A. I had read about it and had seen it with my own 19 someone other than me. So I can see right here 19 eyes when I was out conducting my research, which 20 20 there's a phrase that says, and the quality of is why when I was writing my expert report and I 21 21 the substrate is degraded. So, yes, I agree was introducing everything I knew about the 22 22 that's here in this paragraph. system, I suggested that Florida's shelling 23 **Q.** You know that this August 2012 report was written 23 efforts seemed to be aggressive, both because of 24 by Mr. Berrigan. Do you know that? 24 what I read in a Florida state document as well 25 A. I think I have heard that. But at the time I 25 as a Gulf states fishery management document. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1521 1523 1 first saw this, I didn't know it because I don't 1 So given those official scientists and then 2 think his name is on it. 2 what I saw with my own eyes, I felt comfortable 3 3 **Q.** Right. But you have been working on this describing it as, you know, a good effort in 4 research for over three years now, and you were 4 trying to reshell the habitat in Apalachicola 5 5 out on the boat on the water with Mr. Berrigan Bay. 6 6 **Q.** But as of the time that you submitted your expert and Mr. Shields and Mr. Gunter. Correct? 7 7 A. Yes. But on a limited basis actually, just once. report in February of this year you hadn't 8 Q. You know that Mr. Berrigan has been described and 8 analyzed any shelling data and had no idea of 9 9 whatever shelling Florida was doing compared to described himself as being the most knowledgeable 10 person about the Apalachicola Bay oyster fishery 10 prior periods. Right? 11 for the last 30 years based on his work as the 11 Α. No. But I have since then. And my statistical 12 lead person in DACS? 12 analysis shows that before the collapse, we --13 13 A. I do know that. the shelling effort by the State of Florida was 14 Q. And -- but to the extent then that he -- and 14 not statistically different than in the long-term 15 strike that. 15 30-year average of annual shelling effort 16 And these DACS reports are official Florida 16 conducted by the State. So with my own eyes and 17 state records. You're aware of that; are you 17 what I read and now I have statistically 18 not? 18 analyzed, I stand by that comment. 19 A. Yes. 19 Q. Let me ask you about that statistical analysis. 20 20 Q. And in these official Florida state records, In your direct, you have got a chart on page 50 21 21 they're talking about the degraded quality of of your direct. Α. 22 reef substrate and structure? 22 Is --23 A. And I have no reason to doubt what that says in 23 Q. Yes? 24 Is that in the -- can I have a piece of paper 24 the document. 25 25 Q. And what you saw was degraded reef substrate and form to look at that? THE REPORTING GROUP THE REPORTING GROUP

Mason & Lockhart

TRIAL - November 8, 2016 (Vol. VI) 1524 1526 1 Q. I think your counsel gave you your written the like, it doesn't make sense to have a 2 2 direct -- your testimony. five-year bin when you're evaluating if there's 3 A. Thank you. You're right. 3 substrate for an oyster spat to land on in order Okay. I'm there. for it to grow up in a year? 5 Q. And is this, sir, the statistical analysis that 5 A. Sure. And that's why I take it even down to just 6 you were referring to? 6 looking at the one mean in 2012 and without any 7 A. It is. 7 measure of variance. And it still overlapped 8 Q. And here what you have done in this analysis is 8 with the long-term average. 9 to create five-year tranches or buckets; is that 9 Q. The Court has seen these before; but I don't know 10 right? 10 that you have, Dr. Kimbro. 11 Α. Sure. 11 MR. ECHOLS: And you know what; let's 12 Q. And that was what you did in order to reach the 12 just put up the longer one. 13 conclusion that there wasn't a statistically 13 BY MR. ECHOLS: 14 significant difference in the shelling that 14 Q. And so what I have handed you, sir, are a couple 15 Florida did before the collapse relative to other 15 of exhibits that were used with Mr. Sutton. And 16 16 periods? these come from the official Florida state 17 A. In short, yes. But there's a little more 17 records that have been submitted to the Court 18 analytical steps to it. 18 about how much shelling took place in these -- in 19 Q. Okay. And I'm sure you will get a chance to 19 this decade basically, decade-plus. 20 20 explain that. And you would agree with me, sir, would you 21 21 From a biological standpoint for oysters, not, that particularly since we're interested in 22 22 looking at whether there's shell there for spat now -- and you know this from your research --23 23 when spat settles, it only takes, like, a year or to settle on so that they can grow up in the next 24 two to grow up to be an adult oyster. Right? 24 year, if you look at 2011, there's shelling of 25 25 A. In Apalachicola it can happen in a year or less. only 19 acres, a pretty small amount? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1525 1527 1 Q. Right. So for purposes of analyzing shelling and A. I'm sorry. Did you say 2011? 2 the amounts of shelling that's done, wouldn't it Yes. I'm looking at 2011 first. 3 be more useful to look at individual years to see 3 And you said 19 to 20 acres? 4 when there was shell out there for the spat to Q. 19 acres it says; yes, sir. 5 settle on? Α. Okay. And your question? 6 A. That's a great question. And I can refer to a 6 **Q.** That's not a lot of shell? 7 7 lot of climate science where if you want to draw Δ. Compared to what? 8 conclusions about what's happened recently 8 Q. Compared to anything. 9 9 A. It seems consistent to previous years. compared to long-term trends, you could compare 10 10 one year; but you would use an average. And And I'm also wondering why are we only 11 11 there is no variation or little error bars around looking at 10 years worth of shelling data when 12 12 that average. So that's why typically when the record is much longer? 13 13 Q. We're looking at it because the collapse took people look at long-term precipitation records, 14 you use bends or some -- something akin to that 14 place in 2012 to 2013 and because oysters need to 15 so that you can have both a mean and a variance, 15 land on a shell to grow up in one year or two 16 or an error bar. So that's why you need to group 16 years, as you said. That's why we're looking at 17 17 things into categories. this period of time. 18 And to be honest, after reading the expert 18 A. It could also be that, you know, shelling isn't 19 prestated Georgia's direct testimony, I was -- it 19 always going to help. So perhaps the State of 20 was brought to my attention that I perhaps 20 Florida felt that the environmental conditions 21 grouped them wrong. So I regrouped them and ran 21 were unsuitable to deploy shell, which is a 22 22 the same analysis as the expert for the State of limited resource. So if you put it out in high

THE REPORTING GROUP

Georgia suggested. And I got the same outcome.

But whereas it makes sense to do things in bins,

such as for long-term precipitation analysis and

salinity conditions, there aren't going to be any

larvae there to settle on it. So then that shell

is quickly silted over and lost. So it's a waste

THE REPORTING GROUP

TRIAL - November 8, 2016 (Vol. VI) Florida v. Georgia 1528 1530 1 of a limited resource. 1 of Florida to shell only 19 acres, 35, 16 acres, **Q.** So is it your -- you're the expert -- the oyster 2 2 that that was a beneficial management program? 3 expert for the State of Florida and opining with 3 A. In 2010 they shelled 57 acres; 2011, 19 acres; 4 respect to shelling and everything else. Is it 2012, 35 acres. And when you compare those --5 your testimony, since you have had access to that amount of shelling to the long-term records, 6 anybody in state government that you would like, 6 it doesn't differ statistically. 7 that the State of Florida determined that it 7 So they have been doing this for a while, and 8 likely was not beneficial to shell from 2004 --8 it's been working for a long time. So I just 9 or at least not to shell that much from 2004 all 9 stand by that. 10 the way up through 2013? 10 Q. It doesn't differ statistically if you put it in 11 A. I'm sorry. It looks like they shelled from 2008 11 five-year buckets, but if you --12 through 2015. It looks like in 2005 through 2007 12 A. Nor if I put it in four, three, or two-year 13 they did not. And perhaps they were very wise 13 buckets. 14 because that was a year drought, I believe. And 14 **Q.** How about one? 15 so if that's the case, they saved themselves from 15 A. Then you have a measure of variation. 16 16 wasting a lot of shell. **Q.** But the variation that we're looking for is are 17 17 Q. Okay. I just want to make sure that the Court is the spat going to settle in year 1 so that, as 18 clear with your testimony that it was -- the 18 you found, they can grow up to adult size in 19 State of Florida was wise not to shell in these 19 vear 2? 20 20 years where they did not shell? A. I'm sorry. I don't understand the question. 21 A. That's not my conclusion. I'm just making a 21 **Q.** You just explained to the Court that the oyster 22 point that there's another interpretation of 22 spat can grow to adult size in a year, in 12 23 these data. 23 months, in Apalachicola Bay? Q. Right. But you're the expert for the State of 24 24 A. Yes. That's correct. 25 Florida providing this testimony for the Court to 25 Q. All right. So they need the spat, when they're THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1529 1531 1 understand the process. And is it your judgment, 1 baby oysters, to settle on in the first year so 2 2 sir, that it was wise not to shell from 2004 to that they can grow up the next year? 3 2007? 3 A. I agree with that. A. My conclusion is when I look at the long-term 4 Q. You actually, sir, did some experiments about 4 5 5 record from 1970 to now, that the efforts of reshelling as part of your research; did you not? 6 6 A. Sorry. Yes. I did. shelling have been statistically consistent. 7 That apparently has been sufficient to maintain a 7 Q. Now, one thing that we haven't talked about 8 8 very productive oyster fishery for a very, very previously, but I think it will be important for 9 long time. 9 the record here, is that reshelling not only is 10 10 This has also been supported by State of beneficial because it provides a hard surface for 11 Florida documents as well as the Gulf States 11 the baby oysters to land on and grow up, but when 12 Marine Fisheries Council. 12 you have a healthy reef or a reshelled reef, 13 Q. And I'm sorry if I wasn't clear. 2004 to 2007 it 13 that's important because it helps reduce 14 was wise for the State of Florida not to shell 14 predation. Isn't that correct? 15 during those years based on your opinion? 15 A. It could. 16 A. That's not my opinion. 16 Q. Okay. Well, it does? 17 **Q.** And --17 You have studied this, and that's what you 18 A. I was just pointing out perhaps an alternative 18 have determined. Right? 19 explanation. 19 A. No. 20 **Q.** And similarly, you -- when we're coming up to the 20 Q. Okay. Well, maybe I'm confused then. In your 21 21 collapse which took place in 2012 to 2013 that expert report, which in the binder is tab 1 --22 22 you were analyzing, is it your testimony that it and you can -- this is the expert report you

- 14 Q. The Court can read it. I can read it.
- 15 A. Okay. I finished.
- **16 Q.** Okay. And it's correct, is it not, sir, that
- 17 that's what you found when you analyzed how
- having a restored reef might assist in preventing
- **19** predation, that -- that it significantly affected
- and decreased the effect of predation. Correct?
- A. Right. So proving out an ecological theory, it's
 hypothesized that structured habitats can inhibit
- 23 predators from finding and attacking their prey.
- 24 But for other predator prey, it can sometimes
- 25 enhance that attack rate.

half as many oysters.

THE REPORTING GROUP

Mason & Lockhart

So in this specific sentence, I was referring to experiments I conducted, you know, in a lab setting. I used to be a professor at Florida State University before going to Northeastern. So there we had outdoor tubs essentially. And I sort of mimicked little piles of oyster shell. I had some piles that had lots of structure, others with a little, and others with none. And I looked at how the foraging rate of the snail predators on oysters changed as you had big piles versus little piles. And I found the statistical difference of over a week, the snails ate about

Given that result, I felt that it would be a great idea to actually go out and test this out in the real environment. So I convinced the State of Florida to actually build me two quarter-acre reefs, and we did this experiment outdoors. And the results differed from the lab experiments. It showed that on really big, complex reefs, you had predation. On moderately structured reefs, you had predation. And on reefs with little structure, you had predation. And that predation level did not differ among those three reef types.

THE REPORTING GROUP Mason & Lockhart

- **1 Q.** And I know you put that in your written direct.
- 2 I take it you also have had the opportunity to
- 3 read Dr. Lipcius's written direct submission
- where he evaluated what you wrote there?
- 5 A. Yes. I looked at the experts' direct testimony.
- **6 Q.** Yes. And he pointed out -- and I don't need to
- **7** do it with you. He will testify, as he's right
- 8 there, when it's his turn that your analysis
- **9** actually did have a statistical difference as far
- **10** as the level of predation for restored reefs?
- 11 A. Yes.

19

20

21

22

23

- **12 Q.** So you saw that analysis. Right?
- A. Yes. And I was surprised by it. So I went and
 cursorily looked at the statistical code he used
 to analyze those data. And I -- the data weren't
 analyzed as I designed the experiment; and that
 really shouldn't be done. It looks like the data
 had been subsetted.

And so to be honest, I really don't know how he came up with the results he presented in his direct testimony because they're completely the opposite of what I observed and reported in my testimony.

- 24 Q. But at least insofar as this report was your
- 25 expert report that we took your deposition on,

THE REPORTING GROUP

Mason & Lockhart

ing 1 which you said was full and complete and

- 2 accurate, after working on your research for
- 3 three years for the State of Florida, you
- 4 concluded here at that point in time that the
- **5** restored reefs significantly reduced the
- 6 intensity of predation and pointed to that as
- **7** being one of the reasons that the restoration
- 8 efforts that Florida was undertaking were a
- **9** particularly good thing to do?
- 10 A. Exactly.

11

12

13

14

15

16

17

And those were preliminary results. And it turned out that I had not analyzed the full dataset. There were data from all the reefs that had been left out. And so when I reanalyzed the full dataset for my direct testimony, that supported the conclusion I just stated a few moments ago.

- **18 Q.** So you found, despite the fact that you had
- **19** worked on this for three years and submitted it
- in an expert report that Florida submitted to
- this Court, now you determined that that was
- 22 wrong?
- 23 A. It wasn't wrong. The data were just preliminary
- 24 in nature. The experiment was ongoing. It
- 25 started in the fall of 2015.

4 A. If you will, the mesh can act like a dinner 5 plate. And we had five oysters on a dinner plate 6 over here. And then we had five pretty much 7 identical oysters on a dinner plate over there. 8 I randomly assigned one dinner plate to get a 9 cage to restrict access by predators.

> So if the oysters on the plate without the cage died and the oysters on the plate with the cage did not, then I could conclude that the environment is not the thing that killed the oysters on the cage; it was a predator. So it's a standard experimental technique used in ecology for the past half century.

- 17 Q. And basically, as you said, the oyster -- well, 18 first, let's start off. We have already 19 identified that there are portions of the bay at 20 this point in time that don't have many live 21 oysters and, in fact, some portions that look 22 like a gravel parking lot. Right?
- 23 A. And to be fair, some portions of the bay that 24 have restructure.
- 25 **Q.** Right. But some portions that look like a gravel THE REPORTING GROUP

Mason & Lockhart

1 we're not underwater and we can't look at it, I

2 was trying to find some kind of analogy. And I

3 want to know if you would say that this is

accurate. I could be totally off, but it struck

me as I walked to court this morning. So when I

6 came out of the hotel, I saw somebody had

7 scattered a bunch of bird seed on the sidewalk.

8 And all the pigeons came to eat the bird seed.

9 And that's like if you have the oyster out there

in the gravel parking lot; all the snails come

and eat the oyster. Would that more or less make

12 sense?

- 13 A. That could happen, yes.
- 14 Q. Yes. And then -- but you did a separate part of 15 the experiment that didn't involve the oyster 16 served up on a plate. You know, it was actually 17 inside a cage. Right?
- 18 Α. Right. So one plate without a cage, one plate 19 with the cage.
- 20 **Q.** With the cage. And then you have got your 21 picture in your direct, paragraph 79, the 22 picture -- so in your direct you have got the

23 picture, if you have it in front of you --

actually, I guess I have the wrong paragraph

25 number. My apologies. I have got the wrong THE REPORTING GROUP

Mason & Lockhart

1541

parking lot. I take it that your experiment

involved using -- running your experiment in some

3 of those places as well because it was in many

4 locations in the bay?

5 A. Yes. So we wanted to repeat the experiment 6 repeatedly through time so we could see how 7 things like disease and predation change as 8 seasons change, as it gets warmer or colder or as 9 you get more inflow from the river and salinity 10 is less the next month. So how does predation 11 change?

> We also recognized the fact that Apalachicola is very large, so its environment is going to differ even on the same day, depending on if you're far from the river or close. So in addition to repeating our experiments over time, we replicated them rigorously across space.

18 So --

19 **Q.** And what you found, sir, for the control 20 treatment, those oysters that were set out there

21 on the dinner plate, they died; the rock snails 22 came to the dinner plate and ate them?

23 A. In the warm months, yes. Not during the winter months. They hibernate, if you will.

25 Q. And I -- because this is so difficult because

> THE REPORTING GROUP Mason & Lockhart

1 paragraph number listed in my paper here. Let me 2 find it.

Okay. So this is on page 4. It's on page 4 of your expert submission here, your direct testimony, that figure 2 there. And this here is when you have the oyster on the plate; but the plate is surrounded by a cage, so the snails still come, but they can't get in. Right?

9 A. Ideally, yes.

10 Q. Okay. And that's sort of what this reflects, 11 snails on the outside of the cage that can't get 12 in to eat the oyster?

13 A. Yes.

Q. And this is exactly what you would expect to find 14 15 when there aren't live oysters out there for the 16 snails to eat, and you put some live oysters out 17 there in a cage; is it not?

18 A. True. It could also happen on a reef where there 19 are live oysters and structure. And by repeating 20 our experiment systematically throughout the bay, 21 we, in fact, did have these cages on reefs with

22 live oysters and structure.

23 Q. But, actually, you didn't study and take into 24 account, as we talked about it in your

25 deposition, what the elevation was, what reef

1 elevation was when you set these cages down? 2 Α. No. We rigorously sampled the general area and 3 evaluated structure in terms of the biomass of 4 the reef habitat per unit area and used that as a 5 proxy for reef structure. 6 And may I add one further thing? 7 Q. Sure. 8 A. By repeating these experiments for four years

now, just like salinity has changed throughout the bay, and we see predictable results. When the salinity lowers, predation stops. When salinity increases, predation increases.

We have seen changes in the structure of the reefs where our experiments were conducted. Some areas get more structure one year; some areas lose structure the other year.

While salinity strongly can predict and explain why predation goes up or down, when we use our structure data to ask the same question, it does not influence snail predation one bit.

Q. So we went through the observations and the experiments. As far as observations, you saw and your research assistants saw gravel parking lots in places. Correct?

THE REPORTING GROUP

Mason & Lockhart

that correct?

2 Α. Yes.

> And these parameters that go into the model that pertained to oyster biology, those parameters aren't supposed to change. That's something that's tied to, you know, how oysters develop and grow?

8 Α. Well, the value of the parameter can change 9 depending on things like water salinity.

10 Sure. Let's make sure we're looking at it the 11 same way with Dr. White.

> Let's look at Dr. White and the way that he described how the model works with your inputs. And in particular, so that I don't butcher it, we'll just make sure we'll use Dr. White's description.

If you could look at paragraph 28 of his written direct testimony, and here he's explaining, I believe, that you have got certain data points, certain parameters that you put in that relate to things like growth rate in the oyster population, and that those don't change over time?

24 Α. I don't exactly know what he was intending by 25 that one sentence. What I know about growth is

> THE REPORTING GROUP Mason & Lockhart

that I have studied it a lot in oysters both on

the Atlantic coast, the Gulf coast, and the

Pacific coast of the United States is that

oysters do grow differently through time. Generally they start growing very fast right

after they settle. And then as they get older, they will slow down in growth. They also slow down in growth when it's colder. And when it's

warmer, they speed up their growth.

So that whole process of growing from a little baby oyster to an adult, it's sort of a growth path. And if you study these growth paths over and over again, you can get an idea of how these growth paths are doing.

So perhaps that is what Dr. White was intending to mean. But you would have to ask him about the intentions of his paragraph 28.

18 Q. Well, I'm just talking about the parameters.

Here we're talking about the eastern oyster and

the model, and the model uses a single parameter

21 for growth rate. Right?

22 It used a von Bertalanffy growth curve.

23 You're going to have to spell that one for her.

24 I don't think I -- von Bertalanffy. It itself 25 has parameters as well.

THE REPORTING GROUP Mason & Lockhart

A. Yes.

4 A. -- observed reefs with structure.

5 **Q.** That's right. I know you weren't here for part

6 of the other testimony that there were snails.

There was predation. You would expect that when

8 you have a drought, you have some higher 9 salinity; you're going to have some predators.

10 That happens in every drought, you know, for 11 every oyster fishery more or less. Right?

12 A. That's correct.

13 Q. Now, the third prong of the analysis you did 14 involved the modeling; is that right?

15 A. That's correct.

16 **Q.** And that modeling was something that you did with 17 your colleague, Dr. Will White?

18 A. I would rephrase that as Dr. White designed and 19 conducted the modeling. I facilitated it by 20 providing data and biological detail about what

21 was needed in the model.

22 Q. And that's right. In order for Dr. White to 23

create and to run this model, he had to have certain parameters to put into it, some of which

Mason & Lockhart

25 were relating to the biology of the oyster. Is

And that just doesn't make any sense, does it, as far as being the average maximum size of very old individual oysters? We needed to quickly quantify growth rates for

1 ways. And the first one was to go out and, from 2 our surveys, collect a bunch of oysters, 3 different size. And you can take them back to 4 the lab, and their ligamental area at the bottom 5 actually has a banding pattern. So you can slice 6 it open. And it's been published in scientific 7 literature that you can look at these bands, and 8 they're almost like tree rings. And so if you 9 count these bands and measure the size of the 10 oyster, with each band corresponding to one year

And because we were not finding very many large oysters in 2013, you know, there was a massive unprecedented decline, we didn't have very many large oysters to sample to put in that dataset. And the very large oysters we did have, oftentimes they weren't conducive for this aging process. Just some shells were conducive and some were not.

of age, you can then fit a mathematical function

to evaluate how oysters grow to certain years of

age. So we did this as a means to get growth

rates as soon as possible.

So these data are real. They came from Apalachicola. They were the best we had. They weren't perfect. And we recognized that. I

began a painstaking experiment to quantify growth

of oysters every month over a two-and-a-half year

repeated this experiment twice. So now, we have

new -- the best growth data available that exists

parameter was updated from Dr. White's expert

in Apalachicola Bay; and that's why this

report to his direct testimony.

wrong. And then you changed it?

Q. That is correct. After we had your deposition

and Dr. White's deposition, Dr. Lipcius,

Georgia's expert, in his report explained why

this figure of 61.5 millimeters was absolutely

A. But how can that be wrong if that's what the

animals were out in nature and that's what they

were. It can't be wrong. It can just be under a

conditions are too high. This is the asymptotic

growth rate you're going to find; it's not wrong.

And, no, we just didn't have the data for the

second experiment until well after my deposition.

nonideal situation for oysters when salinity

Q. Well, the reason -- the only way that this could

2 be inaccurate that 61.5 millimeters -- well,

3 let's get out of the metric. That's about 2

inches. Right?

Α. Okay.

Q. More or less?

7 Sure.

Q. Oysters can't be harvested in Apalachicola until 8

9 they're 3 inches in size. Right?

10 A. Yes.

13

19

2

5

11 **Q.** And so what the parameter is that you gave

12 Dr. White or Dr. White came up with on his own

for the average maximum size of very old

14 individual oysters was about 2 inches, and that

15 makes no sense.

16 A. That's what the data said.

17 Q. And that data said that because you're taking

18 data from after the collapse when, as you said,

there aren't oysters out there. And that's why

20 it can't tell you anything about before the

21 collapse and what caused it?

22 A. I'm sorry. Was that a question?

23 Q. I think so.

24 A. Could you rephrase it, please.

25 Sure. All of your data and the reason you got

anticipated that problem, which is why in 2014 we

1 this 61.5 millimeters is because you're analyzing

what's happening with these oysters when -- after

3 the fishery collapsed when there's poor substrate

4 and there are no oysters out there, and you're

getting this 2 inches as the maximum size.

6 Right?

7 A. Yes. And predators were eating all the live,

8 large oysters.

9 **Q.** Yes. Like the ones you put on the serving plate?

10 Α. Correct.

11 Q. But before the collapse, it didn't look like

12 that?

13 A. Correct.

14 Q. Before the collapse, there were oysters out

15 there; and there were lots of oysters because

16 they were being harvested and harvested and

17 harvested at the highest levels in the past 25

18 years. It was a very different situation?

19 A. I don't agree with that.

20 Q. You don't?

21 Α. No.

22 Q. You don't agree with the official Florida state

data showing that more oysters were harvested in

24 the two years prior to the collapse than in the

Mason & Lockhart

25 25 years prior?

THE REPORTING GROUP

And

1566 1 relatively stable. And then, again, based on our 1 this. This is an article published --2 2 closer inspection at a higher resolution of the peer-reviewed article that you cite in your 3 fishery-independent data, this level of 3 expert report bibliography. And I take it you're 4 harvesting did not inhibit recruitment just prior 4 familiar with this article? 5 to the collapse. 5 A. Yes. And, in fact, as a post-doc, I tried to 6 Q. In fact, if I can refer you -- and let's keep 6 work with Dr. Kirby to write a proposal for the 7 this up on the screen there -- to your written 7 **National Science Foundation.** 8 8 **Q.** And in very laymen terms, what Dr. Kirby is direct testimony, paragraph 99. 9 A. Sorry. My direct testimony? 9 studying is how oyster fisheries have declined 10 Q. Yes, please, sir, your direct testimony to 10 and in some cases been destroyed up and down the 11 paragraph 99 on page 40. 11 coast in progression over time over the past 12 12 Are you at paragraph 99? hundred-some years? 13 A. Yes. I was just beginning to --13 A. Yes. He's using essentially fishery-dependent 14 Q. Okay. Sure. 14 data landings and historical records to piece 15 A. -- read it. 15 together a very plausible story about how oyster 16 Should I read it? 16 reefs declined going from north to south. 17 MR. ECHOLS: Just waiting for the Court 17 Q. And this is awful hard to read given the way the 18 18 to -- got it, sir? columns are set up. I'll direct you over, but 19 BY MR. ECHOLS: 19 I'll have it pulled out. I'll direct you on the 20 20 **Q.** Yes. We were operating under a rule where we right-hand column, and it's two-thirds of the way 21 21 don't read things, at least I don't. But could down there is a section where he starts third. 22 22 you read the first sentence only of that He's doing first, second, and third. The line 23 paragraph out loud. 23 that begins early 1800's. A. I see that. 24 A. The results of the model demonstrated that the 24 25 commercial harvest of oysters has not changed 25 Q. Okay. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1565 1567 1 significantly over the past 30 years. 1 MR. ECHOLS: And can we put up, you 2 2 And -know, that particular portion on our chart, 3 Q. Okav. 3 please. A. -- if I could revise that, I would revise it to BY MR. ECHOLS: 4 4 5 be the estimated fishing rate. 5 **Q.** And so what, as you explained, Dr. Kirby was 6 6 **Q.** Okay. And the commercial harvest of oysters has looking at was Dr. Kirby, whom you wanted to do 7 changed significantly over the past 30 years, as 7 some research with, was looking at how you could 8 8 reflected by the harvest data. Correct? examine landings data to identify fishery 9 A. Again, when you -- you're just seeing an image 9 collapses, shall we say, and explains that what 10 here; and you're using your eyes and your mind to 10 you would find that would show a fishery collapse 11 11 say what's different and what's not. And in our would be where the landings data would show a 12 field, we use statistics. And in order to use 12 rapid rise to a maximum value followed by a rapid 13 13 statistics, you have to have averages and decrease and that such a rise to a maximum value 14 variances. 14 like this serves as an equally and easily 15 So the way you're looking at these data right 15 recognizable proxy for a fishery collapse and 16 here, the human mind wants to see patterns. But 16 reef degradation. Right? 17 in order to objectively see if there are 17 A. Yes. And that's why, when I looked at these 18 differences or not, you need to use means and 18 data, my initial hypothesis was that fishing 19 variances. And so when you do that, like the 19 pressure played a role in the collapse of 2012 in 20 model output did, it shows that the level of 20 Apalachicola. 21 fishing has been relatively consistent for the 21 Q. Okay. Last thing I would like to touch on, 22 22 past 20 years. please, sir, is the model that you and Dr. White 23 23 **Q.** In your binder, if I could ask you to turn, worked on was designed to assist the Court in 24 please, to tab 6. And this is GX-1318. And 24 determining whether the low flows from the river 25 we're only going to look at a very tiny part of 25 caused the oyster collapse. Does that more or THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

1569

- 1 less sound accurate? 2 A. Yes. We wanted to evaluate the relative roles of 3 fishing pressure and very high salinity level 4 induced by low river flows. 5 Q. And when we had your initial report, you had --6 you and Dr. White had run a scenario that assumed 7 that Georgia was consuming no water whatsoever, 8 you know, and analyzed whether that would have 9 had an impact on the biomass or abundance of 10 oysters. Is that right? 11 A. We did run that scenario. 12 Q. But then since then, you know, up until now 13 through your direct testimony, you and Dr. White 14 also ran what is called a remedy scenario, which 15 uses what Florida is proposing be imposed on 16 Georgia as far as restrictions on their water
- 18 A. We were asked to run a scenario as you described.
- 19 Q. And I just want to look at what the results of 20 the model that you and Dr. White did. And you 21 did fix those parameters, the ones that were 22 wrong, the small size and the growth rate?

use. Is that right?

23 A. Just for the record, they weren't wrong at the 24 time. But we just had better data that we could 25 use at a later date.

> THE REPORTING GROUP Mason & Lockhart

Q. You changed them. They were double when it was

2 rerun later on. Right? 3 A. Given our more expansive and very intensive

5 And we would rather use those data than the data 6 that we had -- that's all we had when we first 7 started the sturdy.

experiment, we then had much higher quality data.

Q. If you could look at Dr. White's written direct 8 9 testimony where he charts the results of the 10 model and the effect of the remedy scenario, and 11 that would be on page 50 of Dr. White's written 12 direct. Are you there, sir?

13 A. Yes, I am.

Q. And do you see the same chart that we have up on 14 15 the screen. And I'm focused on the Cat Point 16 one.

17 A. Yes.

17

4

18 Q. Now, this remedy scenario that is proposed here, 19 you understand that it anticipates that half of 20 Georgia's agricultural consumption of water would 21 be cut?

22 A. I didn't understand that. I was just given a 23 salinity time series and was told to run it. And 24 I knew it was less of an imposition, for lack of 25 a better word, on the State of Georgia than was

> THE REPORTING GROUP Mason & Lockhart

the "Georgia can't use any water" scenario.

Q. And so under this remedy scenario, the way the 2 3 Court should understand the chart is that if you cut, assuming that is what is intended here, 5 one-half of all of Georgia's agricultural 6 consumption, based on the model that you and 7 Dr. White put together, that remedy scenario 8 shows that you would have somewhere in between a 9 zero and a 1.1 percent difference as far as 10 greater oyster abundance. Right? That's correct.

11

And your conclusion is that despite the fact that if you put in place this significant restriction on Georgia water use, that based on all of your modeling and observation and experimentation, that the 1 to 1.2 percent difference that you would have in the change in population shows that Georgia water use caused the oyster collapse? A. Yes.

19

20 Is there any way I could look at a map and --

21 Q. I'm sure Mr. --

22 A. -- to answer the question?

23 Q. Mr. Qureshi will lead you through that.

That's correct; your opinion is that Georgia water consumption caused the oyster collapse? THE REPORTING GROUP

Mason & Lockhart

1571 A. The reason why I wanted to look at a map is to say -- well, one, the model was set up in a very, very conservative process. We are looking at Cat Point commercial bar, the most heavily-fished bar. So the model is estimating fishing rate in an area of the bay where it's being fished the most. It's not happening everywhere. At the same time we're at an oyster bar that's farther away from the river than are other bars.

So our results here are very, very conservative in showing the benefit of any additional flow from the river on the population abundance at this commercial bar far from the river.

So, unfortunately, we don't have data for bars closer to the river. And as you move in towards the river, you're going to see, given the same scenario, much more pronounced benefit to the oyster populations.

And during times of natural stress, oyster reefs far away from the river generally decline precipitously. What is needed in estuaries for those bars close to the river to be maintained is freshwater inflow driving out predators and disease. So when the conditions normalize, the

> THE REPORTING GROUP Mason & Lockhart

- 1 reproduction from these reefs by the river 2 reseeds the whole bay.
- 3 **Q.** What your model shows -- your and Dr. White's
- 4 model -- is that at Cat Point, which is one of
- 5 the largest, most commercially important reefs
- 6 in Apalachicola Bay, that if you cut Georgia's
- 7 water -- agricultural water consumption by 50
- 8 percent under the proposed remedy scenario, you
- 9 would have a 1.2 percent increase at that major
- 10 oyster bar -- 1.2 percent increase in oyster
- 11 biomass. Right?
- 12 A. Based on our very, very conservative use of the 13 model, yes.
- 14 Q. Thank you.
- 15 REDIRECT EXAMINATION
- 16 BY MR. QURESHI:
- 17 Q. Good afternoon, Dr. Kimbro.
- 18 A. Good afternoon.
- 19 **Q.** Do you recall some questions earlier today about
- 20 when you became involved in reviewing the
- 21 collapse of the oyster fishery in Apalachicola
- 22 Bay?
- 23 A. Yes, I do.
- 24 Q. Have you heard of the Apalachicola Bay oyster
- 25 situation report?

THE REPORTING GROUP

Mason & Lockhart

- 1 that need and my plan for implementing it to the 2 readers, primarily the citizens of Apalachicola.
- 3 Q. And, Dr. Kimbro, how did you become involved in
- the task force?
- 5 A. Shortly after the collapse, in the fall of 2012,
- 6 Dr. Havens contacted me and told me about the
- 7 task force, which I thought was a great idea.
- 8 And he said that he had selected many experts to
- 9 be on the task force; but the current composition
- 10 was insufficient because they all consisted of
- 11 scientists from the University of Florida at
- 12 Gainesville when there are other scientists, like
- 13 myself, who were much closer to the situation.
- 14 At the time I was at Florida State University and 15 was only 30 miles from Apalachicola Bay.

And, secondly, all of the scientists on the panel lacked extensive experience with oyster ecology. So he thought by inviting me to join the task force, that that problem would be solved. He invited me, and I humbly accepted.

MR. QURESHI: Your Honor, may I provide

- 22 Dr. Kimbro with a document?
- 23 SPECIAL MASTER LANCASTER: Please.
- 24 BY MR. QURESHI:
- 25 **Q.** Dr. Kimbro, do you recognize the document marked

THE REPORTING GROUP

Mason & Lockhart

1573

1 as GX-568?

16

17

18

19

20

21

2 Α. Yes.

14

25

- 3 Q. Okay. I would like to ask you to turn to page 4
- 4 and explain to us what findings the task force
- 5 made in April 2013?
- A. So there were several key findings made by the 6
- 7 collective task force. The first is that the
- 8 flow of the Apalachicola River was extremely low
- 9 just before and during the collapse of 2012. And
- 10 this was during a period of high, prolonged
- 11 drought. As a result of that, because the inflow
- 12 from rivers is the primary control of salinity of
- 13 water in an estuary, there is a spike in water
- salinity throughout Apalachicola Bay. Coincident 15 with that, there's an unprecedented decline in
- 16
- the oyster fishery of Apalachicola Bay that the
- 17 panel attributed to be most likely caused by
- 18 recruitment failure and massive mortality of
- 19 sub-legal-size oysters.
- 20 Using the fishery-independent data, the task 21 force concluded that there really wasn't much out 22 there left, legal-size oysters or sub-legal-size 23 oysters. And as a result, the fishery was going
- 24 to be in trouble for the next couple of years.

There were simply no more young oysters to grow THE REPORTING GROUP

Mason & Lockhart

- 1 A. Yes. 2 Q. What is it?

17

24

25

- 3 A. It's a document put together by a task force,
- 4 mostly based out of the University of Florida in
- 5 Gainesville. It was called the University of
- 6 Florida Oyster Recovery Task Force. And it was 7

led by Dr. Karl Havens, who is a professor at the

- 8 University of Florida and also head of Florida's
- 9 Sea Grant. And he convened a panel of experts to
- 10 gather all the available data at the time of the
- 11 2012 oyster decline to try and figure out what
- 12 was the cause of that unprecedented decline in 13 oysters.
- 14 Q. What involvement did you have with the task
- 15 force? 16 A. I conducted research that was a precursor for all
- 18 argued that if you're ever going to be able to
- 19 establish what caused what in a very complex
- 20 system like Apalachicola Bay, you're going to 21 need a rigorous research program involving
- 22 experiments, observations, and modeling. And you 23 need to have that maintained.
 - And my section that I wrote was towards the end of the report, and it essentially introduced

the research we have been talking about today. I

They then, due to some modeling efforts, concluded that the current regulation on the legal size limit to harvest oysters at 3 inches was sufficient to prevent the likelihood of overharvesting the resource. However, they cautioned that everyone needed to stick to obeying that regulation.

And, finally, they share with the public that they had investigated in oysters, two different shrimp species, and crabs whether or not dispersant used during the Deepwater Horizon oil spill was in any way in the food web in the bay and might play a factor in the collapse of oysters in 2012. And they, based on their evidence, concluded that it was not a factor.

Q. Dr. Kimbro, on page 7 under the Results section, the first substantive topic is environmental conditions. Why did the task force look at environmental conditions in its work?

21 A. This was research conducted by, if I remember, 22 Dr. Bill Pine and Dr. Karl Havens, both at the 23 University of Florida. And I think the overall 24 goal of this section was to show just how 25 different the environmental conditions in

> THE REPORTING GROUP Mason & Lockhart

6 have enjoyed the benefits of living close to 7 rivers because their predators and diseases can't 8 take that. So when you have flow events, it 9 beats back the disease and predators, which 10

oysters, I assume, appreciate. And what impacts does fresh water have on nutrients?

far away from the river and species better

adapted for freshwater conditions closer to the

your food web looks like throughout an estuary.

And, for example, oysters for a long time

river. So salinity essentially organizes what

Α. So fresh water from the river organizes estuarine systems in two ways. The first is the salinity, which we just talked about. The second is food webs, whether on land or at sea, the base of them are supported by plants or autotrophs. And these things grow their food on limited nutrients such as nitrogen and phosphorus. So without that, the plants can't grow. Without plants, you can't have herbivores. Without herbivores, you can't have carnivores. So in estuaries, the primary delivery of limited nutrients such as nitrogen and phosphorus come from rivers.

> So when you turn off the flow of the river, THE REPORTING GROUP

1577

Apalachicola Bay and the River were just prior to the collapse when compared to long-term trends from 1950 to 2000.

So the first figure on page 7, figure 1, is showing you how recent years of flow from the Apalachicola River compared to long-term averages and variances of flow from 1950 to 2006, I believe, for each of the 12 months of the year.

- 9 Q. Dr. Kimbro, excuse me for interrupting. Are you 10 on figure 1 or figure 2?
- 11 A. Figure 1, talking about flow.
- 12 Q. Okay.
- 13 A. But -- in short, the most recent years were 14 considerably below the long-term average of flow 15 from the river.
- 16 **Q.** And what impact does that have on the health of 17 the estuary?
- 18 A. Well, salinity is the primary organizational 19 environmental force of how species and food webs 20 assemble themselves throughout an estuary. If 21 you ever go fishing in an estuary, if you go 22 closer to the river, you're going to catch 23 different fishes and species than you are farther 24 away from the river. That's because you're going 25 to have species more adapted to marine conditions

THE REPORTING GROUP

Mason & Lockhart

any river, that's dumping into an estuary, you're significantly altering the food web of the estuary in two ways. One, by increasing the salinity, you're increasing natural enemies of things like oysters that then come and make them die. So that's, like, a top-down pressure.

And then, No. 2, because you're starving the system of limited nutrients that the plants -- in marine systems the plants are algae. And that's what the oysters filter out of the water for food. You're then starving the oysters. So you're collapsing the food web from the bottom as well.

So lacking river water fundamentally changes the food webs of the estuaries from the top down and from the bottom up.

- 17 **Q.** On page 10, sir, there's a discussion by the task 18 force on status and trends in the oyster fishery. 19 Can you explain why the task force was looking at
- 20 the fishery?
- 21 A. I'm sorry. Can you tell me which page that is on 22 again, please?
- 23 Q. I believe it's page 10, sir.
- And your question was what is this section about? 24
- 25 Q. It was more general. Why was the task force

A. One, they wanted to explain to the public the kinds of data they have available to evaluate what's going on with the fishery. So they presented two different kinds of data that -again, I'm not a fisheries biologist, but what I believe fisheries biologists use. And the first was fishery-dependent data. And that essentially is the amount of landings or oyster pounds brought to the dock. Typically on an annual basis, they use the total. And from that they can calculate how landings fluctuate over time.

The second type of data that they want to introduce the public to that they use to evaluate what's going on with the fishery are the fishery-independent data. So these are data collected by DACS, a division within the State of Florida, that went out and dove to the bottom on reefs. And instead of relying on harvesters to tell them, you know, how many oysters are out there, they went down and actually grabbed samples per unit area, brought them up to the boat, and counted the number of oysters. And they also sized the oysters so you could tell how many oysters were of market size to be harvested

THE REPORTING GROUP

Mason & Lockhart

population. There are going to be more younger individuals than older individuals, so that doesn't surprise me. But what you also see is over the past 22 years, there's been tremendous variability, peaks and valleys, of the abundance of sub-legal oysters that they were quantifying.

However, in 2011 there was a very high abundance of sub-legal oysters, indicating that harvest the following year should be very good. But what they found in 2012 was there was a precipitous drop-off in the abundance of these sub-legal oysters, most likely due to a massive mortality event.

- **Q.** Dr. Kimbro, there's been discussion about harvest of oysters that are smaller than 3 inches. As an oyster ecologist and biologist, what's the impact on the oyster resource of harvesting oysters smaller than 3 inches?
- A. Well, the 3-inch threshold for harvesting an oyster is a conservative threshold set by federal or state management scientists; but it doesn't reflect the true biology of the organism. If I went out and we all harvested oysters that were 2 inches, 2-3/4 inches, that wouldn't inhibit reproductive capability of the oyster population

THE REPORTING GROUP

Mason & Lockhart

1581

and how many oysters are just below that so, therefore, are going to quickly grow into market

3 size. And they could then use that to plan 4

future harvesting regulations for the next season.

5

6 **Q.** Sir, if we could look at figure 14 on the bottom 7 of page 13, the lower right-hand corner. Can you 8 explain what that means?

9 A. Figure 14, the bottom panel?

10 Q. Yes, sir.

> A. Okay. These are -- this is a plot of the fishery-independent data. And it shows you on the Y axis the number of oyster individuals per meter squared. So that's size of the quadrat they used to collect their animals.

And the red data at the bottom shows you for each year from 1990, going from left to right, to 2012 the abundance of adult legal-size oysters in these quadrats. And it was relatively stable. You don't see too many wild fluctuations in that.

If you then look at the blue data on the line just above it, one, you're going to notice that these are the sub-legal oysters. So they're smaller. And there are many more of them. And that's what you expect to find in any natural

THE REPORTING GROUP

Mason & Lockhart

1 because oysters -- they're actually

hermaphrodites. So at 1 inch in size, the males

3 begin producing many, many sperm that are

4 released. Once the oysters get a little older,

5 they switch to female; and they're larger. And

6 the average-size female oyster can release 8

million eggs.

So I find it hard to believe that if we harvest at 2 inch, 2-3/4 inches for our oyster population, that we're going to somehow inhibit the reproductive success of an oyster population.

12 Q. Dr. Kimbro, on page 23 of the task force report

13 there's a discussion of monitoring and

14 experimentation. Can you describe that section

for us?

16 A. Yes.

17 THE WITNESS: Could I use a map to --18 your Honor, to explain this?

19 This is a section I wrote; and it will 20 be wordy, but easier to do if I can point at

21 things.

22 Thank you.

23 BY MR. QURESHI:

24 Q. Sure. I'll put a map up for you and give you a

25 laser pointer.

THE REPORTING GROUP

A. So my section of the report was essentially communications to the public that in order to -- this is a very big, complicated system. And in order to ever establish what caused what, we would need a rigorous research approach to be maintained. And I outlined to the public what this research approach would look like. It should involve long-term observations, repeated experiments, and modeling that can integrate all those results.

So because of observations I wanted us to make and began making within 2013, was to monitor oyster populations not just on Cat Point or Dry Bar, but everywhere, because this is not a homogenous environment. Salinity can be quite higher here away from the river than here because we're closer to the river. Not only that, we have east-west currents. So salinities away from the river in the east can be different from salinities away from the river in the west.

So our goal was to monitor consistently how oyster reefs, their health, changed as we saw changes in the inflow of the river. So if you have more inflow of the river, do you see salinity drop? And then do you see oyster

THE REPORTING GROUP

Mason & Lockhart

put them out here on this reef. And one of three things can happen. No. 1, all the oysters could survive. Perhaps salinity is low everywhere, so great.

No. 2, we could have all the oysters eaten on the plate without the cage; but all the oysters on the plate with the cage would survive. So if that's the case, it would suggest that the environment, the stress, disease, is not strong enough to kill the oysters in the cage. So, therefore, what killed the oysters outside of the cage was predation.

So if you actually do a little sort of subtraction thing that we do as ecologists, if you subtract the survivorship in-the-cage plate versus the survivorship on the noncage plate, that's a very strong indicator of predation strength.

The third outcome is oysters die on the plate without the cage, but they also die on the plate inside the cage. That would suggest that stress, high salinity, and disease is what killed these oysters both inside and outside the cage.

So by repeating these experiments systematically throughout this estuary for four

THE REPORTING GROUP

Mason & Lockhart

populations improve? Do you see more improvement closer to the river than you do farther away from the river? What do the predators look like at all these different reefs? When you have more river inflow coming in, just after a very salty time period, do we have predators all up in here that quickly go away?

So these kinds of observations can allow us to make hypotheses about how the inflow of the river and its influence on salinity can change the health of oyster reefs.

But that's just an observation. I can't say -- if the inflow of the river comes in and we see a dramatic improvement in oyster health because the water salinity dropped, I can't tell you exactly why. For that I need the second prong of our approach, and that's experimentation.

So we talked about this earlier. And I explained that we have two simple treatments. It's been used in ecology for the past 50 years. For example, we have a plate of oysters with five of them. We have another plate; they're the same. And I randomly assigned this plate to receive a cage that excludes predators. So we

THE REPORTING GROUP

Mason & Lockhart

years, very intensive effort, diving down to the bottom, seeing things with your own eyes, I can show you and I repeatedly have shown you that as you get fluctuations in this river inflow, you get fluctuations in water salinity that gives you fluctuation in predator abundance. And that explains why we see different levels of predation throughout this whole bay. It is predictable. Done it over and over and over again.

It's actually not that new of a concept.

Investigators before me did this. Dr. Skip
Livingston was a long-time professor at the
Florida State University for 30 years. He did
similar experiments that showed very similar
results. In the 1960's, Dr. Menzel and
Dr. Hathaway did the same experiment that showed
that high salinity caused an outbreak of
predators that destroyed reefs out here in the
St. Vincent section of Apalachicola.

So once we get all these observations and these experiments which allow us to establish cause and effect about patterns in the present, we then integrate that into a model which proves to work very well in the present. If you have data, luckily, that is consistent from a long

THE REPORTING GROUP

1588

time ago, you can take that model, go back in time, and evaluate why things like the FDACS data went up and down from year to year and, therefore, exactly why the oysters collapsed in 2012.

And this three-pronged research approach of observations, experiments, and modeling, it is not new. This is not something I invented. It's actually a research approach that I teach to my undergraduate ecology students at Northeastern University. It's highlighted in a textbook.

It started with, in Canada, there was a 200-year record of snowshoe hare, for trapping for furs, and Canadian lynx, which like to eat the hare. And so ecologists figured, I would like to look in these trapping books. And they noticed really interesting patterns of when the predators increased, the lynx, the snowshoe hare decreased. And it's a cycle that repeats every 200 years. So ecologists debated for 40 or 50 years what was causing that. Some people thought it was the lynx, when they get abundant, drive the snowshoe hare predators down. But it could also be possible that food quality for the snowshoe hare changed through time; and because

THE REPORTING GROUP

Mason & Lockhart

1 based on the research approach you just

2 discussed, what conclusions had you made at this

3 point in time in April of 2013?

4 A. I'm sorry. I just sat down. Can you repeat your question, please?

6 Q. Certainly. Page 24 and 25 of the task force

7 report --

8 A. Sure.

19

20

21

22

23

24

25

9 Q. -- what conclusions had you reached at this point10 in time, April 2013?

11 A. They were very preliminary. My goal wasn't to
12 reach any conclusions. I just wanted to be very
13 transparent that the community was hurting. And
14 I think they wanted to see any kind of work that
15 was being done on their behalf to figure out what
16 had happened and how can we fix it. And so this
17 was just a good faith effort to tell everyone
18 what exactly I was doing and what I'm actually

what exactly I was doing and what I'm actually seeing.

And so on figure 35 on page 25, I'm

presenting the results of our first sampling efforts began in January 2013. And regions 1, 2, and 3, as you -- region 1 means we're looking at reefs closer to the river mouth. Region 3

means we're way out on reefs far from the river.

THE REPORTING GROUP

Mason & Lockhart

1589

snowshoe hares starved, the lynx starved and fell down.

Well, the only way they figured this out was by conducting long-term experiments in the present where these people erected electronic fences at an acred scale. And they manipulated the abundance of predators. They manipulated the abundance of food. So they knew exactly how food and predators controlled snowshoe hare abundances, cause and effect. And then they implemented that into a model, just like we did, proved that it worked now.

So given that they had this wonderful 200-year time series, they can take that model back in time and tell you exactly what caused these fluctuations in predator and prey. And it's highlighted in the ecological textbook that I use in my class.

So the point of my story is not only to tell you what I wanted to introduce in the section of the report to the public in Apalachicola, but to highlight that my research approach, which worked very well in this situation, is not something I invented.

25 Q. Dr. Kimbro, on page 24 of the task force report,

THE REPORTING GROUP

Mason & Lockhart

1 And what I showed to the public is some areas do

look like gravel parking lots. There's not that
 much structure. In fact, the black bars are the

4 reefs towards the west of Apalachicola Bay. And

they have lower structure per unit area. But

some reefs have lots of reef structure left. In
 fact, as you go from the river, away from the

8 river towards the east, towards Cat Point, we saw

9 variability -- you can see that wide arrow bar --

in restructured per sample; but the average was
pretty good. So then I also just shared with

pretty good. So then I also just shared withthem my abundance counts of adult-size oysters

and baby oysters that we quantify in thesesamples.

And, again, it was just very preliminary data to show, you know, work is being done. And if we can stick with this, we'll figure it out.

Q. Okay. Dr. Kimbro, we talked a little earlier

about the evaluation of status in trends inoyster fishery -- in the oyster fishery in

21 Apalachicola Bay. The group that -- of the task

force that was responsible for that issue, on

pages 14 and 15 what conclusions have they

reached at this point in time?

25 A. So this was led independently by Dr. Mike Allen

THE REPORTING GROUP

Mason & Lockhart

15

16

and Dr. Bill Pine at the University of Florida, as well as Dr. Carl Walters, who is a retired fisheries biologist from the University of British Columbia, as well as a student of Dr. Pine's, Ed Camp. In addition to evaluating the fishery-dependent and independent data, they constructed a model. It was actually Dr. Walter's model; he created it and drove it. And they had four key conclusions that are important to share with the Court.

The first is just as we have all seen looking at the fishery-dependent and independent data, there was an unprecedented decline of oysters in 2012. They said the possible reasons for that collapse was a recruitment failure and/or a massive mortality of sub-legal oysters.

Second, the actual output from their model suggested that mortality of oysters was increasing; but because they lacked the necessary data, i.e., the kind of data that my research program has developed, they could not explain exactly why mortality was increasing. They did lay out hypotheses about the influence of low river flow, higher salinity, and its influence on the diseases and predators of oysters.

THE REPORTING GROUP

Mason & Lockhart

Third, they highlighted that the fishery-independent dataset indicated by 2012, the oyster situation did not look good. As a result, it could not sustain substantial harvesting further. And they highlighted the fact that FWC had significantly restricted harvest as guided by this task force.

And fourth is an important one, so I'll quote it. Fourth, there is no evidence that harvest of sub-legal oysters has or would lead to overfishing. If current regulations are followed, it is unlikely that the current with sub-legal oysters and the catch has caused the trends we see in the data unless the sub-legal harvest has been unregulated and extremely high.

And I just want to add that this was done completely independent of me on the task force. I don't agree with their methods, but their results point in the very same direction that my research program does.

Q. Thank you, Dr. Kimbro.

Before we leave this document, can you describe the relationship between the task force and the Florida state agencies involved at DACS FWC?

THE REPORTING GROUP Mason & Lockhart

A. You couldn't ask for a better relationship. I was pretty young. I had never worked with state scientists. So I suspected that they wouldn't appreciate academics coming in and asking to see their books requesting data. But that was the completely opposite of what I saw.

For example, Dr. Pine requested persistently updated landings data, fishery-independent data. By following e-mail chains, I was able to discern that FWC employees were working overtime to get him these data.

From my own experience, I wanted a different version of the fishery-independent data that the task force did not have. So I simply got in my car, drove from the FSU marine lab 20 minutes to the FDACS office, knocked on the door unannounced; and they invited me right in. I told them what I needed. And it was as simple as me sticking my disk drive into their computer. And five minutes later I was walking out of their office with a 30-year time series.

So the point I'm trying to make is they were very open. It was a harmonious relationship between state scientists and academics. And you couldn't hope for anything better when you're

THE REPORTING GROUP

Mason & Lockhart

working on a complex issue like this.

Q. Thank you, Dr. Kimbro.

I want to move on to a slightly different topic now. You had mentioned some of the prior studies evaluating the relationship between salinity and the oyster resource. You mentioned, I believe, Dr. Petes. Who is Dr. Petes?

A. Dr. Petes received her Ph.D. from Morgan State
University under a very famous ecologist,
Dr. Jane Lubchenco. She then did a post-doc with
me at Florida State University. When I became a
faculty there, she moved to work for NOAA, the
National Oceanic Atmospheric Administration, in
their climate program office.

Given her -- she actually studied in 2007 and '8 one of the serious droughts in Apalachicola. She studied the relationship between increasing water salinity due to lack of water flow in the river and the incidence and intensity of a disease called dermo and its effect on oyster mortality.

So given that proven track record, the Undersecretary of Commerce, Dr. Jane Lubchenco, who was hand-picked by the president of the United States, she asked Dr. Petes to investigate

THE REPORTING GROUP

Mason & Lockhart

1598 1 the issue when they were notified by the State of 1 Suwannee River. I would like to understand from 2 2 Florida about the problem in 2012. you whether the 2012 collapse in Apalachicola Bay 3 MR. QURESHI: Your Honor, may I approach 3 was an issue that was broader in scope? Were Dr. Kimbro? there other areas of Florida that were impacted? 5 BY MR. QURESHI: 5 A. That's a great question. And it was specifically 6 Q. Dr. Kimbro, I have handed you a document that's 6 incorporated by my research approach, which I not 7 identified as Florida Exhibit 412. It's actually 7 only focused on Apalachicola, but to be able to 8 8 three documents stapled together. I'll give you answer questions like that I ran the same kind of 9 a moment to flip through it. 9 observations and experiments in other estuaries. 10 A. I'm familiar with the document. 10 So the principle is if you see the same 11 Q. Okay. Can you please describe it? 11 outcomes from your studies in other estuaries 12 A. It appears to be an e-mail correspondence between 12 that you're seeing in Apalachicola, then that 13 Dr. Petes and perhaps her supervisor. Dr. Petes 13 would indicate there's a regional-scale stressor 14 being notified that she's been appointed by 14 causing everything. If, however, you see 15 Dr. Lubchenco, the Undersecretary for the 15 intensification of things in Apalachicola Bay 16 **Department of Commerce Oceanic Atmosphere. And** 16 that you don't see elsewhere, then that would 17 it appears that she's accepted that task. 17 suggest that there's something additional that's 18 And then there's another e-mail in which she 18 unique to Apalachicola that is going on beyond 19 is reporting her conclusions on the situation 19 natural environmental stress to cause what we saw 20 20 surrounding the 2012 oyster decline in in 2012. 21 21 Apalachicola Bay and is then asking if she can be And so one sort of nonscientific hard data 22 22 observation was in the e-mail about the gravel of any further assistance. 23 Q. The document where she lays out her conclusions, 23 parking lot. I think if we read that further, we 24 24 would see that Dr. Pine and I were communicating is that signified by the Bates numbers on the 25 lower right-hand corner, NOAA-0003818 through 25 about what we were seeing. He was operating --THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 1597 1599 1 3841? 1 Q. If I could just pause you, Dr. Kimbro, so we can 2 2 A. Yes, it is. catch up. 3 **Q.** How are the conclusions in this memo consistent 3 Α. Sure. with your work? 4 Q. I'm going to put that e-mail up. I believe it's 5 5 A. In short, very consistent. GX-486, and it should be tab 5 of the binder that 6 Q. Can you explain how? 6 was provided to you by Georgia's counsel. 7 7 A. My understanding is she lays out the fact that If you could just direct us to the section 8 there was significant drought naturally stressing 8 you were referring to, and then we'll follow 9 9 the oyster populations, much as my research along. 10 10 approach analogies. And she, of course, I believe you sent an e-mail to Dr. Pine at 11 11 attributes that to low flow from the Apalachicola 9:47 p.m. on Thursday, October 25, 2012? 12 12 River. During these kinds of conditions, natural A. So in this e-mail chain we're comparing notes 13 13 enemies of oysters proliferate such as disease essentially of what I'm seeing in Apalachicola 14 and multiple species of predators. So these were 14 Bay and what Dr. Pine was seeing in Cedar Key, an 15 15 restricting the population of the oyster. estuary a five-hour drive south of Apalachicola 16 16 Bay. We recognized that there were stressors on She also talks about harvesting pressure was 17 ongoing at the same time. However, she concludes 17 the oyster populations in both areas; but I asked 18 due to stressful conditions associated with the 18 him, after making the gravel parking lot comment, 19 severity and duration of the recent drought, it 19 you know, that I was seeing in other areas of 20 is likely that high Florida Gulf Coast oyster 20 Apalachicola Bay symptoms of an outbreak of 21 mortality would be occurring even in the absence 21 predatory snails eating all the oysters caused by 22 22 of harvesting pressure, so said a scientist for very high salinity, if he saw anything similar in 23 23 the -- NOAA. Cedar Key. So if he did, that would suggest that 24 24 **Q.** On page 4 of this memo, sir, there is a there is a very regional stress causing the same 25 25 thing in all estuaries of the Gulf Coast. And he discussion about drought and flooding in the THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

TRIAL - November 8, 2016 (Vol. VI) 1 said he did not. 1 2 2 So that was my first sort of idea that we may 3 be looking at something unique in Apalachicola 3 4 5 Q. And what have you identified that unique factor 5 6 6 7 A. A pronounced increase in -- essentially the 7 8 8 natural -- a classic estuary is going to have a 9 natural salinity in it where as you're closer to 9 10 the river, it's going to be lower salinity. As 10 11 you get a little farther, it's going to be a 11 12 little higher in salinity. And as you get to the 12 13 ocean, it's going to be really salty. 13 14 All right. What we're seeing from our 14 15 experiments -- we conducted them both in 15 16 Apalachicola Bay and in an estuary 30 kilometers 16 17 to the east called Ochlockonee Bay. It's a much 17 18 18 smaller estuary, but it's not tied to the 19 watershed of the Apalachicola River. So if 19 20 20 there's a regional force causing all the badness 21 21 in Apalachicola Bay, you should see the same 22 22 water salinity and predation results in both 23 23 bays. 24 When we repeated our experiments, we found 24 Α. 25 25 that, yes, predation on oysters occurs in both THE REPORTING GROUP Mason & Lockhart 1601 1 bays, especially when you're far away from the 1 2 river. But unlike -- Ochlockonee Bay was acting 2 3 more like a genuine estuary. Close to the river 3 4 on reefs and moderate distances from the reefs, 4 5 5 the flow from the river was keeping predators 6 6

officer that investigated the oyster fishery situation in 2012 at -- on behalf of Dr. Jane Lubchenco. And it's a publication that observed oysters in Apalachicola Bay along that classic salinity gradient from reefs near the river to reefs far away from the river. And they went out every month and monitored the incidence and intensity of oyster disease, and they found clear relationships between the amount of inflow from the river and how it influenced salinity and that relationship to dermo disease in oysters. She then did experiments to show that dermo can cause very high mortality.

So it was a clear observational experimental study that established a causal pathway between what's going on with the river, salinity, and oyster disease.

- **Q.** Dr. Kimbro, you mentioned that -- you spoke about the work that Dr. Petes did and Dr. Skip Livingston. What other scholars have examined the relationship between salinity and the health of the oyster resource, particularly at Apalachicola Bay?
- Well, for Apalachicola Bay there would be Dr. Wilber, who did a correlational study about THE REPORTING GROUP

Mason & Lockhart

1603

away. So oyster survivorship was high. There was no predation.

There is not that at all in Apalachicola Bay. Predation has infiltrated abnormally all the way up to the reefs closest to the river. So that suggested that something had intensified a natural process in Apalachicola Bay that's not operating in any other bays we looked in in the **Gulf Coast.**

- 14 15 Q. Dr. Kimbro, if we could return for a moment to 16 Florida Exhibit 412, this is a document I handed 17 you; and it consisted of three documents, actually. I just want to talk about the last one in that collection. It begins on the Bates number 3842. I ask you to describe that after 21 you have had a moment to look at it.
- 22 A. I'm familiar with this document.
- 23 Q. Okay. What is it?

7

the relationship between the inflow of the river and the landings. If you looked at the relationship in present time, you would see when you have high flow from the river, landings decrease. But as to your time lag, you see -after major inflow of the river, you see oyster landings rebound.

And so her conclusion was that's caused by the high flows beat back the predators and disease from the oyster reefs, and that allows oyster reefs to recover and reproduce. And two years later after the oysters settle, grow, and become market size, that's the end product of moderate to high flow from the Apalachicola River.

16 Q. Okay. Let's talk about other estuaries. What 17 research has been done about the relationship 18 between salinity and the health of the oyster 19 resource in other places?

Α. Lots. So, for myself, I have conducted research in estuaries on the Atlantic coast that shows as you increase salinity very high, you can create outbreaks of snails that cause large losses on oyster reefs. I have done similar research on ovsters in California.

You also have many researchers in Delaware Bay showing very strong relationships between water salinity, as it increases, predictably you see an increasing effect of dermo disease on oysters. And that can have a devastating impact on oyster populations.

You also see NOAA document studies as well as studies out of Texas that show salinity is the primary determinant of where oysters can occur. So at a certain point if the water is too salty, you no longer have oyster reefs. And these are in publication cited, in fact, by the expert witness from the State of Georgia.

You also have geological evidence published in a geological journal in 2015 that shows oysters came into a Texas estuary about 10,000 years ago. And there have been massive droughts from now until then. And those droughts are associated with massive, massive losses of oyster reef habitat in that bay.

So these are my observations, my experiments in Apalachicola Bay, others' independent research efforts in Apalachicola Bay, other independent research efforts in other estuaries.

And now, let's go to the landings data. Can

Mason & Lockhart

published a scientific study that showed the very clear relationship in oysters outdoors. With high salinity conditions, you have high dermo disease that caused massive losses of oysters and significant decline in the oyster fishery.

The same conclusion and thing happened in a severe drought in 2001 and 2002 in Chesapeake Bay where researchers again found the exact same pattern. And this was provided by data from the Maryland Department of Marine Science, I believe.

So if we go from my work conducted in Apalachicola, other work conducted in Apalachicola, scientific studies from the geological record to ecological studies in other estuaries, and then looking at the landings data and drought data in other estuaries, I can definitively say that when you have very high salinity conditions due to lack of flow of river, you're going to have bad things happen to oysters, just like we saw in 2012 in Apalachicola

22 Q. Thank you, Dr. Kimbro.

23 On the binder that was provided to you by 24 Georgia's counsel, they reviewed with you the 25 article by Kirby behind tab 6.

> THE REPORTING GROUP Mason & Lockhart

1605

A. Okay.

Sir, are you familiar with this article?

A. I am. I haven't read it in awhile.

Q. Okay. Just very generally, what does this 5 article provide about the cause and effect 6 relationships for a fishery collapsing?

A. It doesn't. It provides strong observational data on what could have caused the collapse. It's convincing, but I would be reticent to apply that thinking in particular to Apalachicola because all the estuaries that this study focused on allowed harvesters to use very efficient methods such as dredging. In contrast, the State

15 dredging on public oyster bars. You have to use 16 very large tongs. They're 12 feet tall, very 17 heavy wooden salad spoons basically.

of Florida and Apalachicola does not allow

And I tried to tong oysters from a very unsteady boat. If you ever see an oysterman tonging oysters, they're on these very, very small boats. They're rocking back and forth. So when you're standing on the bow and you're moving all around by the waves and you have these very large, 12-foot tall, two rakes put together like a salad spoon, it's very difficult to grab

THE REPORTING GROUP

Mason & Lockhart

salinity cause massive declines in oyster landings?

THE REPORTING GROUP

So if you look at datasets requested from the National Marine Fisheries Service, you can get landings data for all the Gulf states going back to the 1950's. So you can see in the early '50's, there was a massive drought; and that resulted in a massive collapse of oyster landings, greater than what we saw in Apalachicola. You can see similar associations between severe droughts and significant drops, more than 50 percent, in oyster landings in other states of Mississippi and Alabama in the '60's.

Going back to Texas, the Texas legislature passed legislation in 1985 so that fresh water from the rivers would not be impeded so that all that water could flow as it naturally does to the estuaries to prevent problems that happened with coastal species when you deprive estuaries of fresh water. Since then, they haven't had these dramatic problems.

Now, in fact, going to the Chesapeake Bay, you can see in 1987-1988, there's a very significant drought. And researchers, in fact, from the Virginia Institute of Marine Science has

15

16

sections of the reef and bring it back up to the boat.

So that's a much more inefficient harvesting practice than what you saw in the areas that Dr. Kirby talked about where all the collapses occurred.

Not only is the actual process less efficient, the tonging, only a few people can do that. Not anyone off the street can just walk in there and get on a boat and go tong efficiently a bunch of oysters. If you look at these gentlemen out on their boats harvesting out in Apalachicola Bay, they're strong; and they're very skilled and not -- the fishery has a relatively small number of individuals. So it's not a job just anyone else can do.

And finally, the tongs are set up so that when you grab a section of the reef, smaller oysters and material can fall through the teeth of the tong. Again, trying to make it so that they're only extracting the adult oysters. So it's a very inefficient process.

Given that, I would be reticent to apply the conclusions made on estuaries in the mid and north Atlantic to what's going on in Apalachicola

THE REPORTING GROUP

Mason & Lockhart

the collapse in 2012. The other -- that's animportant conclusion.

The other important component of this paper is that one of the main things we're talking about here today is how extraction of fresh water from the Apalachicola River may have impacted what happened in 2012. And they admit in the beginning of this article they did not even address that. So I find it hard to accept any conclusions from the study about what happened in 2012 if they did not even evaluate the most proximal potential cause for it happening in 2012.

Q. Okay. Thank you, Dr. Kimbro.

MR. QURESHI: I have nothing further.

SPECIAL MASTER LANCASTER: Counsel, are you

able to give me an estimate of how much longer?

18 MR. ECHOLS: Would 7 to 10 minutes be

19 okay, Judge, or no?

20 SPECIAL MASTER LANCASTER: Seven to 10,

21 okay. The clock is ticking.

22 RECROSS-EXAMINATION

23 BY MR. ECHOLS:

24 Q. Dr. Kimbro, you still have the Apalachicola Bay

25 oyster situation report in front of you --

talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22,	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2,	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24,	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5,
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14,	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8,	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24,
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7,	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19,	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] -	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2,
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:4, 1575:7,	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:4, 1575:7, 1575:20, 1576:19,	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2, 1488:16, 1493:11,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19, 1593:1	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22 Tommy [2] - 1484:12,	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22 tracking [1] - 1386:24
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:4, 1575:7, 1575:20, 1576:19, 1579:17, 1579:19,	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2, 1488:16, 1493:11, 1493:19, 1494:25,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19, 1593:1 thirds [3] - 1370:10,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22 Tommy [2] - 1484:12, 1489:9	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22 tracking [1] - 1386:24 tracks [1] - 1390:20
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:4, 1575:7, 1575:20, 1576:19, 1579:17, 1579:19, 1579:25, 1583:12,	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2, 1488:16, 1493:11, 1493:19, 1494:25, 1497:5, 1497:7,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19, 1593:1 thirds [3] - 1370:10, 1420:16, 1566:20	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22 Tommy [2] - 1484:12, 1489:9 tomorrow [1] - 1617:8	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22 tracking [1] - 1386:24 tracks [1] - 1390:20 traditional [1] -
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:4, 1575:7, 1575:20, 1576:19, 1579:17, 1579:19,	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2, 1488:16, 1493:11, 1493:19, 1494:25, 1497:5, 1497:7, 1497:11, 1497:15,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19, 1593:1 thirds [3] - 1370:10, 1420:16, 1566:20 three [25] - 1378:25,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22 Tommy [2] - 1484:12, 1489:9 tomorrow [1] - 1617:8 tong [3] - 1607:18,	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22 tracking [1] - 1386:24 tracks [1] - 1390:20 traditional [1] - 1453:23
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:4, 1575:7, 1575:20, 1576:19, 1579:17, 1579:19, 1579:25, 1583:12, 1589:25, 1590:6,	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2, 1488:16, 1493:11, 1493:19, 1494:25, 1497:5, 1497:7,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19, 1593:1 thirds [3] - 1370:10, 1420:16, 1566:20	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22 Tommy [2] - 1484:12, 1489:9 tomorrow [1] - 1617:8 tong [3] - 1607:18, 1608:10, 1608:20	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22 tracking [1] - 1386:24 tracks [1] - 1390:20 traditional [1] - 1453:23 traditionally [1] -
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:4, 1575:7, 1575:20, 1576:19, 1579:17, 1579:19, 1579:25, 1583:12, 1589:25, 1590:6, 1591:21, 1593:7,	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2, 1488:16, 1493:11, 1493:19, 1494:25, 1497:5, 1497:7, 1497:11, 1497:15, 1497:23, 1498:10,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19, 1593:1 thirds [3] - 1370:10, 1420:16, 1566:20 three [25] - 1378:25, 1383:10, 1389:19,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22 Tommy [2] - 1484:12, 1489:9 tomorrow [1] - 1617:8 tong [3] - 1607:18, 1608:10, 1608:20 tonged [1] - 1517:14	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22 tracking [1] - 1386:24 tracks [1] - 1390:20 traditional [1] - 1453:23 traditionally [1] - 1476:8
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:4, 1575:7, 1575:20, 1576:19, 1579:17, 1579:19, 1579:25, 1583:12, 1589:25, 1590:6, 1591:21, 1593:7, 1593:17, 1593:23,	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2, 1488:16, 1493:11, 1493:19, 1494:25, 1497:5, 1497:7, 1497:11, 1497:15, 1497:23, 1498:10, 1498:12, 1498:15,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19, 1593:1 thirds [3] - 1370:10, 1420:16, 1566:20 three [25] - 1378:25, 1383:10, 1389:19, 1389:20, 1393:23,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22 Tommy [2] - 1484:12, 1489:9 tomorrow [1] - 1617:8 tong [3] - 1607:18, 1608:10, 1608:20 tonged [1] - 1517:14 tonging [6] - 1453:14,	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22 tracking [1] - 1386:24 tracks [1] - 1390:20 traditional [1] - 1453:23 traditionally [1] - 1476:8 training [1] - 1412:7
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:4, 1575:7, 1575:20, 1576:19, 1579:17, 1579:19, 1579:25, 1583:12, 1589:25, 1590:6, 1591:21, 1593:7, 1593:17, 1593:23, 1594:14, 1596:17	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2, 1488:16, 1493:11, 1493:19, 1494:25, 1497:5, 1497:7, 1497:11, 1497:15, 1497:23, 1498:10, 1498:12, 1498:15, 1498:16, 1498:19,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19, 1593:1 thirds [3] - 1370:10, 1420:16, 1566:20 three [25] - 1378:25, 1383:10, 1389:19, 1389:20, 1393:23, 1413:14, 1413:16,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22 Tommy [2] - 1484:12, 1489:9 tomorrow [1] - 1617:8 tong [3] - 1607:18, 1608:10, 1608:20 tonged [1] - 1517:14 tonging [6] - 1453:14, 1454:1, 1454:20,	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22 tracking [1] - 1386:24 tracks [1] - 1390:20 traditional [1] - 1453:23 traditionally [1] - 1476:8 training [1] - 1412:7 tranches [1] - 1524:9
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:20, 1576:19, 1579:17, 1579:19, 1579:25, 1583:12, 1589:25, 1590:6, 1591:21, 1593:7, 1594:14, 1596:17 teach [2] - 1515:7, 1588:9 team [1] - 1539:6	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2, 1488:16, 1493:11, 1493:19, 1494:25, 1497:5, 1497:7, 1497:11, 1497:15, 1497:23, 1498:10, 1498:12, 1498:15, 1499:2, 1499:4, 1499:18, 1499:20, 1500:5, 1503:1,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19, 1593:1 thirds [3] - 1370:10, 1420:16, 1566:20 three [25] - 1378:25, 1383:10, 1389:19, 1389:20, 1393:23, 1413:14, 1413:16, 1415:14, 1474:5,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22 Tommy [2] - 1484:12, 1489:9 tomorrow [1] - 1617:8 tong [3] - 1607:18, 1608:10, 1608:20 tonged [1] - 1517:14 tonging [6] - 1453:14,	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22 tracking [1] - 1386:24 tracks [1] - 1390:20 traditional [1] - 1453:23 traditionally [1] - 1476:8 training [1] - 1412:7
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:4, 1575:7, 1575:20, 1576:19, 1579:17, 1579:19, 1579:25, 1583:12, 1589:25, 1590:6, 1591:21, 1593:7, 1593:17, 1593:23, 1594:14, 1596:17 teach [2] - 1515:7, 1588:9 team [1] - 1539:6	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2, 1488:16, 1493:11, 1493:19, 1494:25, 1497:5, 1497:7, 1497:11, 1497:15, 1497:23, 1498:10, 1498:12, 1498:15, 1498:16, 1498:19, 1499:2, 1499:4, 1499:18, 1499:20, 1500:5, 1503:1, 1503:20, 1504:20,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19, 1593:1 thirds [3] - 1370:10, 1420:16, 1566:20 three [25] - 1378:25, 1383:10, 1389:19, 1389:20, 1393:23, 1413:14, 1413:16, 1415:14, 1474:5, 1482:1, 1482:2,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22 Tommy [2] - 1484:12, 1489:9 tomorrow [1] - 1617:8 tong [3] - 1607:18, 1608:20 tonged [1] - 1517:14 tonging [6] - 1453:14, 1454:1, 1454:0, 1514:8, 1607:20,	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22 tracking [1] - 1386:24 tracks [1] - 1390:20 traditional [1] - 1453:23 traditionally [1] - 1476:8 training [1] - 1412:7 tranches [1] - 1524:9 transcript [3] -
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:20, 1576:19, 1579:17, 1579:19, 1579:25, 1583:12, 1589:25, 1590:6, 1591:21, 1593:7, 1594:14, 1596:17 teach [2] - 1515:7, 1588:9 team [1] - 1539:6	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2, 1488:16, 1493:11, 1493:19, 1494:25, 1497:5, 1497:7, 1497:11, 1497:15, 1497:23, 1498:10, 1498:12, 1498:15, 1499:2, 1499:4, 1499:18, 1499:20, 1500:5, 1503:1,	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19, 1593:1 thirds [3] - 1370:10, 1420:16, 1566:20 three [25] - 1378:25, 1383:10, 1389:19, 1389:20, 1393:23, 1413:14, 1413:16, 1415:14, 1474:5, 1482:1, 1482:2, 1497:2, 1504:20, 1506:22, 1521:4,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22 Tommy [2] - 1484:12, 1489:9 tomorrow [1] - 1617:8 tong [3] - 1607:18, 1608:10, 1608:20 tonged [1] - 1517:14 tonging [6] - 1453:14, 1454:1, 1454:20, 1514:8, 1607:20, 1608:8	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22 tracking [1] - 1386:24 tracks [1] - 1390:20 traditional [1] - 1453:23 traditionally [1] - 1476:8 training [1] - 1412:7 tranches [1] - 1524:9 transcript [3] - 1438:15, 1515:25,
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:4, 1575:7, 1575:20, 1576:19, 1579:17, 1579:19, 1579:25, 1583:12, 1589:25, 1590:6, 1591:21, 1593:7, 1593:17, 1593:23, 1594:14, 1596:17 teach [2] - 1515:7, 1588:9 team [1] - 1539:6	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2, 1488:16, 1493:11, 1493:19, 1494:25, 1497:5, 1497:7, 1497:11, 1497:15, 1497:23, 1498:10, 1498:12, 1498:15, 1498:16, 1498:19, 1499:2, 1499:4, 1499:18, 1499:20, 1500:5, 1503:1, 1503:20, 1504:20, 1515:24, 1516:4	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19, 1593:1 thirds [3] - 1370:10, 1420:16, 1566:20 three [25] - 1378:25, 1383:10, 1389:19, 1389:20, 1393:23, 1413:14, 1413:16, 1415:14, 1474:5, 1482:1, 1482:2, 1497:2, 1504:20, 1506:22, 1521:4, E REPORTING GI	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22 Tommy [2] - 1484:12, 1489:9 tomorrow [1] - 1617:8 tong [3] - 1607:18, 1608:10, 1608:20 tonged [1] - 1517:14 tonging [6] - 1453:14, 1454:1, 1454:20, 1514:8, 1607:20, 1608:8 tongs [5] - 1453:12, ROUP:13, 1607:16,	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22 tracking [1] - 1386:24 tracks [1] - 1390:20 traditional [1] - 1453:23 traditionally [1] - 1476:8 training [1] - 1412:7 tranches [1] - 1524:9 transcript [3] - 1438:15, 1515:25, 1619:5
talks [4] - 1456:25, 1457:15, 1457:18, 1597:16 tall [2] - 1607:16, 1607:24 target [1] - 1422:8 Task [3] - 1507:24, 1510:20, 1573:6 task [23] - 1508:2, 1573:3, 1573:14, 1574:4, 1574:7, 1574:9, 1574:19, 1575:4, 1575:7, 1575:20, 1576:19, 1579:17, 1579:19, 1579:25, 1583:12, 1589:25, 1590:6, 1591:21, 1593:7, 1593:17, 1593:23, 1594:14, 1596:17 teach [2] - 1515:7, 1588:9 team [1] - 1539:6	1538:24 testimony [78] - 1376:21, 1377:9, 1383:25, 1402:9, 1402:12, 1402:22, 1402:23, 1403:3, 1403:16, 1411:15, 1411:19, 1424:18, 1443:16, 1445:3, 1453:4, 1455:7, 1470:10, 1475:14, 1475:24, 1476:18, 1479:6, 1479:9, 1481:25, 1485:2, 1488:16, 1493:11, 1493:19, 1494:25, 1497:5, 1497:7, 1497:11, 1497:15, 1497:23, 1498:10, 1498:12, 1498:15, 1498:16, 1498:19, 1499:2, 1499:4, 1499:18, 1499:20, 1500:5, 1503:1, 1503:20, 1504:20, 1515:24, 1516:4	theoretically [1] - 1389:15 theory [3] - 1402:18, 1403:5, 1532:21 thereafter [1] - 1487:16 therefore [3] - 1581:2, 1586:11, 1588:4 thinking [2] - 1607:10, 1613:3 third [8] - 1435:3, 1456:1, 1460:1, 1545:13, 1566:21, 1566:22, 1586:19, 1593:1 thirds [3] - 1370:10, 1420:16, 1566:20 three [25] - 1378:25, 1383:10, 1389:19, 1389:20, 1393:23, 1413:14, 1413:16, 1415:14, 1474:5, 1482:1, 1482:2, 1497:2, 1504:20, 1506:22, 1521:4,	1447:24, 1482:17, 1502:1, 1572:19, 1573:17, 1610:5, 1611:12 together [13] - 1367:24, 1378:9, 1379:13, 1395:22, 1398:5, 1413:24, 1423:7, 1434:12, 1566:15, 1570:7, 1573:3, 1596:8, 1607:24 tolerances [1] - 1415:22 Tommy [2] - 1484:12, 1489:9 tomorrow [1] - 1617:8 tong [3] - 1607:18, 1608:10, 1608:20 tonged [1] - 1517:14 tonging [6] - 1453:14, 1454:1, 1454:20, 1514:8, 1607:20, 1608:8 tongs [5] - 1453:12, ROUP:13, 1607:16,	1378:11, 1378:17, 1380:7, 1383:15, 1461:21, 1580:11 totally [1] - 1542:4 touch [3] - 1398:2, 1418:5, 1567:21 touched [2] - 1367:11, 1536:25 toward [1] - 1612:10 towards [6] - 1458:5, 1571:17, 1573:24, 1591:4, 1591:8 track [2] - 1489:2, 1595:22 tracking [1] - 1386:24 tracks [1] - 1390:20 traditional [1] - 1453:23 traditionally [1] - 1476:8 training [1] - 1412:7 tranches [1] - 1524:9 transcript [3] - 1438:15, 1515:25, 1619:5

1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20,	utilizing [1] - 1501:15
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] -	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21,	utilizing [1] - 1501:15
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25,	utilizing [1] - 1501:15 V vague [1] - 1373:15
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] -	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20,	vague [1] - 1501:15 vague [1] - 1373:15 valid [2] - 1612:24,
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25,	vague [1] - 1501:15 vague [1] - 1373:15 valid [2] - 1612:24, 1614:16
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] -	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3,	vague [1] - 1501:15 vague [1] - 1373:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25,	vague [1] - 1501:15 vague [1] - 1373:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8,
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] -	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25,	vague [1] - 1501:15 vague [1] - 1373:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12,
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] -	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12,	vague [1] - 1501:15 vague [1] - 1373:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23,	vague [1] - 1501:15 vague [1] - 1373:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] -
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] -	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1493:25,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20 tubs [1] - 1533:5	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12 type [4] - 1369:5,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1 undetermined [1] -	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1493:25, 1494:13, 1499:7,	vague [1] - 1501:15 V vague [1] - 1373:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10 variance [2] - 1525:15,
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20 tubs [1] - 1533:5 turn [41] - 1369:15,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12 type [4] - 1369:5, 1452:24, 1517:12,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1 undetermined [1] - 1436:13	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1493:25, 1494:13, 1499:7, 1501:25, 1503:7,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10 variance [2] - 1525:15, 1526:7
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20 tubs [1] - 1533:5 turn [41] - 1369:15, 1370:3, 1371:10,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12 type [4] - 1369:5, 1452:24, 1517:12, 1580:13	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1 undetermined [1] - 1436:13 unfortunately [3] -	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1493:25, 1494:13, 1499:7, 1501:25, 1503:7, 1507:5, 1507:8,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10 variance [2] - 1525:15, 1526:7 variances [4] -
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20 tubs [1] - 1533:5 turn [41] - 1369:15, 1370:3, 1371:10, 1376:6, 1378:24,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12 type [4] - 1369:5, 1452:24, 1517:12, 1580:13 types [4] - 1367:25,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1 undetermined [1] - 1436:13 unfortunately [3] - 1464:14, 1549:10, 1571:15 unique [4] - 1453:12,	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1499:7, 1501:25, 1503:7, 1507:5, 1507:8, 1507:10, 1512:10,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10 variance [2] - 1525:15, 1526:7 variances [4] - 1515:10, 1565:14,
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20 tubs [1] - 1533:5 turn [41] - 1369:15, 1370:3, 1371:10, 1376:6, 1378:24, 1378:25, 1396:1,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12 type [4] - 1369:5, 1452:24, 1517:12, 1580:13 types [4] - 1367:25, 1442:25, 1533:25,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1 undetermined [1] - 1436:13 unfortunately [3] - 1464:14, 1549:10, 1571:15 unique [4] - 1453:12, 1598:18, 1600:3,	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1493:25, 1494:13, 1499:7, 1501:25, 1503:7, 1507:5, 1507:8, 1507:10, 1512:10, 1514:18, 1515:1,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10 variance [2] - 1525:15, 1526:7 variances [4] - 1515:10, 1565:14, 1565:19, 1577:7
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20 tubs [1] - 1533:5 turn [41] - 1369:15, 1370:3, 1371:10, 1376:6, 1378:24, 1378:25, 1396:1, 1396:24, 1397:18,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12 type [4] - 1369:5, 1452:24, 1517:12, 1580:13 types [4] - 1367:25, 1442:25, 1533:25, 1560:25	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1 undetermined [1] - 1436:13 unfortunately [3] - 1464:14, 1549:10, 1571:15 unique [4] - 1453:12, 1598:18, 1600:3, 1600:5	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1493:25, 1494:13, 1499:7, 1501:25, 1503:7, 1507:5, 1507:8, 1507:10, 1512:10, 1514:18, 1515:1, 1517:14, 1519:1,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10 variance [2] - 1525:15, 1526:7 variances [4] - 1515:10, 1565:14, 1565:19, 1577:7 variation [5] - 1394:7,
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20 tubs [1] - 1533:5 turn [41] - 1369:15, 1370:3, 1371:10, 1376:6, 1378:24, 1378:25, 1396:1, 1396:24, 1397:18, 1403:17, 1410:6, 1410:19, 1439:23, 1444:1, 1445:19,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12 type [4] - 1369:5, 1452:24, 1517:12, 1580:13 types [4] - 1367:25, 1442:25, 1533:25, 1560:25 typical [1] - 1482:7	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1 undetermined [1] - 1436:13 unfortunately [3] - 1464:14, 1549:10, 1571:15 unique [4] - 1453:12, 1598:18, 1600:3, 1600:5 unit [4] - 1544:4,	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1499:7, 1501:25, 1503:7, 1507:5, 1507:8, 1507:10, 1512:10, 1514:18, 1515:1, 1517:14, 1519:1, 1522:2, 1524:24,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10 variance [2] - 1525:15, 1526:7 variances [4] - 1515:10, 1565:14, 1565:19, 1577:7 variation [5] - 1394:7, 1525:11, 1530:15,
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20 tubs [1] - 1533:5 turn [41] - 1369:15, 1370:3, 1371:10, 1376:6, 1378:24, 1378:25, 1396:1, 1396:24, 1397:18, 1403:17, 1410:6, 1410:19, 1439:23, 1444:1, 1445:19, 1446:11, 1447:22,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12 type [4] - 1369:5, 1452:24, 1517:12, 1580:13 types [4] - 1367:25, 1442:25, 1533:25, 1560:25 typical [1] - 1482:7 typically [3] - 1513:13,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1 undetermined [1] - 1436:13 unfortunately [3] - 1464:14, 1549:10, 1571:15 unique [4] - 1453:12, 1598:18, 1600:3, 1600:5 unit [4] - 1544:4, 1558:8, 1580:22,	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1493:25, 1494:13, 1499:7, 1501:25, 1503:7, 1507:5, 1507:8, 1507:10, 1512:10, 1514:18, 1515:1, 1517:14, 1519:1, 1522:2, 1524:24, 1526:4, 1526:12,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10 variance [2] - 1525:15, 1526:7 variances [4] - 1515:10, 1565:14, 1565:19, 1577:7 variation [5] - 1394:7, 1525:11, 1530:15, 1530:16, 1556:16
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20 tubs [1] - 1533:5 turn [41] - 1369:15, 1370:3, 1371:10, 1376:6, 1378:24, 1378:25, 1396:1, 1396:24, 1397:18, 1403:17, 1410:6, 1410:19, 1439:23, 1444:1, 1445:19, 1446:11, 1447:22, 1448:10, 1449:5,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12 type [4] - 1369:5, 1452:24, 1517:12, 1580:13 types [4] - 1367:25, 1442:25, 1533:25, 1560:25 typical [1] - 1482:7	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1 undetermined [1] - 1436:13 unfortunately [3] - 1464:14, 1549:10, 1571:15 unique [4] - 1453:12, 1598:18, 1600:3, 1600:5 unit [4] - 1544:4, 1558:8, 1580:22, 1591:5	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1493:25, 1494:13, 1499:7, 1501:25, 1503:7, 1507:5, 1507:8, 1507:10, 1512:10, 1514:18, 1515:1, 1517:14, 1519:1, 1522:2, 1524:24, 1526:4, 1526:12, 1526:23, 1527:15,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10 variance [2] - 1525:15, 1526:7 variances [4] - 1515:10, 1565:14, 1565:19, 1577:7 variation [5] - 1394:7, 1525:11, 1530:15, 1530:16, 1556:25
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20 tubs [1] - 1533:5 turn [41] - 1369:15, 1370:3, 1371:10, 1376:6, 1378:24, 1378:25, 1396:1, 1396:24, 1397:18, 1403:17, 1410:6, 1410:19, 1439:23, 1444:1, 1445:19, 1446:11, 1447:22, 1448:10, 1449:5, 1450:16, 1454:4,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12 type [4] - 1369:5, 1452:24, 1517:12, 1580:13 types [4] - 1367:25, 1442:25, 1533:25, 1560:25 typical [1] - 1482:7 typically [3] - 1513:13, 1525:12, 1580:10	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1 undetermined [1] - 1436:13 unfortunately [3] - 1464:14, 1549:10, 1571:15 unique [4] - 1453:12, 1598:18, 1600:3, 1600:5 unit [4] - 1544:4, 1558:8, 1580:22, 1591:5 UNITED [1] - 1364:1	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1493:25, 1494:13, 1499:7, 1501:25, 1503:7, 1507:5, 1507:8, 1507:10, 1512:10, 1514:18, 1515:1, 1517:14, 1519:1, 1522:2, 1524:24, 1526:4, 1526:12, 1526:23, 1527:15, 1528:10, 1529:20,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10 variance [2] - 1525:15, 1526:7 variances [4] - 1515:10, 1565:14, 1565:19, 1577:7 variation [5] - 1394:7, 1525:11, 1530:15, 1530:16, 1556:25 varies [1] - 1394:4
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20 tubs [1] - 1533:5 turn [41] - 1369:15, 1370:3, 1371:10, 1376:6, 1378:24, 1378:25, 1396:1, 1396:24, 1397:18, 1403:17, 1410:6, 1410:19, 1439:23, 1444:1, 1445:19, 1446:11, 1447:22, 1448:10, 1449:5, 1450:16, 1454:4, 1455:25, 1456:13,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12 type [4] - 1369:5, 1452:24, 1517:12, 1580:13 types [4] - 1367:25, 1442:25, 1533:25, 1560:25 typical [1] - 1482:7 typically [3] - 1513:13,	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1 undetermined [1] - 1436:13 unfortunately [3] - 1464:14, 1549:10, 1571:15 unique [4] - 1453:12, 1598:18, 1600:3, 1600:5 unit [4] - 1544:4, 1558:8, 1580:22, 1591:5 UNITED [1] - 1364:1 United [2] - 1547:3,	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1436:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1493:25, 1494:13, 1499:7, 1501:25, 1503:7, 1507:5, 1507:8, 1507:10, 1512:10, 1514:18, 1515:1, 1517:14, 1519:1, 1522:2, 1524:24, 1526:4, 1526:12, 1526:23, 1527:15, 1528:10, 1529:20, 1530:18, 1531:2,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10 variance [2] - 1525:15, 1526:7 variances [4] - 1515:10, 1565:14, 1565:19, 1577:7 variation [5] - 1394:7, 1525:11, 1530:15, 1530:16, 1556:16 varied [1] - 1556:25 varies [1] - 1394:4 various [1] - 1465:24
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20 tubs [1] - 1533:5 turn [41] - 1369:15, 1370:3, 1371:10, 1376:6, 1378:24, 1378:25, 1396:1, 1396:24, 1397:18, 1403:17, 1410:6, 1410:19, 1439:23, 1444:1, 1445:19, 1446:11, 1447:22, 1448:10, 1449:5, 1450:16, 1454:4, 1455:25, 1456:13, 1458:4, 1459:21,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12 type [4] - 1369:5, 1452:24, 1517:12, 1580:13 types [4] - 1367:25, 1442:25, 1533:25, 1560:25 typical [1] - 1482:7 typically [3] - 1513:13, 1525:12, 1580:10	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1 undetermined [1] - 1436:13 unfortunately [3] - 1464:14, 1549:10, 1571:15 unique [4] - 1453:12, 1598:18, 1600:3, 1600:5 unit [4] - 1544:4, 1558:8, 1580:22, 1591:5 UNITED [1] - 1364:1 United [2] - 1547:3, 1505:35	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1432:3, 1444:12, 1456:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1499:7, 1501:25, 1503:7, 1507:5, 1507:8, 1507:10, 1512:10, 1514:18, 1515:1, 1517:14, 1519:1, 1522:2, 1524:24, 1526:4, 1526:12, 1526:23, 1527:15, 1528:10, 1529:20, 1530:18, 1531:2, 1531:11, 1534:20,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10 variance [2] - 1525:15, 1526:7 variances [4] - 1515:10, 1565:14, 1565:19, 1577:7 variation [5] - 1394:7, 1525:11, 1530:15, 1530:16, 1556:16 varied [1] - 1556:25 varies [1] - 1465:24 vast [1] - 1457:12
1403:4, 1405:9, 1411:8, 1457:5, 1457:6, 1543:18, 1582:22 truth [3] - 1503:3, 1503:4 try [4] - 1438:14, 1481:6, 1509:1, 1573:11 trying [9] - 1366:23, 1372:13, 1392:22, 1444:16, 1514:25, 1523:4, 1542:2, 1594:22, 1608:20 tubs [1] - 1533:5 turn [41] - 1369:15, 1370:3, 1371:10, 1376:6, 1378:24, 1378:25, 1396:1, 1396:24, 1397:18, 1403:17, 1410:6, 1410:19, 1439:23, 1444:1, 1445:19, 1446:11, 1447:22, 1448:10, 1449:5, 1450:16, 1454:4, 1455:25, 1456:13,	1533:17, 1540:1, 1549:14, 1549:18, 1551:25, 1553:3, 1555:24, 1557:2, 1566:20, 1576:10, 1578:14, 1579:3, 1580:5, 1585:20, 1603:11, 1607:24, 1609:9, 1611:22, 1616:17, 1617:14 two-and-a-half [1] - 1553:3 two-thirds [3] - 1370:10, 1420:16, 1566:20 two-year [1] - 1530:12 type [4] - 1369:5, 1452:24, 1517:12, 1580:13 types [4] - 1367:25, 1442:25, 1533:25, 1560:25 typical [1] - 1482:7 typically [3] - 1513:13, 1525:12, 1580:10	undersized [6] - 1367:19, 1368:20, 1368:22, 1369:6, 1369:18, 1415:11 understood [2] - 1392:25, 1518:11 undertaken [1] - 1488:15 undertakes [1] - 1442:25 undertaking [1] - 1535:8 underwater [1] - 1542:1 undetermined [1] - 1436:13 unfortunately [3] - 1464:14, 1549:10, 1571:15 unique [4] - 1453:12, 1598:18, 1600:3, 1600:5 unit [4] - 1544:4, 1558:8, 1580:22, 1591:5 UNITED [1] - 1364:1 United [2] - 1547:3, 1505:35	1527:21 up [83] - 1370:16, 1375:1, 1379:23, 1382:15, 1383:20, 1388:17, 1388:21, 1389:16, 1389:25, 1390:12, 1401:20, 1413:16, 1417:3, 1422:4, 1422:25, 1426:13, 1429:25, 1436:2, 1457:23, 1466:18, 1475:6, 1483:24, 1484:1, 1488:25, 1490:16, 1492:13, 1493:25, 1494:13, 1499:7, 1501:25, 1503:7, 1507:5, 1507:8, 1507:10, 1512:10, 1514:18, 1515:1, 1517:14, 1519:1, 1522:2, 1524:24, 1526:4, 1526:12, 1526:23, 1527:15, 1528:10, 1529:20, 1530:18, 1531:2,	vague [1] - 1501:15 valid [2] - 1612:24, 1614:16 valleys [1] - 1582:5 value [4] - 1546:8, 1550:4, 1567:12, 1567:13 values [1] - 1550:11 valves [1] - 1513:22 variability [2] - 1582:5, 1591:9 variables [1] - 1490:10 variance [2] - 1525:15, 1526:7 variances [4] - 1515:10, 1565:14, 1565:19, 1577:7 variation [5] - 1394:7, 1525:11, 1530:15, 1530:16, 1556:16 varied [1] - 1556:25 varies [1] - 1394:4 various [1] - 1465:24
