

**In the
Supreme Court of the United States**

OCTOBER TERM 1968

UNITED STATES OF AMERICA,

Plaintiff,

v.

STATE OF LOUISIANA, ET AL.

**Appendix G, Map Exhibits and Related Materials for
Brief of the State of Louisiana in Support of its
Motion for Entry of Supplemental Decree No. 2**

JACK P. F. GREMILLION,

Attorney General,
State of Louisiana,
2201 State Capitol,
Baton Rouge, Louisiana.

VICTOR A. SACHSE,

PAUL M. HEBERT,

THOMAS W. LEIGH,

ROBERT F. KENNON,

W. SCOTT WILKINSON,

J. J. DAVIDSON,

OLIVER P. STOCKWELL,

J. B. MILLER,

FREDERICK W. ELLIS,

ANTHONY J. CORRERO III,

Special Assistant Attorneys General,
State of Louisiana.

JOHN L. MADDEN,

Assistant Attorney General,
State of Louisiana.

EXHIBIT 119

2 of 41

MAP NO. 2 OF 41
OF A SERIES NUMBERED FROM EAST TO WEST
LOUISIANA COAST
SCALE 1:20,000
CONTROL DATA
Polyconic Projection, NAD 83, Zone 17N
Elevations shown are based on mean sea level
Prepared by the Coast and Geodetic Survey for the Bureau of Land Management and the State of Louisiana to show the approximate mean low water line along the Gulf Coast as interpolated and compiled from aerial photographs taken by Jack Annemann Corp., January 1954.
Based on Coast and Geodetic Survey Map No. 1-5387 dated 1951.
The outercoast shoreline has been revised, where appreciably changed, as the date of the 1954 photographs. All other map details are of the date of the base map.
LEGEND
A. Recoverable horizontal control station of first-order or higher accuracy
B. Recoverable horizontal control station of less than first-order accuracy
C. Approximate mean low water line
D. The light shoreline defines the outer limits of vegetation visible above appropriate mean high water.
The heavy shoreline defines the approximate mean high water line.
Marsh
Mangrove
Inland water areas
Shallow

EXHIBIT 119

7 of 41

MAP NO. 7 OF 41
OF A SERIES NUMBERED FROM EAST TO WEST
LOUISIANA COAST

SCALE 1:20,000
(1 inch = 1,666.67 ft.)
Polyconic Projection 1927 North American Datum
Contours shown at 10-foot intervals
Elevations shown are based on mean sea level

Prepared by the Coast and Geodetic Survey for the Bureau of Land Management and the State of Louisiana to show the approximate mean low water line along the Gulf Coast as interpolated and computed from aerial photographs taken by Jack Kimmitt Corp., January 1954.

Based on Coast and Geodetic Survey Map No. T-3933 dated 1950. The mean low water line has been interpolated from the mean low water line shown on the 1954 photographs. All other map details are of the date of the base map.

LEGEND
△ Recoverable horizontal control station of third order or higher accuracy
○ Recoverable horizontal control station of less than third order accuracy
— Approximate mean low water line
— The light shoreline defines the outer limits of vegetation visible above approximate mean high water.
— The heavy shoreline defines the approximate mean high water line.
■ Inland water areas
Marsh
Mangrove
Sand

EXHIBIT 119

1 of 8

- LEGEND**
- Recoverable horizontal control station of third-order or higher accuracy
 - Recoverable horizontal control station of less than third-order accuracy
 - Mean low water line
 - Levee
 - The light shoreline defines the outer limits of vegetation visible from the air
 - The heavy shoreline defines the approximate mean high water line
 - Marsh and/or Wild Cane
 - Sand
 - Grass in Water
 - Woodland
 - Swamp
 - Orchard
 - Trees in Water

MAP NO. 1 OF 8
LOUISIANA COAST
(MISSISSIPPI RIVER DELTA AREA)
(1 inch = 1:666,667 ft.)

CONTROL DATA
Polyconic Projection 1927 North American Datum
10,000 foot grid based on Louisiana plane coordinate system, south zone

Prepared by the Coast and Geodetic Survey for the Bureau of Land Management
and the State of Louisiana to show the new water line along the outer coast
of the State of Louisiana. The map was compiled from aerial photography and
from infrared aerial photography and field examination by the Coast and Geodetic
Survey in November and December, 1959.

Based on Coast and Geodetic Survey Map No. 1:19545 dated 1959.
Base map compiled from nine-inch photographs taken October, 1956, outer coast line
and culture revised from new photography and field inspection of November and
December, 1959.

- NUMERICAL CONTROL STATIONS**
- 1. GARDEN ISLAND LIGHT
 - 2. GARDEN ISLAND LIGHT
 - 3. GARDEN ISLAND LIGHT
 - 4. GARDEN ISLAND LIGHT
 - 5. GARDEN ISLAND LIGHT
 - 6. GARDEN ISLAND LIGHT

- LEGEND**
- Reconnaissance horizontal control station of first order or higher
 - Reconnaissance horizontal control station of second order
 - Mean low water line
 - Level
 - Light
 - Shoreline
 - Marsh and/or Wild Area
 - Sand
 - Grass in Water
 - Woodland
 - Trees in Water

MAP NO. 4 OF 8
LOUISIANA COAST
(MISSISSIPPI RIVER DELTA AREA)
SCALE 1:50,000
(1) CONTROL DATA
Polemic Projection 1927 North American Datum
The Coast and Geodetic Survey for the Bureau of Land Management
and the State of Louisiana plan coordinate system, south zone
of the Mississippi River Delta area of the Gulf Coast is interpolated and compiled
from aerial photography and field examination by the Coast and Geodetic
Survey on Coast and Geodetic Survey Map No. 1, 1925 dated 1925.
Base map compiled from new photography and field inspection of November and
December, 1959.

INDEX TO ADJOINING SHEETS

- LEGEND
- Recoverable horizontal control station of third-order or higher accuracy
 - Recoverable horizontal control station of less than third-order accuracy
 - Mean low water line
 - Levee
 - The light shading defines the outer limits of vegetation visible from the air. The heavy shading defines the approximate mean high water line.

- NOTE: Unlabeled circles are photogrammetric point positions and map features.
- Marsh and/or Wild Cane
 - Sand
 - Swamp
 - Orchard
 - Grass in Water
 - Woodland
 - Tree in Water

MAP NO. 5 OF 8
LOUISIANA COAST
(MISSISSIPPI RIVER DELTA AREA)
SCALE 1:20,000
CONTROL DATA
(1 inch = 1,566.67 ft.)

Photocentric Projection 1927 North American Datum
10,000-foot grid based on Louisiana plane coordinate system, Zone nine
Prepared by the Coast and Geodetic Survey for the Bureau of Land Management
and the Mississippi River Delta area of the Gulf Coast as interpolated and compiled
from infrared aerial photography and field examination by the Coast and Geodetic
Survey in November and December, 1959.
Based on Coast and Geodetic Survey Map No. 1, 1954 dated 1959.
Base map compiled from nine-inch photographs taken October, 1958, outer coast line
and culture revised from new photography and field inspection of November and
December, 1959.

EXHIBIT 119

- LEGEND**
- Recoverable horizontal control station of third-order or higher accuracy
 - Recoverable horizontal control station of less than third-order accuracy
 - Levee
 - Mean low water line
 - The light shoreline defines the outer limits of vegetation visible from the water
 - The heavy shoreline defines the approximate mean high water line
 - Marsh and/or Wild Cane
 - Sand
 - Savanna
 - Orchard
 - Mangrove
 - Grass in Water
 - Woodland
 - Trees in Water

MAP NO. 6 OF 8
LOUISIANA COAST
(MISSISSIPPI DELTA AREA)
SCALE 1:50,000
CONTROL DATA
Polyconic Projection 1927 North American Datum
10,000-foot grid based on Louisiana plane coordinate system, south zone
Prepared by the Coast and Geodetic Survey for the Bureau of Land Management
and the State of Louisiana to show the mean low water line along the outer coast
of the Mississippi River Delta and the mean high water line along the inner coast
from infrared aerial photography and field examination by the Coast and Geodetic
Survey in November and December, 1959.
Based on Coast and Geodetic Survey Map No. 1, 1957 dated 1959.
Base map compiled from nine-line photographs taken October, 1958, outer coast line
and culture revised from new photography and field inspection of November and
December, 1959.
