P R O C E E D I N G S

MR. CHIEF JUSTICE BURGER: Mr. Greenberg, you may proceed.

MR. JACK GREENBERG, ESQ: Mr. Chief Justice and may it please the Court. This case is here on Petition for Writ of Certiorari to the United States Court of Appeals for the Fourth Circuit which affirmed in part and reversed in part the decision of the United States District Court for the middle district of North Carolina by a decision in which Judge Sobeloff dissented.

The issue is one of statutory construction of Title 7 of the Civil Rights Act of 1964. And the particular statutory provisions to which I would like to draw the Court's attention appears on page 2 of our brief. The statute makes it an unlawful employment practice for an employer to fail or refuse to hire or discharge any individual or otherwise to discriminate against him with regard to race.

And then in section 2 which more particularly applies to the issue we have pending here, to limit, segregate, or classify his employees in any way which would deprive or tend to deprive any individual of employment opportunities or otherwise adversely affect his status as an employee, because of race and other forbidden reasons.

The question presented in this case is whether intelligence tests and a high school graduation requirement may be used as

1 a prerequisite to promotion from the job of laborer to the
2 job of coal handler, and perhaps other jobs at Respondents
3 power plant.

4 When these tests, that is the intelligence tests, which
5 I might say was adopted on July 2, 1965, the effective date of
6 Title 7 of the Civil Rights Act of 1964, and these tests
7 screen out Negroes at a significantly higher rate than they
8 screen out whites, and there has been no demonstration that
9 the tests and the high school requirement predict ability to
10 do the job, and indeed there are some evidence to the contrary
11 that they do not predict ability to do the job.

12 Now the Court below held in the case of employees employed
13 after the high school requirement was instituted that the
14 statute was not violated and as I read the opinion of the Court
15 below and the position of Respondents, they rest on three sep-
16 arate grounds.

17 First of all, that there was no demonstration of an intent
18 to discriminate. Secondly this is a statutory argument and that
19 is that such tests are priveleged as professionally developed
20 ability tests under section 703H of Title 7. And then there
21 is an assertion by the Respondent which we say has no support
22 in the record, in fact the record is in some parts contrary
23 that the tests are a legitimate business need. That is, that
24 certain employees are not fully promotable throughout the plant,
25 to higher positions, and that the high school education require-

1 ment helps select employees who are.

2 Now before elaborating on our argument, we would like to
3 make our position clear with regard to ability testing. No
4 employer, we submit under the statute, is required to employ
5 anyone who is unable to do the job. And any employer may use
6 tests and educational requirements which predict whether an
7 employee, a prospective employee, can do the job.

8 But if the test that's used, or the education requirement
9 that's used means that members of a race, or of a group pro-
10 tected by the statute, and does not predict who can do the job,
11 in other words does not have predictive validity as indus-
12 trial psychologists use the term, and this record uses the
13 term, then it cannot be justified merely on the basis of good
14 faith.

15 Good faith or intent, we submit, is an elusive concept
16 which regularly, frequently is advanced in Civil Rights cases.
17 We hear good faith defenses in school segregation cases, in
18 jury discrimination cases, in voting discrimination cases, and
19 the courts have regularly responded that they look to results
20 and not make an effort to read the mind of an employer, indeed
21 it's something much more difficult to do to read the mind of
22 a corporation as to what it intends to do by the application of
23 certain standards of testing.

24 Indeed, while it is not impossible on this record to chal-
25 lenge the good faith of the Respondent, because that's just

1 something that one can very rarely develop evidence on, such
2 a test would be an invitation to many who would seek to evade
3 the statute to hide behind the concept of good faith.

4 Now, as I said, Duke Power Company adopted the test re-
5 quirement for initial employment on July 2, 1965, the date
6 of the act in question. Until then, and until after the filing
7 of the charge in this case, in fact, employment at Duke Power
8 Company was rigidly racially segregated. Black persons
9 worked in the Labor Department only. White persons worked in
10 the better and higher paying jobs, that is the Departments
11 described in the record, as Operations, Maintenance, Test and
12 Laboratory and Coal Handling. And the highest paid black
13 worker made less money than the lowest paid white worker,
14 under this system.

15 Q Now, I understand, in the Labor Department, that
16 that was all Negro, was it?

17 A Yes, well, it one time---

18 Q All Negro?

19 A ---there was a white foreman in the Labor Department.

20 Q Well, what my real question is as a matter of fact,
21 and I don't know that I fully understand, was the Labor De-
22 partment all Negro and every other department in the company
23 all white, prior to 1965?

24 A Yes.

25 Q Or was it only that the Labor Department was all

1 Negro, and that the other departments, Coal Handling, did
2 have some Negroes in it?

3 A Your first formulation is the correct one, there was
4 rigid racial segregation. The Labor was all black, everything
5 else was all white.

6 Q Up until 1965?

7 A Well, indeed, until up until after the filing of the
8 charge in this case. Some time after that.

9 Q (inaudible)

10 A Well, I think the first black man probably got out
11 of the Labor Department in 1966, after the charge of the un-
12 equal employment opportunities.

13 Q And there were no Negroes in the other four depart-
14 ments?

15 A That is correct.

16 Q Up until---

17 A And there's no question about that, on the record,
18 I don't think the Respondents would challenge that for a moment.

19 Q No, I just was inquiring as a matter of fact, is all.

20 A But the intelligence test was put in at the request
21 of certain, non-high school graduate workers in the Coal
22 Handling Department as a substitute for a high school education,
23 and it has been described in the record as a test which would
24 identify the average high school graduate, so it's perhaps
25 somewhat more stringent than the high school graduation re-

1 quirement in that half the high school graduates presumably
2 would be unable to pass this test.

3 And to enable them to be promoted to the so called inside
4 departments, Labor and Coal Handling are outside, all the other
5 departments are inside. The high school education requirement
6 was adopted considerably earlier, and the date is not certain,
7 but it appears to be, people talk in terms of about, about
8 1955 as a prerequisite to employment and promotion in all
9 departments but the Labor Department. Black people could be
10 employed in the Labor Department without a high school ed-
11 ucation, others could be employed in the other departments
12 initially only with a high school education. But many pre-1955
13 Duke Power employees are non-high school graduates at all pay
14 levels throughout the plant. And indeed the, our brief has an
15 analysis of the pay which is earned by various workers, the
16 pay earned by an average high school worker, an average non-
17 high school worker, is about the same, the calculations are on
18 page 38 of our brief.

19 And the governments brief engages in a similiar analysis
20 of promotibility, comparable promotibility and promotion rates
21 of high school and non-high school graduates, and it finds that
22 high school and non high school graduates within the plant are
23 roughly promoted at approximately the same rate.

24 Q Does this record show the total employment figure
25 in 1955, and the total employment figure currently?

1 A I couldn't spell it out. To quote the Respondents
2 in this case, and I'm sure this is right, they quote a real,
3 stable employment situation there and there have been about
4 95 workers at all times that are relevant to this case.

5 Q I wondered at that figure, because it certainly
6 would be counter to the general growth of everything in the
7 last 15 years.

8 A Well, I'm not familiar with the industry. It just
9 may be that the power industry - it's possible to expand
10 power production perhaps from other locations without increasing
11 the work force, but the employment situation has remained just
12 about the same.

13 I think there doesn't seem to be any real doubt about that
14 and they characterize it as stable, and it apparently is.

15 After the passage of the Act and the filing of the com-
16 plaint before the Equal Employment Opportunity Commission,
17 Duke did promote a number of black workers with a high school
18 education over a period of a couple of years.

19 q And the Court of Appeals then ordered the promotibility
20 but not the actual promotion of others employed before the
21 high school education requirement was adopted. This is now
22 in further litigation by the District Court because there's a
23 claim which Court has not yet rendered any decision and some
24 white people have been brought in above these black workers.
25 The Court has not resolved that.

1 This case involves four workers frozen in the Labor
2 Department by the test requirement of July 2, 1965, and by
3 the fact that they have no high school education.

4 Q Have they taken and failed these tests?

5 A The record is not clear on who has taken and who
6 has not taken this test. The record indicates that three wor-
7 kers some of them black and some of them white, we don't know
8 which two are black and which one is white, have taken and
9 failed the test. Everyone who has taken the test has failed
10 it. The record indicates that applicants for employment almost
11 an entirely overwhelming number declined to take the test. They
12 don't want to take the test, this is, however, class action
13 and our argument about the test is that it is patently dis-
14 criminatory as I hope to develop in a moment or two that that
15 really doesn't matter, it doesn't have any---

16 Q Well---

17 A ---bearing on the decision in this case.

18 Q I thought you said there were four identifiable Ne-
19 gro workers in the Labor Department.

20 A The four identifiable---

21 Q What class do they represent beyond their own num-
22 ber?

23 A The class in the complaint and in the order allowing
24 an amendment to the complaint is defined as persons presently
25 working at Duke Power and those who may be accepted for em-

1 ployment in the future. "o it is in some sense a rather well
2 defined (inaudible).

3 Q And that open ended class was accepted, was it?
4 By the Courts?

5 A Oh, yes, the District Court right on page 17 of the
6 complaint filed an order allowing an amendment to the complaint
7 and defines it and then well, on page 19 also, the same thing
8 again - an order allowing class action.

9 This action is maintainable as a class action only insofar
10 as it seeks injunctive relief and so on, and the class presented
11 are those Negroes presently employed as well as those who may
12 subsequently be employed at defendants Dan River Station. Both
13 those orders on page 17 and 19a---

14 Q Who may be subsequently employed, it's not future
15 applicants. Is it?

16 A No, that's not future applicants, those who may
17 subsequently be employed.

18 Q Employees?

19 A Yes.

20 Q And there are now four identifiable people, is that
21 it? If I understand your submission.

22 A I'm sorry, it's also on page 14 those who may sub-
23 sequently seek employment. On page 14, order allowing amendment
24 to complaint. So it's both.

25 Q You're talking about 14 a---

1 A A 14 A. An order allowing amendment to the complaint.

2 Q Yes.

3 A Who are now employed or may subsequently seek em-
4 ployment. The first paragraph (inaudible) line.

5 Q Have these---

6 A In the opinion of the Court---

7 Q Have these four people, you say it's not clear which--

8 A We do not know---

9 Q Which, if any, have taken the test---

10 A That is correct.

11 Q Any who have, have all failed.

12 A Everybody who has taken the test has failed.

13 Q It's not clear that any of these four have taken it?

14 A We do not know. But I might point out the order of
15 the Court of Appeals defines a class as those who may subse-
16 quently be employed and may hereafter seek employment. That's
17 the very first sentence of Judge Boremans ---

18 As I was saying, the case involves those workers who
19 want to be promoted from Labor to Coal Handling. Now white
20 men without a high school education who have not passed the
21 tests, and who do not have a high school education are doing
22 the coal handling jobs today. Typically, the way the workers
23 qualify for the coal handling job is by on the job training,
24 on page 124 of the larger volume of the record, an official of
25 the company testifies "We would have to determine that by ac-

1 tion or actually putting them in if there were an opening to
2 see how they would perform. You would take the next senior man
3 who is qualified to go on the job and make a trial of him and
4 try him out.

5 And then the method of qualifying for the job is elaborated
6 also on page 23 as in response to interrogatory 27. The com-
7 pany provides on the job training.

8 Q Prior to 1955 the, you say, there was no high school---

9 A That's correct.

10 Q ---test.

11 A That's correct.

12 Q Does the record show how many people are in the non-
13 labor force who did not meet the high school, who would not
14 today be able to meet the high school---

15 A Yes. The record shows that there is a document filed
16 by the Respondent which lists the education of everyone who,
17 page 126 of this record, of everyone who works in the plant,
18 by my rough calculation, about a third of the people in the
19 plant do not have a - are not high school graduates.

20 Q Would that be---does this record show how that com-
21 pares with the change in standards generally in comparable
22 industries? That is, I assume, many people today have require-
23 ments of either high school or college, who did not have it
24 15 or 20 years ago.

25 A The---

1 Q Does this show any---

2 A There is some statement by Respondents that elsewhere
3 in the utility industry tests are being used, but I would
4 like to say that, first of all, there is no demonstration
5 that to perform the job of coal handler, you have to have a
6 high school education, in fact if you look at the laborers
7 job - the laborers job and the coal handlers job specifications
8 appear on pages 48 and 65 of the record, and they're roughly
9 the same. The coal handler has to, just to read a few of them,
10 has to operate certain vehicle service including coal handling
11 equipment and be able to record weights.

12 On page 65, the laborer has to operate company vehicles,
13 has to be able to operate floor sweeping machines, tractors,
14 trucks, and so forth.

15 Things are comparable. People are trying for the jobs
16 by on the job training, there is no indication that a high
17 school education in any way qualifies one to do the job.

18 Indeed if one were to look at the Wonderlic test that
19 appears here on page 102 of the record, it's difficult to see
20 how for the qualifications put down for a coal handler that
21 there's any need to know or to have a sense of the difference
22 between the words ADOPT and ADEPT, REFLECT and REFLEX, PRE-
23 TENSIONS and PRETENSIOUS, IMAGE and IMAGINARY, and LARGE and
24 AGGRANDIZE and various other kinds of---

25 Q Would that have validity in the promotibility aspect

1 or not?

2 A There is absolutely no evidence that it would at all.
3 We do not deny that there are jobs that that kind of a test,
4 or some kind of a test might have some validity. But the Won-
5 derlic people themselves say the test is not useful unless it
6 has predictive validity. You have to see whether or not passing
7 this test qualifies you to do this job, this test is not an
8 open sesame to decide who can do any job in the whole world.

9 Q Well would it be a violation of the act if an employ-
10 er had a general policy that he would not hire anyone, in any
11 capacity if they didn't meet certain potential promotibility
12 qualifications?

13 A That would not be a violation of the job if he could
14 demonstrate that that kind of a capacity is necessary to do
15 the job. And necessary for the operation of his plant. It then
16 might not be a violation either if it did not disproportionately
17 screen out members of a protected race or national group or---

18 Q Well now that's the key to---

19 A That's the key.

20 Q To your case, isn't it?

21 A That;s the key.

22 Q But if the impact of---

23 A There is a---

24 Q any test screens out one particular category whether
25 it happens to be women, or Negroes, or orientals or whatever,

1 then it's at least suspect.

2 A Then it must be justified in terms of some sort of
3 validation of its ability to predict. And here we have, in
4 the state of North Carolina, one third as many black people as
5 white people graduate from high school. Examinations of this
6 Wonderlic test by the Equal Employment Opportunity Commission
7 now recently in a case in the Eastern District of Louisiana,
8 Hicks against Crown Zellerbach, show that the Wonderlic test
9 have vast disproportions screened out black people for the
10 very same reason, that the high school education requirement
11 does - it is really a test of the capacity to do the kind of
12 things that a high school graduate may---

13 Q Then if a power plant in let us say the state of
14 Maine on the assumption that there would be an almost all white
15 population there, if a power plant in the state of Maine had a
16 high school or other aptitude test that was directed at pro-
17 motibility, and it did not have any adverse impact on any ra-
18 cial group or national origin group, it would not be---

19 A That would be an industrial problem. I would suggest
20 that they might be depriving themselves of people who could go
21 the job very well, but that would not be the problem---

22 Q No violation problems?

23 A No violation problem. If it has a disproportionment
24 effect on black people or members of the various protected
25 groups than they can use it, if they can justify it in terms of
14

1 business necessity. But if this test of July 2, 1965 screened
2 out blacks, and the high school education requirement screens
3 them out, and they - it has no bearing on who can and who
4 cannot be (inaudible). I'd like to reserve the balance of
5 my time.

6 Q All right, Mr. Greenberg. Mr. Ferguson?

7 ARGUMENT OF GEORGE W. FERGUSON, JR., ESQ.

8 ON BEHALF OF RESPONDENTS

9 MR. FERGUSON: Mr. Chief Justice, and may it please the
10 Court.

11 We are here today to determine the rights, duty, and ob-
12 ligations of employers and employees in private employment.
13 In the mid-1950s, as has been indicated to you, Duke Power
14 Company adopted a practice of requiring a high school education
15 for promotion or hiring into all departments other than the
16 Labor Department, at extreme stations. The heart of this case
17 is whether or not that practice is discriminatory under Title 7
18 of the Civil Rights Act of 1964.

19 As to four Negroes who were hired after the adoption of
20 that requirement. Since adoption of the requirement, no em-
21 ployee, white or black, has been hired into departments other
22 than the Labor Department unless he had a high school education.
23 A collateral issue in this case, in our view, is whether or not
24 the tests used by the company as a substitute for the high school
25 requirement violates that.

1 Petitioners assert that the educational requirement is
2 discriminatory because it fails to meet the test of business
3 necessity. To meet that test, Petitioners claim, that any such
4 requirement must be validated for job relatedness. On the
5 other hand the company claims, and the District Court below,
6 and the majority of the Court of Appeals below, found and con-
7 cluded that under the record evidence in this case, the ed-
8 ucational requirement had a genuine business purpose and was
9 adopted to upgrade the quality of the defendants work force and
10 was not adopted with any intent to discriminate against Negroes
11 hired after adoption of the requirement.

12 The uncontradicted evidence of record in this case is
13 that employees in the operations and maintenance department are
14 responsible for the safe, efficient, and reliable operation and
15 maintenance of complex machinery used in the production of elec-
16 tricity and energy.

17 Those in the laboratory department must be able to perform
18 laboratory operations which include water analysis, coal an-
19 alysis, and keep accurate logs with respect to those operations.

20 Those in the test department must maintain the accuracy
21 of instruments, gauges, and control devices.

22 Employees in coal handling must be able to read and under-
23 stand manuals relating to complex machinery and operate that
24 machinery in order to progress through the coal handling class-
25 ification satisfactorily.

1 All of these jobs we submit to you require a degree of
2 skill, judgement, and intelligence, and we would respectfully
3 say to you that it supports the companys decision to require
4 an overall general intelligence and mechanical comprehension
5 level ad reasonably necessary to safely and efficiently operate
6 a plant costing millions of dollars which performs a complex
7 function of electric power production which this company as
8 a public utility is required by law to maintain adequate and
9 continuous service.

10 Q If there were no high school graduation requirements
11 in the labor force, how do you suggest that that would adversely
12 affect the companys operations?

13 A There is no high school requirement for the labor
14 force, may it please Your Honor.

15 Q Then I misheard you . I thought you said every per-
16 son hired on the labor force.

17 Q No sir. Every person hired since 1955 in all depart-
18 ments other than the labor department have a high school ed-
19 ucation.

20 Q I'm glad you corrected that. I thought your statement
21 was in conflict with what I remembered in the record,

22 A Thank you for calling it to my attention, sir.

23 In addition this record shows that---yes, sir?

24 Q May I just ask to clarify this? Tosay, if a person
25 applies for a job---

1 A Yes, sir.

2 Q ---at this plant, he must have a high school education
3 must he, if he is to be considered for employment at any of
4 the four departments other than the Labor Department.

5 A Yes, sir.

6 Q Is that it?

7 A Yes, and he must also pass these tests.

8 Q He must do both?

9 A Yes, sir, he must do both---

10 Q A new applicant as of now must do both?

11 A Yes, sir. He must have a high school education and
12 he must pass the test with the score of the average high
13 school graduate. The test that we use here---

14 Q It's a double test?

15 A Yes, sir, that is for new employees only.

16 Q Yes.

17 A The test here, may it please Your Honor, were util-
18 ized as an alternate for the ---

19 Q High school test---

20 A The high school requirement, to give incumbents only
21 a change to enter and progress into the higher lines of pro-
22 gression without the necessity of havein a high school edu-
23 cation.

24 Q But a new applicant, today, must have a high school
25 diploma, in the first place---

1 A Yes, sir.

2 Q And then must he also take both the Wonderlic test
3 and the Bennett or Bennett test?

4 A Yes, sir.

5 Q Well, he---

6 A And he must make 20 on the Wonderlic and 30 on the
7 Bennett.

8 Q And this is true for any of the four departments
9 oghee than the Labor Department?

10 A Yes, sir.

11 Q And as of today the Labor Department still requires
12 neither of those qualifications?

13 A No, sir, they have to take a revised Bader test that
14 is really no more than just an appreciation of danger and under-
15 standing how to follow instructions.

16 Q Yes.

17 A In addition I would say to you that Mr. A.C. Theis,
18 Vice President of Power Production and in charge of the steam
19 plants on our company system, stated that the company instituted
20 the high school requirement because its business was becoming
21 more comples. It had employees who were unable to grasp situations
22 to read, to write, and who didn't have an intelligence level,
23 really to progress upward in the higher skill lines of pro-
24 gression that we're talking about.

25 In fact some refused promotion, because they didn't feel

1 that they could do the job.

2 Q Now, then you say were talking about, are you talking
3 about promotion within the department or are you talking about
4 interdepartmental transfers?

5 A Interdepartmental transfers. At that point, Your Honor,
6 I was saying this. That we found that we were getting some read-
7 blocks because we had hired people without a high school ed-
8 ucation and without mechanical and general intelligence level
9 that ultimately, in view of our business becoming more complex,
10 we were hiring people and we were suffering road blocks and
11 these tests, and the Petitioners own evidence, were designed
12 to include not to exclude anybody without a high school educa-
13 tion.

14 They had three non-discriminatory alternatives by which
15 they could travel into the other, the higher skilled lines of
16 progression. One, they could take the test, and make satisfactory
17 scores and progress. Two, they could take advantage of the com-
18 panys tuition refund program which we pay 75% of the cost of
19 a high school diploma or a GED equivalent. Or they could do
20 it on their own. They had those three alternatives.

21 Q Existing employees.

22 A Yes, sir, this is for incumbents, obly, about which
23 we're talking. The Court below cured discrimination as to the
24 six black employees who were contemporaneously hired with the
25 whites who were hired into the better departments and who had

1 been progressing along and ordered that when the District Court
2 fashioned a decree that it would take those six employees,
3 waive the educational and test requirement as to them, and
4 require plant wide rather than departmental seniority. With
5 respect to those two. Does that answer your question, sir.

6 Q Well, I think so, I've had a little trouble with
7 the facts in this case and I---

8 A As to the high school graduates, they were all pro-
9 moted after the Civil Rights Act became effective on July 2,
10 1965, they were all promoted out of Labor into the higher
11 skill lines of progression and which we would contend is the
12 precise effect Congress intended. Because both Courts below
13 found and concluded that Negroes were relegated to the Labor
14 Department prior to the effective date of the Act.

15 Q Let me see if I can translate what you've said not in
16 terms of the actual situation on this record, but the operation
17 of it. If a man of any racial or national origin is hired in
18 the Labor Department now without a high school education or any
19 other test, and at some point thinks he can qualify for one
20 of the other operating departments in the company, is he per-
21 mitted to, does he come within this group in which his tuition
22 is paid three-fourths by the company?

23 A Yes, sir.

24 Q And if he passes the test he can join in this up-
25 ward movement?

1 A Yes, sir. If he comes in without a high school---I
2 see your point, Mr. Chief Justice---if he comes in at the Labor
3 Department without a high school education, your question is
4 does he have to pass the test and have a high school education
5 requirement also, is that it?

6 Q To get out of it - move on up?

7 A Yes, sir, he could take the test and move on up. We're
8 speaking about new hires in to departments other than Labor.
9 They must have a high school education and in addition thereto
10 pass these two tests, that's what we're talking about.

11 Q Now since these tests have been inaugurated, since
12 this policy is in effect, how many people have moved out of
13 the labor force by this route, into other branches?

14 A Through the testing route?

15 Q Yes.

16 A As indicated earlier three, two blacks and one white
17 have passed the test, no, have taken the test, but none have
18 passed.

19 Q So---

20 A None have moved out by virtue of the additional pro-
21 motional avenue we gave them.

22 Q Have all three of them taken the training course at
23 the shared expense of the company?

24 A No, sir they have not, they, one, we have one who
25 has recently passed, or given us, or shown us satisfactory

1 evidence of a high school education, and he is now out of the
2 Labor Department force.

3 Q Who conducted these tests?

4 A Sir?

5 Q Who conducts these tests?

6 A Mr. Richard Lemons at this particular plant, Mr.

7 Justice White,---

8 Q Is he an employee of the company?

9 A Yes, sir.

10 Q Anyone else participate?

11 A No sir, I don't believe anyone else at this partic-
12 ular plant---

13 Q Has any charge of unfairness of any kind in any of
14 the tests---

15 A No, sir. They pass by that.

16 Q Well, there is a claim that the test is inherently
17 an unfair test, insofar as Negroes are concerned.

18 A All right, sir, any I speak to that just a moment?

19 Q Well. that is the - do I understand the claim in
20 the opposition correctly?

21 A They claim the test as to Negroes are unfair because
22 they're culturally deprived and therefore placed at a compe-
23 titive disadvantage.

24 Q And what they're asking is that you tailor a new
25 test that will be directed at the particular job ahead.

1 A Yes, sir and I would respectfully submit to you that
2 the legislative history of the Act clearly shows that gen-
3 eral intelligence, and aptitude tests, that Congress intended
4 that they should be used. And I point specifically to Sen-
5 ator Towers language, this is all discussed in pages 27 - 40 of
6 the brief, I would direct the attention of the Court to this,
7 when Senator Tower called up his original amendment he stated,
8 "It is an effort to protect the system, whereby employers give
9 general ability and intelligence tests to determine the train-
10 ability of employees."

11 Q What page were you on, precisely?

12 A That is page 31 of our brief, Your Honor. If you'll
13 go on over to page 32 you'll see Senator Lausche's question,
14 demanding to know where there is language in this bill that
15 allows the Motorola-type test be given. I would point out even
16 more particularly to you, on page 38, the Clark case inter-
17 pretated memorandum, prepared by the Justice Department which
18 states this, "There is no requirement in Title 7 that employers
19 abandon bona fide qualification tests where, because of dif-
20 ferences in background and education, members of some groups
21 are able to perform better on these tests than members of
22 other groups. An employer may set his qualifications as high
23 as he likes. He may test to determine which applicants have these
24 qualifications and he may hire, assign, and promote on the basis
25 of test performance." Now the Justice Department, through the

1 Solicitor General as amicus curiae, apparently, now claims that
2 these are valid only if they're specifically job related.

3 And apparently, repudiates the interpreted memorandum
4 on which Congress of the United States relied when it enacted
5 that legislation.

6 Q Nothing that I heard you read would say that the test
7 could be non-job related. It said that he can be as high as he
8 likes---

9 A Yes, sir.

10 Q ---but it doesn't say that they can be wholly ir-
11 relevant to the job that he's being employed to fill.

12 A Well, now, I would answer that this way. The Bennet
13 and the Wonderlic are, of course, professionally developed tests.
14 That alone, we realize, is not enough. The courts below found
15 that we had a genuine business purpose in adopting the high
16 school education requirement and they found that the tests were
17 a reasonably satisfactory substitute for the high school ed-
18 ucation requirement.

19 Now, if we assume that the tests are professionally dev-
20 eloped ability tests, and that Congress intended to allow the
21 use of general aptitude and ability tests, then, and in that
22 event, the crucial inquiry becomes this. Are the tests de-
23 signed, used, or intended to discriminate?

24 Now, as to design, the two tests in question here were
25 designed by professional psychologists. The record evidence

1 shows that the Wonderlic was designed to measure general in-
2 telligence, and that the Bennet mechanical AA was designed as
3 a measure of mechanical comprehension. The use of the two tests
4 is as a substitute for the high school education requirement.
5 Purely and simply to determine if the employee has a general
6 intelligence or overall mechanical comprehension level of the
7 average high school graduate.

8 What about the intent? Well, once the employer establishes
9 a legitimate business purpose for an employment practice, test-
10 ing or otherwise, then that practice is non-discriminatory
11 even if it operates to prefer whites over blacks.

12 The intent and the legitimate business purpose are in-
13 extricably bound up together, I would submit to the Court.

14 Q That's very well used as kind of a slippery and am-
15 biguous word in this context. It could be read, couldn't it,
16 and that's, I gather, how your brothers on the other side read
17 it, that is if their use results in discrimination, then they're
18 used to discriminate, and on the other hand it could be read as
19 if they did it, they're not subjectively used for purposes of
20 discrimination then they're all right. I simply suggest that
21 that's not the clearest word in the world, in this context.

22 A Well, sir, I would submit to you that it's factually
23 impossible to use it to discriminate in this case as I point
24 out on page 26 of the Respondents brief.

25 Q Let me see if I can focus with you for a moment on

1 a difference that you suggested existed between the Department
2 of Justice position previously and now. On page 38, the ital-
3 ized language that you were referring to, I think, is the
4 amendment relates to the business or enterprise. Not to the
5 specific jobs. That's what the Department of Justice said in
6 that memorandum. The Department of Justice seems to be saying
7 now, do you suggest that the amendments concerning the tests
8 relates to specific jobs as distinguished from enterprise?

9 A Apparently so. What you're referring to Mr Chief Ju-
10 stice, is the first Tower amendment. And this is - I believe
11 the Clark case interpreted memorandum was submitted after the
12 first Tower amendment. Now, I'm not sure about that, but the
13 language I had reference to is on page 31, of the brief.

14 Down about middle of the page where it says, "It is an
15 effort to protect the system". I would point out also to you
16 that both the EEOC, the EEOC has held that educational quali-
17 fications don't violate the act, I believe you'll find that as
18 Defendant's exhibit No. 4,---

19 Q Well, general ability and intelligence tests wouldn't
20 universally relate to specific jobs, would they? We can ponder
21 on that at lunch while we recess?

22 A If you please, Your Honor, someone else has ten minutes
23 of my time.

24 (Whereupon argument on the above-entitled matter was
25 recessed to reconvene at 1:00 o'clock the same day.)

1 AFTERNOON SESSION

2 1:00 p.m.

3 MR. CHIEF JUSTICE BURGER: Let's see, Mr.
4 Ferguson, you have eleven minutes left.

5 ARGUMENT OF MR. GEORGE W. FERGUSON, JR., ESQ.,

6 ON BEHALF OF RESPONDENTS

7 (RESUMED)

8 MR. FERGUSON: Thank you, Mr. Chief Justice, I've
9 yielded ten minutes of my time to someone else and I want to
10 finish up as quickly as I can.

11 The Appellant has produced no evidence at the trial that
12 educational test requirement had, or failed to meet the test
13 for legitimate business purpose. I would respectfully submit
14 to the Court that the findings and conclusions of the Court
15 below should not be set aside unless they are found to be clearly
16 erroneous and in closing I would comment on the Petitioners ar-
17 gument that the educational test requirement has a vast dis-
18 criminatory potential.

19 That simply is not a valid contention because the lower
20 court carefully guarded against broad approval of all education-
21 al and testing requirements by restricting its decision solely
22 to the facts of this case and that decision should, we re-
23 spectfully submit, be affirmed.

24 Q Mr. Ferguson, may I ask you one question?

25 A Yes, sir.

1 Q I got the impression that there were 13 original
2 plaintiffs here. Is this correct, fo you know?

3 A Yes, sir, that is correct. One, who had a high school
4 education was not a Plaintiff. There are 14 negroes employed
5 at the Dan River Steam Station, one of which had been pro-
6 moted into Coal Handling and was not a Plaintiff in this ac-
7 tion.

8 Q I wondered what had happened to him, and this is
9 the answer to it, then.

10 A Yes, sir.

11 Q All right, Mr. Cohen.

12 ARGUMENT OF LAWRENCE M. COHEN, ESQ.

13 FOR CHAMBER OF COMMERCE OF THE UNITED STATES,

14 AS AMICUS CURAIE

15 MR. COHEN: Mr. Chief Justice, and may it please the
16 Court.

17 I appear before you today on behalf of the Chamber of
18 Commerce of the United States to urge affirmance of the de-
19 cision below.

20 This case is one which is of vital concern to employers.
21 Both small and large throughout the United States. In todays
22 labor market there are often many applicants for the same job,
23 just as there are many employees who desire to be promoted into
24 a better position.

25 The employer must make a choice, and the choice confronting

1 him is often a difficult one. We believe employers must be
2 permitted to use objective, generally accepted standards of
3 intelligence, educational achievement, or ability in order to
4 make that decision.

5 Q Mr. Cohen, let me put this question to you. Assume
6 an area of the country, where, I suppose in the Southwest,
7 there are people whose family language is Spanish, and have
8 a rather limited comprehension of English. Suppose an employer
9 provided for farm workers that they must pass a test, something
10 like a literacy test in English, on the face of it that would
11 be a rational request generally for employers, I'm sure. It's
12 impact in the Southwest in that particular area for farm workers
13 might or might not have any relationship at all to the job.

14 Wouldn't that bring it under the Act, if the impact was
15 there?

16 A I think that this is really the heart of this case.
17 Most educational tests today, unfortunately, or aptitude tests,
18 have a discriminatory impact on one or more racial groups.

19 This is the (inaudible) problem of the socio-economic
20 status of these groups has historically evolved. The position
21 that Petitioners urge says that wherever you have an educational
22 requirement, wherever you have an intelligence test, the employer
23 is then obligated to proceed business necessity. That he had to
24 use that particular test. We b

25 We believe that where the employer has a legitimate business

1 purpose and can demonstrate to the Court on the basis of the
2 evidence in the case that he has a legitimate business purpose
3 for the test, then he ought to be permitted to use it.

4 When Congress, in the act of Title 7, it knew that ed-
5 ucational requirements and tests had a potential discrimination
6 of the type you just referred to. It didn't outlaw the use
7 of tests. It didn't prohibit the use of educational requirements.
8 It tried to reach a compromise where employers could use such
9 tests, use such educational requirements as long as they were
10 not a pretext, or subterfuge for discrimination.

11 I---

12 Q Well, does it go that far, that it must be subterfuge,
13 or is it on the impact?

14 A It's whether on the basis of the evidence in the case,
15 did the employer use or intend that the test be discriminatory?
16 That's the words, of, for example, 703H.

17 All through here, really, is that if a business necessity
18 test is adopted of the type that Petitioners have urged in this
19 Court, the result will be that employers won't be able to use
20 any objective tests.

21 Q Well would you regard business necessity and business
22 related as being the same---

23 A No.

24 Q ---or is one stronger than the other?

25 A No. I think the difference is between business necessity

1 which is the position that Petitioners and the government urge,
2 and legitimate business purpose, this is the way the Court of
3 Appeals split on the case. In a majority opinion the Court
4 said that the Respondent has a legitimate business purpose, and
5 proceeds to detail some six or seven reasons why it believes that
6 they have a legitimate business purpose.

7 They approached it on a case by case basis and on the
8 basis of the entire record. Judge Sobeloff in his dissent says
9 that the test is one of business necessity and that in turn
10 is the position that Petitioners urge before this Court today.

11 The problem here is one of what does business necessity
12 mean? One Court of Appeals recently held that business necessity
13 means essential to the safe and efficient operation of the em-
14 ployers business.

15 The troubles with educational requirements or tests or
16 never going to be shown to be essential, so the test is essential.
17 The employer must fall back and use something other than ob-
18 jective criteria, because under the EEOCs definition of a test,
19 any objective means of selecting employees is considered a test.

20 That's really what we're talking about today. We're not
21 talking about the Wonderlic test, we're not talking about the
22 Bennett test, we're talking about objective means of choosing
23 which employee should fit into a particular job. Or which
24 employee should be hired in the first place.

25 And if employers cannot use objective means, then the only

1 way they can choose employees will be subjectively, who does
2 the interviewer like, or on the basis of some arbitrary method
3 like the first person in is the first person hired.

4 Now we feel, as the Court noted in the Porter case, that
5 if you use subjective or arbitrary means, they have a vastly
6 greater potential for discrimination and a vastly greater po-
7 tential for poor business decisions (inaudible) decisions
8 than a test in the objective kind of criteria which Duke Power
9 used here, and our theory is that---

10 Q Mr. Cohen, what relationship does either of these
11 tests have to "Coal Handling"?

12 A The Court of Appeals found that on the facts of this
13 case the tests served a legitimate business purpose by hiring
14 a reservoir able employees in Coal Handling who could not only
15 do the job there, but were reasonably able to be promoted into
16 the higher skilled jobs. I would feel that the Court of Appeals
17 decision here is a reasonable one, and it should not be dis-
18 turbed. But the point here is,---

19 Q Would not put the same test before you hire a laborer?

20 A I'm sorry Mr. Justice (inaudible)

21 Q Why don't they have the same test before you're hired
22 as a laborer, in Duke?

23 A Well I think the difference is that greater skills
24 are required by employees in the Coal Handling.

25 Q Well, they might go up to be President, too.

1 A That's correct, but the question is, should you in
2 each case require the employer, before he uses a test, to first
3 demonstrate that that test is related just to that particular
4 job, or can you have a test that relates to more than one job?

5 Q I still think that you can hire somebody as a Coal
6 Handler and put the requirement that he have a PhD. You have
7 that right. Any employer does. But does he have that right under
8 this Act? That's the question.

9 A Mr feeling, Mr. Justice Marshall, is that this is like
10 a case of an employer who discharges a union employee during
11 a union organizational campaign.

12 He has no right to discharge, if he's discharging the
13 employee because he's engaged in union activities. But he
14 does have the right if he's acting for a legitimate purpose,
15 business purpose, and not because he's trying to get at the
16 employee because he's a union person.

17 If someone sets up a standard for the Coal Handling de-
18 partment and does that with no business purpose and only so
19 that he can prevent Negroes from entering that department,
20 then I think he's violated this law.

21 Q But he did it, knowing fully well that he had a prior
22 policy of rigid segregation and exclusion. He's not writing on
23 a clean slate.

24 A That's---

25 Q And he put this rule, in as I understand it the day

1 the bill became effective.

2 A The company put in the policy of permitting, as an
3 alternate to the education requirement, of permitting tests.
4 That was put in the day(inaudible). The educational requirement
5 antedated that by some ten years. Now do you let the employer
6 given the act became effective (inaudible) an additional avenue
7 for promotion that was over and above what he had done prior
8 to the act.

9 Q Be fore that all you needed to show was a high school
10 diploma. And after that if you didn't have a high school di-
11 ploma you had to give a test which he gave. Duke gave the test,
12 marked the test, right?

13 A Yes. I think the point that I'd like to make is that
14 I think what the Court of Appeals needed to consider was all
15 factors, the timing of the test, what the employers race re-
16 lations, what his general action was in the area of race re-
17 lations, what kind of expert opinion he relied on, what he did
18 later on, in fact he's engaged in validation studies now. And

19 And on the basis of that entire record, the Court of
20 Appeals had to make a decision of whether there was a legitimate
21 business purpose. The summary in the Court of Appeals I said
22 were to have considered whether the employer really had a le-
23 gitimate purpose in discharging the union employee. I think
24 the Court of Appeals considered all these facts, it rated the
25 timing, as you've indicated along with all the other facts in

1 the record, and it reached what is a reasonable decision. And
2 it's the decision that I think that this Court ought not to
3 disturb.

4 My principal reason for appearing here as an amicus is
5 not so much to argue the facts as to whether the Courts decision
6 was correct, but whether the Court of Appeals applied the correct
7 test.

8 That, I think, is the key issue in this case. Now we
9 would urge that the Court of Appeals did apply the correct
10 test. That it reached the correct results applying that test
11 is a different story. But we think the correct test should
12 be one, as the Court of Appeals did, of whether the employer,
13 in all the circumstances of the case, and on a case by case
14 approach adopted a - had a legitimate business purpose for
15 its testing requirement of for its educational requirement.

16 Q Without regard to job relations.

17 A Yes, I think job relationship is one aspect, and not
18 the only aspect of the case.

19 Q That should be considered, do you agree?

20 A Oh, absolutely. But it should not be determinative,
21 either under the EEOCs guidelines or under the business necessity
22 test.

23 Q Well, let me be sure that I understand your response
24 to my hypothetical question. If the fruit pickers and the farm
25 workers down in the Southwest had this English language test,

1 you'd regard that as not very job related?

2 A My feeling is that you could never prove that
3 there was a business necessity for that test. And nor that
4 it was job related in the sense that the employees had to have
5 that skill in order to perform that job.

6 As I understand the Petitioners position, if it had not
7 been validated, which includes job relatedness, under the EEOCs
8 guidelines, the employer could not use it.

9 Q Their command of English would be relevant only to
10 the extent that it was necessary to understand instructions,
11 isn't that about it?

12 A You would have to demonstrate that the employees
13 could not do the job if they did not understand English. And
14 that an understanding of English was essential to the job. If
15 The employer could not prove those two points, he would have
16 violated the law. Thank you.

17 Q Thank you, Mr. Cohen. Mr. Greenberg, you have about
18 ten minutes.

19 REBUTTAL ARGUMENT OF MR. JACK GREENBERG, ESQ.

20 ON BEHALF OF PETITIONERS

21 MR. GREENBERG: Mr. Chief Justice, and may it please
22 the court.

23 I would like to get to the record in this case, because
24 I would like to assert to this Court that this record nowhere
25 demonstrates that this high school education or the ability to

1 pass the test is related to any job that is from Labor to
2 Coal Handler or from Coal Handler to anywhere else.

3 I'm not saying that somewhere, in some plant, on some
4 record someone might not demonstrate that, and if they did
5 it would be a different case. It is not demonstrated here,
6 and I'd like to read just but two of many portions of the record
7 that indicate that the---

8 Q What are you reading?

9 Z Well, I'm going to read from page 179, Dr. Moffee,
10 the Respondents Industrial Psychologist, and he said the same
11 thing a number of times. And here he said, "We are doing job
12 related validities. For example, we have completed one study
13 where we---"

14 Q That's about one fourth of the page down, isn't it?

15 A That's right. "We had completed one study where
16 we had taken roughly one hundred to two hundred people in
17 some categories, well over 200 people at different job levels
18 where we have attempted to validate the Wonderlic. And we are
19 finding, as pointed out this morning by Dr. Barrett, that we
20 are too broad."

21 You can find that throughout the record,. Now as to the
22 high school education, on page 188. And of course this is
23 redundant because the test in this case is to demonstrate an ave
24 average high school graduate, and so it is redundant. In any
25 event, Dr. Moffee says, "High school education would really tell

1 you that you have the necessary---

2 Q Let's locate our spot first.

3 A Page 188, just above the colliquy on the bottom of
4 the page.

5 Q Fine.

6 A High school education would really tell you that you
7 have the necessary abilities defined by a high school education,
8 and if the company feels that this is required in these jobs ,
9 then that's all it would tell you.

10 That's what Respondents and the amicus are saying. That
11 the company feels that you ought to have these qualifications,
12 and the company ought to have the right to do it. But thtt's
13 not what the statute says. The statute changes the pre-existing
14 situation.

15 It says it's an unlawful employment practice for an employer
16 to, and I'll just summarize here, classify employees in any way
17 which would tend to deprive any individual of employment oppor-
18 tunities or which would in any way adversely affect his status.
19 And the statute says you may not classify. They have classi-
20 fied them by ability to take the test, and have a high school
21 education.

22 And it deprives, and certainly tends to deprive them, and
23 adversley affects them with resprct to employment and promotion
24 and pay. And we submit that that's a violation of the statute.

25 Now there is an exception in this statute which we refer

1 to, section 703H, which is the professionally developed ab-
2 ility test provision, and that comes out of the Motorola case
3 which was referred to.

4 The Motorola case was a case quite unlike this case. The
5 Motorola case and this case are not the same at all. Motorola
6 was a case in which the hearing examiner held that even though
7 a Negro applicant for a job could not pass a test and could not
8 do the job he nevertheless ought to be employed with some ac-
9 tion of compensatory employment, compensatory credit for being
10 deprived and so on.

11 Now that's not this case, and that's not this statute.
12 If these Petitioners were taking a job validated, job related
13 test and they could not pass the test, and not passing the test
14 indicated that they could not do the job, we would not be here
15 today, but these are tests which Respondents have conceded
16 throughout the record do not indicate anything at all about the
17 ability to do the job, non-high school graduates are in Coal
18 Handling, Maintenance, Laboratory Test, Operations, they're
19 being promoted at the same rate, approximately as the calcula-
20 tions in the governments brief indicates, being promoted at
21 the same rate as high school graduates.

22 They're earning approximately the same pay as high school
23 graduates, and the argument that they have to be able to pass
24 these tests to go from Labor to Coal Handling so that they then
25 can reach some very much higher level at the plant is just not

1 borne out.

2 In addition to which I mean just to---

3 Q Mr. Greenberg, perhaps you're saying that on the facts
4 here there are---the company hasn't made out that any of its
5 other jobs---the higher jobs require a high school diploma or an
6 ability to pass these tests. Now let's assume that it's shown
7 that, although the jobs for which they were hiring initially
8 didn't require it.

9 A Then we would have a different case. If it were shown
10 that this---

11 Q Not only a different case, but how would you come out
12 on it?

13 A Well, if it were shown that this were a plant with
14 rapid and frequent promotion, which is not true here, the place
15 is stagnant, or stable as they call it.

16

17 Q But anyway, promotions are from inside, mostly.

18 A If promotions were from inside and it were necessary
19 and the company could demonstrate that blocking up the lines
20 of progression would adversely affect the plant, we would not
21 be urging the position--our position with respect to that sit-
22 uation.

23 In other words it would be job related. It would be job
24 validated, but in some other sense, with regard to promoti-
25 bility---

41

1 Q Judge Sobeliff, I gather, would agree with what you
2 just said, and he said, however, that there's been no showing
3 in this case that any---that these tests are related to any of
4 these other jobs.

5 A That's right. It 's not---you can divide the job
6 validation into two parts. Job validation with respect to im-
7 mediate employment and future employment, over some peroid of
8 time. And that second category is not quite so simple because
9 I think a company might have to demonstrate that there is a
10 regular flow of people through the plant and that they can't
11 function with people stopping off somewhere on the way up the
12 ladder, but nevertheless if they could show that, and they
13 could show that it would interfere with their function impro-
14 perly to have people stopping the line of progression and
15 not become foremen and supervisors, and so forth, then they
16 would have established a kind of job validation.

17 But they haven't done that yet. Theyve just made an asser-
18 tion about it. And that's not adequate to divest the
19 Petitioners of their rights, we submit.

20 Q You dont' think general allegations that a lot of jobs
21 on the ladder that require some kind of abstract skills or some-
22 thing like that is not enough---

23 A I would say that would not be enough when you're deal-
24 ing in an area like this where, without speaking about any
25 particular case, there's a lot of duplicity going on, in a lot

1 cases, you have to have something you can deal with objecti-
2 vely. But apart from that, we have non-high school graduates
3 across the total range of employment in this plant, so that
4 really doesn't hold water.

5 Just a final word about 703H. We submit that the Equal
6 Employment Opportunity Commission, which is charged by the stat-
7 ute with the enforcement of the statute, is in a particularly,
8 peculiarly advantageous position to construe it. And it has
9 construed the term "professionally developed ability tests" to
10 mean a job validated test.

11 So far as the legislative history is concerned the briefs
12 are full of, we think, that the conclusion of the Equal Oppor-
13 tunity Employment Commission should be despositive, we think that
14 we have demonstrated quite clearly in the brief, the legislative
15 history indicates that one ought to be able to pass a test which
16 indicates his ability to do a job, not to pass a test of the ab-
17 stract which doesn't indicate anything at all. Mr. Chief Jus-
18 tice, you asked a question about the ability to speak Spanish,
19 there was a case quite like that, it was settled. It was against
20 one of the Southwestern power companies, which involved height.

21 In order to be a line man, you had to be above a certain
22 height, and for a variety of reasons, Mexican-Americans in that
23 part of the country were not above a certain height, generally
24 speaking, and they could not get the jobs. Yet there was no
25 indication that height had anything at all to do with the ability

1 to do the job. Proceedings were brought and the case was settled
2 and the case never came to a decision. But we would submit that
3 if one could show that this was a height test, and that only one
4 third as many black people qualified for the height test as white
5 people, and that height had nothing whatsoever to do with the
6 ability to do the job, we'd have exactly this case here, and that
7 the result should be the same.

8 Q Let me ask you this, Mr. Greenberg. Suppose in terms
9 of eligibility to intern in a hospital, the hospital standard
10 required that they be persons whose scholastic training and
11 general aptitude measured by some reasonable test, were such that
12 they were qualified to become staff members. In standing alone
13 would you regard that as a reasonable---

14 A Mr. Chief Justice---

15 Q ---criteria?

16 A This is not a subject about which I know anything at
17 all but it would seem to me that a medical education is or at
18 least ought to be directly related to the ability to practice
19 medicine, and that the excellence of one's training and what one
20 has learned as demonstrated by his record would bear some relation
21 tion. I would assume that that would be job validated.

22 Q The implications of my questions are that some medical
23 graduates would and some would not be able to take that ultimate
24 test of being ultimately qualified to be staff members.

25 A Well, I would assume that relevant criteria would be

1 used, and that that would be job validated. It would make sense
2 to me. I can't imagine why it wouldn't but it's not anything I
3 really know anything about.

4 Q Thank you, Mr. Greenberg. Thank you gentlemen, the
5 case is submitted.

6 (Whereupon at 1:20 o'clock p.m. argument in the above
7 entitled matter was concluded.)
