

SEP 3 1968

Number 9 Original

JOHN F. DAVIS, CLERK

In the
Supreme Court of the United States

OCTOBER TERM 1968

UNITED STATES OF AMERICA,

Plaintiff,

v.

STATE OF LOUISIANA, ET AL.

Appendix G, Map Exhibits and Related Materials for
Brief of the State of Louisiana in Support of its
Motion for Entry of Supplemental Decree No. 2

JACK P. F. GREMILLION,

Attorney General,
State of Louisiana,
2201 State Capitol,
Baton Rouge, Louisiana.

VICTOR A. SACHSE,

PAUL M. HEBERT,

THOMAS W. LEIGH,

ROBERT F. KENNON,

W. SCOTT WILKINSON,

J. J. DAVIDSON,

OLIVER P. STOCKWELL,

J. B. MILLER,

FREDERICK W. ELLIS,

ANTHONY J. CORRERO III,

Special Assistant Attorneys General,
State of Louisiana.

JOHN L. MADDEN,

Assistant Attorney General,
State of Louisiana.

EXHIBIT 119

8 of 41

EXHIBIT 119

9 of 41

MAP NO. 9 OF 41
OF A SERIES NUMBERED FROM EAST TO WEST
LOUISIANA COAST
SCALE 1:20,000
(1 inch = 1,666.67 ft.)

Polyconic Projection 1927 North American Datum
10,000 foot horizontal scale, 63,000 foot vertical scale
Elevations shown are based on mean sea level
Prepared by the Coast and Geodetic Survey for the Bureau of Land Management and the State of Louisiana to show the approximate mean low water line along the Gulf Coast as interpolated and computed from aerial photographs taken by Jack Ammann Corp., January 1954
Based on Coast and Geodetic Survey Map No. T-5432 dated 1934
The shoreline shown has been revised where it was approximately changed to the date of the 1954 photographs. All other map details are of the date of the base map.

EXHIBIT 119

10 of 41

EXHIBIT 119

11 of 41

MAP NO. 11 OF 41
OF A SERIES NUMBERED FROM EAST TO WEST
LOUISIANA COAST
SCALE 1:20,000

CONTROL DATA
(1 inch = 1,666.67 ft.)
Polyconic Projection, based on Louisiana plane coordinate system, south zone
Elevations shown are based on mean sea level
Prepared by the Coast and Geodetic Survey for the Bureau of Land
Management and the State of Louisiana to show the approximate
mean low water line along the Gulf Coast as interpreted and com-
pared with aerial photographs taken by the American Corp., January
1934.
Based on Coast and Geodetic Survey Map No. T-5311 (WEST) dated
1934.

The outcroast shoreline has been revised, where appreciably changed,
to the date of the 1934 photographs. All other map details are of the
date of the base map.

LEGEND
△ Recoverable horizontal control station of first order or higher accuracy
○ Approximate mean low water line
○ Approximate mean high water line
The light shoreline defines the outer limits of vegetation visible above
approximate mean high water.
The heavy shoreline defines the approximate mean high water line.

Marsh
Inland water reeds
Mangrove
Sand

EXHIBIT 119

14 of 41

MAP NO. 14 OF 41
OF A SERIES NUMBERED FROM EAST TO WEST
LOUISIANA COAST

SCALE 1:20,000
(1 inch = 1,666.67 ft.)

Polyconic Projection 1927 North American Datum
10,000-foot grid based on Louisiana plane coordinate system, south zone
Elevations shown are based on mean sea level
Prepared by the Coast and Geodetic Survey for the Bureau of Land Management and the State of Louisiana to show the approximate mean low water line along the Gulf Coast as interpolated and computed from aerial photographs taken by Jack Annemann Corp., January 1954.
Based on Coast and Geodetic Survey Map No. T-3884 dated 1955.
The outermost shoreline has been revised where appreciable changes to the date of the 1954 photographs. All other map details are of the date of the base map.

LEGEND

- △ Recoverable horizontal control station of third-order or higher accuracy
- Recoverable horizontal control station of less than third-order accuracy
- Approximate mean low water line
- The light shoreline defines the outer limits of vegetation visible above approximate mean high water.
- The heavy shoreline defines the approximate mean high water line.
- ⇒ Marsh
- Sand

EXHIBIT 119

15 of 41

MAP NO. 15 OF 41
OF A SERIES NUMBERED FROM EAST TO WEST
LOUISIANA COAST

SCALE 1:20,000
(1 inch=1,666.67 ft.)
CONTROL DATA
Polyconic Projection 1927 North American Datum
10,000 foot interval contour lines shown south zone
of land on which the survey was made. Elevations shown are based on mean sea level.
Prepared by the Coast and Geodetic Survey for the Bureau of Land
Management and the State of Louisiana to show the approximate
mean low water line along the Gulf Coast as interpolated and com-
piled from aerial photographs taken by Jack Ammann Corp., January
1954.
Based on Coast and Geodetic Survey Map No. T-9825 dated 1956.
The outermost shoreline has been revised, where appreciably changed,
from the 1954 photographs. All other map details are of the
date of the base map.

- LEGEND
- △ Recoverable horizontal control station of third-order or higher accuracy
 - Recoverable horizontal control station of less than third-order accuracy
 - Approximate mean low water line
 - The light shoreline defines the outer limits of vegetation visible above approximate mean high water.
 - The heavy shoreline defines the approximate mean high water line.
 - Marsh
 - Magrow
 - Sand

MAP NO. 21 OF 41
OF A SERIES NUMBERED FROM EAST TO WEST
LOUISIANA COAST
SCALE 1:20,000
(1 CONTINUED)

Polyconic Projection 1927 North American Datum
10,000-foot grid based on Louisiana plane coordinate system, south zone
Elevations shown are based on mean sea level
Prepared by the Coast and Geodetic Survey for the Bureau of Land
Management and the State of Louisiana to show the approximate
mean low water line along the Gulf Coast as interpolated and com-
piled from aerial photographs taken by Jack A. Martin, Jr., January
1954.

Based on Coast and Geodetic Survey Map No. 1-5870 dated 1955.
The outermost shoreline has been revised where appreciable changes
to the date of the 1954 photographs. All other map details are of the
date of the base map.

LEGEND
△ Recoverable horizontal control station of third-order or higher accuracy
○ Recoverable horizontal control station of less than third-order accuracy
— Approximate mean low water line
— The light shoreline defines the outer limits of vegetation visible above
approximate mean high water.
— The heavy shoreline defines the approximate mean high water line.

MAP NO. 24 OF 41
OF A SERIES NUMBERED FROM EAST TO WEST
LOUISIANA COAST

SCALE 1:20,000

CONTINUED DATA
Polyconic Projection
10,000-foot grid based on Louisiana above coordinate system, south zone
Elevations shown are based on mean sea level
Prepared by the Coast and Geodetic Survey for the Bureau of Land
Management and the State of Louisiana to show the approximate
mean low water line along the Gulf Coast as interpolated and com-
piled from aerial photographs taken by Jack Ammann Corp., January
1954.
Based on Coast and Geodetic Survey Map No. T-5971, dated 1956.
The shoreward shoreline has been revised, where appreciably changed,
by the use of aerial photographs. All other map details are of the
date of the base map.

- LEGEND
- Recoverable horizontal control station of third-order or higher accuracy
 - Approximate mean low water line
 - The light shoreline defines the outer limits of vegetation visible above approximate mean high water.
 - The heavy shoreline defines the approximate mean high water line.
