EXHIBIT NO. 339-3

In the Longitude of Cape Race, different Red-
 vines in our Ships from Cape Breton (and it
 seems to be a Degree or so) and more than
 1000 Miles from Europe. At a Medium they make it
 104° 30' & Chabert's Survey makes it 104° 30' &
 30" to the Distance from Cape Race to the
 Mouth of the River St. Lawrence which is exactly the
 Mean of the reckonings of our Ships of War
 from England. C. S. Mary's they make 104° 30' West of Cape Race,
 and St. John's Harbour 35 or 40 East of it.
 It is the Longitude of Cape Sable we had to
 ascertain. In the Latitude before the observations of
 Chabert, and the reckonings of our Ships were
 inserted which make it 46° 35' or 37' according
 within a mile. In which we have altered that and
 consequently the adjacent Parts of Nova Scotia
 and New England.

well as he remembered it, perhaps to enable him to
 a Lobster to the Road of Trade to enable him to
 Survey it as that time which he sailing into the Har-
 bor. But this Distance falls within it as an
 of some 100 Miles. M. Moll put this Distance as an
 Actual Survey made by his Master has been the
 Command from which this Distance.
 It is thus laid down from the Annapolis to
 M. Defart Rock (from Cape Anne) 100 Miles
 100° and 10' 30" East from Cape Anne. It is
 from whence they make St. John's Bay 100 Miles
 and the Rock in 104° 30' - But this runs rather West
 than East. It is the Longitude of Cape Sable we had to
 ascertain. In the Latitude before the observations of
 Chabert, and the reckonings of our Ships were
 inserted which make it 46° 35' or 37' according
 within a mile. In which we have altered that and
 consequently the adjacent Parts of Nova Scotia
 and New England.

NOTE
River St. Croix is laid down as in our previous and according
to former hydrographic surveys made in 1775 & 1776. It is laid in
the Map of Canada. Louisiana in 1775. Anguilla Published
in 1775 gives the name of River St. Croix in Louisiana. Published
and drawn on the Map of North America & Cape Breton. Published
also in 1775. making but one of the two. River St. Croix is an equidistant
and St. Croix. This difference between the two Maps has been
the occasion of a very large error, namely that there were
two Rivers St. Croix, one called West St. Croix & the other East St. Croix.

ADVERTISEMENT
All within the Blue Colour of this Map, shows what is Claim'd by France under the Name of LOUISIANA. MISSES = SEPT. 1763. According to a French Map published at Paris with the French King's Privilege. The Yellow Colour what they allow the English. The Red, Spain. The Blue, the property of Great Britain. The Green, the property of the United States. The map was published in 1763, and is a very accurate representation of the territory at that time.

EXPLANATION
To find the Difference between any two Places in this Map by a Scale of English Miles, find from 10 to 50 Degrees of Latitude, as you see of one number up each side, the line that goes from top to bottom, intersecting the Parallel of Latitude at every 10 Miles, which each Parallel contains 100 Miles of Latitude, that Parallel is numbered with. Example I desire to know the Distance between New York and Indian Fort in Brazil. I find the 42d Parallel of Latitude, and the 10th Parallel of Longitude, and the Distance between them is 1000 Miles.

Map Division
The map is divided into several sections, each labeled with a letter and a number. The letters are A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z. The numbers are 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.
