FX-36 3264 FX-54 3201 FX-63 3216 FX-70 3276 FX-78 3237 FX-82 3240, 3275 FX-83 3242 FX-85 3246 FX-88 3249 FX-89 3244 FX-129 3223 FX-152 3230 FX-199 3296, 3424	9 10 11 12 13	Dr. Zeng use a mike a mobile microphone in case he gets up. So we're going to see if that works. And if it doesn't, please let us know; and we'll put it back so he can talk with the microphone. And finally, there was a document that
FX-36 3264 FX-54 3201 FX-63 3216 FX-70 3276 FX-78 3237 FX-82 3240, 3275 FX-83 3242 FX-85 3246 FX-88 3249 FX-89 3244 FX-152 3230 FX-152 3230 FX-152 3295 FX-212 3295 FX-215 3295	9 10 11 12 13 14	Dr. Zeng use a mike a mobile microphone in case he gets up. So we're going to see if that works. And if it doesn't, please let us know; and we'll put it back so he can talk with the microphone. And finally, there was a document that the Court asked Mr. Turner about at the end
FX-36 3264 FX-54 3201 FX-63 3216 FX-70 3276 FX-78 3237 FX-82 3240, 3275 FX-83 3242 FX-85 3246 FX-129 3223 FX-152 3230 FX-152 3230 FX-199 3296, 3424 FX-212 3295 FX-215 3295 FX-211 320 FX-241 3417	9 10 11 12 13 14	Dr. Zeng use a mike a mobile microphone in case he gets up. So we're going to see if that works. And if it doesn't, please let us know; and we'll put it back so he can talk with the microphone. And finally, there was a document that the Court asked Mr. Turner about at the end of the proceedings last week. And I just
FX-36 3264 FX-54 3201 FX-63 3216 FX-70 3276 FX-78 3237 FX-82 3240, 3275 FX-83 3242 FX-85 3246 FX-89 3244 FX-129 3223 FX-129 3223 FX-152 3230 FX-199 3296, 3424 FX-212 3295 FX-215 3295 FX-219 320	9 10 11 12 13 14 15	Dr. Zeng use a mike a mobile microphone in case he gets up. So we're going to see if that works. And if it doesn't, please let us know; and we'll put it back so he can talk with the microphone. And finally, there was a document that the Court asked Mr. Turner about at the end of the proceedings last week. And I just wanted to clarify, make sure we were talking
FX-36 3264 FX-54 3201 FX-63 3216 FX-70 3276 FX-78 3237 FX-82 3240, 3275 FX-83 3242 FX-85 3246 FX-88 3249 FX-89 3244 FX-152 3230 FX-152 3230 FX-199 3296, 3424 FX-212 3295 FX-212 3295 FX-215 3295 FX-219 320 FX-219 320 FX-219 320 FX-211 3295 FX-215 3295 FX-217 3295 FX-218 3295 FX-219 320 FX-219 320 FX-219 320 FX-211 3417 FX-313 3415 FX-515 3285 FX-517 3286	9 10 11 12 13 14 15 16	Dr. Zeng use a mike a mobile microphone in case he gets up. So we're going to see if that works. And if it doesn't, please let us know; and we'll put it back so he can talk with the microphone. And finally, there was a document that the Court asked Mr. Turner about at the end of the proceedings last week. And I just wanted to clarify, make sure we were talking about the same document.
FX-36 3264 FX-54 3201 FX-63 3216 FX-70 3276 FX-78 3237 FX-82 3240, 3275 FX-83 3242 FX-85 3246 FX-89 3244 FX-129 3223 FX-152 3230 FX-199 3296, 3424 FX-212 3295 FX-215 3295 FX-219 320 FX-241 3417 FX-313 3415 FX-515 3285 FX-515 3286 FX-518 3309, 3373 FX-534 3209	9 10 11 12 13 14 15 16 17	Dr. Zeng use a mike a mobile microphone in case he gets up. So we're going to see if that works. And if it doesn't, please let us know; and we'll put it back so he can talk with the microphone. And finally, there was a document that the Court asked Mr. Turner about at the end of the proceedings last week. And I just wanted to clarify, make sure we were talking about the same document. SPECIAL MASTER LANCASTER: We are.
FX-36 3264 FX-54 3201 FX-63 3216 FX-70 3276 FX-78 3237 FX-82 3240, 3275 FX-83 3242 FX-85 3246 FX-88 3249 FX-89 3244 FX-129 3223 FX-152 3230 FX-152 3230 FX-152 3295 FX-215 3295 FX-215 3295 FX-215 3295 FX-215 3295 FX-217 3206 FX-218 3206 FX-518 3209 FX-517 3286 FX-518 3309, 3373 FX-534 3209 FX-778 3231 FX-903 3421	9 10 11 12 13 14 15 16 17 18	Dr. Zeng use a mike a mobile microphone in case he gets up. So we're going to see if that works. And if it doesn't, please let us know; and we'll put it back so he can talk with the microphone. And finally, there was a document that the Court asked Mr. Turner about at the end of the proceedings last week. And I just wanted to clarify, make sure we were talking about the same document. SPECIAL MASTER LANCASTER: We are. MR. PRIMIS: The Court had asked about,
FX-36 3264 FX-54 3201 FX-63 3216 FX-70 3276 FX-78 3237 FX-82 3240, 3275 FX-83 3242 FX-85 3246 FX-88 3249 FX-89 3244 FX-152 3230 FX-152 3230 FX-152 3230 FX-199 3296, 3424 FX-212 3295 FX-215 3295 FX-215 3295 FX-217 320 FX-218 320 FX-219 320 FX-219 320 FX-219 320 FX-219 320 FX-219 320 FX-219 320 FX-515 3295 FX-517 3286 FX-518 3309, 3373 FX-534 3209 FX-778 3231 FX-903 3421 FX-904 3252 FX-905 3403	9 10 11 12 13 14 15 16 17 18 19	Dr. Zeng use a mike a mobile microphone in case he gets up. So we're going to see if that works. And if it doesn't, please let us know; and we'll put it back so he can talk with the microphone. And finally, there was a document that the Court asked Mr. Turner about at the end of the proceedings last week. And I just wanted to clarify, make sure we were talking about the same document. SPECIAL MASTER LANCASTER: We are. MR. PRIMIS: The Court had asked about, I think, this document which says February
FX-36 3264 FX-54 3201 FX-63 3216 FX-70 3276 FX-78 3237 FX-82 3240, 3275 FX-83 3242 FX-85 3246 FX-89 3244 FX-129 3223 FX-152 3230 FX-152 3230 FX-199 3296, 3424 FX-212 3295 FX-215 3295 FX-215 3295 FX-217 3295 FX-218 3295 FX-219 320 FX-199 3296, 3424 FX-212 3295 FX-215 3295 FX-215 3295 FX-215 3295 FX-218 3295 FX-517 3286 FX-518 3309, 3373 FX-534 3209 FX-778 3231 FX-903 3421 FX-903 3421 FX-904 3252	9 10 11 12 13 14 15 16 17 18 19 20 21 22	Dr. Zeng use a mike a mobile microphone in case he gets up. So we're going to see if that works. And if it doesn't, please let us know; and we'll put it back so he can talk with the microphone. And finally, there was a document that the Court asked Mr. Turner about at the end of the proceedings last week. And I just wanted to clarify, make sure we were talking about the same document. SPECIAL MASTER LANCASTER: We are. MR. PRIMIS: The Court had asked about, I think, this document which says February 1958 revised 2016. SPECIAL MASTER LANCASTER: That's it.
FX-36 3264 FX-54 3201 FX-63 3216 FX-70 3276 FX-78 3223 FX-82 3240, 3275 FX-83 3242 FX-85 3246 FX-88 3249 FX-89 3244 FX-129 3223 FX-152 3230 FX-152 3230 FX-199 3296, 3424 FX-212 3295 FX-215 3295 FX-215 3295 FX-215 3295 FX-217 3295 FX-218 3295 FX-219 320 FX-517 3286 FX-518 3309, 3373 FX-534 3209 FX-534 3209 FX-778 3231 FX-903 3421 FX-903 3421 FX-904 3252 FX-905 3403 FX-908 3269	9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Dr. Zeng use a mike a mobile microphone in case he gets up. So we're going to see if that works. And if it doesn't, please let us know; and we'll put it back so he can talk with the microphone. And finally, there was a document that the Court asked Mr. Turner about at the end of the proceedings last week. And I just wanted to clarify, make sure we were talking about the same document. SPECIAL MASTER LANCASTER: We are. MR. PRIMIS: The Court had asked about, I think, this document which says February 1958 revised 2016. SPECIAL MASTER LANCASTER: That's it. MR. PRIMIS: Is that correct?
FX-36 3264 FX-54 3201 FX-63 3216 FX-70 3276 FX-78 3237 FX-82 3240, 3275 FX-83 3242 FX-85 3246 FX-88 3249 FX-89 3244 FX-129 3223 FX-152 3230 FX-152 3230 FX-199 3296, 3424 FX-212 3295 FX-215 3295 FX-215 3295 FX-215 3295 FX-217 3295 FX-218 3200 FX-517 3286 FX-517 3286 FX-518 3309, 3373 FX-534 3209 FX-778 3231 FX-904 3252 FX-903 3421 FX-904 3252 FX-908 3269 FX-909 3227 FX-909 3227 FX-909 3227 FX-909 3227 FX-909 3228	9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	Dr. Zeng use a mike a mobile microphone in case he gets up. So we're going to see if that works. And if it doesn't, please let us know; and we'll put it back so he can talk with the microphone. And finally, there was a document that the Court asked Mr. Turner about at the end of the proceedings last week. And I just wanted to clarify, make sure we were talking about the same document. SPECIAL MASTER LANCASTER: We are. MR. PRIMIS: The Court had asked about, I think, this document which says February 1958 revised 2016. SPECIAL MASTER LANCASTER: That's it. MR. PRIMIS: Is that correct? Okay. Just to clarify, I think
FX-36 3264 FX-54 3201 FX-63 3216 FX-70 3276 FX-78 3237 FX-82 3240, 3275 FX-83 3242 FX-85 3246 FX-88 3249 FX-89 3244 FX-129 3223 FX-152 3230 FX-152 3230 FX-199 3296, 3424 FX-212 3295 FX-215 3295 FX-215 3295 FX-215 3295 FX-217 3200 FX-218 3200 FX-219 3200 FX-518 3295 FX-78 3281 FX-518 3285 FX-517 3286 FX-518 3309, 3373 FX-534 3209 FX-778 3231 FX-903 3421 FX-904 3252 FX-908 3269 FX-908 3269 FX-909 3227 FX-908 3269 FX-909 3227 FX-909 3227 FX-901 3228	9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Dr. Zeng use a mike a mobile microphone in case he gets up. So we're going to see if that works. And if it doesn't, please let us know; and we'll put it back so he can talk with the microphone. And finally, there was a document that the Court asked Mr. Turner about at the end of the proceedings last week. And I just wanted to clarify, make sure we were talking about the same document. SPECIAL MASTER LANCASTER: We are. MR. PRIMIS: The Court had asked about, I think, this document which says February 1958 revised 2016. SPECIAL MASTER LANCASTER: That's it. MR. PRIMIS: Is that correct?

	TRIAL - November	21, 20	J16 (V	ol. XIII) Florida v. Georgia
	3198			3200
1	talking about; but just so I can show you on	1		CROSS-EXAMINATION
2	the screen, this is part of that revision	2	BY I	MR. QURESHI:
3	is part of the October 2015 Army Corps report	3	Q.	Good morning Dr. Zeng.
4	out.	4	A.	Good morning.
5	SPECIAL MASTER LANCASTER: Yes.	5		MR. QURESHI: Your Honor, with your
6	MR. PRIMIS: And it says 2016 on the	6		permission, I would like to pass out the
7	Water Control Manual. When it goes final, it	7		examination binders.
8	will then have a final 2016 date. I think he	8		SPECIAL MASTER LANCASTER: Please.
9	was confused because that was published in	9	BY	MR. QURESHI:
10	October 2015, and not at some point in 2016.	10	Q.	Dr. Zeng, you were in the courtroom on Friday?
11	The good news is that Dr. Zeng knows	11	A.	Yes, I was, yes.
12	about these very documents. And if the Court	12	Q.	I would like to pick up where we left off on
13	has questions, he may even be a better person	13		Friday after the testimony of your colleagues at
14	to ask.	14		Georgia EPD. You have worked at EPD for more
15	SPECIAL MASTER LANCASTER: Thank you.	15		than 10 years, sir?
16	MR. PRIMIS: But I thought I would	16	A.	Yes.
17	clarify that before we got started.	17	Q.	And from 2012 to 2016 you worked with Mr. Jud
18	SPECIAL MASTER LANCASTER: Thank you.	18		Turner, the director of EPD at that time?
19	MR. PRIMIS: The State of Georgia now	19	A.	That's correct.
20	calls Dr. Wei Zeng to the stand.	20	Q.	And during that period, sir, did you report
21	THE CLERK: Please raise your right	21		directly to him?
22	hand.	22	A.	Well, there's an agency structure; but sometimes
23	Do you solemnly swear that the testimony	23		I do report directly to him.
24	you shall give in the cause now in hearing	24	Q.	And did you have regular meetings with him?
25	shall be the truth, the whole truth, and	25	A.	I would say yes.
	THE REPORTING GROUP			THE REPORTING GROUP
	Mason & Lockhart			Mason & Lockhart
	3199			3201
1	nothing but the truth, so help you God?	1	Q.	Okay. Do you recall him testifying on Friday
2	THE WITNESS: I do.	2		about a meeting with the Governor's chief of
3	THE CLERK: Please be seated.	3		staff in 2013?
4	Pull yourself right up to the microphone	4	A.	I'm not sure what you're referring to.
5	and please state your name and spell your	5	Q.	Do you recall Director Turner discussing a
6	last name.	6		briefing paper on the protection of external and
7	THE WITNESS: Wei Zeng. W E I, first	7		internal threats to agricultural water use?
8	name; Zeng, Z E N G, last name.	8	A.	I don't.
9	Your Honor, can you hear me with this	9	Q.	Okay. Sir, can you please turn to tab 2 of the
10	mike?	10		big binder I handed to you; and there you will
11	SPECIAL MASTER LANCASTER: Yes.	11		see a document that's designated by Exhibit
12	I'm sorry about this. You'll have to	12		FX-54.
13	look at me now.	13	_	I see that.
14	THE WITNESS: I have no problem doing	14		Have you seen this document previously, sir?
15	that.	15	_	Can I take some time and go through it?
16	DIRECT EXAMINATION	16		Absolutely, sir.
17	BY MR. PRIMIS:	17	_	All right. Thank you.
18	Q. Dr. Zeng, I have placed before you your written	18	Q.	Please take as much time as you need. The
19	direct testimony that you submitted in this	19		relevant portion that I want to highlight is on
20	case. And I just want to ask you do you accept	20		the fourth page that ends in the numbers in the
21	or adopt the written direct as your sworn	21		lower right-hand corner 478438.
22	testimony?	22	_	Okay.
23	A. I do.	23	Ų.	At the top of that page there is a section
24	MR. QURESHI: Good morning, your Honor.	24		entitled Protect Against External and Internal
25	SPECIAL MASTER LANCASTER: Good morning.	25		Threats to Agricultural Water Use. Do you see
	THE REPORTING GROUP			THE REPORTING GROUP
	Mason & Lockhart			Mason & Lockhart

3202 3204 1 that? A. That was the only name that I picked up. 2 2 A. I see it, yes. **Q.** Has Mr. Barnes contacted you for any information 3 Q. Okay. Did Director Turner ever identify for you 3 related to demand or consumptive use in the ACF any external or internal threats to agricultural 4 Basin? water use? 5 A. He hasn't, but let me -- let me say the A. I don't think so. 6 difference between the acreage and the linkage 7 Q. Okay. Did you discuss this topic with anyone 7 between the acreage, the permit, and the water 8 else at EPD? 8 9 A. I don't think so. 9 All right. So the two are not the same 10 **Q.** Did you consider this one of your 10 issue. So to get the volume of water use, you 11 responsibilities at EPD? 11 look at the irrigated or the wetted acreage 12 A. For a hydrologist -- a hydrologist to think about 12 rather than a permitted amount. So in that 13 external threats, probably not. 13 sense, certainly I know where the irrigated 14 **Q.** Okay. What about internal threats, sir? 14 acreages are; and I do know their corresponding 15 A. I don't think so. 15 water use. Now, whether or not that is a permit 16 16 **Q.** Do you recall Director Turner testifying about issue, that's sort of beyond hydrology. 17 the Governor's task force to investigate roughly 17 Q. Understood, sir. And I'm certainly going to talk 18 about the areas that you're familiar with as well 18 90,000 illegally irrigated acres? 19 A. Well, I'm aware of a task force that is to be --19 as the areas that you're not familiar with; and 20 20 that is to be working, investigating the alleged we'll get to that. 21 21 unpermitted acreage; but that's the extent of my In fact, in the same paragraph that we were 22 22 knowledge. looking at, you highlight that you have had 23 **Q.** And you're aware that the task force was actually 23 involvement in every key issue regarding 24 convened in October 2016? 24 hydrology, water resource management, and 25 A. I'm not aware of that. 25 reservoir operations in the ACF Basin over the THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3203 3205 **Q.** Okay. I assume from that answer that you're not 1 past decade. Is that correct? 2 on the task force? 2 A. That's correct. 3 Q. Okay. And I'm going to go over some of the 3 A. I'm certainly not on the task force. Q. Okay. On -- in paragraph 4 of your prefiled 4 issues with you this morning. 4 5 5 direct testimony, which is behind tab 1, you On page 26 of your direct testimony you 6 state that you believe no one has comparable 6 explain that Georgia relies on unimpaired flows 7 7 for the UIF dataset prepared by the Army Corps. knowledge and experience regarding consumptive 8 use and water level -- water demand levels in the 8 Do you see that? 9 ACF Basin. Do you see that, sir? 9 A. I see that. 10 10 A. I see that. **Q.** And in your testimony you further state that the 11 Q. Does Governor Deal of Georgia know that? 11 Corps uses and relies upon consumptive use data 12 A. Know what? 12 from Georgia for the development of these UIF's; 13 **Q.** That you believe that no one has comparable 13 is that correct? 14 knowledge and experience regarding consumptive 14 A. That's correct. 15 use and water demand levels in the ACF Basin. 15 Q. You state in paragraph 75 -- that's on page 27 --16 A. I'm -- I'm not sure if Governor Deal knows that. 16 that you have no recollection of instances in 17 But I'm --17 which Florida questioned the, quote, technical 18 Q. Do you know --18 validity or reliability of Georgia's consumptive 19 A. -- I'm sure Governor Deal knows that that 19 use data until the current litigation began. Is 20 knowledge resides in the EPD, in the agency that 20 that correct? A. Well, I have no recollection of Florida's 21 regulates water use. 21 22 22 **Q.** Do you know anyone who is on the task force? technical people contacting me regarding the A. I do know -- I did hear the name of Allen Barnes, 23 technical validity of this data. 23 24 who was a prior EPD director. 24 But you are aware that Florida, prior to the 25 Q. Anyone else, sir? 25 commencement of this litigation, has challenged THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

TRIAL - November 21, 2016 (Vol. XIII) Florida v. Georgia 3208 1 whether the consumptive use data proffered by 1 60 you talk about surface-to-pond withdrawals, 2 Georgia is accurate. You know that? 2 which refer to withdrawals for irrigation from 3 A. I'm aware of a Florida legal counsel sending a 3 these farm ponds. Is that right? letter to the Corps complaining about it, yes. A. Well, yes. That's what I was saying there, is 4 4 5 I'm aware of that -that kind of withdrawal is treated as part of Q. Were you --6 surface water withdrawal. 7 A. -- but I do not treat that legal counsel as a 7 Q. But your direct testimony does not discuss 8 technical person. 8 evaporation from these farm ponds; is that 9 **Q.** Are you also aware that the United States Fish 9 correct? 10 and Wildlife Service has questioned the validity 10 A. I did not. 11 of the consumptive use data proffered by the 11 **Q.** Okay. And are you aware that as of 2011, there 12 State of Georgia? Are you aware of that? 12 were over 20,000 farm ponds in the Georgia 13 A. I did come across the Service's criticism of the 13 portion of the ACF Basin? 14 dataset 14 A. Well, I came across a study sort of identifying 15 the water bodies. I'm not sure all of them are 15 Q. Are you also aware that the Georgia Water 16 16 Resources Institute, or GWRI, has also questioned farm ponds. 17 17 the validity and reliability of the EPD Q. Are you referring to the Ignatius and Stallins 18 18 consumptive use dataset? study, sir? 19 A. I don't think GWRI criticized the EPD water use 19 A. That's correct. 20 data. They criticized the UIF. I'm aware of 20 **Q.** This is the same study that's referenced by GWRI; 21 21 22 **Q.** And we will certainly cover that in a little more 22 A. I think it was referenced by GWRI, yes. 23 detail, sir. 23 Q. And let's put GWRI in some context. The Georgia Water Resources Institute is affiliated with 24 Let's stay with consumptive use and talk 24 25 about that in some more detail. In your direct 25 Georgia Tech University? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3207 3209 1 testimony, you explain that the highest level or A. That's correct. 2 the peak level of consumptive use by Georgia on a **Q.** And EPD has contracted with GWRI in the past? 3 monthly basis is slightly below 2,000. That's in A. Occasionally, yes. 4 paragraph 22 you have a graph. I think sometime **Q.** Does it have any current contracts with GWRI? 5 A. I'm not aware of one at this moment. I had a in 2012 the amount of consumptive use is slightly 5 6 above 1800 cfs. Is that -- does that seem right 6 couple with them before. 7 to you? 7 **Q.** And is the name Dr. Aris Georgakakos familiar to 8 A. That's correct. 8 you? 9 **Q.** And are you aware that the State of Florida's 9 A. Very. 10 **Q.** What about Dr. Martin Kistenmacher? estimate of Georgia's consumptive use on a 10 11 A. Yes. monthly basis is approximately 3800 cfs? 11 12 A. Well, I have come across a 3800 cfs. I wasn't 12 **Q.** You're also very familiar with that individual? 13 sure if it was on a monthly basis. 13 A. Yes. 14 **Q.** Let's talk about the various factors that make up 14 Q. What about Dr. C. J. Chen? 15 your consumptive use estimate in your direct 15 A. I'm not so familiar with him. 16 testimony. 16 Q. Okay. But do you know that he was one of the 17 You're familiar with the fact, sir, that in 17 individuals in addition to Dr. Kistenmacher and 18 the Georgia portion of the ACF Basin there are 18 Dr. Georgakakos that prepared a UIF report in the 19 thousands of impoundments that store water for 19 fall of 2012? irrigation and other farm purposes? 20 A. I'm aware of the first two names, but not the 20 21 A. I'm aware of that. 21 third one. 22 **Q.** And these impoundments are generally referred to 22 Q. Okay. Could you please turn to tab 3 in the big 23 as farm ponds? 23 binder. There you will see a document that's

So it would be every member of my unit. Okay. And approximately how many members are in the unit? I have six staff members in my unit. And did that discussion occur after you received a final copy of this report or prior to that time? Well, the discussion about evaporation from open water surface bodies has been long. So I would say just on evaporation itself, it's probably both before and after. Certainly, you know, when we received this, I would have talked with my staff member on the farm pond evaporation alluded to in this report. Okay. Well, let's look to where they're alluded to. Can you please turn to page 191 of FX-534, sir. And I'll request that you please read the section at the bottom of the page to yourself entitled Net Evaporation Losses From Other Basin
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. A. Q. A. Q. A. Q.	November of 2012? I did. Okay. In fact, you participated in workshops before this report was issued; isn't that right? Well, I'm not sure the workshop was specifically for this purpose. We had meetings. We had regular meetings with the GWRI; and I cooperated fully with their study, provided data that we developed. So I'm not sure if there is a you know, one specific workshop that you referred to. September 10, 2012, Columbus, Georgia, at the Columbus Convention Center, do you remember going there? September 2012? September 10 of 2012, yes, sir. I don't recall that meeting. Okay. Let's go back to your providing information to the authors of this report. What kind of information did you provide? Consumptive use. Okay. And that includes M & I as well as agricultural consumptive use?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. A. Q. 5

8

- **Q.** It's the section at the bottom of the page
- 2 entitled Net Evaporation Losses From Other Basin
- 3 Impoundments.
- A. I see that.
- 5 Q. Okay. Sir, were you aware in the fall of 2012
- 6 that GWRI had concluded that net evaporation from
- 7 farm ponds could result in an up to 1200 cfs net
- 8 loss? Did you know that?
- 9 A. I'm aware of the number.
- 10 **Q.** Okay. And I believe you said earlier that the
- 11 consumptive use information that you presented to
- 12 the Supreme Court contains no number associated
- 13 with evaporative loss from farm ponds; is that
- 14 correct?
- 15 A. That's correct.
- 16 Q. Okay. Let's move to another category of
- 17 information that's not in your prefiled direct.
- 18 Your consumptive use data for agricultural
- 19 irrigation does not include any amount for
- 20 groundwater pumping from aquifers other than the
- 21 non-Floridan -- I'm sorry -- the non-Upper
- 22 Floridan Aquifers. Do you include those or do
- 23 you not include those?
- 24 A. Could you repeat the question --
- 25 Q. Sure.

THE REPORTING GROUP Mason & Lockhart

3215

- A. -- because I think I -- could you repeat the 2 question, please?
- 3 **Q.** Certainly. Consumptive use data that you present
- 4 for agricultural irrigation, does it include any
- 5 values associated with groundwater pumping from
- 6 aquifers other than the Floridan Aquifer?
- 7 A. Right. The agricultural consumptive use that we
- 8 have incorporated does not incorporate pumping
- 9 data from the aquifers other than the Floridan
- 10 Aquifer because those aquifers are not
- 11 hydrologically connected with the streams.
- 12 Q. Sir, in footnote 1 of your prefiled direct that's
- 13 on page 1 -- do you have it in front of you?
- 14 A. Yes.
- 15 **Q.** Okay. You write that groundwater withdrawals
- 16 from deep unconnected aguifers have minimal, if
- 17 any, impact on surface water flows.
- 18 And is that the reason you exclude it?
- 19 A. That's correct.
- 20 **Q.** Okay. You go on to say in paragraph 61 on page
- 21 22 that water withdrawals from non-UFA, which I
- 22 assume means non-Upper Floridan, deeper aquifers,
- 23 for example, Claiborne, Clayton, Cretaceous, have
- 24 limited to no hydraulic connection with surface
- 25 water streams in the ACF Basin. Is that correct?

THE REPORTING GROUP

Mason & Lockhart

- A. That's correct.
- 2 Q. So both in footnote 1 and in paragraph 61, you
- 3 say that the impact from these aguifers on
- streamflow is not zero, but it's minimal; is that
- 6 A. It's very small. It's close to zero.
- 7 Q. Okay. And, therefore, you treat it as zero in
 - your direct testimony?
- 9 A. That's correct.
- 10 **Q.** Do you know a fellow by the name of Dr. James
- 11 Kennedy?
- A. Yes. 12
- 13 Q. And who is Dr. Kennedy?
- 14 A. He is the state geologist.
- 15 **Q.** And does the state geologist study groundwater?
- 16 A. He does.
- 17 Q. Can you please turn with me, sir, to tab 4. It
- 18 says FX-63, and it's a memo prepared by
- 19 Dr. Kennedy. And I would like to direct you in
- 20 particular to page 27 of the memo from the state
- 21 geologist.
- 22 A. Yes.
- 23 **Q.** And the very last paragraph, if you might read
- 24 that to yourself, sir.
- 25 A. I see that.

THE REPORTING GROUP

Mason & Lockhart

3217

- 1 **Q.** Okay. Do you agree with Dr. Kennedy's conclusion
 - that pumping from the Claiborne Aquifer would
- 3 result in some impact to streamflow?
- A. I disagree. 4

2

10

- 5 **Q.** You -- and have you informed Dr. Kennedy of your
- 6 disagreement?
- 7 A. Well, we disagreed over many issues, so he's 8
 - aware of that.
- 9 Q. Okay. And you don't mention this disagreement in
 - your direct testimony; do you?
- 11 A. I did not.
- 12 **Q.** And you state in your direct testimony that your
- 13 consumptive use estimates are conservative?
- 14 A. Yes.
- 15 **Q.** And in your opinion, treating withdrawals from
- 16 the Claiborne and the Clayton and the Cretaceous
- 17 Aguifers as zero is conservative?
- A. That's correct. 18
- 19 **Q.** Okay. In fact, on page 18 of your testimony, you
- 20 highlight that there's more than 154,000 acres
- 21 irrigated from non-Upper Floridan Aguifers; and
- 22 you believe that it's conservative to treat the
- 23 surface water impact of these withdrawals as
- 24
- 25 A. Well, yes. It's simply because they are not

		I RIAL - November	21, 20) 10 (V	/ol. XIII) Florida v. Georgia
		3222			3224
1		members of the ACF Compact, Director Reheis	1		years 2004 and 2009, those are the throw acres.
2		estimates irrigation acreage of more than	2		Those were provided directly from Dr. Jim Hook's
3		920,000; is that right?	3		study. So those reflect the throw acreage. And
4	A.	Well, that was right. But that was before the	4		then the last three rows here, they were
5		mapping of or the result of the mapping came	5		developed or they were mapped associated with the
6		out.	6		Ag metering program. So those acreage were
7	Q.	And the results of the mapping and the result of	7		hardware acreage.
8		your work here is a significantly lower amount of	8	Q.	So
9		irrigated acreage as represented on page 18 of	9	A.	And there is a slight difference there.
10		your direct testimony?	10	_	I apologize for interrupting you, sir.
11	Α.	Well, that is a significantly more accurate	11		My question, again, was the 723,127, the cell
12		capturing of the irrigated acreage.	12		on the extreme right-hand corner, that's just
13	Q.	Let's stay with this topic of irrigated acreage,	13		hardware acres. Isn't that right?
14		but I want to go to a slightly different subject.	14	Δ	That's hardware acres, yes.
15		And that subject is the term throw acres. Do you	15		Okay. And if you were to add 2014 throw acres,
16		know what throw acres means?	16	Œ.	do you know what the number would increase to?
					,
17	Α.		17		I don't know.
18	Q.		18	Q.	Okay. And I believe you testified it would be a
19	Α.	Well, it means at the end of a center-pivot	19		slight increase?
20		irrigation equipment, there is sometimes attached	20		Yes.
21		a what's called an end-gun. And so the	21	Q.	All right. Well, we used the wetted acreage
22		end-gun can throw water out beyond the range of	22		wetted acreage database JX-129 to evaluate
23		the irrigation equipment so that a bigger area	23		whether or not it was a slight difference. And
24		can be irrigated.	24		if I may request that you turn to tab A in the
25	Q.	And the area in the range of the irrigation	25		demonstrative booklet.

So the acreage that we used here, do you see the first two rows?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	Q. A. Q. A. Q.	Yes. You will see that the number is 826,877. Do you see that? Tab 8? Tab A. A as in Abid. Tab A. I'm sorry. Tab A in the small booklet, sir. Oh, I'm sorry. Okay. I see that. Okay. You hadn't done this analysis; had you? Well, no. But let me let me clarify on the acreage and the use of the acreage, all right. So the acreage or the irrigated acreage is used in such a way that you would use the acreage that is associated with Ag metering volume to develop irrigation depth. And then you would apply the irrigation depth to the overall acreage. Right? Are you with me here? So so to develop the application depth, you need to have a set of irrigated acreage, whether or not that's throw acres or that's hardware acreage. And then when you do the extrapolation because you don't have every system metered, right, so you have a big sample of all of the meters of all of the irrigation

3229

13

1 that rate to apply it to the ones that are not 2 metered. So for that purpose, you need to have a 3 consistency between the acreage you use to 4 develop the application depth and the total

> So I could use -- I could use the hardware acreage to develop the depth and then apply it to the overall hardware acreage for the total volume of water. Or I could use the throw acreage to develop the application depth, which would be lower because the acreage now is larger. But then when I apply it to the overall acreage, that is also larger, which means if you used a consistent methodology, the total volume of water that you derive would be the same.

16 **Q.** Sir, you had access to the wetted acreage 17 database?

acreage that you apply.

A. Yes. 18

1 A. Okay.

- 19 **Q.** And you had access to the total number of throw 20 acres that were listed in that database. Is that 21 riaht?
- 22 23 answer is probably yes.
- 25

Mason & Lockhart

Q. I would like to now return to the claim that you

indicating that you have no recollection of

instances in which Florida questioned the

technical validity or reliability of Georgia's

consumptive use data. And I believe you

not from technical experts. Is that your

A. Right. I have not -- I have not heard from

Q. But you do agree that prior to the start of the

A. I'm aware of that legal counsel's letter.

is that behind tab 6 at FX-909?

Q. Okay. And the letter you're talking about, sir,

litigation, Florida was complaining about the

quality of the consumptive use data provided by

I'll represent to you this is a January 7,

2007, letter from the Florida Department of

THE REPORTING GROUP

Mason & Lockhart

State of Florida complaining about the --

testimony, sir?

use data.

Georgia?

testified that you saw letters from Florida's

lawyers criticizing the consumptive use data, but

any -- any member of the technical team from the

complaining about the quality of Georgia's water

make in paragraph 75 of your direct testimony,

Environmental Protection.

- A. Did you say tab 6? 2
- 3 Q. Yes, sir. And it's printed a little oddly, so
- 4 you have to turn it sideways. But if you turn to
 - page 14, the last paragraph on page 14, I would
 - invite you to read that.
- 7 I see that.
- 8 Q. Okay. And is this the letter you were referring
- 9 to by the counsel for Florida Department of
- 10 Environmental Protection?
- 11 A. I'm not sure about that. I'm not sure whether
- 12 this is the letter. But I -- I have come across
 - a letter of this nature.
- 14 Q. Okay. And you don't consider it a technical 15
- criticism; is that right? 16 A. Well, I think the letter sent was sent from a
- 17 legal counsel.
- 18 **Q.** Okay. And my question was you don't, therefore, 19 think of it as a technical criticism?
- 20 A. Well, it wasn't made by a technical person.
- 21 Q. And, again, if it's not made by a technical 22 person -- let me back up.
- 23
- You believe a lawyer is not a technical 24 person?
- 25 Well, I believe a lawyer is not a technical

THE REPORTING GROUP

Mason & Lockhart

3227

1 person, not in our field.

- 2 Q. Okay. And, therefore, the letter from the lawyer
- 3 is not valid to you?
- A. That's not what I'm saying. What I'm saying is 4
- 5 there is a general way of communicating technical
- 6 information. It used to be the technical people
- 7 in the basin are very open to exchanging ideas
- 8 and views among the technical people. So there
- 9 was open discussion about issues related, all the
- 10 technical -- the technical elements of the entire
- basin. So this certainly is not a -- an exchange 11
- 12 of that nature.
- 13 Q. You went to a meeting in Eufaula, Alabama, in
- 14 November of 2012?
- 15 A. That's correct.
- 16 **Q.** And there were technical personnel from the State
- 17 of Florida present there; weren't they?
- 18 A. Yes.
- 19 **Q.** And in that meeting, they criticized the
- 20 consumptive use data presented by the State of
- 21 Georgia?
- 22 A. I don't recall that.
- 23 **Q.** But you were at that meeting?
- A. I was at that meeting. 24
- 25 Q. Do you remember a presentation by a Ms. Helen

TRIAL - November 21, 2016 (Vol. XIII) Florida v. Georgia 3238 3240 A. First of all, I have to say it's not a 1 Allen Barnes? A. That's correct. 2 2 recommendation. 3 **Q.** When you prepared the text in the section **Q.** And Director Barnes did not invoke the Flint underneath Recommendation, did you believe that River Drought Protection Act in 2011; did he? 4 5 text to be accurate? 5 A. He did not. A. I wrote that text. 6 Q. Okay. I would like to move a little further in 7 Q. Did you believe it was accurate, sir, at the time 7 time in 2011, sir, if you might. If you could 8 you wrote it? 8 please turn to tab 13, it's a memo designated as 9 A. It reflects my -- it accurately reflects my 9 FX-82. It appears to be from you to Director 10 understanding of the situation at the time. 10 Barnes on September 6, 2011. 11 Q. Thank you. 11 Α. Yes. 12 A. But it was not a recommendation. 12 **Q.** Did you prepare this memo, sir? 13 **Q.** Okay. And my question again was the text itself, 13 A. Yes. Q. I want to focus on the two numbered items on the 14 call it whatever you want, it was accurate? 14 15 A. The text accurately reflects my understanding at 15 first page of J -- the first page of FX-82. 16 A. First page, yes. 16 the time, yes. 17 17 Q. Okay. I would now like to turn to the next tab, Q. The two numbered paragraphs. I'll give you a 18 tab 12. And that's a document marked FX-912. 18 moment to review those to yourself. 19 And it's an e-mail between you and a gentleman 19 A. I read them. named Mr. Cliff Lewis. Do you know Mr. Lewis? 20 20 Q. Okay. At the end of the paragraph marked 1 you 21 21 A. Yes. write, quote, the lack of groundwater recovery in 22 Q. Okay. Did you send him the e-mail at the bottom 22 this year was stunning, end quote. 23 of the page? 23 At the time you made that observation, sir, 24 A. It looks like that was an e-mail from me. 24 did you believe it was accurate? 25 **Q.** Okay. And in this e-mail, were you assessing the 25 A. It was accurate, yes. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3239 3241 1 flow benefits and the financial cost of invoking 1 **Q.** Okay. On the following page you make some the Act? 2 2 observations about streamflow in the Flint River. 3 A. I think I was -- I think I was conveying the 3 Can you please take a moment to read those to 4 message mostly on the potential flow benefit yourself. 4 5 A. I read it. rather than cost because cost usually is not a 5 part of hydrology. **Q.** Okay. Sir, when you made these observations 6 6 7 **Q.** Okay. So you were calculating the flow benefits 7 about the impact of low groundwater level and 8 of invoking the Act in January of 2011? 8 discharge on streamflow, did you believe them to 9 A. That seems to be the case. 9 he accurate? 10 A. Yes. 10 **Q.** And at the top of the document, FX-912, Mr. Lewis 11 11 responds to you and someone named Tim. Do you **Q.** Finally, I would like to direct you to the 12 know who that refers to? 12 section on projections of potential future 13 A. That would be Tim Cash, the assistant branch 13 conditions and, in particular, the middle 14 chief for the basin at the time. 14 paragraph in that section. 15 Q. And he writes, based on your accounts, estimated 15 A. I'm sorry, where is that? 16 cost for FRDPA is 31,355,600. Do you have any 16 Oh, the last section? 17 understanding as to why he was providing you that 17 Q. The last section and the middle paragraph, the 18 cost information if hydrology doesn't involve 18 one that begins, if this comes to fruition. 19 costs? 19 A. I see that. A. I'm not sure why he was copying me on that. Q. Okay. And at the time you wrote this, did you 20 20 21 Q. Okay. When you wrote the e-mail to Mr. Lewis, 21 believe it to be accurate, sir? 22 did you believe the information you provided him 22 A. It was accurate. 23 was accurate? 23 Q. Okay. And although it's a memo written by a

		TRIAL - November	21, 20	016 (V	ol. XIII) Florida v. Georgi
		3246			3248
1		February 16, 2012. And this is designated as	1	Q.	Okay. Do you have any reason to doubt what
2		JX-70. Did you prepare this memo, sir?	2		Mr. Caldwell wrote?
3	A.	Yes.	3	A.	I have no basis of judging whether or not that's
4	Q.	And did you prepare it with your colleague Inchul	4		accurate.
5		Kim?	5	Q.	Okay. Let's turn to the flip back to the
6	Α.	That's correct.	6		front of the memo and actually look at the second
7	Q.	Okay. And now if you turn to pages 2 or 3,	7		page. It's a little difficult to read; but if
8		there's no section that says Recommendation; is	8		you bear with me, you will see that in the fifth
9		there?	9		line from the bottom on the first paragraph,
10	Δ	There is none, yes.	10		there's a bracket. And it goes on to say, the
11	_	Okay. Did anyone ask you to remove that section,	11		reason we were able to focus more. May I ask
12	Œ.	sir?	12		·
	^				that you read that bracketed sentence that ends
13	Α.		13		with, dash, way.
14	_	You did it on your own?	14		Could you tell me which paragraph it is?
15		Yes.	15	Q.	Yes. It's the paragraph at the top of the page,
16	Q.	Okay. And did you have correspondence with	16		and it's a little difficult to find. But if you
17		anyone at EPD during this time?	17		look, it's the fifth line up; and it's
18	A.	Correspondence regarding this?	18		highlighted on the screen.
19	Q.	The subject matter we have been talking about,	19	A.	I'm sorry. Did you say the first page or the
20		yes, sir.	20		second?
21	A.	I probably had some correspondence.	21	Q.	The second page, sir.
22	Q.	Okay. Let's take a look at that correspondence,	22	A.	I'm sorry.
23		if we might. Can you please turn to tab 17.	23		The first paragraph?
24	A.	Yes.	24	Q.	Yes, sir. And if you look on your screen, it
25	Q.	Okay. This is a document marked FX-85, and it	25		might help you locate it.
		THE REPORTING GROUP			THE REPORTING GROUP
		Mason & Lockhart			Mason & Lockhart
		3247			3249
1		contains both a memo and an e-mail. And I think	1	A.	Oh, yeah. Okay.
2		we'll start with the e-mail on the very last	2		I see that, yes.
3		page.	3	Q.	Okay. Did you write that?
4	Α.	The very last page?	4	_	I wrote that, yes.
5	Q.	Yes, sir.	5		Okay. And you wrote that to whom?
6	Α.	Ending with 391?	6	_	I think I wrote that back to Nap Caldwell.
7	Q.	Yes, sir.	7	_	Okay. And if you look at the bottom of the page,
8	Α.	I'm here.	8	٠.	it's listed Options. Do you see that?
9	Q.		9	۸	Yes.
	Œ.	, ,			
10		bottom of the page I'll give you a moment to	10	ų.	And the first option says, quote, be forthright
11		review it; but it's entitled, subject line,	11		about the results of the Flint River Drought
12		Thoughts, and then in all caps, FOR YOUR EYES	12		Protection matrix. Do you see that?
13		ONLY. Do you see that?	13		I see that.
14		I'm sorry okay. Okay.	14	_	And did you agree with that?
15	Q.	Do you recall an e-mail exchange with Mr. Cliff	15	_	I agreed, yes.
16		Lewis, Dr. Gail Cowie, and Mr. Napoleon Caldwell	16	Q.	And you believed it was important to be
17	_	in February of 2012, sir?	17	_	forthright about the application of the matrix?
18	A.	We must have some have had some discussion on	18	A.	I believe it is correct to be forthright.
19		this.	19	Q.	Okay. Sir, may we please turn to tab 18.
20	Q.	At the very bottom of the page there's a	20	A.	Yes.
21		reference to Ag permitting. At this point in	21	Q.	This is a document designated as FX-88, and it's
1		time, sir, did you believe that EPD was issuing	22		entitled Wei's Modifications. And then there is
22		time, sir, did you believe that Er b was issuing			
22 23		permits in the red and yellow zones of the Flint	23		a parentheses, it says, 18 February, 2012. Do
			23 24		a parentheses, it says, 18 February, 2012. Do you see that?
23	Α.	permits in the red and yellow zones of the Flint		Α.	
23 24	A.	permits in the red and yellow zones of the Flint River Basin?	24	A.	you see that?
23 24	A.	permits in the red and yellow zones of the Flint River Basin? I'm not aware of that.	24	A.	you see that? I see that.

3253

TRIAL - November 21, 2016 (Vol. XIII) 3252 3250 Q. Okay. Did you prepare this document? Q. Okay. And did you also have a piece of A. I don't believe so. 2 2 information that suggested suspending irrigation Q. Anyone else named Wei at EPD? 3 near Ichawaynochaway Creek would indeed benefit A. Not that I'm aware of. streamflow? Q. Okay. Can I ask you to read the last -- the A. I don't recall a specific study on that. 6 second-to-last paragraph on this page entitled 6 Q. Isn't that what it says in the first sentence of 7 Wei's Modifications. 7 the paragraph you just read? 8 A. The second to the last paragraph? 8 A. I'm not sure that was referencing a study --9 **Q.** Yes, the one that begins, along those Q. Okay. 10 tributaries. 10 A. -- or a speculation. I'm not sure. 11 A. I have it. 11 **Q.** But --12 Q. Okay. In February of 2012, Dr. Zeng, did you 12 A. Let me clarify. Sorry. 13 believe that there were some tributaries of the 13 Even though this thing is titled Wei's 14 Flint River that would experience flow benefits 14 Modifications, I really don't have any 15 if agricultural irrigation were suspended? 15 recollection of modifying it or -- and I believe 16 A. I think it depends on where the acreage is 16 this was not from -- that this file was not 17 relative to the streamflow. So it's hard to --17 collected from my file. 18 Q. Okay. Turn to tab 19, please, sir. This is a it's hard to determine where the acreage and the 18 19 benefit of the acreage removal would benefit the 19 document designated as FX-904. I'll give you a 20 20 moment, sir, to review this e-mail. I want to streams. 21 **Q.** Okay. Would there be any acreage anywhere in the 21 pay particular attention to the paragraph that 22 22 Flint River Basin where suspension of begins, so the third element of the series. 23 agricultural irrigation would benefit streamflow 23 A. I see that. 24 24 in February of 2012? **Q.** Okay. There's a reference to the work that Wei 25 A. Now, if the acreage can be pinpointed to a 25 and Menghong did? Who is Menghong? THE REPORTING GROUP THE REPORTING GROUP

3251

A. He's a member of my unit.

Q. In the hydrology unit?

A. Yes. 3

Q. Okay. Do you recall performing any work in 4

Mason & Lockhart

5 February of 2012 to evaluate whether there was

6 streamflow -- streamflow benefits of suspending

7 irrigation, sir?

8 A. I think -- are you referring to the one that 9 Menghong and I did or something else?

10

Q. I'll ask my question again. Did you and

11 Mr. Menghong -- Dr. Menghong perform any analysis

12 to evaluation the streamflow benefits of

13 suspending agricultural irrigation in February of

14 2012?

15 A. We probably did.

16 Q. And what do you recall about the conclusions you

17

23

18 A. I think this is the one that I referenced earlier

19 on Spring Creek. So the well level was at the

20 threshold or below the threshold. So we looked 21

at the well level as a good indicator for the 22 stream to cease to flow. And we believed the

level at that time would indeed be below the

24 threshold so that suspension of irrigation will 25 not help the groundwater level, which in turn

> THE REPORTING GROUP Mason & Lockhart

1 specific location where there's -- there's been 2 streamflow, then it's possible.

Mason & Lockhart

3 **Q.** And my question was was there any such location

in the entire basin where suspension of Ag 4

5 irrigation would benefit streamflow?

6 A. I did not have enough information to give you an 7 answer.

Q. Okay. Did you ever do any analysis in February 8

9

A. We looked at certain places. We looked at the 10 11 groundwater levels, and we looked at some

12 streamflows, yes.

13 Q. Okay. And did you look at Spring Creek?

14 A. We did.

15 **Q.** And what was your conclusion at Spring Creek?

16 A. The -- Spring Creek there's a -- there's a pretty

17 good indicator. There's a well right next to the 18 stream. And we observed the historic data, and

there seems to be a threshold. So when the

19 20 groundwater level falls below that very level,

21 then Spring Creek becomes -- then the flow at

22 Spring Creek ceased to flow. So we know that.

Q. So --23

24 A. So that was one piece of information that we had 25

THE REPORTING GROUP Mason & Lockhart

3256 1 would sort of indicate a dry stream anyway. 1 impact on surface water flows this year. Q. Okay. You looked at Spring Creek. What other 2 2 Do you see that, sir? 3 locations in the Flint River Basin did you look 3 Α. Where is that? **Q.** The second paragraph, first sentence. 5 A. I don't recall specific locations; but I do A. I see that. 6 recall an overall -- an overall modeling work 6 Q. Okay. You didn't have the data to support that 7 which is to look at the entire amount of impact 7 statement; did you? 8 but not specific streams other than Spring Creek. 8 A. Well, I did not have the data to say that it 9 Q. And did this overall conclusion lead you to tell 9 would definitely be a benefit. 10 your colleagues at EPD that if we suspend 10 Q. And you didn't have the data to say that it 11 agricultural irrigation, it's not going to 11 wouldn't be a benefit? 12 matter; it's not going to influence streamflow? 12 A. I didn't have the data. 13 Is that what you said? 13 Q. You didn't know either way? 14 A. No. We don't have -- well, the overall and the 14 A. I didn't know either way. 15 specifics are at different geographic levels. So 15 **Q.** Did you see this before it went out? 16 16 A. I probably did. one is you look at the entire basin. The other 17 one is you look at specific streams or 17 Q. Did you tell anybody that you don't have the data 18 18 sub-watersheds. And so we did not have to support this? 19 information detailed enough for us to zoom in 19 What we -- we had a discussion. We had an 20 20 from the -- from the large basin with the internal discussion about this. And so, yes, 21 21 exception of Spring Creek where there is an they were aware of the information. 22 indicator. 22 **Q.** And the internal discussion with whom? 23 Q. Okay. Mr. Caldwell writes, we cannot make a 23 A. With staff. Q. Did you talk to Director Turner? 24 similar assertion elsewhere in the Flint, either 24 25 because we don't have the data or the data we 25 A. I'm not sure I spoke -- specifically talked to THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3255 3257 1 have do not support the conclusion. 1 him about this; but there was internal staff 2 2 Do you know which one of those contingencies discussion. 3 3 was actually occurring? **Q.** We're talking about just the hydrology unit? A. We don't have enough detailed enough data to tell No. It would be -- it would be beyond the 4 4 5 us that there would be a benefit. 5 hydrology unit. 6 **Q.** So you could not say that there would be a 6 Q. Okay. Did you do anything to communicate to 7 7 Director Turner that the information in this benefit. Could you say there wouldn't be a 8 8 benefit? press release is not accurate? 9 A. There was just not enough information for us to 9 A. I'm not sure the information provided here could 10 10 say, I think, one way or the other. be characterized as inaccurate. So for the 11 11 **Q.** So you couldn't say one way or the other? streams that ceased to flow, for those streams 12 A. I couldn't say. 12 that ceased to flow, that is accurate. For those 13 Q. All right. Let's look at the next exhibit, 13 streams that are still having some flow, but at 14 tab 20. 14 the edge, I'm not sure. So we don't have 15 MR. QURESHI: Mr. Walton, if we could 15 information to say there would be a benefit. 16 just leave this on here and put tab 20 side 16 Q. You only looked at Spring Creek? 17 17 Α. We did. by side. 18 BY MR. QURESHI: 18 You didn't look at any other stream? 19 **Q.** Are you ready, Dr. Zeng? 19 A. We looked at the entire basin. 20 A. Yes. Thank you. 20 Q. And what did you conclude? 21 21 **Q.** This is a press release marked JX-69. I would A. Well, we looked at the entire basin. We know 22 22 that -- the amount of impact; and we don't have like to direct your attention to the first 23 23 information specific enough to detail locations. sentence of the second paragraph, and in 24 particular the conclusion that invocation of the Q. Dr. Zeng, does EPD still use the drought matrix? 24 25 Drought Protection Act would have a negligible A. I don't think so. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3258 3260 1 Q. Okay. What new matrix does it use? A. That's correct. 2 A. There are gages that we can look at; and we have 2 Q. And if you turn with me to tab 23, you might 3 a -- we have a general drought indicator that we 3 recognize the document there as the Surface Water 4 publish. Availability Assessment, designated JX-148. 5 Q. And whose job is it to do that? 5 Α. I see that. A. That -- that functionality resides in my unit. 6 Q. And am I correct that the assessment was 7 Q. Okay. Do you make recommendations? 7 undertaken to evaluate the availability of water 8 A. Well, we constantly update the information. And 8 to meet demands without depleting flows below 9 if we see information that is -- that's turning 9 certain identified federal or state thresholds? 10 toward the adverse hydrologic conditions, I will 10 A. Well, the objective of the assessment is to look 11 certainly alert the different levels of 11 at the amount of available water as provided by 12 management. 12 Mother Nature and then to look at water use as we 13 MR. QURESHI: Your Honor, I'm ready to 13 understood it. And sometimes we overestimate 14 move to another topic. But I can also take a 14 that. And then to look at whether or not there's 15 break if -- I have about another hour, I 15 enough water to meet both demand and some set of 16 think. 16 in-stream flow threshold or initial -- initial 17 SPECIAL MASTER LANCASTER: Whatever 17 threshold that we -- that I designated. 18 18 suits you. Q. Okay. And I want to focus on this part because I 19 MR. QURESHI: I would like to get some 19 think that's important, the threshold part. 20 20 water, if I may. A. Okay. 21 21 **Q.** Before we get to the threshold part, instances in SPECIAL MASTER LANCASTER: Sure. 22 22 MR. QURESHI: Thank you. which the flows fall below the thresholds, those 23 SPECIAL MASTER LANCASTER: Why don't we 23 are called resource gaps; is that right? 24 24 Α. take a break. That's how I define them in the technical work, 25 25 (Time Noted: 10:11 a.m.) yes. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3259 3261 1 (Recess Called) 1 Q. Okay. And the thresholds that you referred to, 2 2 (Time Noted: 10:24 a.m.) those are consistent with Georgia state policy on 3 3 MR. QURESHI: Thank you, your Honor. maintaining minimum flows for surface water, sir? A. I think that is not a correct characterization. 4 BY MR. QURESHI: 4 5 5 **Q.** Dr. Zeng, I would like to move on to a different The policy was used in permitting, and it was 6 6 topic now, and that is your involvement in state used in permitting municipal and industrial 7 7 water planning resource assessments. facilities. So the way it works is the facilities would need to have a measure so that 8 A. Yes. 8 9 Q. You described this involvement in paragraph 76, 9 they don't affect the threshold. And so for --10 10 which is on page 27 of your direct testimony. so that's what the policy was intended for. 11 11 And you explain that the hydrology unit of EPD Now, when I directed the resource assessment, 12 12 provides technical analysis and modeling to I had to have a threshold against which I could 13 13 support statewide water planning efforts. Is compare the modeling results. And because of the 14 that correct? 14 lack of more solid information on that front, I 15 A. That's correct. 15 borrowed the -- I borrowed the policy for this 16 Q. And this work includes modeling for hydraulic --16 purpose. 17 17 Q. Okay. I appreciate that clarification. That's hydrologic resource assessments that are a major 18 part of the planning process; is that right? 18 very helpful. 19 A. That's correct. 19 So the policy provides a threshold for 20 Q. And resource assessments are evaluations of 20 permitting purposes, and you decided to use that 21 21 whether water resources are sufficient to meet in conducting your resource assessment? 22 22 water demands; is that right? Α. For -- yes. 23 23 A. In the very general sense, yes. **Q.** And that policy that applies to permitting, 24 Q. In 2010 EPD conducted a statewide surface water 24 that's called Georgia's Interim In-stream Flow 25 25 availability assessment; is that right? Protection Strategy? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3262 3264 1 A. Policy. Florida's -- I'm sorry -- Georgia's Department of 2 2 Q. Policy, right. Natural Resources was critical of the use of the 3 Interim In-stream Flow Protection Policy? 3 7Q10 threshold to protect streams? Did you know A. That's correct. Q. And the In-stream Flow Protection Policy contains 5 A. Vaguely. 6 a different threshold depending on whether a 6 Q. Okay. Well, let's turn to that. May I please stream is regulated or unregulated? 7 direct you to tab 25. It's a document designated 8 A. Well, I think a part of that is -- in fact, the 8 as FX-36. Have you seen this document before, 9 policy contains three different types of -- three 9 sir? 10 different types of -- three options, I would say, 10 A. I have. 11 three options. And so there's an option that 11 Q. Okay. I would like to direct you to the 12 calls for monthly 7Q10 or natural flow, whichever 12 Executive Summary and request that you read the 13 13 first paragraph, focusing on the sentence that 14 And there is a second one which is a 14 reads, Georgia's present policy protects 15 site-specific study which says you have a 15 streamflow, and read that all the way to the end 16 16 specific site and that at that site there's a of the sentence. 17 value. Either it's ecological, biological or 17 A. I see that. 18 other type of value that people can identify at 18 **Q.** Okay. Sir, you mentioned that you were vaguely 19 that location. And so there needs to be a study 19 familiar with this document. When you picked the 20 20 for that that's a site specific option. 7Q10 threshold for the resource assessments, did 21 21 And then there is a third option which has to you know that the 7Q10 was not intended to 22 22 establish flow conditions for aquatic organisms? do with annual average flow, and there you do 23 23 have a separation between regulated and Well, when I picked the option here, I wasn't 24 24 unregulated. really considering the aquatic resources because 25 25 **Q.** Okay. So let me make sure I understand this. I think the -- all of these thresholds -- all of THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3263 3265 1 The policy provides for three levels of 1 these thresholds, regardless of the option, they 2 threshold. One is the 7Q10. One is the site 2 are some sort of a statistical threshold from an 3 specific. And one is the average annual 3 existing dataset; right? So they don't 4 discharge; is that right? address -- they actually don't address any 5 5 A. It's not three levels. It's three options. specific issues at specific locations. 6 **Q.** Three options. 6 And the reason I picked one is because this 7 7 A. Right. is the starting point of a long and evolving 8 **Q.** And the option that you picked in doing the 8 planning process. I had no intention of keeping 9 9 resource assessment was the 7Q10? one threshold there forever because we are moving 10 A. The monthly 7Q10 or inflow, whichever is lower. 10 toward -- I was talking with the council members, Q. Okay. Can you tell us what a 7Q10 is? 11 11 the regional planning council members, about 12 A. Right. A 7Q10 is one type of low flow measure. 12 establishing site-specific criteria, about having 13 13 It's -- so if you have 100 years of data -- 100 them help us identify the values that need to be 14 years of data, seven-day average data, and you 14 protected. I said this numerous times with the 15 15 council members in numerous council meetings. would pick the lowest in each year. And then you 16 go from the lowest to the 90 -- to the 90th 16 And so my intent is to have that 17 lowest. So you would ignore 10, go to the 10th 17 site-specific criteria established throughout 18 lowest, which kind of have 9 points above it, but 18 the state. And so what I chose was only a 19 10 points below it. So that is the monthly --19 starting point. It was only a -- a very early 20 that is the 7Q10 concept on an annual basis. 20 benchmark against which we can evaluate the model 21 And this thing can be done for each month. 21 simulations. 22 That way you have a flow threshold that is 22 Q. I understand that, sir. And, again, the date of 23 23 roughly between 90 percent of the points and 10 the document we're reading is 1995. You did your 24 percent of the points. 24 resource assessment when? 25 25 Q. Okay. Sir, you were aware that as early as 1995 2009 or 2010, I believe. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3268 1 Q. Okay. Can you turn with me to the next page and 1 diluting discharge wastewater purpose. 2 read the sentence that begins, many states have 2 Q. Okay. Sir, can you now turn with me to page 27. 3 developed. 3 Α. Page 27. 4 A. Which page? Q. Okay. I request that you read the concluding 5 **Q.** The very next page. Roman numeral II is at the 5 paragraph of this 1995 document. 6 hottom. 6 Which is the concluding paragraph? The very last 7 Which paragraph? 7 8 **Q.** The very top of the page, the first sentence that 8 **Q.** Yes, sir. It begins with, as aquatic systems 9 begins, many states have developed. 9 continue to be impacted. 10 We'll highlight it for you. It might make it 10 I see that. 11 easier. 11 Okay. And my question is when you were preparing 12 A. Oh, I see. I see that. 12 the resource assessment, did you have any 13 **Q.** And my question is when you picked the 7Q10 13 deliberations with your colleagues about picking 14 threshold for the resource assessment, did you 14 a different threshold? 15 know that other states had developed 15 Α. We had. 16 16 comprehensive in-stream flow policies? **Q.** And you decided to use monthly 7Q10? 17 A. Well, I was aware of alternatives, yes. 17 Α. Well, we had internal discussions; and we also 18 **Q.** Okay. Please turn with me to page 3 of this 18 had exchanges with a -- what we call scientific 19 document. It's numbered page 3. 19 and engineering advisory panel. We invited 20 A. Yes. 20 scientists around the state, around the country 21 21 Q. And can you please read the first sentence of the actually to help us guide us on determining 22 22 second paragraph -streamflow protection and thresholds. And I was 23 A. Starting --23 the one who asked the panel, you know, what to **Q.** -- there? 24 24 use. And I wasn't given a specific -- I wasn't 25 25 given a specific answer. The answer was always a A. -- while it is critical? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3267 3269 Q. No, sir. Starting with, there is clear 1 wide range of options, and each one having to do 2 2 consensus. with something, and another one having to do with 3 3 A. I'm not following you. Sorry. something else. 4 Q. I may have the wrong page number, but on my 4 So that is why I say I started the process 5 5 version it's page 3 of FX-36. with an option that I chose; and I never intended 6 6 A. Roman III? for that to be cast in stone. I always intended 7 **Q.** No. It's the actual arabic 3. 7 for this to be the starting point in the evolving 8 A. Oh, I'm sorry. 8 process. 9 9 Q. Understood. Oh, yes, I'm here. 10 Q. Okay. So it's the second paragraph; and it 10 And we are moving -- we're always moving towards 11 11 states, there is clear consensus. Can you please site specifics. If there are habitats along 12 read that paragraph, sir. 12 specific locations, specific regions of the 13 13 A. I see that. rivers, we like to identify those. I would like Q. Okay. At the time you picked the 7Q10 threshold, 14 14 to know, and I would like to have those as the 15 did you know that that was designed to limit 15 basis of our future assessments. 16 concentration of pollutants rather than to 16 Q. Are you finished, sir? 17 protect aquatic habitat? 17 Α. Yes. 18 A. Well, let's make a distinction between 7Q10 and 18 Q. Okay. Thank you. I want to go back to that 19 monthly 7Q10. I'm aware that 7Q10 is for the 19 resource assessment. But before we get to that, 20 purpose of NPDES discharging treated wastewater. 20 I want to take a little detour and look at a 21 21 I'm aware of that. journal article that you published behind tab 4 22 22 Q. Okay. entitled Investigation of Uncertainties in 23 23 A. But monthly 7Q10's are higher usually than the Surface Water Resource Assessment of Georgia's 24 annual 7Q10's, and they also provide seasonality. 24 State Water Plan. That's FX-908. 25 So I'm not sure we can say monthly 7Q10's are for 25 Did you say tab 4? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

		TRIAL - November	21, 20) 16 (V	(ol. XIII) Florida v. Georgia
		3270			3272
1	Q.	24, sir.	1	A.	That is one of many, yes.
2	A.	Oh, I'm sorry.	2	Q.	Okay. And the 2506 is the one listed here, sir?
3		I'm here.	3	A.	That's just for that day, yes. That's for one
4	Q.	Okay. And based on my reading of page 229, I	4		day, yes.
5		understand that the purpose of the article was to	5	Q.	Okay. It could be higher. It could be lower.
6		address concerns from stakeholders regarding	6		But you have highlighted 2506 as an example?
7		uncertainty in the resource assessment process	7	A.	For that day, yes.
8		and results. Is that is that accurate?	8	Q.	Okay. And you have also identified the
9	Α.	That is correct.	9		percentage of time that the flow regime the
10	Q.	Okay. And based on the study that's published	10		modeled flow regime falls below that particular
11	-	here, you have a tremendous amount of confidence	11		target. Is that correct?
12		in the surface water resource assessment that	12	Α.	I think I need to rephrase that, if I may.
13		uses the 7Q10 monthly thresholds?	13	_	Certainly.
14	Α.	I don't think that is a correct characterization	14	Α.	The simulated so 12 percent of the time for
15	۸.	of this paper.	15	Α.	12 percent of the time the simulated flow using a
	0	• •	16		
16	Q.	Okay. Can you turn with me to page 236 of the			very conservative overestimated demand water use
17		paper?	17		data would have the simulated flow being lower
18	_	Yes.	18		than the flow regime as I decided what the flow
19	Q.	And I would ask you to read the section under	19		regime was. Right?
20		Summary and Conclusions and the very you're	20		But that but that also means that there is
21		welcome to read the entire section. But I'm	21		88 percent of the time when there is not a gap.
22		focused on the first paragraph under Summary and	22	Q.	Okay. Thank you for rephrasing that. So these
23		Conclusions and the last sentence.	23		are modeled results; is that fair?
24	Α.	I see that.	24	A.	That's correct.
25	Q.	Okay. Is that a true statement at the time you	25	Q.	Okay. And has EPD done any work to identify

3280 1 A. Yes. to take a moment to read that Section 2.5. It 2 Q. Okay. And you were involved in the modeling to 2 carries onto the page 52 as well. 3 support this Flint River Basin Regional Water 3 A. I see it. Development and Conservation Plan? 4 Q. Okay. Sir, in the page 51 near the bottom of the 4 5 A. Involved in, yes. 5 page it says that, expanded drought year 6 Q. Okay. May I ask that you turn to page 16 and 6 irrigation will worsen the situation. Reduced 7 read the paragraph that begins on the bottom of 7 irrigation will improve it. Do you agree with 8 16 and carries over to the top of page 15 -- 17, 8 9 please. 9 A. Well, certainly irrigation has an effect on 10 A. I see that. 10 streamflow. 11 **Q.** Okay. Did you play any role in preparing this 11 **Q.** And the particular statement that's written here, 12 particular section? 12 that if you expand drought year irrigation it 13 A. I -- I'm not sure I played a role in this. This 13 will make the situation worse; whereas, if you 14 seems to be a description of the criteria used to 14 reduce irrigation, it will improve it, do you 15 evaluate the modeling, but I'm not sure I had a 15 agree with that statement? 16 role in writing this. Α. Well, I think that depends on where you increase 16 17 17 Q. Okay. Can you please turn to page 129, sir. and where you reduce because -- because the 18 A. I'm here. 18 situation is different from place to place. In 19 Q. Okay. And there is a section on Spring Creek 19 certain places, if you expand, you don't see any 20 20 that begins on 129 and then carries over to the effect. In certain places if you reduce, you 21 following page. You're welcome to read as much 21 don't see a beneficial effect. So it's location 22 of it as you like. I'm focused on the first 22 specific. 23 sentence. 23 **Q.** Okay. And would you agree that there are 24 24 A. I see that. locations along the Flint River Basin where if 25 25 **Q.** Okay, sir. And if you look at the table on the you reduce or suspend irrigation, it will have a THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3279 3281 1 following page, it gives some context of the 1 benefit to streamflow? 2 description here which explains that the modeled 2 A. I agree, yes. 3 results indicate that criteria failed at very **Q.** Okay. And have you identified those locations? 3 4 high rates except in August and September. A. We actually have. 5 Q. Okay. Now, this report was issued in 2006 in Can you look at the table on 131 and tell us 5 6 what the criteria is for Spring Creek in August 6 March: is that correct? 7 and September? 7 A. Yes. 8 8 Q. Okay. And in March of 2006, the director of EPD A. Well, from the table, the criteria for lowest 9 monthly one-day minimum there is zero. 9 did not invoke the Flint River Drought Protection 10 Act? 10 Q. For August? 11 11 A. For August and September. A. Yes. But that -- that decision would not have 12 Q. Okay. And you would agree that a zero flow in 12 been made in February 2006. 13 any tributary to the Flint River is a bad thing? 13 Q. Okay. And I appreciate that. I'm just focused 14 A. It is a bad thing. 14 on whether it was invoked or not. 15 **Q.** And the criteria for June and July are less than 15 A. Well, my understanding is that that was a no. 16 1 cfs? 16 **Q.** And the same question with respect to 2007; was 17 A. That's what the table says. 17 the Act invoked? 18 Q. Okay. And even in those months, the criteria 18 A. It was not. failed in certain instances? 19 19 **Q.** Are you aware that after issuing this document in 20 March of 2006, EPD lifted its moratorium on 20 A. Yes. 21 Q. Okay. Can we flip back to page 51 of this 21 irrigation permits? 22 particular document, JX-21, sir. 22 A. I'm aware of that. Yes. 23 A. I'm here. 23 Q. Okay. And you're also aware that at that point 24 **Q.** Okay. And I'm interested in the section entitled 24 in time it started issuing backlogged permits? 25 Conclusions About Safe Yield. So you're welcome 25 A. I'm aware of that. But I'm also aware that those THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3284 1 are mostly in the so-called green areas that we 1 your direct testimony, you claim that you 2 identified as having the least amount of impact. 2 analyzed two USGS streamflow gages on the 3 Q. Sir, may I invite you to turn to tab 27. This 3 Apalachicola River and observed a decline in is a letter from the United States Department of 4 incremental flow from 1972 through 2012. Is that 4 5 Interior Fish and Wildlife Service to Mr. Rob 5 right? 6 McDowell of Georgia EPD. Do you know 6 A. That's what the graph shows. 7 Mr. McDowell? 7 Okay. And by incremental flow, sir, do you mean 8 A. Yes. 8 the amount of additional water added to the 9 Q. Okay. And what's his position with EPD? 9 Apalachicola because of precipitation in the 10 A. I -- at this time I think he was -- he was the 10 Florida portion of the basin? 11 Flint River plan coordinator. I think that was 11 A. That's correct, the portion of the precipitation 12 his position. 12 that falls in the Florida part of the basin that 13 **Q.** Okay. Can you please turn to page 7 of this 13 is converted into streamflow. 14 letter. And I will invite you to read the first 14 **Q.** You also say in paragraph 158 of your testimony 15 paragraph at the top of the page, sir. 15 that you're unaware of any explanation offered by A. Yes. First paragraph on page 7? 16 Florida as to the cause of this incremental flow 16 17 17 Q. Yes, sir. decline. Is that correct? 18 A. Okay. 18 A. That's correct. 19 **Q.** The one that is under a section entitled Water 19 Q. And to do your analysis and reach your 20 20 Conservation in the Flint River Basin. conclusions, you relied on USGS gage 21 A. I see that paragraph. 21 measurements? 22 22 Q. Okay. Did anyone ever tell you that the United A. Well, it was an analysis. I'm not sure there was 23 States Fish and Wildlife Service determined in 23 a conclusion. But, yes, I relied on USGS data. 2006 that the roof for the Flint River Basin was 24 24 **Q.** So the analysis you did relied on USGS gage data? 25 leaking in some places quite badly? 25 A. That's correct. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3283 3285 1 A. Did anybody tell me? 1 **Q.** And the gage data is taken from specific 2 **Q.** Had you ever heard that? locations along the Apalachicola, sir? 3 A. That's correct. 3 A. I have not heard that analogy. Q. And the two gages you analyzed were at 4 **Q.** Okay. You're the person who has the most 5 knowledge and experience regarding the hydrology 5 Chattahoochee and Sumatra? of the ACF Basin, and you were unaware that the 6 6 A. That's correct. 7 Fish and Wildlife Service had made that analogy? 7 Q. And you're aware, sir, that in 2016 the USGS A. Well, this was -- this letter was dated 8 8 noted anomalies in measurements of flow between 9 January --9 Chattahoochee and Sumatra? **Q.** 2006. 10 A. I'm aware of that. 10 11 A. -- 2006. 11 Q. Okav. 12 12 A. But I'm also aware that they qualified the So this letter was dated January 2006. And 13 13 problematic area, the error, which was between it was the time before I became manager and 14 before I became chief hydrologist of the state. 14 the 1990 -- mid-1990 to 2002. They said some of 15 I was a staff engineer at the time. So you're 15 the high flows were not gaged correctly during 16 right; nobody told me about this specific 16 that period, 1994, I believe, to 2002. 17 17 Q. If we turn to tab 28, that might refresh your argument. 18 **Q.** Okay. You -- you view this as an argument? 18 recollection about the exact dates. It's FX-515. 19 A. Well, this is a statement. This is a statement. 19 It's a letter from the U.S. Geological Survey to 20 Q. And in your 10 years plus at EPD, you were 20 the Northwest Florida Water Management District. 21 21 unaware of this statement? And in the second paragraph, they refer to rating 22 22 changes made during 1990 through 2002. Do you A. I'm unaware of this statement. 23 Q. Sir, I would like to now move on to another 23 see that? 24 topic. And that topic is Decline in Incremental 24 A. I see that. 25 Flow. In paragraph 154 at pages 54 and 55 of 25 Q. And, sir, are you also aware that the USGS has THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart Page 3282 to 3285 of 3491

TRIAL - November 21, 2016 (Vol. XIII) 3290 3292 1 the highlighted paragraphs. Q. But there was no restriction on your ability to 2 2 A. I see that. 3 Q. Okay. You agree that the climate division data 3 Α. There was no restriction. That's correct. you used is less modern than the gridded data? Q. And the debate you're referring to, that's not a 5 A. I disagree for the -- not for this purpose. 5 debate that NOAA is having? 6 Q. Okay. And do you know that NOAA has determined 6 A. Well, that's a debate that people in the 7 that gridded data has better quality and coverage 7 profession are having. 8 8 Q. But not people who work for NOAA? than climate division data? 9 A. That depends on the purpose, again. That depends 9 Well, I don't know that. 10 on the type of analysis you do. 10 Q. All right. We just read their official 11 Q. And are you aware that the climate division data 11 statement; didn't we, sir? 12 that you are examining aren't even limited to the 12 A. Well, they didn't say that that climate division 13 ACF Basin? 13 data should not be used. 14 A. Well, climate division 4 and climate division 7 14 Q. Okay. Sir, can we please turn to paragraph 150 15 cover a large -- a majority of the drainage area 15 of your direct testimony. And that's on page 16 16 of the ACF Basin. 153. 17 Q. But they also contain counties that are not in 17 Paragraph 150? 18 18 the ACF Basin, sir? **Q.** Yes, sir, on page 53. Do you see that? 19 A. They also contain counties outside the ACF Basin. 19 A. I'm reading it. Yes, I see that. 20 20 That's correct. Q. Okay. Now, in this analysis, you don't present 21 **Q.** And they also omit some counties that are in the 21 any information on consumptive use for the other 22 ACF Basin? 22 rivers you identified here; have you? 23 23 A. Very small portions, yes. A. I have not. **Q.** And you present your analysis as annual average 24 24 **Q.** Okay. Was there any restriction on your ability 25 25 flows? to use gridded data? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3291 3293 A. Well, as I said, gridded data is a more spatially A. That's correct. 2 detailed data. So it goes beyond the rainfall, Not seasonal flows? 3 the rain gages, the rain stations. But there is 3 A. Not seasonal flows. 4 an ongoing debate about the use of gridded data 4 **Q.** Let's move now to your discussion of tri-state 5 5 because gridded data tends to overestimate the negotiations, in particular, paragraph 137. 6 low rainfall events. So there are times when the 6 That's on page 48. 7 stations are not recording rainfall. The gridded 7 A. 137? 8 data are saying we got rainfall. Okay. So there 8 **Q.** Yes, sir. It's an entire section on tri-state 9 is a debate about whether or not the gridded data 9 negotiations. But you're welcome to review as 10 10 is the best to use. much or as little as you like. 11 11 Α. The other side of the story is if you use the Yes. 12 12 Q. gridded data for the purpose that I'm doing here, Okay. You state in your testimony that in past 13 13 you will need to aggregate the gridded data, negotiations, Florida took several positions that made it difficult to ever reach compromise. 14 which means it's not lump average. You have to 14 15 15 A. That's correct. lump it together, the same way you would lump it 16 together as the climatic division data. 16 And you also say that Florida would never specify 17 Q. I appreciate that explanation, sir. My question 17 a scientifically0-justified water or flow level 18 was a little more basic. 18 that it believed it needed. Is that right? 19 A. Okay. 19 A. Well, they didn't provide the -- the kind of flow 20 **Q.** And that question was was there any restriction 20 threshold that are supported by scientific 21 21 on your ability to use NOAA gridded data? evidence that can be implemented by the Corps. 22 22 Q. And I believe you testified earlier that you A. Well, as I said it before -- as I said before, we 23 23 have questions. Because of the ongoing debate would want information from technical experts; 24 within the community about gridded data, I chose 24 that if it came from lawyers, it wouldn't count? 25 25 not to use that. That's not what I meant. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

- 1 Q. Okay. Well, so regardless of who presented the
- 2 data, you would be open to reviewing it?
- 3 A. That's right.
- Q. Okay. Do you know who former Secretary of DEP
- David Struhs is?
- 6 A. I do.
- 7 Q. Okay. Did you review his direct testimony in
- 8 this matter?
- 9 A. I did not.
- 10 **Q.** Okay. Did you review his trial testimony in this
- 11 matter?
- 12 A. I did not.
- 13 **Q.** Did you review his deposition testimony?
- 14 A. I did not.
- 15 Q. Okay. What kind of investigation did you do
- 16 before making statements about the tri-state
- 17 negotiations in your testimony?
- A. My experience as part of the negotiation team. 18
- 19 **Q.** Okay. And what about before you joined EPD, the
- 20 negotiations going back to the '90's, what
- 21 analysis did you do of those?
- 22 A. Well, I was aware -- I was aware of the
- 23 negotiations back then. And after I came on
- 24 board, I was part of the team that -- that
- 25 supported the negotiations, the chief negotiators

Q. Okay. Why don't we look at tab 33. Perhaps that

will help. It is a document labeled FX-199.

- 3 Have you seen this document before, sir?
- A. I'm not sure. This does not look familiar.
- Q. Okay. So your investigation prior to submitting
- 6 your testimony did not include any review of
- 7 something like this?
- 8 A. I did not review this.
- 9 Q. Okay. If you turn to page 4, there is a
- 10 discussion attributed to do Bob Kerr. Do you
- 11 know who Mr. Kerr is?
- A. Yes. 12
- 13 Q. Who is he?
- 14 A. He was -- I think he was the chief negotiator
- 15 representing the State of Georgia --
- 16 Q. Okay.
- 17 A. -- in the ACF Compact negotiations.
- 18 **Q.** And I'll invite you to read the statements
- 19 attributed to Mr. Kerr on pages 4 and 5.
- 20 A. I see that.
- 21 **Q.** Okay. Sir, when you prepared your testimony in
- 22 this matter, were you aware that Georgia had
- 23 indicated during negotiations that it would not
- 24 agree with the consumptive limit?
- 25 A. I -- well, as staff engineer, I vaguely -- I was THE REPORTING GROUP

Mason & Lockhart

3295

- 1 from Georgia. So I'm aware of some of the 2 proposals.
- 3 **Q.** Okay. Are you aware of the proposal in FX-212
- 4 behind tab 31?

5

- This is a letter from Mr. Doug Barr of the
- 6 Northwest Florida Management District to Harold
- 7 Reheis of Georgia EPD. And my question for you,
- 8 sir, is have you seen this letter previously?
- 9 A. I have not seen this letter, but I do know that
- 10 the discussions in the late 1990's did result in
- 11 the set of flow requirements that are actually in
- 12 a proposal.
- 13 **Q.** Let me turn you now to tab 32, the memorandum at
- 14 FX-215 from Mr. Nolton Johnson to Harold Reheis.
- 15 You know who Harold Reheis is. Right?
- 16 A. Yes.
- 17 Q. Do you know who Mr. Nolton Johnson is?
- 18 A. Yes.

21

- 19 Q. Did you review this memo before you prepared your
- 20 direct testimony? A. I did not.
- 22 Q. Okay. Do you know of any demands that Georgia
- 23 made during the negotiations before you became 24 part of EPD?
- 25 A. I'm not sure what you mean by demands.

THE REPORTING GROUP Mason & Lockhart

- 1 vaguely aware of that.
- 2 **Q.** But you made no mention of that fact in your
- 3 direct testimony?
- 4 A. I did not.

7

- 5 Q. Okay. Thank you very much, sir.
- 6 SPECIAL MASTER LANCASTER: Mr. Primis?
 - MR. PRIMIS: Thank you.
- 8 We have some demonstratives and some
- 9 exhibits of our own. May I approach?
- 10 SPECIAL MASTER LANCASTER: Yes.
- **EXAMINATION** 11
- 12 BY MR. PRIMIS:
- 13 Q. Dr. Zeng, just picking up on that last line of
- 14 questioning about the tri-state negotiations, can
- 15 you look at paragraph 137 of your testimony.
- 16 A. Yes.
- 17 Q. In the fourth line, Mr. Qureshi might have missed
- 18 it, but does it say, throughout your interactions
- with Florida? 19
- 20 A. That's correct.
- **Q.** Is that what your written testimony was about? 21
- 22 Α.
- 23 Q. Did Mr. Qureshi show you any documents from your
- 24 interactions with Florida that contradict what
- 25 you said here?

THE REPORTING GROUP Mason & Lockhart

3297

3298 3300 1 A. No. A. I have -- I am a registered professional 2 2 Q. Now, Dr. Zeng, I would like to take a step back hydrologist with the American Institute of 3 and put in context what it is that you do for the 3 Hydrology. 4 State of Georgia. What is your current position? Q. Is that an easy organization to get admitted to? 5 A. I am manager of EPD's hydrological analysis unit, 5 A. It's not. It's selective. 6 and the unit is sometimes referred to as the 6 MR. PRIMIS: Your Honor, we did a 7 hydrology unit. So in that role, I'm sometimes 7 demonstrative. It's in tab 1. And to try to 8 referred to as the chief hydrologist of the 8 make this easier -- I know it's hard to find 9 state. 9 these demonstratives sometimes -- I have put 10 Q. Dr. Zeng, how long have you been doing that? 10 each demonstrative in its own tab. So 11 A. I have been in this position for 10 -- more than 11 demonstrative 1 is tab 1. 12 10 years. 12 SPECIAL MASTER LANCASTER: Thank you. 13 Q. And you have been at EPD how long? 13 BY MR. PRIMIS: 14 A. I have been in EPD since 2000, so 16 years. 14 Q. And, Dr. Zeng, can you just identify what the 15 **Q.** Now, we have had a number of hydrologists in this 15 three topics that you plan to cover in your 16 16 case come and testify. So it's been a good case testimony today are. 17 for the hydrology business. Can you tell the 17 A. Yes. I would like to offer the Court my 18 Court what your understanding is of what a 18 knowledge in mostly three areas. The first one 19 hydrologist does? 19 is Georgia's consumptive use, and the second one 20 20 A. Right. What a hydrologist does is to study the is the operation of the federal reservoirs in the 21 21 movement of water within the natural and human ACF Basin, and the third one is our analysis of 22 22 environment. hydrologic changes in the basin. 23 23 Q. **Q.** You mentioned you have a unit that does this. Dr. Zeng, let's start with consumptive use which 24 24 And how many people are in that unit? we've got up there. We have heard a lot about 25 A. I have six staff members, so including myself, 25 consumptive use. Mr. Qureshi asked you a few THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3299 3301 1 seven people. 1 questions about it. How do you define 2 2 **Q.** And you have a Ph.D., Dr. Zeng; is that right? consumptive use as the chief hydrologist for 3 3 A. That's correct. Georgia? A. Well, consumptive use in the basin really is the 4 **Q.** How many other people in the hydrology unit at 4 5 5 Georgia EPD also have doctorate degrees? amount of water that people remove from the 6 6 streams or the water bodies without returning A. I have four other Ph.D. holders in my unit in the 7 7 areas of hydrology, civil engineering, back. So -- so in that sense, it's a consumptive 8 environmental engineering, and hydrogeology. 8 loss. 9 Q. How would you describe the level of expertise and 9 ${\bf Q.}\;\;$ Dr. Zeng, is consumptive use something Georgia 10 10 technical knowledge of that group? tracks in the ordinary course? 11 11 A. This is a highly-trained, highly-professional A. That's correct. 12 12 **Q.** Why do you do that? group. 13 13 **Q.** What are your specific responsibilities as chief A. Well, we do that because consumptive use -understanding of the amount of consumptive use is 14 hydrologist? 14 15 A. My chief responsibility is to study anything that 15 the building block in understanding hydrology in 16 has to do with hydrology, with managing of water 16 the basin and understanding how well we're 17 resources, and with the analysis of the Corps 17 managing the resources. So that is the -- that 18 operations of the reservoirs within the State of 18 is the cornerstone of our understanding. So we 19 Georgia. 19 need to track that, and we do that. 20 20 Q. Dr. Zeng, can you tell the Court where you got As your position as chief hydrologist, do you 21 21 your Ph.D. and what it's in? have confidence in Georgia's understanding of how 22 22 A. I received my Ph.D. degree back in 2000 from the much consumptive use actually occurs on Georgia's 23 23 University of Georgia in forest resources but side of the basin? 24 24 focusing on hydrology and water resources. Α. I do, very much. 25 Q. Do you have any professional certifications? 25 How do you -- how does Georgia know how much THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

1 consumptive use is occurring within its borders? 2 A. Well, because we track hundreds of withdrawing 3 and returning facilities, these facilities report 4 their water use, both withdrawing activities and 5 discharging activities, to the agency on a 6 monthly basis. And also because we have an 7 agriculture metering program providing readings

from thousands of irrigation systems. And so we

- 9 have -- we have this data. We're very 10 comfortable, we're very confident that we have 11 captured the water use.
- 12 Q. Let's talk about now the total amount of 13 consumption in Georgia because it's been a 14 hotly-disputed fact. And I want to get your 15 views as a Ph.D. hydrologist and the chief 16 hydrologist of Georgia. Did you put together a 17 demonstrative that shows your understanding of 18 Georgia's consumptive use?
- 19 A. I did.

24

25

8

- 20 MR. PRIMIS: Your Honor, we have that a 21 tab 2.
- 22 BY MR. PRIMIS:
- 23 **Q.** And, Dr. Zeng, can you explain what tab 2 shows.
- 24 A. Yes. Tab 2 shows the annual average amount of 25 consumptive use that took place in the Georgia

THE REPORTING GROUP

Mason & Lockhart

1 cfs, when compared with the long-term average of 2 21,000 cfs, that is a percentage between 4 and 5.

3 Q. Dr. Zeng, did you prepare another demonstrative

4 that -- and these are in your written testimony.

I just want you to explain them clearly for the

6 Court. Do you have a second demonstrative that 7 talks about the consumptive use in Georgia?

8 A. Yes.

9

12

Q. Can you turn to tab 3 of your book. This is 10 demonstrative 3 in our book and demonstrative 2 11 in your testimony.

Can you tell the Court what is depicted here?

- 13 A. Yes. What is shown here is within the year, how 14 consumptive use, that takes place. Now, we 15 know -- we do know that especially for the 16 agricultural water use part, there's a 17 seasonality in it. So water use is higher in the 18 summer month but lower in the winter -- in the 19 winter -- in the colder month. There's also a 20 seasonality associated with municipal and 21 industrial water use, but not -- not so much as 22 the agricultural part.
- 23 Q. Again, focusing on the magnitude, what does this 24 chart tell you about the magnitude of the 25 consumptive use within Georgia in the ACF on a THE REPORTING GROUP Mason & Lockhart

3303

1 monthly basis?

- 1 part of the ACF Basin from 1994 through 2013.
- 2 **Q.** What are the green portions and the blue 3 portions?
- 4 A. The blue portions represent municipal and 5 industrial consumptive use, while the green 6 portion represents the agricultural consumptive 7 use.
- **Q.** What does this chart tell us on an annual basis 8 9 about the magnitude of the consumption within 10 Georgia?
- 11 A. This chart is telling us that outside the drought 12 years, the total amount of consumptive use on an 13 annual basis is around 500 cfs. And to put this 14 number in perspective, 500 cfs in comparison to 15 the long-term average state line flow of 21,000 16 cfs, 500 cfs is 2.5 percent.
- 17 **Q.** And what about in the dry and drought years, what 18 does this show about consumptive use on an annual 19 hasis?
- 20 A. In the drought years, the total amount of annual 21 average consumptive use would be higher than the 22 normal levels; but they have never gone beyond 23 900 cfs on any average basis.
 - Now, we can still look at the 900 cfs with a perspective of the long-term average. And 900

THE REPORTING GROUP

Mason & Lockhart

- 2 A. Well, this is -- this is telling us that, for
- 3 example, the January water use, the January total
- 4 amount of consumptive water use is around 200
- 5 cfs. And, for example, the December number, the
- 6 consumptive use -- average consumptive use for 7
- the month of December is lower than 400 cfs. 8 Now, there are a few months in the summertime
- 9 that do have higher monthly water use. But
- 10 they -- they have never gone beyond 1400 cfs.
- 11 Q. Dr. Zeng, you've got these two bars, blue and
- 12 green. And can you just tell the Court how you
- 13 calculate or how you collect the data that allows
- 14 you to say what the blue means for M & I
- 15 consumptive use?
- 16 A. The M & I, municipal and industrial, water use is
- 17 calculated by totaling all of the water use --
- 18 all of the withdrawals from the withdrawing
- 19 facilities, and then subtracting all of the
- 20 treated and return flow into the system. So the 21 difference between the two is the municipal and
- 22 the industrial consumptive use.
- 23 **Q.** And how good is your data in terms of municipal
- 24 and industrial use?

Our data are very comprehensive. They're all THE REPORTING GROUP

Mason & Lockhart

25

3305

3306 3308 1 high quality. **Q.** What is the -- what is the highest amount that Q. Why? 2 2 Georgia -- that Florida has said Georgia has 3 A. Well, because we keep tracking them; and we have 3 consumed in terms of consumptive use of water? A. It looks like it's beyond 5,000 cfs. hundreds of systems reporting them. And we have 4 5 various programs in the agency that track them 5 How does that 5,000 compare with the numbers that 6 and QA/QC them. 6 you believe Georgia actually uses? 7 Q. And, Dr. Zeng, can you describe at a high level 7 Well, in comparison to the average -- to the 8 how you collect data to determine the green bar 8 average number that we use in a normal year, 9 for agricultural use? 9 that's 10 times as large as our number. In 10 A. For agricultural water use, we have stated 10 comparison to the annual average drought year of 11 earlier today, that we have the Ag metering 11 900, this is more than five times as much as what 12 program. And the Ag metering program actually 12 we have collected in comparison even to the 13 collect data, the actual water use, from the 13 monthly high, which was around 1800. This would 14 individual systems. Now, from the individual 14 be three times as much. 15 systems we can know the average application 15 Q. Dr. Zeng, without -- this was a subject of some 16 depth. That's the amount of water applied to 16 of the other expert testimony; but from your 17 those systems and their corresponding acreage. 17 perspective as Georgia's chief hydrologist, can 18 Then we can estimate with all the wetted acreage 18 you just explain to the Court why you believe 19 what the total amount of water would be. So 19 that a high level -- why this number is so much 20 20 higher than what Georgia estimates? that's the general process. 21 21 Α. **Q.** And, Dr. Zeng, just to put a point on it, why do Right. I believe there were several reasons for 22 22 you believe Georgia's estimates for consumptive these numbers to be extremely high. For example, 23 23 use are correct, given all the numbers floating the inclusion of the aquifers that do not 24 24 around in this case? connect, that are not connected with the streams; 25 A. Well, we -- I believe this is correct because all 25 that's one. And then the fact that groundwater THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3307 3309 1 of these data were collected from thousands of 1 pumping, even from the connected aquifer, was 2 facilities and instances in the -- across these 2 counted as one-on-one -- one-to-one reduction in 3 months and years. It's based on -- it's based on 3 streamflow, which is not supported by scientific 4 instrumentation, measurements by instrumentation 4 evidence. And then there is also double-counting 5 5 from all these facilities. in Florida's methodology. 6 Q. Dr. Zeng, do you know that -- I think you do know 6 Q. Dr. Zeng, is it even possible for Georgia to 7 7 that in this case Florida has put forward its own consume as much water as Florida is suggesting, 8 8 estimates of Georgia's consumptive use. Correct? as high as 5,000 cfs? 9 A. I'm aware of that, yes. 9 A. It's not -- it's not possible. 10 **Q.** And have you actually read the work that was done 10 **Q.** Have you seen in this case any estimates by 11 by Florida and its experts to make those 11 Florida of how much 5,000 cfs could support in 12 12 determinations? terms of water use? 13 13 A. I have. A. I have come across a demonstrative from Florida. **Q.** Let me show you a slide. It's the next tab. 14 14 Okay. Let me turn you to the next tab. And this 15 15 is tab 5. And what we have at tab 5 is a It's tab 4. So Zeng demonstrative 4. And this 16 16 demonstrative that Florida created and used in an was a slide that was used in Florida's opening 17 17 expert deposition. I believe it was statement. And the header for this slide says, 18 even using extremely conservative assumptions --18 Mr. Singarella. And they have actually made it 19 not just conservation, extremely conservative --19 an exhibit in the case. They have it on their 20 there is no doubt that Georgia's upstream 20 exhibit list, FX-518. Can you explain to the 21 21 consumptive use of water has exploded since the Court what Florida is saying about the impact of 22 22 1970's. 5,000 cfs consumptive use? 23 23 And do you believe that these estimates here Α. It looks like Florida is saying that 5,000 cfs 24 24 is enough to support the drinking water of 19 are extremely conservative, sir? 25 Α. 25 million people, at the same time to support No. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3312 1 farming irrigation of close to 4 million acres of 1 detail. 2 2 But coming back to the consumptive use data, 3 Q. Dr. Zeng, does Georgia have 19 million people and 3 does Georgia actually use or rely on this data 4 4 million irrigated acres in the ACF Basin? that you put together? 5 A. Nowhere near that. Α. Yes. 6 Q. And are you aware that Dr. Sunding, Florida's 6 Q. How? 7 economist who was here and testified last week, 7 Georgia uses this data to evaluate its management 8 8 he's proposed certain options or scenarios, he of the resources -- of water resources. Georgia 9 calls, that he said could generate up to 2,000 9 used this data to do its state and regional water 10 cfs in peak streamflow periods? Are you aware of 10 planning. Georgia used this data to communicate 11 that? 11 with the Army Corps of Engineers to help them 12 A. I'm aware of that, yes. 12 manage the river reservoir system. Georgia 13 Q. What would happen if the Court were to order --13 provides this data to the U.S. Geological Survey 14 say, Sunding, let's do this 2,000 scenario. What 14 for their five-year state water use reports and 15 would be the practical impact of that on Georgia? 15 Georgia provides this data to the ACF Stakeholder 16 16 Could it even be accomplished? Group for their modeling and for their developing 17 A. It just cannot be physically accomplished because 17 the Sustainable Water Management Plan. 18 18 that number is more than our total consumptive **Q.** Dr. Zeng, you said that you share your data with 19 use. 19 the Army Corps and with the United States 20 20 Q. Well, he also had a 1500 cfs option -- a mixture Geological Survey, both federal agencies; 21 of options at 15. What would happen if that were 21 correct? 22 22 ordered; could Georgia deliver that in the middle A. Correct. 23 of a severe drought? 23 **Q.** And has either of those agencies or any of their 24 A. Well, 1500 is a -- it's over 80 percent of our 24 personnel ever come to you and said, your 25 highest monthly consumptive use. 25 consumptive use looks like it's about 2-1/2 times THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3311 3313 Q. 15 or -- I'm talking about 1500 now. 1 too low? 2 A. Yes. 1500 is over 80 percent of the highest 2 Α. No. 3 Q. Has anybody ever come to you with the types of monthly water use that we have. So it -- I don't 3 4 believe it's practical. 4 numbers that Florida has proposed in this case 5 5 and said, you guys are way off; this is where you **Q.** Now -- and, Dr. Zeng, we're going to come back to 6 6 really are? this. But let's say we cut almost all of 7 7 A. No. Georgia's water use, as Dr. Sunding would have 8 8 the Court do. Where would -- whatever water Q. And has Florida presented you, as the chief 9 happened to get saved at whatever level, where 9 hydrologist with a Ph.D. in hydrology, with any 10 10 would that go in the middle of a severe drought? information that causes you to say, you know 11 11 A. In the middle of a severe drought, that water what, I think our numbers are just wrong; and we 12 12 have to go redo them all? certainly would flow down the river and 13 13 A. No. ultimately into Lake Seminole. But then does it 14 flow across the state line? That depends on what 14 **Q.** You said you're familiar with the ACF Stakeholders? 15 the Corps does on the Chattahoochee side. 15 A. That's correct. 16 So under a low flow or drought operation 16 Q. Okay. And that's a group we discussed quite a 17 where the Corps is operating to provide 5,000 cfs 17 bit here in court. I think you know that? 18 into the Apalachicola River, the Corps will 18 A. Yes. 19 19 simply reduce the release from the upstream MR. PRIMIS: Your Honor, we have the 20 20 reservoirs on the Chattahoochee branch. In Sustainable Water Management Plan, GX-1325 at 21 21 effect, the two branches of the river would tab 15; but I believe the Court has its own 22 22 provide the same amount of water, 5,000 cfs, for copy. But if you don't have it handy, you 23 23 that project to provide 5,000 cfs into Florida. can go to tab 15. 24 24 BY MR. PRIMIS: Q. Okay. I don't want to get ahead. That's our 25 second topic, so we'll come back to that in more 25 Q. And, Dr. Zeng, I want to start in that document THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

		TRIAL - Novembe	21, 20	16 (V	ol. XIII) Florida v. Georgia
		3314			3316
1		at page 2.	1		the unimpaired flow dataset. Do you remember
2	A.	The summary, page 2?	2		that?
3	Q.	Page 2. It's the section called Development of	3	A.	Yes.
4		The Plan in the first paragraph.	4	Q.	And recall it was there was a 2012 report
5	A.	Yes.	5		and it's in the binder that you were presented
6	Q.	And can you read that starting where it says,	6		with from a Dr. Georgakakos. Right?
7		ACFS worked closely read it to yourself; and	7	Α.	Yes.
8		then I'm going to ask you a question about it, in	8	Q.	From Georgia Tech. Right?
9		particular the first sentence.	9		Yes.
10	Α.	Yes.	10	Q.	And I think it's important because I don't think
11	Q.	So what do you understand ACFS to be saying here	11		the questions were always clearly delineated. Is
12		when it said that they worked with state and	12		there a difference between unimpaired flow data
13		federal agencies to compile the best available	13		and your consumptive use data?
14		water withdrawals and return data?	14	Α.	There certainly is a difference.
15	Α.	I believe that statement certainly describes the	15	_	Can you explain that?
16		data that we provided them.	16		Yes. The water use data is basically as we
17	Q.	•	17		presented. It's the Georgia part of the
18	Α.	, , ,	18		consumptive water use, municipal, industrial,
19	_	And Georgia provided it?	19		agricultural. The unimpaired flow data is
20		That's correct.	20		synthetic data that takes the water use data
21	_	Now, did ACFS present its own estimates of	21		back. So the unimpaired the term unimpaired
22	Q.	Georgia's consumptive use in this document?	22		means this is an attempt to get to what Mother
23	^		23		
24	A.	I believe they did for the basin, not just Georgia.	24		Nature has provided. So that's in that sense, it's called unimpaired. So the water use data is
	^				·
25	Q.	Can you turn to page 28. That's GX-1325.	25		incorporated into the unimpaired flow data. And

TRIAL - November 21, 2016 (Vol. XIII) Florida v. Georgia 3318 3320 1 the ACFS Stakeholders Group. Correct? A. That's correct. A. Correct. 2 2 **Q.** And does the Army Corps use this evaporation from 3 **Q.** And three years later when the ACFS Stakeholders 3 small impoundments in its estimates? published GX-1325, the Sustainable Water 4 A. They don't. 5 Management Plan, what dataset did they use to 5 **Q.** Last topic, Dr. Zeng, before lunch. Do factors 6 evaluate water use in the basin? 6 other than Georgia's consumptive use affect the 7 A. The -- well, water use, it was based on --7 amount of streamflow in the ACF Basin? A. Yes. 8 **Q.** I'm sorry. What did they -- did they use the 8 9 unimpaired flow dataset to evaluate modeling in 9 Q. What types of things affect streamflow? 10 the basin? 10 A. The amount of rainfall that falls in the basin, 11 A. They did. 11 the pattern with which it falls, and the Corps' 12 Q. And which model did they use? 12 operation of the facilities, and issues like the 13 A. They used ResSim. 13 incremental flow within Florida that's been 14 **Q.** Is that the Army Corps' model? 14 declining in the past 40 years. All these 15 A. That's correct. 15 factors would affect streamflow in different 16 16 **Q.** And have you seen any testimony in this case ways. 17 about what Dr. Georgakakos and his colleague 17 **Q.** Would the back-to-back nature of a drought --18 18 consecutive years of drought also affect Dr. Kistenmacher said about whether it's 19 appropriate to use the unimpaired flow dataset 19 streamflow? 20 20 for modeling? A. Absolutely, yes. 21 21 A. I have. **Q.** Dr. Zeng, is Georgia's consumptive use in your 22 view a major factor affecting state line flow 22 **Q.** And what did they say? 23 A. They said for the purpose of comparing 23 into Florida? 24 24 A. It's not. alternatives in operation and alternatives in 25 management, it's appropriate to use the 25 **Q.** What do you believe is the most important factor? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3319 3321 1 unimpaired flow data. A. That would be the Army Corps of Engineers' 2 2 Q. One last point, Dr. Zeng. You were also asked operation of the system. 3 about small impoundments. Do you remember that? 3 **Q.** And what about in dry years; is that the case? A. In dry years that's absolutely the case. 4 A. Yes. 5 **Q.** And these are those small farm ponds potentially 5 **Q.** And what about in wet years? 6 that exist in the basin? 6 A. In wet years it matters less because we all know 7 A. That's correct. 7 in wet years the percentage of Georgia's water 8 **Q.** Why doesn't Georgia EPD include evaporation from 8 use is even smaller in comparison to the wet year 9 those small impoundments in its consumptive use 9 type of flow. 10 estimates? 10 MR. PRIMIS: This is probably a good 11 11 A. Well, there are several reasons. The small place to break for lunch, if it's okay. 12 12 SPECIAL MASTER LANCASTER: Thank you. impoundment, it collects water; and it evaporates 13 13 We'll be in recess. water at different times of the year. And also, 14 the impoundment actually provides data -- it 14 (Time Noted: 11:52 a.m.) 15 shifts the timing of the water. So it collects 15 (Recess Called) 16 water in the wetter part of the year and puts 16 (Time Noted: 12:54 a.m.) 17 water in the storage for use in the drier part of 17 MR. PRIMIS: Good afternoon, your Honor. 18 the year. So in a sense, this is like a 18 BY MR. PRIMIS: 19 reservoir. It changes the timing and actually 19 **Q.** Good afternoon, Dr. Zeng. 20 reduces the summertime streamflow reduction. 20 A. Good afternoon. 21 21 So the farmers use the storage, and that Q. Dr. Zeng, I want to turn now to the second 22 actually reduces the streamflow depletion during 22 category of your testimony and talk about the 23 summertime. 23 role of the federal reservoir system in the ACF

3322 3324 1 **Q.** The Corps has come up a number of times Statement. 2 throughout the proceedings here. Can you tell 2 **Q.** Dr. Zeng, is that a thorough document? 3 us; do you have firsthand knowledge of Corps It is. It is a 4,000, 5,000 page document. 4 operations in the ACF Basin? Right. We have it here in the courtroom. It's 5 A. Yes. four binders double-sided. Does that sound 6 Q. Can you describe that for the Court. 6 riaht? 7 A. Yes. Through the years that I was with EPD, I 7 Α. Yes. 8 have worked with the Corps in its operation of 8 Okay. Does -- can you describe the process that 9 the federal reservoirs in the system. And myself 9 the Corps goes through to put together that four 10 and my staff, we were trained by the Corps to 10 to 5,000-page operating manual and environmental 11 understand their operations and also to 11 impact statement? 12 understand how to use the model to simulate their 12 Α. Yes. The Corps started this process by working 13 operations. 13 with the stakeholders, different states, 14 And I have had numerous exchanges with the 14 different interests across the basin, collect 15 Corps staff discussing specific aspects of the 15 their comments, their scoping comments and other 16 16 reservoir operations. In fact, we and other comments, and then formulate different 17 stakeholders provided the Corps with the input on 17 operational alternatives, how to operate the 18 how they would shape their operation plans. 18 reservoirs appropriately to meet authorized 19 Q. Dr. Zeng, I was just going to ask you why do the 19 purposes. They also analyzed the water supply 20 20 scenarios, different ones, how do you evaluate state and federal governments coordinate on water 21 21 resource management in the basin? those and what are the impacts of those. And 22 22 A. Right. The federal reservoirs belong, and then they did a very thorough technical analysis. 23 23 they're operated by a federal agency here, the And they documented the analysis in the document 24 24 Army Corps of Engineers. But the water -- the that we're talking about. 25 water is state water. And so the state has an 25 Q. What role does U.S. Fish and Wildlife play in THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3323 3325 1 interest in understanding how the Corps operates 1 this Army Corps manual update process? 2 the system because that affects the state. And 2 Α. When the Corps developed the so-called preferred 3 also, for example, Lake Lanier is the major water 3 action alternative, this is the one that they 4 supply source to the metro Atlanta area. So the 4 recommend to be adopted as the new Water Control 5 5 state has a high interest in how the system --Manual. They would seek a formal consultation 6 with the U.S. Fish and Wildlife Service. And the how the federal reservoirs are operated by this 6 7 7 Service would look at the alternative and then federal agency. 8 **Q.** You mentioned that there were rules that govern 8 make a determination of whether or not the plan 9 9 Corps operations. Right? would -- would have an impact on the endangered 10 10 A. That's correct. species. 11 11 **Q.** And are you familiar with those? **Q.** Is that called a biological opinion? 12 12 A. I'm very familiar with those. A. That's correct. 13 13 Q. Who does Georgia rely on to understand and advise Q. Okay. Now, we have had a lot of biological 14 the state on the operation of the Army Corps' 14 opinions in the courtroom; and I'm not going to 15 rules? 15 reintroduce them here. But is there just one 16 A. That would be myself and my staff. 16 biological opinion, or have there been multiple? 17 **Q.** Now, is there a set of documents that governs 17 A. There are multiple versions of them. 18 what the Corps does and how it operates in the 18 Q. Are you familiar with the current operating rules 19 basin? 19 for the Revised Interim Operating Plan? 20 Α. Yes. 20 Α. I am, yes. 21 21 **Q.** Can you describe what those documents are. Q. And did Fish and Wildlife issue a biological 22 A. The most comprehensive one would be the one that 22 opinion on that plan? 23 23 the Corps published in October of 2015. And this Α. They issued two, one in 2008 and another one in 24 is the Army Corps of Engineers Water Control 24 2012. 25 **Manual and the Draft Environmental Impact** 25 Q. And what did Fish and Wildlife say about the THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3328 1 RIOP? 1 And along the Chattahoochee River, there is a 2 2 A. Well, they concluded that the operation as the series of federal reservoirs starting with the 3 Corps put forward does not jeopardize the 3 most upstream one which can -- which happens to 4 continued existence of the species and that the be the one owning the largest amount of storage, 5 plan the Corps has does not adversely impact the 5 about two-thirds of the storage in the basin. 6 designated critical habitat. 6 And that's in Lake Lanier. Coming down, further 7 **Q.** And with regard to the DEIS that we have seen 7 downstream, there's the metro Atlanta area in 8 from 2015, is there a biological opinion 8 between -- between Lake Lanier and the next one, 9 associated with that one? 9 which is Lake West Point. And West Point here 10 A. There is one, yes. 10 and Walter F. George here, they combine -- they 11 Q. And when did that come out? 11 have one-third of the system's storage. And 12 A. That came out, I think, a month ago or a couple 12 George Andrews is just a lock and dam. So it 13 of months ago. 13 doesn't have meaningful storage. And Jim 14 Q. Did that reach the same conclusion as prior 14 Woodruff here that impounded Lake Seminole, it 15 biological opinions? 15 has limited amount of storage; and it regulates 16 16 A. It did. flow into Florida. 17 17 Q. Now, Dr. Zeng, I want to put up a demonstrative So a decision about the Corps flow is made at 18 18 of a map of the basin. It's tab 6 in the book. this project. And that project determines how 19 And Dr. Shanahan was here, and he talked through 19 much flow goes into the Apalachicola River. 20 20 this map to some extent. But as the chief Q. Okay. Dr. Zeng, the -- there's been testimony 21 21 hydrologist who has been working on this basin that there are specially authorized purposes for 22 22 for 16 years, can I ask you if you would describe these reservoirs and dams. Can you explain that? 23 23 to the Court where the reservoirs are and how you Specially authorized --24 24 view their operations. **Q.** What are the Congressionally-authorized purposes 25 25 MR. PRIMIS: And, your Honor, I think it for these aquifers? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3327 3329 1 might be easiest for Dr. Zeng to go to the map. 1 A. Right, right. These projects serve a number of 2 SPECIAL MASTER LANCASTER: Fine. 2 Congressionally-authorized purposes. And these 3 3 MR. PRIMIS: And we, hopefully, have him purposes include flood control, water supply, 4 miked up so he can be heard over there. water quality, navigation, recreation, and fish 5 and wildlife conservation. 5 THE WITNESS: I'll try. 6 6 A. Do you have the pointer? **Q.** And hydropower, too? 7 7 **Q.** Just keep your voice up. A. And hydropower generation. 8 8 THE WITNESS: Your Honor, can you hear Q. Okay. So how does the Corps figure out when it 9 9 operates these reservoirs what purpose it will me? BY MR. PRIMIS: 10 10 serve at any given point in time? 11 11 A. There is a complicated set of rules determining **Q.** Okay. Dr. Zeng, can you describe how the 12 12 reservoirs work together on this map. what kind of flow is released into the 13 13 A. Yes. Here is a schematic, a map of the basin. Apalachicola River and what kind of flow support 14 And the blue lines here represent the rivers, and 14 is provided from -- from the upstream reservoirs 15 the blue globs here represent the reservoirs. So 15 all the way down to Jim Woodruff. So there's a 16 if we look at the western part of the basin, that 16 set of rules. 17 is the Chattahoochee River that flows down here, 17 **Q.** Dr. Zeng, we'll come to those rules in a moment. 18 forms the state line between Georgia and Alabama, 18 But I just want to ask you first, are the 19 continues to flow down. And then at the Jim 19 reservoirs operated as independent facilities or 20 Woodruff project, there is the state line between 20 do they work together? 21 21 Georgia and Florida. There is the state line Α. They are operated as an integrated system. The 22 22 between Alabama and Florida. And then this one Corps would use a word that's called a tandem 23 23 on the eastern part, this is the Flint River that operation. A tandem operation means a lower 24 flows into the Lake Seminole that is impounded by 24 reservoir makes releases, but then it is 25 the Jim Woodruff Dam. 25 supported in turn by the releases from its THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3333

2220

3

15

16

17

18

19

23

2

1 immediate upstream reservoir. And that one is in
2 turn supported by the one upstream of it. So
3 that's called a tandem operation.

- 4 Q. Now, when you say supported by releases, what5 does that mean?
- 6 A. That means all the storage in the basin is
 7 treated as one. It's treated as one. And then
 8 when the lower projects are short of water, it is
 9 supported by releases or replenishment from
 10 upstream projects.
- Q. Okay. Dr. Zeng, I would now like to focus on a
 single reservoir and have you explain to the
 Court how the Army Corps views a single
 stand-alone reservoir.

And we have a demonstrative at tab 7. We can put it on the screen. And this comes right from JX-124, which is the Draft Environmental Impact Statement at page 2-28.

And, Dr. Zeng, can you explain how the Corps divides up these reservoirs?

A. Yes. Here is a typical schematic of a reservoir and the storage behind the dam. So this -- that darker part represents the dam itself.

Now, the water stored behind the dam, the Corps puts them into three different layers.

THE REPORTING GROUP
Mason & Lockhart

1 rainfall and high flood coming into the system,

2 the system can then temporarily put that water in

the flood control storage so that the Corps does

4 not inundate and flood downstream entities.

That's flood control.

Q. Now, Dr. Zeng, I want to focus specifically on
 conservation storage, which you said is used for
 the Congressionally-authorized purposes.

9 Correct?

10 A. That's right.

11 Q. Does the Corps have rules that it uses to figure12 out when to release and when to store water in13 conservation storage?

14 A. Yes, the Corps does.

Q. Okay. Let's turn to the next demonstrative, tab 8. And this, again, is another diagram from the Draft Environmental Impact Statement from the Corps, JX-124, at page 2-35. And can you explain to the Court what this chart shows?

A. Yes. Let's focus on the flat part of the curve.
 The very bottom one is the one that we just saw.
 This is the bottom of conservation pool, and

below it is the inactive. But we're talking

about just the conservation pool itself here.
 And so if we look at the top of it, there's

THE REPORTING GROUP

Mason & Lockhart

3331

This lowest layer here is called the inactive storage. By the name itself, I think it's not hard to know the meaning of it. This -- this amount of water is inactive. It is not used in meaningful ways in the Corps day-to-day operation.

And above that there is another layer, and this layer here is called the conservation storage. A conservation storage contains the amount of water that the Corps works on a day-to-day basis to meet all of the purposes -all of the Congressionally-authorized purposes except flood control -- except flood control. So if we need to generate power, the water comes from conservation storage. If we need to support a downstream flow target for water quality purposes or for water supply purposes, that water comes from here. If there's water going into Florida, that water comes from here. And that's -- so that's basically how much water the Corps has to work with. **Q.** Okay. What's the top layer, flood storage, for?

THE REPORTING GROUP

conservation storage. Now, the purpose of that

is to leave that empty. And in the cases of high

A. The top layer here is the space above

Mason & Lockhart

1 the title that says Top of Conservation Pool.

This is the top of the storage that the Corps has

3 to work with. And between the top of

4 conservation and the bottom of conservation, the

5 Corps made a division of the conservation

6 storage. They made zones. They made action

7 zones. And when the elevation or the storage is

8 within each zone, the Corps has a somewhat

9 different operation to go with it. And if

10 they're in zone 1, that means the reservoir

11 system is healthy. There is plenty of storage.

12 The Corps can afford to have more aggressive

13 operations, meaning release more for storage. As

14 the storage declines from zone 1 into zone 2 or

15 3, the Corps operation turns to more and more

16 conservative, meaning they tend to store more.

17 They tend to release less. When they get into

18 zone 4, they will implement an operation that is

19 called a drought operation. So once the Corps is

20 in drought operation, the only flow that the

21 Corps is required to release into Florida into

22 the Apalachicola River would be the 5,000 cfs.

Q. And I think it's clear from your description, butjust to make sure I've got it, when the

reservoirs are full, they're in zone 1. And the

THE REPORTING GROUP

Mason & Lockhart

3334 3336 1 Army Corps can address all purposes; is that **Q.** And then that -- the fourth column, which shows 2 2 riaht? the release, which would occur at a particular 3 A. That's correct. 3 time of year and a particular zone depending on 4 Q. And in a drought, as the reservoir goes down and how much, say, rain there is in the system? that conservation pool declines, you end up in Α. That's correct. 6 zone 4 where they get more conservative and Now, you mentioned zone 4 was drought operations. 7 target the 5,000 at the state line? Α. 8 A. That's correct. 8 Q. And can you -- and is there also dry or low flow 9 Q. Now, are there -- this gets complicated; but are 9 conditions? 10 there then rules for how the Corps operates 10 Α. 11 within each of those zones? 11 Q. Can you describe the difference between low flow 12 A. Yes. 12 and drought and show where on the chart --13 Q. Okay. And I will -- this is -- I want to do this 13 Α. 14 at a high level. But let's go to tab 8 -- I'm 14 Q. -- the Army Corps would look in that situation? 15 sorry -- tab 9, which is again another chart from 15 Α. Yes. There is a role that represents the drought 16 the Army Corps' DEIS, JX-124. And this one comes 16 operations. So if you look at the first column 17 from page 2-71. And I -- can you just explain 17 title that says At All Times, just below the 18 what the title of this chart is? 18 December to February, and the second column says 19 And then I think maybe the easiest way to 19 here zone 4, that is the drought operation that 20 20 describe it is to go by columns, but I'll defer the Corps undertakes when they have their storage 21 21 to you because you're much more familiar. I do into the lowest layer. And when you look toward 22 22 the operational, the release, the Corps ask you though to keep it at a level where the 23 rest of us in the room can understand it. 23 defines -- it says 5,000 here. And then if you 24 A. Right. Right. 24 look at the fifth column which says how many you 25 25 So this is the table that the Corps has for can store, and then it says up to 100 percent of THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3335 3337 1 the minimum discharge from Woodruff Lock and Dam 1 basin inflow above 5,000. 2 by month and by based on inflow. So what this 2 So what this means is that when the Corps is 3 3 chart does is to place the Corps -- on an in drought operation, the Corps can put every 4 everyday basis it places the Corps on exact drop of water above 5,000 into storage to recover 5 5 location in this table so they can decide on that from the drought conditions. 6 6 Q. And what will the flow into Florida be at that day what to release. 7 7 Now, the factors that they consider point in time? 8 include -- the first is what I call seasonality. 8 Α. That would be 5,000 cfs. 9 9 O. I think they called it seasonality. Here the When does the Corps move to a position where it 10 10 first column they title that as month. So that will release more than 5,000 and go back to more 11 11 represents the seasonality. And then the second normal operations? 12 12 Α. column is called the Conservation Storage Zone. That would be when the Corps suspends its drought 13 13 This is when they look at the reservoirs; and operation, and that would be when the entire 14 they say, how much storage do we have? Are we in 14 system storage goes back from zone 4 all the way 15 zone 1 or 2 or 3 or 4? That's the storage that 15 to recovering to zone 1. 16 16 Is it possible to end up at 5,000 cfs even if they look at. 17 17 And then the third column says Basin Inflow. you're not in drought operation? 18 Now, this is the amount of water that comes into 18 That's possible, yes. Α. 19 the basin, comes into each one of the Corps 19 Q. Okay. Can you explain that? 20 reservoirs. This is how much water the Corps has 20 Α. Yes. There is what I call the low flow 21 21 to work with on the daily basis. operation. So even if you are not in the drought 22 22 So in combination of these three factors, the operation, if you have low basin inflow -- so in 23 23 Corps, then they place themselves into one of each category under the basin inflow column, we 24 see a division that's called less than 5,000, these cells or one of these lines; and that tells 24 25 25 less than 5,000, less than 5,000, and less than them what to release. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

TRIAL - November 21, 2016 (Vol. XIII) Florida v. Georgia 3340 1 5,000. So in the different seasonality even in 1 drought operations? 2 Α. the higher zones when basin inflow -- when basin 2 5,000 cfs. 3 inflow is below 5,000, the Corps is required to 3 Now, how long can drought operations last? 4 release 5,000 cfs, 5,000 cfs, 5,000 cfs. This is A. In this -- in this instance, the drought 5 the low flow operation. Under a low flow operation lasted from May of 2012, I believe, 6 operation the Corps is required to release only 6 through March of 2013. 7 5,000 cfs. 7 Q. And what happened in March of 2013 that caused it 8 **Q.** Dr. Zeng, have you in your experience actually 8 to go out of drought operations? 9 observed the Corps go into drought operations? 9 A. In March 2013 the system recovered to zone 1. So 10 10 the entire reservoir system became healthy again, A. I have, yes. 11 **Q.** And can -- would it help to explain how it works 11 and the Corps suspended its drought operations. 12 if we show another chart? 12 Q. Now, Dr. Zeng, if more flow comes into the 13 A. Yes, please. 13 reservoir system when the system is in drought 14 Q. Okay. Let's go to tab 10, which is demonstrative 14 operations or that low flow condition you 15 10; and the data here represented comes from 15 described, does that extra water go downstream to 16 16 GX-143. And, Dr. Zeng, can you explain to the Florida or does it go into storage? 17 Court what is on this chart behind tab 10? 17 A. It goes into storage. A. Right. This is what we call a hydrograph, and 18 18 **Q.** And why is that? 19 it depicts the flow that actually went across 19 Α. Well, because the Corps -- according to the 20 20 the state line in the year of 2012 starting drought operation rule, the Corps needs only to 21 21 release 5,000 cfs; and the Corps can put every January 1, 2012, all the way through December 31, 22 22 2012. So what is shown here that -- this blue drop of water above 5,000 into storage to recover 23 23 curve shows the amount of flow that goes through storage. 24 24 Q. Florida has contended that if Georgia would the state line and flowing into the Apalachicola 25 River. 25 simply reduce its consumption in drought, all THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3339 3341 1 So what is shown here is after the spring of 1 that extra water that is conserved would pass 2 2012, the Corps went into drought operation. The 2 through to Florida. Is that -- is that your 3 Corps started drought operation. They declared 3 view? 4 A. That's not true. that they would be operating under the drought 4 5 operation May the 1st. So they made that 5 Q. And what would actually happen? 6 6 A. What would happen is the Corps would put that determination, and they made releases after that 7 7 point to be very close to 5,000 throughout the extra water into storage and replenish storage 8 8 rest of 2012. during the drought operation. 9 ${\bf Q.}\;\;$ Dr. Zeng, there are some small bumps up in the 9 $\boldsymbol{Q}_{\!\boldsymbol{\cdot}}$ Another argument that's been made is that Lake 10 August and September time frame. Do you see 10 Seminole is just a pass-through facility and that 11 11 those? its run-of-river. Why doesn't that mean that 12 A. Yes. 12 conserved water just always passes through to 13 13 **Q.** Can you explain what those are? Florida? A. Yes. Every now and then there are local A. Well, the water coming into Jim Woodruff is from 14 14 15 rainstorms, local rainstorms that bring 15 two sources. One is the Flint. The other one is 16 unexpected water that would raise the elevation 16 from the Chattahoochee, which is supported --17 in Jim Woodruff Dam. And the Corps have safety 17 directly supported by releases from upstream 18 considerations. The Corps has safety rules that 18 federal reservoirs. So the inflow is a 19 require that they release more water to bring up 19 combination of the two. When you do have more 20 the tailwater elevation so that dam safety can be 20 water coming in from the Flint side, the Corps 21 maintained. 21 can effectively reduce the release --Q. Now --22 22 THE WITNESS: I'm sorry, your Honor. 23 23 A. Those events represent that condition. Can you hear me?

Q. And absent those kinds of conditions, what is the

approximate flow across the state line during

THE REPORTING GROUP

Mason & Lockhart

24

25

24

25

The Corps would reduce release from the

THE REPORTING GROUP

Mason & Lockhart

Chattahoochee side so that the combined water

3344 1 going into Jim Woodruff is just 5,000 cfs. Now, 1 think it's tab 7; but it's the map. 2 2 that is in effect putting that extra water into 3 storage by releasing less. 3 Where is Battle Bend? MR. PRIMIS: Battle Bend? 4 Q. Dr. Zeng, have you seen what you just described, 5 this offsetting, in practice? SPECIAL MASTER LANCASTER: Battle Bend. 6 A. Yes. 6 THE WITNESS: Battle Bend? I don't know 7 Q. Okay. Can I ask you to go to the next tab in the 7 that. 8 8 SPECIAL MASTER LANCASTER: You don't binder, which is tab 11. And this is a chart, I 9 believe, that was shown to Dr. Shanahan. And I 9 know? 10 want to ask if you can explain how this chart 10 THE WITNESS: No. 11 relates to this offset concept you just 11 SPECIAL MASTER LANCASTER: Okay. 12 described. 12 MR. PRIMIS: Any other questions? 13 A. Yes. So let me first explain what the curves 13 SPECIAL MASTER LANCASTER: No. 14 are. Again, this is a -- this is a 2012 flow 14 BY MR. PRIMIS: 15 chart, a 2012 hydrograph. And that starts from 15 Q. Okay. You can have a seat. 16 April 1st all the way to December 31st. And the 16 Now, Dr. Zeng, you were here during 17 blue curve here is the flow that goes into 17 Dr. Shanahan's testimony; is that correct? 18 Apalachicola River. And the orange curve here is 18 A. Yes. 19 the one that comes down the Flint River. And as 19 Q. Did you detect there was a change from his 20 20 we see, in the first oval, the flow in the Flint written testimony to the live testimony he gave 21 21 had a variation of roughly 2,000 cfs -- roughly here in court? 22 22 2,000 cfs up and down, up and down. And, yet, A. I did. 23 23 Q. And what did you -- what did you perceive? you cannot see any kind of corresponding change 24 24 in terms of releases the Corps made into the A. Well, I believe in his -- in his written direct 25 25 he said the amount of flow or the -- the amount Apalachicola River. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3343 3345 1 Similarly, we can see the same thing around 1 of flow coming from the Flint side or the added 2 the October, November time frame, where the flow 2 flow coming from the Flint side would be 3 in the Flint River fluctuated over 1000 cfs, 3 released; it would be passed through the Jim 4 maybe 1500, maybe close to 2,000 cfs; and, yet, 4 Woodruff project into Florida. And then when he 5 5 you don't see -- with an exception of this blip was shown that figure with the fluctuation in the 6 6 here, you don't see the Corps follow suit. You flow in the Flint River and with the lack of 7 7 don't see the Corps making a release that change in the release the Corps made into the 8 reflects the change in the flow in the Flint 8 Apalachicola River, I believe he changed his 9 River. So --9 story to, well, that amount is spread out. It 10 10 **Q.** Dr. Zeng, as a hydrologist, what does that ultimately came down to Florida. 11 11 **Q.** Did you hear him say something about there was a phenomenon tell you? 12 12 A. That tells me that the Corps has made a change in question of when, but not if? 13 13 its release in -- from the Chattahoochee side, A. Right. 14 from the federal reservoirs in the Chattahoochee 14 **Q.** And how does that relate to your testimony? 15 side so that the flow provided to the Jim 15 A. Well, if he -- if he -- what he said was if that 16 Woodruff project is just 5,000 cfs. That tells 16 water ultimately comes down, it's not coming down 17 me that when this flow goes up, they made less 17 at the right time. That seems to be the argument 18 release in the upstream reservoir to support Jim 18 that -- that we have been making. 19 Woodruff. 19 **Q.** And why is timing important when it comes to 20 Q. Okay. Thank you, Dr. Zeng. I think you can take 20 reservoir operations? 21 21 A. Well, because I think we are talking about timing your seat now. 22 22 SPECIAL MASTER LANCASTER: Excuse me. of flow, timing of increased flow that goes 23 23 MR. PRIMIS: Sorry. across the state line at the right time. 24 SPECIAL MASTER LANCASTER: Before you 24 And what is the right time and how does it get 25 25 return, Mr. Smith, would you put back -- I there? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3346 3348 1 A. My understanding is that the argument that Α. No. 2 Florida made was the right time is the 2 Q. Did you ever hear Florida propose a remedy during 3 summertime, and it's when the water use is cut or 3 those negotiations that did not include the Corps 4 the conservation of water is made. And that in some fashion? would be the time for flow to come back past the 5 Α. 6 state line into Florida. 6 Q. Okay. Now, I want to go back to the ACF 7 **Q.** Is that how the system works? 7 Stakeholder plan, which is tab 15, in the book. 8 8 It's GX-1325. And are you familiar with the A. That clearly wasn't something that we saw from 9 the Corps' real operation. 9 recommendations set out in that plan? 10 Q. Okay. Does the Corps favor any single project 10 Α. 11 purpose over another? 11 Q. And what do you perceive to be the most important 12 A. No. 12 recommendation that the ACFS Stakeholders made? 13 **Q.** There was a suggestion that the Corps would use 13 Α. The most important recommendations they made are 14 its discretion to favor fish and wildlife and 14 changes to the Corps operation throughout the 15 that purpose. Did you hear that testimony? 15 basin, different aspects; but all of them are 16 A. I heard that. 16 changing the Corps operation. 17 **Q.** And what is your understanding of how the Corps 17 Can I ask you to turn to page 4 of tab 15, page 4 18 18 works in that regard? of GX-1325. 19 A. Well, I believe the Corps operates according to 19 Α. I'm sorry -- oh, yes. 20 20 its operational plan, which has been blessed, And in particular on page 4, I want to focus on 21 21 which has been approved by Fish and Wildlife the first paragraph; and there are four bullet 22 22 Service. So -- so the Corps sticks to its plan; points underneath it. And can you just take a 23 23 and the plan meets the needs of endangered minute to read that to yourself, and then I'll 24 24 species. ask you the question. 25 25 Α. Dr. Zeng, to get a predictable or reliable Yes. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3347 3349 1 increase in flow into Florida during a drought, 1 Can you tell the Court what is the ACFS 2 2 what would have to happen? recommending with regard to U.S. Army Corps 3 A. What would need to happen is the Corps would need 3 operations here on page 4? Α. 4 to change its operation and to change those 4 The ACF Stakeholder recommended four actions on 5 5 numbers that we saw earlier in the operational the Corps side, and the first one being changing 6 chart. 6 one of the -- the reservoir topic of 7 Q. Based on your experience and familiarity with 7 conservation. That's a slight change that ACFS 8 Corps operations and how this basin works, is it 8 suggested. What it does is expands storage in 9 9 necessary to have the Corps involved in order to the reservoir system to make more storage 10 10 provide Florida a predictable and dependable flow available for meeting different purposes. 11 11 in excess of 5,000 cfs during droughts? And the second one they recommended is a 12 12 Α. change of the action zones in terms of tandem 13 13 **Q.** I want to briefly touch back on your role in the operation. We said this earlier, that the tandem 14 tri-state negotiations. And, again, we're not 14 operation really means how the upstream 15 15 talking about any mediation for the present reservoirs support the downstream reservoirs. So 16 16 they recommended the change there. proceeding. Okay? 17 17 And I think you said you were personally And the third one is they recommended 18 involved in negotiations with Florida? 18 changing the peaking power generation 19 A. That's correct. 19 requirement. The peaking power requirement 20 Q. And can you describe your involvement? 20 drives water out of the reservoirs. So the 21 A. My role was to provide technical analysis and 21 stakeholder wanted that part of the operation to 22 technical advice to the chief negotiator. 22 23 23 Q. And in connection with that work, did you ever And then the fourth element here is to 24 hear of a workable proposal that did not include 24 provide two pulse flows into the Apalachicola 25 25 a change to Army Corps operations? River. One is in May for two weeks, and the THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

TRIAL - November 21, 2016 (Vol. XIII) 3352 1 other one is in the month of July for two weeks. 1 talking about both how much rain falls, but also 2 2 Q. Dr. Zeng, when you take these four when it falls? 3 recommendations on Army Corps operations as a 3 A. That's correct. 4 package, just in laymen's terms, what is the Q. Okay. Can you turn to the next -- or to tab 12 5 group trying to accomplish with these in your book. And this is -- I believe this 6 recommendations? 6 chart appears in your written direct and comes 7 A. The group is trying to accomplish a balanced -- a 7 from GX-1042. 8 balanced approach, taking care of the interests 8 Can you -- I think the Court has seen this 9 of all of the stakeholders. 9 before from other witnesses; but you created it. 10 Q. And as it relates to storage and achieving 10 Can you explain what this shows? 11 purposes, what are they saying here in these four 11 Yes. First of all, let me explain what the 12 12 curves are. And so each curve represents the 13 A. They're saying the Corps -- the Corps' change of 13 monthly precipitation. And the -- the red curve 14 action is needed to achieve this balanced -- this 14 represents the period between 1975 and 2013. 15 balanced approach. 15 This is what I call the modern decade -- decades. 16 16 Q. Okay. Dr. Zeng, I want to turn now to the third And then there is the earlier decades, which 17 topic in your testimony; and that's something you 17 started from 1995 and all the way through 1974. 18 18 called natural hydrologic change. Correct? So I compared the rainfall patterns in those two 19 A. Yes. 19 periods to see if there are changes. 20 20 Q. Does Georgia study the natural hydrology of the And what did you find? Q. 21 21 ACF Basin? Α. Well, we found, indeed, there has been a change 22 22 A. Yes. in the rainfall pattern, especially when you look 23 Q. And what do you mean when you say natural 23 at the middle part of the year, which turned out 24 24 hydrology? to be the drier part and the part that -- that's 25 25 related to lower flow, usually in the year in Α. Well, we started by looking at the precipitation THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3351 3353

1 in the basin. And the precipitation in the basin 2 has certainly not been impacted by the human 3 activities in the State of Georgia. 4 Q. So why have you studied that? 5 A. Well, when we -- years ago we had -- we had come 6 across arguments about the change or the lack of 7 change in precipitation, but then the change in 8 streamflow. So there were a lot of discussions 9 about the change in streamflow. And naturally, 10 there is the question of why? All right. So why 11 was there these streamflow changes? Why have we 12 been observing these things? 13 And so we started looking into it, and the

right place to start certainly is rainfall.

15 **Q.** Did you do a study of changes in precipitation 16 over the last several decades?

17 A. Yes, we did.

14

18 Q. What did you look at?

19 A. We looked at the -- the rainfall that happens in 20 the basin; and also we looked at how the rainfall 21 happens, you know, within the year, how rainfall 22 happens in each month. So we look at that 23 pattern, what we call the intra-annual rainfall 24 pattern.

25 **Q.** Are you talking -- just to be clear, are you

19

2 **Q.** Well, by reference to the chart, can you just 3 tell us what it means when you see the blue line 4 significantly above the red line in June, July, 5 and August? What does that mean? 6 7

A. Yes. If we just look at the one on the right, this is the one for CD4, and in particular if we look at the month of July, we're seeing that for the modern decades, for the past four decades, we're seeing a -- a once every 20 year type of drought. Once every 20 year type of drought, and you would see a rainfall of 2 inches in the month of July.

But if you look at the same level of drought severity, you look at the prior decades, you would see a more than 3 inches of rainfall. So that comparison tells me that the prior decades had more than 50 percent more rainfall in that month.

20 What is the practical impact in terms of 21 streamflow of having that kind of reduction in 22 precipitation over time?

23 It would certainly mean lower flow in the 24 streams. 25 Do you -- are these the only two charts you THE REPORTING GROUP

Mason & Lockhart

Page 3350 to 3353 of 3491

TRIAL - November 21, 2016 (Vol. XIII) Florida v. Georgia 3354 3356 1 created like this; or did you look at it across 1 them. What's your view? 2 other criteria? 2 A. Well, I heard him say that. But I think I also 3 A. Well, like I said, I -- this is one for the once 3 heard him say just before that that he said he 4 every 20 years type of drought. And there are 4 didn't quite understand what was done here. 5 others. For example, I also looked at once every 5 Q. Okay. Dr. Zeng, did you look at changing 6 10 years, once every four years, and once every 6 patterns in rainfall in any other kind of 7 two years. In the subsequent study, I actually 7 context? 8 did much more than that. I looked at the 8 A. Well, we looked at the impact on streamflow. 9 intervals right in between. And all of them are 9 Q. Okay. And did you look at the impact on other 10 showing the same pattern. All of them are 10 streams other than the Chattahoochee, Flint, and 11 showing that the rainfall that used to take place 11 Apalachicola? 12 in the middle of the year has been squeezed to 12 A. We did. 13 toward the sides of the year, which means we're 13 Q. Okay. Why did you look at other rivers in the 14 having a drier summer in comparison to the past; 14 region? 15 and we're having a wetter winter in comparison to 15 Α. Well, it makes sense when we look at one river 16 16 the past. basin. And in particular there are complicated 17 17 **Q.** And, Dr. Zeng, we included it in your book; but factors playing in this basin. It makes sense 18 18 can you just say -- check tab 16 and tell us if for us to look beyond that basin and see a basin 19 GX-1042 is the study that you conducted? 19 that don't have similar conditions and see 20 20 A. That's correct. whether or not you have a control river basin 21 Q. Now, are you aware of any other expert who looked 21 that gives you the benchmark, that gives you the 22 22 into precipitation in this case? background to -- or to give you a reference 23 A. It looks like Dr. Lettenmaier looked into this. 23 point. 24 **Q.** And what did -- did you look at his study? 24 **Q.** Can you turn to tab 13. 25 A. Yes. 25 And, Dr. Zeng, what does the demonstrative at THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3355 3357 1 Q. And what did you find in his study with regard to 1 tab 13 show? 2 this intra-annual pattern of drier summers and 2 A. This is showing other rivers in Florida, other 3 wetter winters? 3 rivers in the Panhandle part of Florida. And we A. I believe he saw similar trends as we saw here. 4 4 looked at the gage rivers of these streams. And 5 But he -- he categorized the differences that he 5 we compared them with the -- with the flow that 6 took place in the Chattahoochee River -- in the 6 saw as statistically not significant. 7 **Q.** And what is your view? 7 Apalachicola River. 8 Q. And what did you find? 8 A. Well, I think his statistically significant or 9 not significant difference in his own words means 9 Α. We found all of these streams -- if you look at 10 10 are these differences by chance? And he only the past four decades, all of them are showing 11 11 looked at the mean -- I think the median -- the the same type of declining trend. 12 median value; and then he made his determination 12 Q. As a hydrologist, what does it tell you that 13 13 he thinks that they are not statistically other rivers that aren't impacted by Georgia's 14 significant or, in other words, that he thinks 14 ACF water use are showing a similar declining 15 15 trend?

that they weren't extensive. But I have looked at the ones 20 years to the ones two year -- once every two years. And I looked at all the probabilities in the middle. And all of them -- all of them are showing the same trend. All of them are showing the same

pattern. I think we're beyond doubt that these differences are not because of chance.

23 Q. Dr. Zeng, I think Dr. Lettenmaier had these two 24 charts on the screen. And if I can quote him, he 25 said, they are completely flawed. You created

THE REPORTING GROUP

Mason & Lockhart

20 result of Georgia's consumptive water use. 21 **Q.** Now, you testified a bit on cross-examination 22 about another study you did which looked at just 23 the decline in flows in the Apalachicola. Is that right? 24 25 A. That's right.

A. Well, it tells me that there is a regional trend

that is taking place -- that has taken place in

that regional pattern certainly was not the

the past decades. And that regional pattern --

3358 3360 1 **Q.** Can -- and this is just south of the state line. Α. No. 2 2 Right? Q. And, Dr. Zeng, Mr. Qureshi asked you some 3 A. That's correct. 3 questions about the Sumatra Gage and whether that 4 Q. Okay. Can you explain what analysis you did on 4 was appropriate to look at. Did you look at any 5 other gages in Florida to double-check? 6 A. Okay. Now, that one, we know that the total Α. In terms of declining flow? 7 amount of water going into the Apalachicola Bay Q. 8 is not the same amount that crosses the state 8 Α. Yes. 9 line. So there's water added. There is flow 9 Q. And what did you do in that regard? 10 added in the Florida part of the basin. And that 10 Well, we looked at the -- we looked at the 11 was water converted from rainfall, from flows in 11 Blountstown Gage, which is right downstream of --12 the tributaries. And so this added part is what 12 it's downstream of Chattahoochee, but upstream of 13 I call flow generated within the Florida portion 13 Sumatra Gage. We also looked at the gage that is 14 of the state. 14 immediately downstream of Blountstown but is 15 Q. Does Georgia's consumptive use have any 15 upstream of Sumatra Gage. So there are two other 16 relationship or impact on this flow that's 16 gages in the Florida part of the Apalachicola 17 created just within Florida? 17 River. And we looked at those two gages as well, A. No. 18 18 and we found similar declining trends at those 19 Q. Okay. And can you turn to tab 14, demonstrative 19 two gages as well. 20 20 14? And did you prepare this demonstrative? Q. Now, Dr. Zeng, as a hydrologist who studies this 21 21 A. Yes. basin, what does it tell you that Florida is 22 22 Q. Can you explain to the Court what this one means? contributing as much as 4,000 cfs less into the 23 A. Yes. This is a table that shows the state line 23 flow into Apalachicola Bay than it was decades 24 flow. And so we're -- I'm going to the title 24 ago? 25 column here. So it shows the flow in the 25 A. Well, it tells me that there clearly is an issue THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3359 3361 1 Chattahoochee River -- or this is the state line 1 with the flow coming into the river in the 2 flow, the first row. 2 Florida part. It also concerns me that in 3 Q. Let's start over. Is the first flow the 3 addressing -- in trying to address the issue, 4 Chattahoochee Gage? 4 Florida does not look into this issue, does not 5 5 A. Yes. acknowledge that even that -- that it's even an 6 6 **Q.** And where is that? issue while looking toward the north of the state 7 7 A. That is right downstream of Jim Woodruff project. line and seeking higher flow coming from north of 8 Q. And then what did you observe next at Sumatra 8 the state line as a solution to their problems. 9 Gage? 9 Q. Thank you, Dr. Zeng. 10 10 A. I looked at the flow at Sumatra Gage. MR. PRIMIS: I have no further 11 Q. And this -- why is the flow in Sumatra higher 11 questions. 12 12 SPECIAL MASTER LANCASTER: Recross? than Chattahoochee? 13 13 **RECROSS-EXAMINATION** A. Well, that's because there's flow coming into the 14 basin in the Florida part of the basin. 14 BY MR. QURESHI: 15 **Q.** Then you have a row that says Florida's 15 Q. Good afternoon Dr. Zeng. 16 Contribution. And what is that? 16 Good afternoon. 17 A. That is simply the difference between the first 17 Q. I want to finish up where you just finished with 18 two. 18 Georgia's counsel on redirect. 19 **Q.** And what trend do you see in Florida's 19 You mentioned you looked at two other gages 20 20 contribution to flows into Apalachicola Bay? in Florida. One was Blountstown, and what was 21 A. Well, from the late '70's to the year 2013, 2014, 21 the other one? 22 22 A. It's called Wewahitchka. we're seeing a declining flow that -- that came 23 23 Q. Wewahitchka? into existence solely in the Florida part of the 24 Wewahitchka, thank you. basin. 24 25 Q. Did Georgia play any role in that? 25 Okay. And where was that analysis presented in THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

TRIAL - November 21, 2016 (Vol. XIII) 3362 3364 1 your direct testimony? Q. And so you're thinking of the greater than or A. It was not. 2 equal to sign as a target? 2 3 Q. Okay. And the Sumatra Gage, did you have a 3 A. In effect, yes. chance to check that at lunch? Were you able to Q. Okay. And from a mathematical perspective, you 4 5 confirm that the data from 1978 to 2013, the understand that greater than or equal to allows 6 daily data, is no longer up? 6 for variation? 7 A. I didn't have a chance to check that. 7 A. I understand the greater than or equal to means 8 **Q.** Okay. I noticed on paragraph 155 on page 55 of 8 at least 5,000. 9 your direct testimony that you have information 9 Q. Okay. You also explained in your prefiled direct 10 going from 1972 through 2012 on that figure 10 that there are various places in the DEIS where 11 there. 11 the Corps describes the 5,000 as a target. Is A. Yes. 12 12 that right? 13 Q. Are you aware that there is no Sumatra data for 13 A. Yes. 19722 14 14 **Q.** And you are aware, sir, that there are many 15 A. I'm aware of that. 15 places in the DEIS where the Corps explicitly Q. Okay. I want to --16 states the 5,000 is not a target. Are you aware 16 17 A. But we did use some data. We did use the Corps 17 of that? 18 data. 18 A. I'm not aware of that. 19 Q. Okay. 19 Q. Okay. Well, perhaps I can walk through some of A. The Corps had field data. 20 20 those. We're going to have to switch binders. 21 Q. I want to talk about -- I'm sorry. Are you 21 If you could look at tab 30 of the binder that I 22 finished? 22 gave you this morning, and we can walk through 23 A. Go ahead. 23 some of those examples. I suggest we start with 24 **Q.** I want to talk about the Corps data and some of 24 going to pages -- and we only included excerpts. 25 the observations you made about the Corps RIOP. 25 But we can start with the pages marked 2-72 THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3363 3365 1 If we could turn for a moment to -- I believe 1 through 2-73. 2 it's tab 9 of the binder that Georgia's counsel 2 A. Where is that? 3 provided you. Do you have that in front of you, 3 Q. It's at page 2-72 through 2-73. And there's a discussion beginning at the bottom of the page 4 sir? 4 A. Tab 9? 5 5 that says, quote, the flow rates included in 6 **Q.** Tab 9 of the binder that Georgia's counsel 6 table 2.1.5, the table we were just looking at. 7 provided you. 7 Can you read that? A. Yes. A. I see that. Yes. 8 8 9 **Q.** You actually walked us through this table while 9 **Q.** Do you see the reference to prescribed minimum, 10 10 you were standing. And you kept pointing to the not target releases? 11 number 5,000. Is that correct? 11 A. I see that. 12 A. Yes. 12 Q. Okay. Were you aware of this section when you 13 Q. Okay. There's actually a figure in front of the 13 wrote your direct testimony? 14 5,000, but you never mentioned it. Can you tell 14 A. Well, apparently I didn't read that. 15 us what that figure represents? 15 Q. Okay. 16 A. That represents greater than or equal to. 16 A. Or didn't read that carefully. 17 Q. Okay. And what does that mean? 17 Q. Sir, can you please turn to page 1-10. 18 A. It means -- it means 5,000 or higher. 18 A. 1-10. 19 **Q.** Okay. You testified, sir, in your prefiled 19 **Q.** And the pages are not sequential, so you will 20 direct testimony that the Corps treats the 5,000 20 find it a couple places after. A. Page 1-10? 21 cfs minimum flow requirement as a target. 21 Q. Yes, sir. 22 22 **Q.** Okay. And by that you're suggesting that the 23 A. I'm here. 23 24 Corps releases as close to 5,000 as possible? 24 Okay. And, again, you will notice the paragraph 25 A. Yes. 25 that states the flow rates included in table THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart Page 3362 to 3365 of 3491 The Reporting Group (207) 797-6040 43 of 103 sheets

107E 146VEITIBET 21, 2016 (VOI: XI

- 1 1.2-3 prescribe minimum and not target releases.
- 2 Do you see that?
- 3 A. Where is that, please?
- **4 Q.** It's the sentence that begins, the flow rates
- 5 included in --
- 6 A. The last paragraph?
- 7 Q. Yes, sir.
- 8 A. Okay. I see that.
- 9 Q. Okay. And were you aware of this when you
- **10** prepared your direct testimony?
- 11 A. I'm aware of this document.
- **12 Q.** Were you aware of the sentence we just read, sir?
- 13 A. I'm not aware of the sentence.
- 14 Q. Okay. Similarly, let's go to table -- I'm sorry,
- page 1-16. And that's a similarly worded
- sentence which begins with, the flow rates
- 17 included.
- 18 A. I see that.
- **19 Q.** Okay. And I have the same question for you; were
- 20 you aware of that sentence when you prepared your
- 21 direct testimony?
- 22 A. Well, I'm aware of the Corps' general saying of
- 23 that; but I'm not aware of this specific
- 24 sentence.
- 25 Q. Okay. Thank you, sir.

THE REPORTING GROUP

Mason & Lockhart

- I'm going to return to some of the other
- topics that were covered during your redirect
- **3** examination, sir. May we return to tab 3 that's
- 4 the UIF report? This is tab 3 of the big binder,
- 5 sir.

1

2

- 6 A. I'm here.
- 7 Q. Okay. And before we go into the body of the
- **8** document, you're aware that GWRI is part of a
- **9** National Institute for Water Resources in
- 10 affiliation with USGS?
- 11 A. I'm not aware of that.
- **12 Q.** You never heard that before?
- 13 A. Well, they might have some affiliation; but I'm
- 14 not aware of that.
- 15 Q. Okay. And in discussing the UIF datasets, sir,
- you agree that the UIF's prepared by the Corps
- 17 rely on consumptive use information or demand
- information from Georgia EPD?
- 19 A. I'm aware of that, yes.
- 20 Q. Okay. And that's actually information that you
- **21** provide. Right?
- 22 A. Yes.
- 23 Q. And this report is critical of that information;
- is it not?
- 25 A. Well, it's critical of some agricultural

THE REPORTING GROUP

Mason & Lockhart

- 1 estimates. I'm aware of that.
- **2 Q.** Okay. And the particular agricultural estimates
- 3 that it's critical of are the evaporations from
- **4** farm ponds. Correct?
- 5 A. I'm aware of that.
- **6 Q.** And I believe during your redirect, Georgia's
- 7 counsel discussed that there were certain
- 8 potential farm ponds in the Georgia portion of
- **9** the ACF Basin. You know they exist. Right?
- 10 A. Well, the farm ponds exist, yes.
- **11 Q.** And you know that there's more than 20,000 of
- 12 them. Right?
- 13 A. I'm -- well, again, the number of water bodies he
- 14 identified would be that number. But I'm not
- 15 sure all of them are farm ponds.
- **16 Q.** You have done an analysis of farm pond
- 17 evaporation; haven't you?
- 18 A. I have.
- **19 Q.** Okay. And that was not produced in this
- 20 litigation because it's privileged. Is that
 - riaht?

21

24

7

15

3367

- 22 A. That's right.
- 23 Q. Okay. And the UIF indicates that the net loss
 - from evaporation of farm ponds could be as high
- as 1200 cfs. Is that right?

THE REPORTING GROUP

Mason & Lockhart

3369

- 1 A. That's what the document says.
- **2 Q.** That's what the document says; correct.
- 3 There are other criticisms of the UIF
- **4** dataset; are there not?
- 5 A. There are, yes.
- **6 Q.** And one of them we looked at earlier today is
 - behind tab 9, sir?
- 8 A. I'm here.
- 9 Q. Okay. And in particular, under the section
- 10 Inappropriate Use of the Unimpaired Flow Dataset,
- 11 there is a sentence that begins, for example, and
- then a following sentence that begins with,
- however. Can you read both of those, please.
- 14 A. Can you direct me to the right location?
- the middle of the page. It's the sentence that
- the initiality of the page. It's the sentence that

Q. Certainly. It's the second paragraph and sort of

- 17 begins, for example, the unimpaired flows do not
- 18 represent.
- 19 A. Okay. I found it.
- 20 MR. QURESHI: If you can actually
- 21 highlight the following sentence as well.
- 22 A. I see that.
- 23 Q. Okay. And you were aware of this when you
- 24 prepared your prefiled direct testimony, sir?
- 25 A. I was aware of this, yes.

THE REPORTING GROUP

Mason & Lockhart

3370 3372 1 Q. And you were aware of it at the time you A. Yes. 2 submitted your testimony? 2 Q. Okay. And you're aware that the caption of this 3 Α. 3 slide refers to Georgia's Upstream Consumptive 4 **Q.** In your prefiled direct testimony at paragraph Use of Water? 5 22, you include a figure 3. 5 Α. Yes. 6 MR. QURESHI: If you can put that up on 6 Are you familiar with how Florida's expert, 7 the screen. 7 Dr. Hornberger, defines consumptive use? 8 BY MR. QURESHI: 8 A. I think I understand what that concept is. 9 Q. And you can certainly review it in front of you 9 Q. Okay. And it's equivalent -- it's actually 10 10 different than the way you described consumptive 11 Α. Did you say 22? 11 use; is it not? 12 Q. Paragraph 22, page 7. 12 A. I'm not sure that would be different, but go 13 A. Yes. 13 ahead. 14 Q. And the peak consumptive use here looks to be at 14 Q. Well, I guess my question for you is do you know 15 some time in the summer of 2012. Does that seem 15 how he defines it? 16 right to you? 16 Α. Well, if he's using every drop of water that was 17 A. That seems right. 17 pumped out of sources connected and not connected 18 **Q.** Okay. And it's roughly at 1,800 cfs? 18 to the streams, and water pumped out that does 19 A. That seems right, yes. 19 not translate in a one-to-one relationship into a 20 20 Q. Okay. And do you know what the monthly flows in streamflow, then I think I understand his -- his 21 21 the Apalachicola River were at this point in concept. 22 22 time? Before you characterized this particular exhibit, Q. 23 A. 5,000 cfs. 23 did you know how he defined consumptive use? 24 24 **Q.** Somewhere between five and 6,000? A. I think I know how he defined it. 25 A. It's mostly 5,000 cfs. 25 Q. Did you read his prefiled direct testimony? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3371 3373 Q. Okay. And do you know that 1,800 is Not in very detail. 1 2 approximately 35 percent of 5,000 cfs? 2 Okay. We can put up page 9 of his prefiled 3 A. Yes. I understand the flow into Florida is about 3 direct, and it will give you some idea of how 4 two to three times that amount. 4 Dr. Hornberger defines consumptive use. 5 5 MR. QURESHI: It's actually page 9. **Q.** Okay. Sir, you also talked about the BiOp, the 6 2016 BiOp? 6 You can also blow up the definition of 7 7 streamflow depletions and withdrawals, please. A. Yes. 8 Q. And you're familiar with that document? 8 A. I see it. 9 A. Well, reasonably. It just came out not too long 9 Q. Okay. And do you see his definition of 10 10 streamflow depletion as well? ago. 11 11 Α. Q. In October, I think? Yes. 12 Q. And his definition of consumptive use is 12 A. Yeah, something like that. 13 13 Q. Okay. And you're aware that there's language in different than yours, sir? 14 the 2016 BiOp that says the most harmful thing 14 A. It appears to be, yes. 15 for a river -- for river biota is low flows? 15 **Q.** Okay. And were you aware of that difference when 16 A. I couldn't -- I could believe they say that. 16 you opined on the slide behind tab 4 of the thin 17 Q. And you don't have any quarrel with that 17 binder? 18 statement; do you? 18 A. Well, I understand there is a difference, yes. 19 A. I don't. 19 Q. Okay. Another slide you walked us through during 20 Q. We looked at during your redirect examination, 20 your redirect examination is behind tab 5. Do 21 sir, a slide that was in Florida's opening 21 you see that? 22 statement. And that's behind tab 4 of the thin 22 A. I see that, yes. 23 23 binder. Q. Okay. And tab 5 is a PowerPoint slide made out A. Tab 4 of the thin binder? 24 of Florida Exhibit 518; but it actually covers up 25 the footnotes for the exhibit. Did you -- did **Q.** Yes, the binder that Georgia -- yes. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

TRIAL - November 21, 2016 (Vol. XIII) Florida v. Georgia 3376 1 you have a chance to review the actual exhibit; 1 omissions, any missing information? 2 or did you only look at the PowerPoint slide? 2 Α. Copying data from the Corps website to our 3 A. I had a chance --3 database, probably not. **Q.** To look at the actual footnotes? 4 MR. QURESHI: Okay. Your Honor, with A. Yes. 5 your permission, I would like to hand out a 6 **Q.** And are you, therefore, aware that the footnotes 6 demonstrative. 7 explained that the numbers calculated for 7 SPECIAL MASTER LANCASTER: Sure. 8 population and irrigation acres don't come from 8 BY MR. OURESHI: 9 Florida; but they come from Georgia's experts. 9 Q. Okay. Sir, I have handed you screen shots from 10 Did you know that? 10 the database that we were just talking about, 11 A. I understand that. 11 GX-143. And if you look at the series of issues 12 **Q.** All right. And you -- you were aware of that? 12 we have identified, you will see that there's 13 A. I understand that, yes. 13 missing periods of time from which there is no 14 Q. Okay. Sir, when you describe the Corps 14 data. That's May 1, 2013, through May 15, 2013. 15 operations in your prefiled direct testimony, you 15 Do you see that? 16 highlight something called provisional data or 16 A. I see that. 17 daily project data; is that right? 17 Q. Okay. And then there's particular days that 18 18 A. That's correct. don't have any data whatsoever. For example, 19 Q. And in fact if we look at the thin binder 19 April 14, 2014. behind -- behind tab 10, there is a reference to 20 20 A. I'm sorry. I couldn't read the words here. 21 GX-143. Correct? 21 **Q.** Okay. Can you read the words in the yellow box? 22 A. Yes. 22 A. I can read the words in the yellow box. I was 23 Q. All right. And GX-143 is a database of 23 trying to -information that EPD stores on its computers but 24 24 **Q.** What do they say? 25 that are not stored on government computers, USGS 25 A. Well, they say missing data. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3375 3377 1 or Army Corps of operations, on a daily basis. 1 **Q.** Okay. And if you want to flip through a couple 2 2 They're there for a short time, but then they're of other pages, there's other examples of that, 3 taken down. Is that correct? 3 sir. 4 A. Well, I'm sure the Corps has a copy of that. But 4 Were you aware of these issues with the EPD 5 the Corps just doesn't keep all of the data on 5 database, sir? 6 its website. The Corps has its past 35 days data A. Well, I'm not sure you're looking at the right 6 7 displayed in a particular website. We look at 7 tab. So I cannot say. 8 Q. I'm just looking at what was provided to us, that. We download the data on a weekly basis. 8 9 And we put it -- we maintain this database so 9 GX-143 10 A. Right. Well, what was provided to you I think that the Corps data or the Corps data as showing 10 11 11 what they're doing is recorded in our database. were multiple tabs, multiple sheets. So I'm not 12 12 sure -- just by looking at a screen capture of That's correct. 13 **Q.** So EPD records it and then puts it in its own 13 one of the tabs, I'm not sure that this is the 14 database? 14 right part to look. 15 A. That's correct. 15 Q. Okay. So in certain tabs it would have all the 16 **Q.** And you do the same thing for USGS provisional 16 dates except one? 17 17 A. Well, I cannot tell you just by looking at this. 18 A. We do not do the same thing with the USGS 18 Q. Understood. 19 19 provisional data. MR. QURESHI: I have nothing further, Q. Okay. So the GX-143 contains what EPD has 20 20 your Honor. 21 21 recorded from the Army Corps of Engineers? MR. PRIMIS: No further questions. 22 SPECIAL MASTER LANCASTER: Doctor, you 22 A. That's correct. **Q.** Okay. And are there any errors in that database? 23 23 said that you didn't know where Battle Bend A. Errors as in the Corps errors? 24 is.

25

THE WITNESS: Right.

THE REPORTING GROUP

Mason & Lockhart

Mason & Lockhart Page 3374 to 3377 of 3491

Q. Are there any mistakes in the database, any

THE REPORTING GROUP

3381

3378

- 1 SPECIAL MASTER LANCASTER: Have you ever
- 2 heard the term before?
- 3 THE WITNESS: Battle Bend, no.
- 4 SPECIAL MASTER LANCASTER: So you don't
- 5 know whether it's -- where it is, you don't
- 6 know what slough it may be related to, Swift
- 7 River?
- 8 THE WITNESS: I know Swift Slough.
- 9 SPECIAL MASTER LANCASTER: Swift Slough.
- 10 THE WITNESS: Yes.
- 11 SPECIAL MASTER LANCASTER: Do you know
- 12 whether Battle Bend has any relationship to
- 13 it?
- 14 THE WITNESS: I don't -- I suppose this
- 15 is part of a side river in Florida.
- 16 SPECIAL MASTER LANCASTER: So would I be
- 17 correct in assuming that you couldn't even
- 18 hazard a guess as to the effect if we -- if
- 19 the Court should order that the parties
- 20 reroute the Apalachicola through Battle Bend,
- 21 you wouldn't know what that would have caused
- 22 or affect; is that correct?
- THE WITNESS: I wouldn't know, right.
- 24 SPECIAL MASTER LANCASTER: Would you
 - tell me, again, how Georgia measures its
 THE REPORTING GROUP

Mason & Lockhart

- 1 consumptive use?
- I know you testified about this, but I
- 3 want to be sure I understand it.
- 4 THE WITNESS: Yes. I need to sort of
- 5 separate them, the municipal and industrial
- 6 part from the agricultural part.
- 7 SPECIAL MASTER LANCASTER: Right.
- 8 THE WITNESS: For all of the municipal
- 9 and industrial facilities, these facilities
- 10 report their withdrawing data or their
- 11 discharging data to us on a monthly basis.
- 12 So for the hundreds of facilities that we
- 13 regulate, we know how much they take; we know
- 14 how much they return. So in general, the
- **15** difference between the two is the consumptive
- 16 use in the municipal and industrial sector --
- 17 sectors.
- 18 For agricultural, it is a little
- 19 different. For agricultural irrigation,
- 20 mostly for irrigation purposes, we have these
- 21 irrigation systems that put water for growing
- 22 crops. Now, we have a large sample of them
- 23 metered. So we know how much water is used
- 24 by each one of them. Now, each one of them
- 25 would have a corresponding area. So this is

THE REPORTING GROUP Mason & Lockhart

- ver 1 how big of a land that I'm applying the
 - water. So when I have the volume divided by
 - 3 the area, I have a depth. So that is how
 - 4 much water in terms of depth they applied on
 - that field.
 - 6 And so with all the systems that collect
 - 7 this data, we know the collective volume. We
 - also know the collective area. So when we
 - 9 apply -- when we divide the collective volume
 - 10 with the collective area, we have a depth.
 - 11 Right? So we have a representative depth by
 - 12 these metered systems. And then we apply
 - 13 that depth to the entire universe of
 - 14 irrigated acres.
 - Then we have a volume, the total volume
 - 16 on top of all the irrigated acres. So that's
 - 17 how we know the agricultural water use.
 - 18 SPECIAL MASTER LANCASTER: And what
 - 19 percentage is not accurately measured?
 - THE WITNESS: Well, the part that's
 - 21 measured covers about 50, 60 percent of
 - 22 irrigated fields or the irrigated acreage.
 - 23 SPECIAL MASTER LANCASTER: So if I
 - 24 understand you, 50 to 40 percent is just
 - 25 estimated?

7

THE REPORTING GROUP Mason & Lockhart

3379

1 THE WITNESS: Right. Those were

- **2** estimated by the metered ones.
- 3 SPECIAL MASTER LANCASTER: I think you
- 4 testified that certain aquifers were not
- 5 connected by Florida or considered. Which
- 6 aquifers are you talking about?
 - THE WITNESS: There's -- there are
- 8 aguifers that are called Claiborne, Clayton,
- 9 and Cretaceous. They are actually below --
- 10 they're below the Upper Floridan Aquifer. So
- 11 the connection is really the Upper Floridan
- 12 Aquifer at the top with the river cutting
- 13 through the aquifer. That's the connection
- 14 between the aguifer and the rivers.
- Now, the lower aquifers, since they're
- 16 below the Floridan -- the Upper Floridan
- 17 Aquifer, they don't have this connection to
- 18 the streams.
- 19 SPECIAL MASTER LANCASTER: Going to the
- 20 Corps operations, take a particular dam. How
- 21 is it manned?
- Take Woodruff, for example.
 - THE WITNESS: Woodruff is -- I think
- 24 there's a crew of several. And -- but the
- operation -- for example, the operation for

May I approach the witness? SPECIAL MASTER LANCASTER: Sure. BY MR. FAWAL: Q. Mr. Allen mentioned a bit of this, but you're the vice chair of the Metro North Georgia Water Planning District. Correct? A. Correct. Q. And it's okay if I refer to that as Metro District for short? A. Yes. Q. And Atlanta is in the Metro District. Correct? A. The city of Atlanta, yes. Q. You're also the chief policy officer of the Metro Atlanta Chamber of Commerce. Right? A. I am.

3390 3392 1 business interests; does it not? Q. And that's still in the Metro District. Correct? 2 A. It does. 2 Α. 3 Q. In lay terms, are you a lobbyist? 3 **Q.** And then the orange portion of this map represents the Chattahoochee Basin. Right? A. Per ethics rules by the State of Georgia and because of the nature of my job, I am required to 5 Yes, according to the legend. 6 register as a lobbyist in the State of Georgia. 6 Q. Okay. Ms. Kirkpatrick, I would like to talk a 7 Q. And your prefiled testimony focuses primarily on 7 little bit about Georgia's 2009 water contingency 8 municipal and industrial water use in the Metro 8 planning task force. You're familiar with that. 9 District. Is that right? 9 Right? 10 A. Correct. 10 A. I am. 11 Q. I'll -- so is it okay if I call that M & I for 11 **Q.** I'll probably call it the task force for short. 12 short as well? 12 A. Sounds good. 13 A. It is. 13 **Q.** Trying to save us both some time. 14 Q. Okay. The Court has heard a lot about 14 You were the management lead for the task 15 agricultural irrigation and the Flint River. And 15 force. Correct? 16 A. Correct. we are switching gears a little bit to talk about 16 17 M & I in Atlanta. So I thought it might be 17 Q. And the task force was set up as a response to a 18 18 helpful -- I'm not sure if you were in the ruling in a litigation from Judge Magnuson that 19 courtroom when Dr. Zeng looked at a map. But if 19 threatened Georgia and particularly Atlanta's 20 20 you turn to tab 4 in your binder, do you water supply. Correct? 21 recognize that as a map of the ACF Basin? 21 A. Correct. 22 A. I do. 22 Q. And the task force examined supply options to 23 **Q.** Okay. And you can see Atlanta is represented by 23 address those potential shortages. Right? a dot and a gray area around it. Do you see 24 24 A. They did, in the event that Lake Lanier was no 25 that? 25 longer water supply for the region. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3391 3393 A. I see the City of Atlanta with a dot, yes. And 1 **Q.** And the task force looked at all possible 2 2 the gray area is region around the City of alternatives. Right? 3 Atlanta. 3 A. They were encouraged to look at all options. Q. Does that roughly correspond to the Metro Q. If you will turn to tab 1 in your binder -- I 4 4 5 5 know you were just handed another copy; but you 6 6 should find your prefiled direct testimony. Do A. Roughly, without seeing county lines, I would say 7 7 you see that? **Q.** Sure. Generally speaking, the Metro District A. I do. 8 8 9 stretches south of the city of Atlanta down to, I 9 Q. If you turn to paragraph 62 that's on page 17, 10 think it's Coweta County. Correct? 10 here you know that there are 35 conservation 11 11 A. Coweta. measures considered by the task force. Right? 12 Q. Coweta? 12 A. Correct. 13 13 Q. And then there are six bullet points that you A. Yes. list below that roughly provide categories for 14 Q. I apologize. And metro Atlanta relies primarily 14 15 on Lake Lanier for its water supply. Right? 15 the measures you considered. Correct? 16 A. That is correct. 16 Α. Correct. 17 Q. Lake Lanier is just to the northeast of Atlanta? 17 **Q.** The task force was statewide. Is that right? 18 A. Correct. 18 A. The task force included individuals from across 19 Q. We have also discussed the Flint River and the 19 the state, but the focus of the work of the 20 20 Flint Basin that's represented in green on this contingency task force was primarily the metro 21 21 map. Right? Atlanta region. 22 22 A. Correct. Were you told to exclude options that related to 23 23 Q. Okay. The Flint River forms just south of agricultural water conservation? 24 Hartsfield Jackson Airport. Correct? 24 Considering that we were looking at metro Atlanta 25 25 and options that would replace access to Lake A. Correct. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3396 1 Lanier, the primary focus of the task force was 1 yes. 2 Q. Let's look at those options, if you could go back metro Atlanta. No explicit direction given to 2 3 exclude Ag; but given that there's not 3 to tab 6, and specifically page 9. In section 3.1, do you recognize those as the no regrets 4 large-scale agriculture in the region, it was not 4 5 5 options? 6 **Q.** And the ultimate recommendations that the task 6 A. Those are the -- yes. 7 force provided didn't address agricultural 7 **Q.** It's some of them. Right? 8 irrigation. Right? 8 A. Some of them. 9 A. It did not. 9 Q. And, actually, if you will turn to page 10, there 10 **Q.** And I mentioned this a moment ago. But the task 10 is a section entitled Enhanced Efficiency 11 force did provide its findings and 11 Programs. Do you see that? 12 recommendations in December of 2009. Right? 12 A. I do. 13 A. Correct. 13 Q. This is within the no regrets options. Right? 14 **Q.** If you turn to tab 6 in your binder, do you 14 A. It is. 15 recognize this as the findings and the 15 Q. The first bullet you see below Enhanced 16 recommendations for the task force? 16 Efficiency Programs is for residential retrofit 17 17 A. I do. rebate programs, for things like toilets and 18 **Q.** And you're familiar with the two primary sets of 18 showerheads and faucets. Do you see that? 19 recommendations that are included in this report. 19 A. I do. 20 20 Right? **Q.** And I believe the Metro District implemented that 21 21 recommendation. Right? A. I'm -- I'm very familiar with the findings. Yes. 22 22 Q. And I'm referencing the no regrets options and A. They have. 23 the contingency options. 23 Q. It hasn't been implemented throughout all the other water districts in Georgia; has it? 24 A. Correct. 24 25 **Q.** And the no regrets options can be pursued 25 A. There are no other water districts in Georgia. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3395 3397 1 regardless of the outcome of the legal 1 There are Regional Planning Councils. 2 2 proceedings. Right? **Q.** Have they been implemented throughout the 3 A. That is correct. 3 Regional Planning Councils? 4 **Q.** And the contingency options, on the other hand, A. Not to my knowledge, no. 4 5 were only going to be pursued if Georgia was 5 Q. Still on page 10, same JX-41, there is a section unsuccessful. Right? 6 that says New Outdoor Water Usage Policies. Do 6 7 A. I would actually say they were only going to be 7 you see that? 8 A. I do. considered if Georgia was unsuccessful. 8 9 Q. So if we can look back at your tab 1, your 9 Q. This particular recommendation provides for 10 10 prefiled testimony for a moment, we'll be rebate programs to retrofit existing residential 11 11 flipping back to tab 6 here in a moment. commercial landscaping irrigation systems. 12 So paragraph 65 should be the page before 12 Correct? 13 what we were on -- I'm sorry. It's page 16 --13 A. Correct. 14 I'm sorry. Page 18. 14 **Q.** Essentially providing them with rain sensors. 15 Are you there? 15 Correct? 16 You wrote and testified, Georgia implemented 16 Α. Yes. 17 the no regrets option with the passage of the 17 Q. That recommendation was not implemented either; 18 Water Stewardship Act. Correct? 18 19 A. They did. 19 Not on a statewide level. 20 Q. Georgia didn't implement all of the no regrets 20 **Q.** So the next recommendation on that page is 21 options when it passed the Water Stewardship Act. 21 multifamily sub-metering. Do you see that? 22 22 Α. 23 A. I believe that many communities within the State 23 **Q.** And that relates to existing non sub-metered 24 of Georgia did, and the majority of the no 24 multifamily complexes. Correct? 25 regrets options were implemented within Georgia, 25 A. That's correct. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3398 3400 1 Q. And the Water Stewardship Act mandated new Repeat your question. I'm -- I noted the bullet 2 2 multifamily housing to have sub-metering. about residential retrofit, but what was the 3 Right? 3 other option? A. Correct. Q. Just the second bullet point as well. Neither 5 Q. But there was no provision for existing 5 bullets 2 nor 3 were implemented. Correct? 6 multifamily complexes. Right? 6 Α. 7 Correct. 7 The next recommendation, same page, is mandatory 8 Q. So that hasn't been implemented statewide. 8 multifamily sub-metering. Do you see that? 9 Correct? 9 Α. I do. 10 A. Correct. 10 And, again, that was not implemented either. 11 Q. If you look at the next page, page 12, you should 11 12 see section 3.2. And down near the bottom it 12 Α. Implemented in new construction. 13 says Contingency Plan. Is this where the 13 Implemented in new construction. And the 14 contingency options begin? 14 mandatory multifamily sub-metering you see here 15 A. Yes. 15 is for existing --Q. Great. And then if you will just turn to the 16 Α. 16 Correct. 17 next page, page 13, these are some additional 17 Q. -- construction. Correct? 18 recommendations in the contingency category. 18 So this was not implemented? 19 Correct? 19 Α. It was not. 20 20 Q. If you will turn back to tab 1, paragraph 67. A. Correct. Again, contingency means in the event 21 21 Lake Lanier was not available for water supply. Again, this is your prefiled testimony. 22 22 Q. And Georgia did not implement these Do you see the sentence beginning, it is 23 recommendations. Right? 23 important to note, however? 24 A. There are mandated limits on outdoor water usage. 24 Α. Yes. 25 So --25 Q. There you identify contingency options like THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3399 3401 Q. Yes. We'll walk through specific ones. 1 direct potable reuse and new reservoir 2 2 A. Okay. construction that you say only made sense in the 3 **Q.** But I understood your testimony to be that 3 context of supply shortfall. Right? Α. 4 because the ruling was overturned, you didn't 4 Correct. 5 5 Q. have to implement these. Correct? The options that you list in paragraph 67, part 1 6 A. Correct. That is correct. 6 that we just read, were they? 7 **Q.** And it sounded like you have chosen to implement 7 Α. They were not. 8 some of them. Right? 8 Q. If you will turn back to tab 6, please, and to 9 A. Yes. 9 page 14, please. Do you see section 3.3 at the 10 10 Q. And chosen not to implement others. Right? top has desirable policies that the task force 11 11 recommended for consideration. Correct? A. Correct. 12 **Q.** The first contingency option on page 13 is 12 Α. Correct. 13 13 Q. And there's six policies here, each one mandatory efficiency programs. Do you see those? 14 A. I do. 14 underlined? 15 Q. And it's got four bullet points. Correct? 15 Α. Yes. 16 16 A. Correct. And to your knowledge, there's been no further 17 **Q.** The second bullet is for replacement of fixtures. 17 work on any of those six recommendations. Right? 18 And it lists a number of different fixtures that 18 Α. There's one item here that has moved forward, 19 are options. Do you see that? 19 which is where local communities are empowered 20 A. I do. 20 with the ability to seek more stringent 21 **Q.** And the third bullet point is for retrofits for 21 requirements than what the State imposes. 22 resale -- resold homes. Correct? 22 Local communities have been empowered; but 23 23 A. Yes. otherwise, none of these policies have been **Q.** Neither of those options were implemented. 24 24 considered? 25 25 Α. Correct? No. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3402 3404 1 **Q.** Okay. You testified earlier in your prefiled 1 because it ran its fountains and watered football 2 direct testimony that the task force made 2 fields more than a year into that drought? 3 recommendations. And some of those were 3 A. This document certainly states that. 4 ultimately included in the Water Stewardship Act. Q. And, again, this is the legislative history of 5 Correct? 5 the Water Stewardship Act. Right? 6 A. Correct. 6 A. Again, never having seen this document, I cannot 7 Q. That was a statewide legislation. Right? 7 attest to whether this is a true and accurate 8 legislative history of the bill. 9 **Q.** And you were involved in drafting that law. 9 Q. Do you see -- well, turn to page 187, please. If 10 Right? 10 you look at the first full paragraph -- or first 11 A. I was involved in the conversations around the 11 paragraph, I apologize, the sentence, as 12 12 law, yes. Georgia's demands. 13 **Q.** Before the Water Stewardship Act was passed, 13 A. Okay. 14 Georgia had faced criticism for its conservation 14 **Q.** Do you see that? 15 policies. Right? 15 It's discussing the increased demands for A. I'm not familiar, no. 16 water supply. Correct? 16 17 Q. Do you recall that there was a drought in the ACF 17 A. It states that. Basin in 2007-2008? 18 18 **Q.** And presumably that water was going to come from A. Yes. 19 19 Lake Lanier. Right? 20 20 Q. And do you recall Alabama's Governor, Bob Riley, A. Given that Lake Lanier is our primary source for 21 criticizing Georgia's lack of conservation? 21 water supply, yes. 22 A. No. 22 Q. Yes, absolutely. 23 **Q.** Do you recall Governor Riley criticizing Georgia 23 And so if you will turn to page 204 now, you 24 because it did not impose an outdoor watering ban 24 will see a discussion entitled the Act's Impact 25 until after the summer of 2007? 25 on Negotiations with Florida and Alabama. Do you THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3403 3405 1 A. No. 1 see that section? A. I do. 2 Q. You don't recall that? 2 Q. Will you just read the first paragraph silently 3 Could you turn to tab 5, please. This is 3 4 Florida Exhibit 905. If you would turn to the to yourself. 5 second page, do you recognize SB 370 where it 5 A. Okay. 6 says bill number at the bottom? 6 Q. And do you see that the Act was an effort to 7 A. Yes. I'm sorry. 7 influence the ongoing negotiations with Florida 8 8 **Q.** SB 370 is the Water Stewardship Act. Right? and Alabama and the appeal of the litigation with 9 A. Yes. 9 Florida and Alabama. Do you see that? A. I do see the sentence. Yes. 10 10 **Q.** And this is the legislative history for that Act. 11 11 Correct? Q. And if you will just turn to the next page, do you see a section entitled Criticisms of the Act 12 A. I assume so. I have never seen this Act. 12 13 Q. And if you turn to the next page, do you see it 13 and Issues Unresolved by the Act? 14 starts with History? 14 A. I do. 15 A. Yes. 15 **Q.** Just in this first couple sentences, do you see 16 **Q.** It's the effective date of the Stewardship Act. 16 the legislators agreed the Act should have been 17 Correct? 17 passed years earlier. Right? 18 A. Yes. 18 A. I see that statement. 19 19 **Q.** If you will -- we'll jump around a little bit. **Q.** So let's talk about the actual provisions of the 20 20 If you will turn to page 190 -- the page numbers Water Stewardship Act. If you would look at 21 21 are at the top left corner -- do you see the top tab 7 in your binder, you should see GX-294. Let 22 22 me know when you're there. of that first paragraph some of the criticisms I 23 mentioned from Governor Riley? 23 A. I'm there. A. This document certainly echos what you said. 24 Do you recognize this to be the Water Stewardship 24 Q. And do you see Georgia was also criticized 25 Act? 3410 1 Q. It's line 186. That included the large-scale Q. And, therefore, EPD did not institute an outdoor 2 2 operations like center-pivot irrigation and drip watering ban. Right? 3 irrigation. Right? 3 Α. Correct. A. I would have to refer back to code section 1-3-3. Now, the same management tools were available in Q. You don't have a recollection as to what was 2011 and 2012 as were available in '07 and '08. 6 meant by commercial agricultural irrigation? 6 Riaht? 7 I don't. 7 Α. Correct. 8 Q. I might refresh you with your deposition 8 Were you aware that the 2011-2012 drought was 9 testimony, if that's helpful. 9 more in the southwestern part of Georgia? 10 A. Sure. 10 A. I am. 11 Q. So if you will turn to tab 2 in your binder --11 Q. And is it your understanding that EPD did not 12 and I know you were deposed twice in this case. 12 invoke its drought management tools in Atlanta to 13 This is the first of those two in January of this 13 address drought in other parts of the ACF? 14 year. 14 Α. At that point that's a decision that EPD is given 15 And you swore to tell the truth there. 15 the authority to make. So I have no 16 16 Correct? understanding of why they made the decisions they 17 A. Correct. 17 did in 2010 and 2012. I couldn't speak to those 18 decisions. They have the authority to make 18 **Q.** So if you will look at the transcript at page 19 159, line 13. 19 those. 20 20 A. Page 159? **Q.** Nothing preventing them from using drought tools 21 Q. Correct. 21 in Atlanta if there's a drought in other parts of 22 22 A. Okay. 159. What line? the state. Right? 23 Q. So if you look at lines 13 through to the next 23 They had discretion to implement drought rules. 24 page 162, you will see the discussion that is 24 Ms. Kirkpatrick, you also testified about some of 25 referencing this. 25 the management plans that the Metro District puts THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3411 3413 1 Specifically, do you see you testified, and 1 out from time to time. Correct? 2 when you refer to commercial agricultural 2 Α. Yes. 3 3 irrigation options --**Q.** I believe they're supposed to be about every five 4 A. Yes, I do. years. Right? A. 5 5 **Q.** -- I'm using the term large-scale like drip About. 6 6 **Q.** And in developing those plans, Metro District irrigation, center-pivot irrigation type of 7 7 operations. doesn't consider how much water is actually 8 A. Yes. So that refreshes my memory. 8 flowing downstream to reservoirs past Atlanta; 9 Q. Okay. So that's what was included in that 9 does it? 10 10 A. It does in some ways. There are certainly -- a exception. Correct? 11 11 flow target at Peachtree Creek that must be taken A. I believe so. 12 12 Q. And are you aware of conversations specific to into consideration. I also think by implementing 13 13 that exception? conservation measures, that some of the other 14 A. I am not. 14 activities that are prescribed in our plans, 15 **Q.** You weren't part of any efforts to make sure that 15 there is a consideration. But it isn't a driving 16 that was included in the Stewardship Act? 16 determination for the plan development. 17 17 Okay. In developing its plans, the water A. I was not. 18 Q. I want to talk now about Georgia's responses to 18 district doesn't consider how much water flows to 19 droughts after the Water Stewardship Act was 19 downstream Corps reservoirs. Correct? 20 20 passed. So you -- you're aware there was a They are not prescribed to do so by the 21 21 drought in 2011-2012 as well. Correct? legislation. 22 22 A. Iam. **Q.** It's not part of the planning process. Correct? 23 Well, I -- I would take exception with that. 23 Q. Are you aware EPD did not declare a drought in 24 Georgia in either of those years? 24 They're certainly mindful of downstream, 25 25 especially when you're contemplating conservation A. Iam. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

TRIAL - November 21, 2016 (Vol. XIII) Florida v. Georgia 3416 1 measures and return flows and some of the other A. I -- you would have to -- oh, yes, I do. Sorry. 2 2 aspects of our plans. I do think that those Q. And that's the same Metro District we have been 3 communities that are downstream does influence. 3 discussina. Riaht? A. That is correct. 4 But it is not driven by a targeted number or 5 releases. The Corps of Engineers controls those. 5 Q. And, again, this is from September; so it's a 6 Q. Okay. If you will turn to tab 3 in your binder, 6 couple years after the Water Stewardship Act was 7 again, you mentioned you gave a couple 7 passed. Right? 8 depositions. This is going to be from your 8 A. Correct. 9 second, February 2016. 9 **Q.** If you will turn to page 9 -- the pages here are 10 And, again, you swore to tell the truth at 10 in the bottom right corner, I believe -- you 11 that deposition. Correct? 11 should see a section on Water Loss. Just at the 12 A. Correct. 12 top of the page, if you will read the first 13 **Q.** And there was a court reporter there who took 13 couple sentences silently. 14 down your testimony? 14 And this describes the Water Stewardship Act 15 A. Correct. 15 has modest legislation. Correct? **Q.** Can you look at page 38, lines 4 through 7. 16 A. It is so stated here, yes. 16 17 You were asked, in developing this plan, does 17 Q. Would you turn now to page 18 of the same 18 document. You should see a section that's 18 the water district consider how much water will 19 flow to those downstream Corps reservoirs? 19 entitled Reduce Outdoor Water Use. Are you 20 there? 20 Your answer, no. 21 A. That's correct. 21 A. I am. 22 22 **Q.** Were you asked that question, and did you give Q. Great. In the first paragraph, do you see it 23 that answer? 23 notes the same daytime watering restrictions that we spoke about earlier? 24 A. Absolutely. 24 25 **Q.** And when the Metro District puts its water 25 A. Can you point precisely where you are? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3415 3417 1 management plan together, it also doesn't **Q.** Sure. It's just the first paragraph of that 2 2 consider impacts to species that occupy habitats section, Reduce Outdoor Water Use. 3 downstream. Right? 3 A. I do. A. That's correct. Q. And it notes that there are so many exceptions 4 4 5 Q. Can you turn to tab 9 in your binder. It's 5 that it, quote, appears to virtually undue any benefit of the Water Stewardship Act. Right? 6 FX-313. Do you recognize this document? 6 7 A. I do. 7 A. This document says that, yes. 8 **Q.** This is put together by the Chattahoochee 8 **Q.** So earlier we talked a little bit about the Upper 9 Riverkeeper. Correct? 9 Flint as well. Do you recall that? 10 A. We did. And it's from September 2012, I believe. 10 11 **Q.** The Upper Flint is still contained in the Metro 11 A. It says 2012. 12 Q. Okay. If you flip to the next page, you should 12 District. Right? 13 see a date of September 2012 after the 13 A. Correct. 14 acknowledgments. 14 **Q.** The source of the Flint River, just for context, 15 And in the acknowledgment section, if you 15 is in the Clayton and Fulton County areas. Is 16 look at the second paragraph after the word 16 that right? 17 acknowledgements, do you see that? 17 A. Correct. 18 A. I'm sorry. Repeat your question. 18 Q. And then obviously it flows down all the way to 19 **Q.** Sure. If you're on the second page of the 19 Florida. 20 20 document, do you see where it says Your testimony focuses on the Chattahoochee 21 21 acknowledgments? River and Lake Lanier. Right? 22 22 A. I do. A. Correct. 23 23 Q. If you will turn to tab 11, please, FX-241. You **Q.** In the second paragraph there, there is a

TRIAL - November 21, 2016 (Vol. XIII) Florida v. Georgia 3420 3418 1 A. I do. A. Correct. **Q.** This is from the Flint riverkeeper. Are you 2 Q. Do you see the section Why is This Work 2 3 familiar with him? 3 Important? A. I do. **Q.** Have you seen this particular document before? **Q.** It's a long section. But I just want to point A. I have not. 6 out a couple points. 7 Q. Okay. If you will just turn to page 5, the first 7 Do you see in the second sentence of the 8 sentence of the first full paragraph on that 8 third full paragraph, it notes declining 9 page, do you see where it indicates that the 9 baseflows even in the absence of drought. Right? 10 several tributaries in the Upper Flint have run 10 A. It states that. 11 dry? 11 **Q.** And is that something the Metro District was 12 A. It states that. 12 aware of? 13 **Q.** Is that something you were aware of? 13 A. The Metro District certainly looks at all six 14 A. No. 14 river systems when doing planning. 15 **Q.** One of the concerns listed here in the next 15 Q. Okay. The first bullet point in this section 16 paragraph is the return rate, a low return rate 16 assesses 70 percent lower flows on the mainstem 17 17 on water withdrawals. Do you see that? of the Flint River. Do you see that? A. I do. A. Are you in the second full paragraph? 18 18 **Q.** And then the last bullet suggests that demand on 19 **Q.** Second full paragraph, yes. 19 A. I do see a stated reference to return flows. 20 the river for public water supply is part of the 20 21 **Q.** Is that something you were aware of? 21 reason why. Right? 22 A. Not substantively, not at depth in regards to 22 A. It states that. 23 this specific letter. 23 **Q.** And then the next page, the first bullet also **Q.** That wasn't something that the Metro District 24 24 suggests that low return rates are part of the 25 took into account in its water management plans? 25 reason why. Correct? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3419 3421 1 A. No. I can speak to that. But as regarding to A. It states that. 2 this document, I --**Q.** And, again, this is a document put together by 3 **Q.** You just didn't know the specifics of it? 3 the Chattahoochee riverkeeper. Right? A. No. A. I can't speak to the Flint riverkeeper's intent. 4 5 **Q.** Okay. Do you see it indicates in the first 5 **Q.** I'm sorry. This is American Rivers. Correct? 6 sentence of this second full paragraph that the 6 A. Correct. American Rivers. 7 decrease in streamflow is partly attributable to 7 Q. So we looked at a Flint riverkeeper document and 8 consumptive use in the Metro District? 8 a Chattahoochee riverkeeper document. Correct? 9 A. It's -- are you talking about the sentence, the 9 A. Correct. 10 10 Q. And those are the two primary rivers in the ACF reasons for the decrease? 11 11 Basin, Right? **Q.** Sure. And specifically it notes increasing water 12 withdrawals and the lack of return flows to the 12 A. Correct. 13 13 Q. And then if you will turn to tab 12, FX-903, this system. 14 A. It certainly states that. 14 is an article from April of this year. Correct? 15 **Q.** Are you familiar with American Rivers? 15 A. It is. **Q.** Are you familiar with this? 16 A. Iam. 16 17 **Q.** Will you turn to tab 10 now in your binder. 17 A. The article? Q. Yes. 18 This is an action plan that they put 18 A. I don't believe I have read this article, no. 19 together; correct? 19 A. That's what it says, yes. 20 **Q.** Were you aware American Rivers announced that the 20 Q. It's dated October 2014. Right? 21 ACF was the most endangered river system in the 21 22 A. Yes. 22 country? 23 Q. Can you please turn to page 4. And, again now, 23 A. Yes. 24 October 2014 is four days after the Water 24 **Q.** In the fifth paragraph down in this article, do 25 Stewardship Act was passed. Right? 25 you see that it notes rivers in the basin are so THE REPORTING GROUP THE REPORTING GROUP

I'm going to talk about each of 8 SPECIAL MAGISTRATE LANCASTER: Claudette? 8 those, but I want you to tell us a little bit 9 COURT REPORTER: Sure. 9 about the process through which the District goes 10 MR. ALLEN: Thank you, your Honor. 10 when it actually develops one of these plans. 11 (Time Noted: 3:00 p.m.) 11 What does it do? Who does it meet with? 12 (Recess Called) 12 So it starts by hiring a consultant, an 13 (Time Noted: 3:10 p.m.) 13 engineering firm. Then the demand projections 14 SPECIAL MASTER LANCASTER: Go ahead, 14 are prepared, and that includes looking at 15 15 population forecasts and employment forecasts. counsel. 16 MR. ALLEN: Good afternoon, your Honor. 16 It works with the State of Georgia as well on 17 I'll get started. 17 ensuring those numbers are based on recent data, 18 REDIRECT EXAMINATION 18 as well as the Atlanta Regional Commission. It 19 BY MR. ALLEN: 19 also works with stakeholders, the public, 20 20 Q. Now, Ms. Kirkpatrick, as we mentioned, you served technical coordinating committee, and the 21 21 on the Metro Water District. Correct? governing board to utilize those demand 22 22 projections to prepare the plans. A. I served on the governing board, yes. 23 Q. And, Ms. Kirkpatrick, when you serve on the 23 Okay. And you said the plans are done about 24 governing board of the Metro District, are you 24 every five years roughly. Correct? 25 working as a lobbyist? 25 A. Correct. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3427 3429 A. I am not. I'm -- I'm working in my professional Q. So what planning cycles have there been? 2 capacity as an environmental engineer. 2 A. The first plans were issued in 2003. The second 3 3 **Q.** Okay. And are you working as a lobbyist today? set of plans were issued in 2009. And we're 4 A. No. 4 currently working on the next round of plans and 5 5 **Q.** Are you being paid or compensated in any way for anticipate issuing those in 2017. 6 6 Q. And I think you said that the main components of your testimony here today? 7 A. No. 7 the plans are one bucket is kind of demand 8 8 Q. Okay. Ms. Kirkpatrick, you know, there's been projections, stuff like that; and another bucket 9 some discussion of the Metro Water District; but 9 are conservation measures. Is that fair? 10 I'm not sure we have heard what it is. So could 10 A. That's fair, yes. 11 11 Q. All right. Let's take those one at time, and you tell us just what is the Metro Water 12 12 District? let's start with the demand projections. Tell us 13 13 A. Yes. The Metro Water District is a planning what kind of effort does the District take to get 14 entity that includes 15 counties and 93 cities 14 those projections -- well, first of all, tell us 15 within the metro Atlanta region. And it is --15 what demand projections are. 16 has the direction to prepare plans -- water plans 16 Α. Sure. Well, you know, simply it's how much water 17 17 is an individual going to use in the region. So for the region. 18 Q. And when was it formed? 18 looking at -- you know, you could take myself, 19 A. It was formed by legislation in 2001. 19 how much water would I use on a daily basis, and 20 **Q.** And these plans you mentioned, how often are they 20 projecting out to 2050, and determining how much 21 21 water the community would need at the end of that 22 22 A. They are updated approximately every five years. time period. 23 23 **Q.** And if you would, tell us a little bit about the Q. And what kind of effort does the District take to 24 24 process that goes into developing these plans and make sure it gets those projections correct? 25 25 promulgating them. A. It's a pretty thorough process, again, utilizing THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3432 1 data that is created by the Atlanta Regional Ms. Kirkpatrick, another item you mentioned was 2 2 Commission, the Office of Planning and Budget by water audits. Do you recall that? 3 which the State of Georgia uses those numbers to 3 Α. I do. 4 plan for a variety of other initiatives within Q. Tell us what that is. 5 the state. And again, it's a public transparent Again, it's where a local utility will look at 6 process. And it usually drives -- those demand 6 their infrastructure or their pipes that are in 7 projections drive the conversation around 7 the ground and assess how much water may be lost 8 8 conservation measures. from those pipes, either because they're aging or 9 Q. All right. Let's talk about conservation 9 connections aren't tight, and determine where 10 measures. Now, are --- these conservation 10 they have those leaks and develop a plan of 11 measures that you mentioned, are they voluntary 11 action to correct them. 12 or are they mandatory? 12 Q. And how long has that been a requirement in the 13 A. They're mandatory. 13 Water District? 14 Q. And who are they imposed on? 14 Α. 2003. 15 A. The local utilities that exist within the Metro 15 Q. Are you familiar with the IWA? 16 16 Α. Water District. So every municipal utility that 17 resides within those 15 counties, and there's 93 17 Q. And do they have some kind of connection to the 18 18 cities, is required to adopt those water water auditing process? 19 conservation measures. 19 Α. They do. It's a -- it's a national organization 20 20 Q. And tell us, if you would, when these that puts together best professional practices 21 21 conservation measures were first adopted and for performing leak audits and protection, widely 22 22 regarded within the industry as the standard by imposed by the Metro Water District? 23 23 A. So the first round were adopted and imposed in which to conduct your water loss audits. And as 24 2003. 24 a matter of fact, in their most recent update of 25 Q. And have they been in place every year since 25 that manual just two months ago, they highlighted THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3431 3433 1 2003? 1 the efforts of the State of Georgia as it relates 2 2 A. Absolutely, and then built upon. to water loss audits as a national example of 3 3 **Q.** Okay. I know there is a whole suite of what good process is. Q. All right. And the third item, Ms. Kirkpatrick, 4 conservation measures, but can you tell us about 4 5 5 a few of them? you mentioned that has been a conservation 6 A. Sure. You could start with conservation pricing. 6 measure that's been in place in the Metro 7 7 A second example would be water loss, water District since 2003 was retrofitting fixtures. 8 audit. A third would be retrofit of fixtures. 8 Do you remember that? 9 Q. Okay. I want to talk about a few of those and 9 A. I do. 10 10 Q. Tell us what that is. why you picked those out. Can we start by 11 11 Α. talking about conservation pricing. Can you tell Yes. It's simply, you know, if you look inside a 12 12 us what that is? house, your fixtures, such as toilets, 13 A. Yes. Conservation pricing, simply the more water 13 showerheads, faucets, are often inefficient if 14 you use, the more water you -- I mean, the more 14 your home is older. And so there's been an 15 15 money you pay. And it sends a price signal to encouragement -- and, actually, quite honestly, 16 the consumer, whether or not that's a residential 16 beyond encouragement, there has been replacement 17 17 consumer or commercial, to use less water. of faucets, showerheads, and toilets. And 18 Q. And what portion of the Metro Water District's 18 interestingly on the toilet retrofit, there's 19 customers are covered by conservation pricing? 19 been a program in place now that's resulted in 20 A. 100 percent. 20 over 110,000 toilets being replaced that has 21 21 Q. And if you know, how do Atlanta's water and sewer resulted in over 900 million gallons per year 22 22 rates compare to water and sewer rates in other being saved. 23 23 parts of the country? Q. Okay. Ms. Kirkpatrick, we talked about a few of 24 A. So the City of Atlanta has the highest water and 24 the conservation measures that the Metro District 25 25 has had in place since 2003. And I just want to sewer rates in the country. THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3434 3436 1 be clear about this. What population in the years of activity. And I think it demonstrates 2 2 Metro District relies on ACF waters for their that just as time goes on, more progress has been 3 municipal and industrial needs? 3 Q. Ms. Kirkpatrick, has the District received any 4 A. I believe it's 4.1 million people. 5 Q. Okay. So 4.1 million people reside in the 5 awards or recognitions for its water conservation 6 District and rely on ACF water for their needs. 6 efforts? 7 7 They have. 8 A. That's correct. The vast majority, yes, of the 8 Q. What has it received? 9 basin. 9 So EPA has a program called WaterSense. Over, I 10 Q. All right. And these conservation measures that 10 believe, 1500 entities participate in that 11 we're talking about that have been in place in 11 program. And the Metro Water District received 12 the Metro District, are those measures enforced? 12 an award in 2015 for their education and 13 A. Absolutely. 13 awareness work, and then in 2016 they also 14 **Q.** How are they enforced? 14 received an award for their promotional 15 A. So when the District was created by law, the 15 partnership of WaterSense appliance. 16 Q. 16 legislators gave the Georgia Environmental Okay. Ms. Kirkpatrick, I want to talk a little 17 Protection Division the enforcement capability to 17 bit about the current planning cycle that's going 18 not reissue or renew or allow new permits to be 18 on right now in the Metro Water District. As 19 issued to any utility within the Metro Water 19 part of that work, has the District projected 20 20 District that was not complying with the what its water needs will be into the future? 21 21 A. It has. conservation measures or any other aspect of the 22 22 Q. What do those projections show? plan. 23 **Q.** And you mentioned that these planning cycles 23 Α. So, interestingly, when you sit down and look at 24 24 happen on a five-year cycle. And I want to ask employment forecasting and population forecasting 25 you is there anything done between these 25 and compare that with the 2009 forecasts that THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3435 3437 1 five-year cycles to monitor how the plans are 1 were prepared for that round of plans, it 2 being implemented? 2 demonstrates that our water demand will decrease 3 A. Yes. 3 by 25 percent as compared to the demand projected Q. And what is that? 4 4 in 2009. 5 5 **Q.** I just want to be very clear about this. So the A. So each year the water district produces 6 6 reports -- activities and implementation reports future demands you're projecting now is 25 7 7 that are provided to the Georgia General Assembly percent lower than the future demand that had 8 8 and provided to the Georgia Environmental been projected in 2009? 9 Protection Division, and they're also provided to 9 A. That's correct. 10 10 the public to -- to view what progress has been **Q.** Okay. And how aggressive or conservative is the 11 11 made. And they identify the progress on a District being with respect to these projected 12 12 variety of measures within those reports. future demands? 13 Q. And, Ms. Kirkpatrick, has the Metro District --13 A. They're being conservative. And what -- again, 14 does it have any knowledge about what impact 14 they began with population and employment. They 15 15 also factor in the existing conservation these conservation measures have had on 16 consumptive water use -- M & I consumptive water 16 measures. But they don't include what might come 17 use in the Atlanta area? 17 in terms of additional conservation measures to 18 A. We do. 18 ensure that we are preparing a conservative 19 **Q.** And what do you know about that? 19 future-demand forecast. 20 A. So if you look back in the history, it's been in 20 Q. Okay. Ms. Kirkpatrick, I want to shift briefly 21 21 place for about 15 years now. And we have seen and talk about a topic that has come up in some 22 22 that per capita use has gone down by 30 percent of Florida's experts' testimony; and that has to 23 23 and that our withdrawals have even decreased as do with something called interbasin transfers. 24 well, and again 30 percent and 10 percent. And 24 Can you briefly explain to the Court what an 25 that's quite significant when you look at 15 25 interbasin transfer is and why it happens? THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart

3440 1 A. Yes. So pretty simple, an interbasin transfer is 1 about that. 2 2 when you withdraw water from one river or one And, ma'am, are you an engineer? 3 basin, it goes into the distribution system for 3 A. Iam. Q. And why do you say it wouldn't be feasible? 4 the utility. It's used by the consumer. It is 5 then collected, highly treated, and then returned 5 Α. Two reasons come to mind. The first is the to a different basin or a different river. 6 technical feasibility, and the second is the 7 **Q.** And why might that happen? 7 economic feasibility. When you consider that we 8 A. For a variety of reasons, the first of which is 8 have a large urban area that has been built over 9 geography. The way our systems and our 9 the last couple hundred years and the 10 communities and our political boundaries have 10 infrastructure lies underneath that built 11 been built, they don't necessarily align with 11 environment, the ability to completely transform 12 your watersheds. And so oftentimes the way the 12 that infrastructure underground would be 13 community has been built and grown, it requires 13 technically challenging. And --14 water to be withdrawn from one basin or one water 14 Q. And you also mentioned the -- I'm sorry. I 15 source and used and then treated in another 15 didn't mean to interrupt you. 16 16 facility. You also mentioned the economic costs 17 17 Q. Okay. Certain of Florida's experts in this case involved. Do you have any sense for what that 18 18 have conducted analyses where they assume an over might be? 19 50 percent increase in interbasin transfers in 19 Α. Absolutely. To re-pipe a utility's water system 20 20 the Metro Water District going forward. Do you and wastewater treatment system would be 21 21 agree that that's a fair assumption? extremely costly to take that kind of 22 22 A. I do not agree that's a fair assumption. undertaking. And I'm not sure of the benefit for 23 Q. And why not? 23 investing that type of dollar. A. Well, looking back at the 2001 law that created 24 24 Q. Ms. Kirkpatrick, I want to turn to discussing the 25 25 the Water District, it actually restricts the 2010 Water Stewardship Act that was enacted in THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3439 3441 1 Water District from studying and planning for 1 the State of Georgia that you were asked some 2 2 interbasin transfers into the District from questions on by cross-examination. And one of 3 3 outside its boundaries, No. 1. No. 2, in the the documents you were shown described the 2010 4 2009 plan update that was issued, it includes a Water Stewardship Act as modest legislation. Do 5 5 clear guidance that says that the District will you agree with that? 6 6 A. I do not. minimize interbasin transfers going forward. 7 7 Q. Why not? And, third, there was guidance provided by the 8 **Environmental Protection Division in 2015 for the** 8 You know, it was -- it was really a fundamental 9 Water District that, again, requires that they 9 change for the State of Georgia going forward, 10 10 minimize interbasin transfers in their planning No. 1. No. 2, we had a number of organizations 11 11 process. that also recognized that on a national level 12 Q. Okay. So what, if any, increase in interbasin 12 having the State of Georgia enact this type of 13 13 transfers does the District project will occur conservation and efficiency legislation was a 14 through 2015? 14 leader for the nation at the time. 15 A. Zero. 15 And you could start by looking at the --16 **Q.** There's also been a suggestion by Florida's 16 within the state, the Georgia Conservancy, which 17 experts in this case that Georgia eliminate what 17 is a statewide environmental organization, lauded 18 they call net basin exports. That -- do you have 18 the passage of the Water Stewardship Act. You 19 a reaction -- in particular that's been a 19 can also look at another organization that's been 20 suggestion made by Dr. Sunding. Do you have a 20 referenced here today, American Rivers. And they 21 reaction to Dr. Sunding's proposals that Atlanta 21 highlighted how excited they were about the 22 22 completely eliminate interbasin transfers or net passage and how it really served as a national 23 23 basin exports? example. And then the Alliance for Water

A. That wouldn't be feasible.

Q. And I just want to ask you a couple questions THE REPORTING GROUP

Mason & Lockhart

TRIAL - November 21, 2016 (Vol. XIII) Florida v. Georgia 3444 1 efficiency, also heralded the passage of the Act. 1 demonstrate progress? Q. Ms. Kirkpatrick, will you tell us what some of 2 2 Α. Very similar enforcement action or enforcement 3 the key components were of the 2010 Water 3 capability from -- well, from Environmental Protection Division. They can choose not to 4 Stewardship Act? 4 5 A. Sure. The first was outdoor watering 5 issue, renew, or issue new permits for those 6 restrictions, again, fixture retrofits; and 6 utilities. 7 another piece would have been water loss audits. 7 Q. Okay. Dr. Sunding, an expert for Florida in this 8 **Q.** I want to ask you about the outdoor watering ban. 8 case, testified in his written testimony that 9 Can you tell us what that was? 9 Georgia can undertake leak abatement programs on 10 A. Yes. For the first time it restricted outdoor 10 a sustained year-by-year basis. What's your 11 watering between 10 a.m. -- in other words, you 11 reaction to that proposal from Dr. Sunding? 12 12 couldn't do it between 10 a.m. and 4 p.m. A. It seems outdated. 13 **Q.** And when did that apply? Every day? 13 Q. Why is that? 14 A. Every day, 365 days a year, every year, 14 Because we're already doing that. The District 15 regardless of whether or not it was wet or dry. 15 has had it in place for a number of years. The 16 Q. Okay. And you were shown some exceptions to the 16 State of Georgia has had it in place since 2010. 17 17 outdoor watering ban. Do you remember that? And with implementation of the 2015 rules, it's 18 18 A. I do. already in place across the State of Georgia. 19 **Q.** And do you agree that the exceptions undermine 19 Q. Ms. Kirkpatrick, I want to shift topics again 20 20 the benefits of the outdoor watering ban? because at the beginning of your 21 21 A. I don't. cross-examination, you were asked about the water 22 22 **Q.** Okay. You also mentioned annual water loss contingency planning task force. Do you remember 23 audits. Is that something that was part of the 23 that? A. I do. 24 24 Act? 25 A. It was. 25 Q. Can you just briefly describe for us what was THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3443 3445 **Q.** Can you tell us what that was? 1 that task force? Why was it formed? 2 A. Yes. So they required within the State of 2 Α. So just at a very high level, when Magnuson ruled 3 3 Georgia, not just metro Atlanta, for systems in another case that Georgia would not be able to 4 serving public water supply to 3300 people or 4 access Lake Lanier for water supply, the State of 5 5 Georgia convened a task force to look at options more, they must adopt the water loss audit 6 6 that could potentially be evaluated in the process and begin to implement it. 7 Q. And what percentage of the population, if you 7 absence of Lake Lanier being available for water 8 8 know, in the ACF Basin in Georgia is served by supply. 9 utilities that are subject to the water loss 9 Q. What kind of time frame did the task force 10 10 audit requirements of the Water Stewardship Act? operate under? 11 11 Less than 90 days. A. A significant portion, if not a vast majority. Α. 12 Q. Now, since the Water Stewardship Act was enacted, 12 Q. Why so quick? 13 13 I believe you mentioned there have been some A. The Judge had stayed the Order for three years, 14 additional rules passed in connection -- that had 14 and so it felt like we needed to move forward 15 some connection to the Water Stewardship Act. Do 15 pretty quickly to evaluate some options. 16 vou remember that? 16 Q. And did the task force make any findings about 17 A. I do. 17 the suitability of Lake Lanier as a water supply 18 **Q.** Can you describe for us what those rules are and 18 source for the Atlanta area? 19 what they require? 19 A. Yes. They did. 20 A. So the Georgia Water Use and Efficiency Rules 20 What were those? 21 21 require each of those utilities that we just After the task force concluded its work, its 22 22 spoke about serving 3300 people or more to primary finding was that Lake Lanier was the most

TRIAL - November 21, 2016 (Vol. XIII) Florida v. Georgia 3448 Q. On cross-examination you were asked about kind of 1 the waters of the ACF and the ACT Basin. And 2 2 the two buckets of recommendations that are water is a fundamental driver of not only our 3 included in the task force report, the no regrets 3 economic success but also the quality of life of 4 options and the contingency measures. Do you the citizens in metro Atlanta. 5 recall that? 5 Q. And, Ms. Kirkpatrick, do you feel that the Metro 6 A. I do. 6 Water District has taken steps to conserve the 7 **Q.** And of the no regrets options, how many of the no 7 water resources that are in the region? 8 regrets options have been implemented by the 8 A. Absolutely. 9 Metro Water District? 9 And just describe that again for us. 10 A. 100 percent. 10 You know, it -- it shouldn't be lost on any of us 11 **Q.** And, again, what's the population of the Metro 11 that if you look back over 15 years, and you look 12 Water District that's served by -- that relies on 12 at the significant progress that this planning 13 ACF waters for its water supply source? 13 entity has taken, and you look at the fact that 14 A. 4.1 million people. 14 we have reduced our per capita usage by 30 15 Q. Now, the contingency options, Ms. Kirkpatrick, 15 percent while adding 1 million people or more to 16 16 did the task force recommend that Georgia our region, that is exceptionally significant and 17 17 implement the contingency measures? shows that the planning agency is doing their A. No. 18 18 19 **Q.** Why not? 19 **Q.** Ms. Kirkpatrick, thank you very much. 20 20 MR. ALLEN: Your Honor, I have no A. Because, again, the primary finding was that Lake 21 21 Lanier was the best alternative for water supply. further questions. 22 Q. Did the task force identify any challenges or 22 SPECIAL MASTER LANCASTER: Recross? 23 obstacles that might be imposed with implementing 23 **RECROSS-EXAMINATION** 24 the contingency measures? 24 BY MR. FAWAL: 25 A. They did. 25 Q. Ms. Kirkpatrick, you testified about toilets and THE REPORTING GROUP THE REPORTING GROUP Mason & Lockhart Mason & Lockhart 3447 3449 Q. What were those? 1 faucets and showerhead retrofits. Correct? A. I did. 2 A. So, again, given that the time frame was short 2 3 3 **Q.** Just to clarify for the Court, indoor water uses for the evaluation process of the task force, comprehensive feasibility from an engineering 4 don't really affect consumptive use rates. 4 5 perspective was not done on any of the options. 5 Correct? 6 6 A. No. They can. Second, legal considerations were not taken into 7 7 **Q.** Well, indoor water use is virtually account; third, societal; and fourth, 8 8 environmental considerations were not fully nonconsumptive. Correct? 9 vetted either. And all of those needed to take 9 A. There is minimal consumption. 10 place before any single contingency option could 10 **Q.** You understand outdoor watering and leak 11 11 abatement have a much bigger impact on be contemplated as an option going forward. 12 Q. Okay. Ms. Kirkpatrick, I just have one final set 12 consumptive use. Correct? 13 13 of questions for you. You know, as someone who A. They can, yes. 14 has worked with the Metro Atlanta Chamber of 14 **Q.** When you are using per capita usage in your 15 Commerce, who has worked on the Metro Water 15 testimony, that's not the same as consumptive 16 District, who has worked on the task force, can 16 use. Correct? 17 you just tell us about the importance of a water 17 A. It is not. 18 supply source to the metro Atlanta region? 18 **Q.** And you're referring to water withdrawals. 19 A. It's critical. I mean, we're the ninth largest 19 20 MSA in the nation. We're home to a broad range 20 A. I'm not sure I understand your question. 21 21 of businesses, from small to Fortune 500. We **Q.** You're referring to the amount of water used by a 22 22 person without respect to the return rates. have a healthy university community, over 70

		3450	21, 2010 (3452
1	A.	Oh, per capita use. So ask me your question	1	THE WITNESS: I have not.
2		again.	2	SPECIAL MASTER LANCASTER: Nothing
3	Q.	You testified about per capita usage	3	further.
4	A.	Yes.	4	MR. ALLEN: Nothing further.
5	Q.	and its decrease. And I just want to clarify	5	MR. FAWAL: Nor for me, your Honor.
6		that's not the same thing as consumptive usage.	6	MR. ALLEN: Your Honor, we have our next
7		Right?	7	witness, Peter Mayer, prepared to testify.
8	A.	Correct.	8	We're happy to go ahead and put him on the
9	Q.	You also mentioned or were asked some questions	9	stand now. Or I think both sides are happy
10		about Dr. Sunding. Were you here when	10	to either proceed or wait until the morning
11		Dr. Sunding testified?	11	to start his testimony, however the Court
12	A.	I was not.	12	would prefer.
13	Q.	Okay. Have you read his testimony?	13	SPECIAL MASTER LANCASTER: Approximately
14	A.	I have not.	14	how long do you anticipate this witness and
15	Q.	Are you aware he testified to ways to offset net	15	the next witness will take?
16		IBT's through conservation efforts?	16	MS. WINE: Without we're just
17	A.	I am not familiar with his testimony.	17	conferring because we don't know what each
18	Q.	You testified earlier that you think leak	18	other has planned. But I anticipate that we
19		abatement is generally a good thing. Right?	19	can finish both easily tomorrow without there
20	A.	Yes.	20	being any issues.
21	Q.	Okay. In fact, you just testified that Georgia	21	SPECIAL MASTER LANCASTER: And tomorrow
22		is doing it today. Right?	22	being from 9:00 to what?
23	A.	Correct.	23	MS. WINE: I'm guessing we would be done
24	Q.	And so you would agree that would actually make	24	by 3:00, if not earlier in the day.
25		it easier to implement leak abatement policies	25	SPECIAL MASTER LANCASTER: We'll recess.

		Mason & Lockhart		Mason & Lockhart
		3451		3453
1		Dr. Sunding is providing. Right?	1	(Time Noted: 3:40 p.m.)
2	A.	I'm not familiar with the policies that	2	(Proceeding adjourned to Tuesday,
3		Dr. Sunding is providing.	3	November 22, 2016, at 9:00 a.m.)
4	Q.	If he's suggesting continuing leak abatement,	4	(End of Day)
5		you would agree that's already in place.	5	
6		Right?	6	
7	A.	I think Georgia has a program that's already in	7	
8		place, yes.	8	
9	Q.	And you're not suggesting that leaks won't happen	9	
10		in the future. Right?	10	
11	A.	That's correct. And there is a program in place	11	
12		to adjust that.	12	
13	Q.	And, therefore, it will save water in the future	13	
14		as well. Right?	14	
15	Α.	Yes.	15	
16		MR. FAWAL: No further questions, your	16	
17		Honor.	17	
18		MR. ALLEN: Nothing further, your Honor.	18	
19		SPECIAL MASTER LANCASTER: Ms. Kirkpatrick,	19	
20		were you you were here when the last	20	
21		witness before you testified?	21	
22		THE WITNESS: For a portion.	22	
23		SPECIAL MASTER LANCASTER: Well, for the	23	
24		record, I am not a technician. Do you	24	
25		have you ever heard of Battle Bend?	25
