This act related only to the Northern and Western Boundary of Texas. Still there was no comment or objection to the 3-league boundary on the Gulf.

This was explained by its author and intended by Congress as a compromise of a dispute, demonstrating that the annexation of Texas had not committed the United States to a recognition of the boundaries claimed by the Texan Act of December 19, 1836. U.S. Brief, 233-234. It described the Rio Grande boundary as extending only to the Gulf of Mexico.

Mexican Reply to British Nov. 17, 1848

> "\* \* \* the celebration of the said Treaty had for it's sole object the termination of the war which existed between the two Republics, and for that reason none of it's Articles could change the rights of other Nations. Such rights, whether they refer to the extent of territorial sea, or whatever other point, remain in the same state as before the 2nd of February. Finally Mexico never pretended to assail the rights which Great Britain or any other Power may have, and consequently none has any just cause of complaint against a stipulation concluded for the mutual convenience of Mexico and the United States of America." U.S. Brief, 66, fn 17; 403-404.

Protest

Boundary GulfofMexico

To respond to the British protest of June 9, 1848: "As the tenor of this article [Article 5 of the Treaty of Guadalupe Hidalgol seems to involve an assumption of jurisdiction on the part of the United States and Mexico over the sea beyond the usual limit of 1 marine league (or 3 geographical miles) which is acknowledged by international law and practice as the extent of territorial jurisdiction over the sea that waters the coasts of the states, Her Majesty's Government think it right to declare, in order to prevent future misunderstanding, that they cannot acquiesce in the extent of maritime jurisdiction assumed by the United States and Mexico in the article in question, and Her Majesty's Government consider this step the more necessary, because the Gulf of Mexico is a great thoroughfare of maritime commerce, and is not like a bay or creek which can by its nature be susceptible of being subjected to exclusive dominion." 99 Cong. Rec. 3623; see U.S. Brief, 66, fn. 17.

Like the American reply, this would have been unresponsive, meaningless and misleading if it had been intended to reserve a contention that the Treaty did establish a three-league maritime belt in the Gulf. Its evident meaning was that the Treaty had no such purpose. The British accepted it in this light, as shown by their failure to make any further protest; and until August 29, 1935, Mexico continued to claim only three miles of territorial waters. U.S. Brief, 84.

"The Mexican Republic agrees to designate the following as her true limits with The United States for the future: retaining the same dividing line between the 2 Californias as already defined and established, according to Article V of the Treaty of Guadalupe Hidalgo, the limits between the 2 republics shall be as follows: Beginning in the Gulf of Mexico, 3 leagues from land, opposite the mouth of the Rio Grande, as provided in Article V of the Treaty of Guadalupe Hidalgo; the mouth of the Rio Grande, as provided in Article V of the Treaty of Guadalupe Hidalgo; thence, as defined in the said Article, up the middle of that river." 10 Stat.

As to the Gulf of Mexico, this merely repeated the language of the Treaty of Guadalupe Hildago. It must be understood to have been used with the meaning previously attributed to it by the parties in their explanations to Great Britain, that is, of stating a mere arrangement between the parties, not affecting the rights of nations under international law, as an assertion of a three-ke ague maritime boundary would have done.

Comment by the United States

Texas refers to a letter of April 25, 1856, written by Mr. Crampton, the British Minister, in which he referred to the three-mile rule as a "recently adopted doctrine" of the United States. Joint Reply Brief, 29-30. However, Mr. Crampton's own emphasis, as reprinted by the defendants, shows wherein he thought the novelty lay, namely, in asserting "that the civil jurisdiction of a country in no case extends further than 'a marine league along its coast." Actually, he misunderstood the American position, which was only that exclusive jurisdiction could not extend beyond one league; we have always recognized that jurisdiction for some special purposes, such as a limited customs jurisdiction, can extend farther. Perhaps the confusion arose from the fact that the stopping of the El Dorado—the subject of Secretary Marcy's letter of July 7, 1855—was sought to be justified by Spain as a permissible exercise of a defensive right, under the particular circumstances, although beyond the distance of three miles from shore. We denied that the action taken was of a sort permitted by international law outside territorial waters. Spain did not rely on a claim of exclusive general jurisdiction at the place of the incident. See 11 Manning, Diplomatic Correspondence of the United States: Inter-American Affairs, 201-204, 214-219, 223-224, 231-232, 859-864, 878-886, 908-909, 931-932.

Certainly Mr. Crampton could not have been speaking of the rule against exclusive jurisdiction beyond one league, in saying "it has not, unless I am mistaken been ever acquiesced in by Her Majesty's Government" (Joint Reply Brief, 30), for he himself participated in the correspondence in which Britain asserted that position in protest against the Treaty of Guadalupe Hidalgo in 1848. See U.S. Brief, 65; 1 Moore, Dig. Int. L., 730.

"A claim thus asserted and urged must necessarily be now respected and conceded by the United States, if it could be shown that on its being brought to their notice they had acquiesced in it, or that on its being brought to the notice of other powers it had been so widely conceded by them as to imply a general recognition of it by the maritime powers of the world. This correspondence shows its war-dominated motive. There is no calm consideration of boundary problems.

The practical advantages to be gained from the ability to operate warships within three miles of neutral coasts have been among the major considerations in the adherence of this nation and other maritime nations to the three-mile rule.

Mr. Seward was still Secretact with members of both House and Senate while approval was being considered. Yet he made no protest of this Gulfward boundary article as violating the foreign policy of the United States.

Comment by the United States

The fact that neither Secretary of State, was in Washing- tary Seward nor anyone else, ton, and was in frequent con- in or out of Congress, protested, questioned or even commented on the three-league boundary provision in the Florida Constitution, although the United States at that time was vigorously maintaining in its foreign relations the position that maritime boundaries cannot exceed three miles, seems to us a clear indication that no one believed that Florida's boundary provision was before Congress for consideration. The Act of June 25, 1868, did

not in terms approve Florida's boundary; it merely recited that the constitution was republican, and enacted that Senators and Representatives from Florida could return to Congress. The debates on that Act and the terms and history of related Reconstruction legislation show that it was never intended that Congress should give a general approval to the new State constitutions. The provision of the Act of March 2, 1867, that the constitutions be submitted to Congress for "approval" is most reasonably understood, in its context, as meaning for a determination that the particular requirements of that Act had been satisfactorily met; the legislative history of the Act supports this view. The same is true of the similar provision in the Act of March 23, 1867; in accepting a floor amendment to add the provision for "approval," Senator Trumbull, chairman of the Senate Committee, expressed the view that it made no change in the mean-U.S. Reply Brief, 92-94; Reply ing of the Act. This answer by Mr. Peirce was specifically authorized by Secretary of State Hay on July 3, 1902. U.S. Brief, 78.

This remained in effect until 1935, and shows the Mexican understanding at that time that the Treaty of Guadalupe Hidalgo had not established a three-league maritime belt along the coast.

California 332 U.S. 19  "It did happen that shortly after we became a nation our statesmen became interested in establishing national dominion over a definite marginal zone to protect our neutrality. Largely as a result of their efforts, the idea of a definite three-mile belt in which an adjacent nation can, if it chooses, exercise broad, if not complete dominion, has apparently at last been generally accepted throughout the world ***. That the political agencies of this nation both claim and exercise broad dominion and control over our three-mile marginal belt is now a settled fact. Cunard Steamship Co. v. Mellon, 262 U.S. 100, 122–124. And this assertion of national dominion over the three-mile belt is binding upon this Court." U.S. Brief, 102; U.S. Reply Brief, 26. This stated three miles only as a minimum; no more was necessary, as the reefs in question were within that distance. However, failure to mention any broader claim indicates that the State had not a policy of asserting a broader claim at that time.

In speaking of The Abby Dodge, 223 U.S. 166, the Court said that it there narrowed the scope of the federal statute involved "because of a belief that the United States was without power to regulate the Florida traffic in sponges obtained from within Florida's territorial limits, presumably the three-mile belt." 332 U.S. at 37.

The report recommended further study, to determine whether the existing policy should be changed. Congress has taken no further action in the matter.

Secretary Dulles' letter of September 8, 1958, made clear that he considered the national maritime boundary to be the limit of territorial waters:

maritime boundary to be the limit of territorial waters:

"My letter was not intended to indicate any distinction between the national boundary of the United States and the outer limit of its territorial sea, nor was it intended to leave open the possibility that the national boundary might be farther seaward than the outer limit of its territorial sea."
