1                                   P R O C E E D I N G S

2                   CHIEF JUSTICE BURGER:   Mr. Murdoch, you may  
3 proceed whenever you are ready.

4                   ORAL ARGUMENT OF ROBERT W. MURDOCH, ESQ.,

5                                   ON BEHALF OF PETITIONER

6                   MR. MURDOCH:   Mr. Chief Justice, and may it  
7 please the Court.

8                   This case is before you on a writ of  
9 certiorari from the Third Circuit Court of Appeals and  
10 presents two questions for your consideration. The  
11 first question being the interpretation of some of the  
12 provisions under Section 905(a), 905(b), and 933 of the  
13 Longshoremen's and Harbor Worker's Compensation Act.  
14 The second question is a question regarding major  
15 damages which was applied by the lower court and  
16 affirmed by the Third Circuit in this particular case.

17                   By way of background, the respondent was an  
18 employee of Jones & Laughlin Steel Corporation. He had  
19 worked for them on the rivers, particularly on the  
20 Monongahela River for Jones & Laughlin for many years.  
21 He was entitled as having the duties of being a barge  
22 helper and barge handler. In doing so, he would go out  
23 and he would work with the barges.

24                   So that you are aware of the situation, on the  
25 Monongahela River Jones & Laughlin had two landings.

1 The first landing had an elevator which they would take  
2 these barges, and the barges being approximately 175  
3 feet long, 26 feet wide, under the coal elevator. This  
4 would then empty the barge as the coal goes into the  
5 metal freeze, and persons like Mr. Pfeifer would then be  
6 in charge of taking care of the fleet as the empty  
7 barges would be moved down to the other fleet.

8 Mr. Pfeifer was injured on February 13, 1978,  
9 at which time he came out to work on the midnight  
10 shift. He did not work his normal job at that time,  
11 his normal job was a Class 7 job, but as he would do  
12 from time to time, he would come out and he worked as a  
13 headman, this was a Class 13 as far as the pay is  
14 concerned.

15 In that position Mr. Pfeifer was in charge of  
16 two other individuals and these three individuals on  
17 that particular shift would then go out and take care of  
18 the barges. By taking care of the barges, they would  
19 make sure that the lashings were tight. If it was  
20 necessary to pump out any barges which were taking on  
21 water, this was one of their duties.

22 Also incumbent upon Mr. Pfeifer and the people  
23 he was working with was to make sure that the gunnels,  
24 which would be the walkways on the barges, and the  
25 deck-ends where the people would walk would be free and

1 clear of snow.

2 As I say, Mr. Pfeifer came out to work at  
3 midnight on this particular shift, and sometime later,  
4 3:00 a.m., or 4:00 a.m., while going out with two other  
5 individuals to pump a barge, he slipped on some ice and  
6 snow that had been accumulated on the barge and injured  
7 his back. As a result of that incident, then, Mr.  
8 Pfeifer did sign the proper forms for getting payments  
9 under the Longshoremen's and Harbor Worker's  
10 Compensation Act.

11 I think it is important for you to know as a  
12 Court that Jones & Laughlin has been paying Mr. Pfeifer  
13 for the compensation benefits as called for under this  
14 Act ever since the date of the accident.

15 At the time of the trial in this particular  
16 case in which there was a final verdict rendered against  
17 Jones & Laughlin Steel Corporation in the amount of  
18 approximately \$275,000, there was a set off which was  
19 approximately \$33,000 for the compensation benefits  
20 which had been made to Mr. Pfeifer as of the date of the  
21 trial.

22 I believe it is also important for you to know  
23 that even today as I stand here arguing this case before  
24 you, we are still making payments under the Compensation  
25 Act as called for.

1           I think this is relatively important because  
2 905(a) of the Longshoremen's and Harbor Worker's Act  
3 sets forth what we refer to as the exclusivity  
4 provision, which states basically that a person injured  
5 under the Longshoremen's and Harbor Worker's Act has  
6 exclusive remedies to receive compensation from the  
7 employer.

8           This is why I pointed out that under these  
9 circumstances we have been and in fact are still paying  
10 because as Jones & Laughlin looks at and reviews the  
11 exclusivity provision, we feel that that is the only  
12 basis that an employee is to receive benefits from the  
13 employer.

14           QUESTION: That would be traditional in those  
15 workmen's compensation type claims. But what do you do  
16 with the language of this Court in the Edmonds case  
17 which seems to have rejected your position, and in this  
18 limited situation would say that the ship owner is still  
19 liable both under the underlying tort claim and as under  
20 the Act.

21           MR. MURDOCH: I think, Justice O'Connor --

22           QUESTION: Do you think that we were in error  
23 in Edmonds?

24           MR. MURDOCH: I believe you are in error,  
25 yes. I don't believe that when you review Edmonds,

1    which in that particular instance concerning the point  
2    that I am talking to you about today was strictly dicta,  
3    it was not a part of that particular case, although it  
4    was part of the discussion.

5                QUESTION: But it was a pretty clear  
6    statement. Is there not legislation pending in Congress  
7    now that changed this precise --

8                MR. MURDOCH: There is in the legislation  
9    history as it appears, although the amendments to the  
10   Longshoremen's and Harbor Worker's Act are still  
11   pending, they have set forth the case of Griffith versus  
12   Wheeling-Pittsburgh as being something that was not  
13   intended from the 1972 amendments.

14               I will give you some background. In 1972,  
15   there was an amendment by 905(b), which is the section  
16   that was discussed in Edmonds and came into play. As I  
17   look at the Edmonds decision, as I look at the  
18   Griffith/Wheeling-Pittsburgh case, I feel that was done  
19   in that particular instance, though, was the failure to  
20   look at sections 905(a), 905(b), and section 933, as  
21   they are all read together.

22               Though This Court, even as recently as last  
23   Wednesday, set forth in the case of Lockheed versus the  
24   United States that 905(a) was the exclusive remedy under  
25   the Longshoremen's and Harbor Worker's Benefit Act. As

1 we look at 905(a), it simply says that this is the only  
2 thing that the employee is entitled to.

3           Getting to 905(b) and looking at the  
4 legislative intent of the amendments back in 1972, as we  
5 have in most workermen's compensation areas you had the  
6 quid pro quo. You had the giving up of any rights that  
7 they might have had before the amendments to sue for  
8 unseaworthiness or to sue for indemnity in response for  
9 largely increased benefits.

10           These benefits are taken under section 910 and  
11 they set forth that as of June 1st of each year the  
12 different values are placed on as to what the increase  
13 is going to be for the benefits, and then they are  
14 implemented in October of that particular year.

15           So the position that we have here is that  
16 because of the 1972 amendments giving such a large  
17 increase in benefits to these longshoremen that it did  
18 away with what was the dual capacity.

19           I think it is important that you look at  
20 905(b) as it applies to 905(a) and 933. 905(b)  
21 basically starts off by saying that any person injured  
22 under this particular Act has the benefits of this Act.  
23 I stress that it says "any person" because in looking at  
24 the Edmonds case there is a distinction that the Court  
25 brought or the Court intended to bring up by saying that

1 the first sentence only applies to a longshoreman.

2 I disagree with that because if you go one  
3 step further, it says in 905(b) if there is the right,  
4 then, to sue the vessel or vessel as a person that the  
5 employer cannot be directly or indirectly liable.

6 So where I have the problem with Edmonds is  
7 that it did not go far enough with the language. You  
8 have 905(a) which basically says exclusively you get the  
9 benefits. The employer is not to suffer any more manner  
10 of making payments. Section 905(b) reiterates this, it  
11 says that the employer cannot be directly or indirectly  
12 liable to the injured employee on behalf of the vessel.

13 If we look at Edmonds and we try to determine  
14 the way it was with Edmonds, then you are saying  
15 basically that the injured employee can sue the vessel,  
16 but in the same token if the vessel is owned by the  
17 employer it is literally the employer that is making the  
18 payments.

19 So it is really a way of getting around the  
20 language as far as what 905(a) was, and it is our  
21 contention that in 905(b), as the second part of the  
22 first sentence, where it says that the employer may not  
23 be directly or indirectly liable to the employee for the  
24 vessel, then they are in fact reiterating in 905(b) the  
25 exclusivity provision that it had in 905(a).

1           Going one step further in that same sentence  
2 in section 905(b) it does make reference that if any  
3 action can be filed by the injured employee, it would be  
4 in accordance with section 933 of the same Act. Edmonds  
5 did not address itself to that particular section.

6           Section 933 of the Act sets forth that the  
7 injured employee, if he determines that the injuries  
8 were in fact caused by somebody other than the employer  
9 or an employee of the employer, he has the right to a  
10 third party action.

11           So I think you have in 905(a) and 905(b) and  
12 933, you have three distinct places where the intent of  
13 Congress was to limit any payments that the injured  
14 employee would get from the employer to solely the  
15 situation of receiving the compensation benefits.

16           The trade-offs, as I have indicated, if you  
17 look at the legislative intent and the language which I  
18 have cited in my brief, sets forth specifically that the  
19 intent of the Longshoremen's and Harbor Worker's Act was  
20 to place maritime workers in similar situations into the  
21 same situation that a land-based employee has under  
22 Workmen's Compensation.

23           I believe the Court is well aware that in the  
24 cases where we have a State Workmen's Compensation law  
25 that the employee who is injured does in fact have the

1 right to get the benefits. Under the Compensations Act,  
2 he has no other benefits at that time. There is nothing  
3 to preclude him, as I feel the intent of 905(b) was, to  
4 sue, let's say, the manufacturer of a machine upon which  
5 he was injured as long as it was not owned by the  
6 employer.

7           So I think, in looking at the 1972 amendments,  
8 when you put them all together without taking them out  
9 of context, that you can see that the overall intent was  
10 simply to put these longshoremen on the same basis of  
11 land-based employees, to get only that type of benefit.

12           Now, 905(b) does also provide that somebody  
13 who is injured, who is not an employee or not, can sue  
14 somebody who has caused the injury, but again if there  
15 is any liability or any money to be paid by the  
16 employer, then they are not going to receive payments.

17           We had raised this contention in the  
18 pleadings. I had raised it as a motion for summary  
19 judgment in the lower court, and of course the Third  
20 Circuit looked at it, but this is the first time, I  
21 believe, that this issue has been before this Court.  
22 Although there has been discussion in Edmonds and in  
23 other cases, I do feel that what we are looking at is a  
24 situation that the intent of Congress was overwhelming  
25 to limit the recovery that the longshoremen could get.

1           I might point out also that if we get this  
2   interpretation, and also we are looking at minimizing  
3   litigation costs, because I think if you look at the  
4   true intent then the employees who are injured will, in  
5   fact, be getting their compensation benefits which are  
6   quite high under the circumstances of this Act, and  
7   there is not going to be these types of actions which  
8   are going to take up the time of the trial courts  
9   largely.

10           QUESTION: Mr. Murdoch, just to clarify one  
11   point. You never contested the finding of the trial  
12   court that the ship owner was negligent?

13           MR. MURDOCH: That is correct, that was not  
14   raised, Justice O'Connor.

15           QUESTION: All right.

16           MR. MURDOCH: I would like to point out on  
17   that, though, that the finding of negligence, if you  
18   want to look at a dual capacity, was not made clear  
19   because, although it was a finding of negligence as the  
20   owner pro hac vice, it did not make a distinction as to  
21   whether or not there was a finding of negligence as an  
22   employer or as a vessel. And I think that is the  
23   distinction which should have been made.

24           QUESTION: But for our purposes, we assume  
25   that there was negligence as a vessel owner; right?

1           MR. MURDOCH: No, I don't think we can assume  
2 that. I think that because it is unclear as to what the  
3 court did, perhaps you have to assume that in order to  
4 determine this particular question.

5           QUESTION: Right. Otherwise we wouldn't have  
6 the question --

7           MR. MURDOCH: That's right.

8           QUESTION: --that you want to raise.

9           MR. MURDOCH: Yes.

10          QUESTION: So I am assuming that we must  
11 assume that is the case.

12          MR. MURDOCH: That's correct, Justice  
13 O'Connor.

14          QUESTION: The issue just isn't here.

15          MR. MURDOCH: I am sorry, I did not hear.

16          QUESTION: The just isn't here.

17          MR. MURDOCH: On the particular 905(b)?

18          QUESTION: The issue of negligence is not  
19 here. It is not before us.

20          MR. MURDOCH: In what way, I don't understand,  
21 I'm sorry, Justice Blackmun.

22          QUESTION: Your colloquy with Justice O'Connor  
23 indicated that the issue is not here.

24          MR. MURDOCH: I believe the issue is here. I  
25 believe, as I stated before talking with Justice

1 O'Connor, that we had preserved that particular point.  
2 There is no question that there is a finding of  
3 negligence. It is our position that the law suit should  
4 not have been allowed to be filed because of the fact  
5 that Mr. Pfeifer was the employee.

6 QUESTION: But we are not to pass on the issue  
7 of negligence.

8 MR. MURDOCH: That is correct, that was not  
9 raised at the time of the argument.

10 If there are no other questions concerning  
11 that question, I will go on to the second question. The  
12 second question was the standard of the measure of  
13 damages which was decided by the lower court and then  
14 affirmed by the Third Circuit.

15 In 1980, the Pennsylvania Supreme Court  
16 decided the case of Kacskowski versus Bolubasc and in  
17 that particular case they had adopted what had been  
18 known as the Alaska Rule, which is basically the total  
19 offset method.

20 In the total offset method, the lower court  
21 assumed that any inflation which may arise in the future  
22 would be the equivalent and be offset of any interest  
23 rates, so that rather than discounting to the present  
24 value, that whatever the value of lost future earnings  
25 were going to be or the capacity of future earnings,

1 that was what the measure was.

2 In this particular case, as I stated before,  
3 the lower court came to the conclusion based on a  
4 worklife of 12 years that Mr. Pfeifer would have been  
5 making \$26,000 for those 12 years. In multiplying this  
6 there was a finding that Mr. Pfeifer could do some  
7 minimum wage, so that was projected over the worklife  
8 expectancy and that was deducted in addition to the  
9 workmen's or longshoremen's compensation benefits that  
10 we had paid as of the date of the jury -- the non-jury  
11 verdict, that was deducted.

12 It is our position, as we told the lower court  
13 and put in our post-findings of fact, that it was going  
14 to be necessary -- in the event that there was a verdict  
15 in favor of the plaintiff that there was going to have  
16 to be a reduction to present work.

17 This was not done as it was just assumed, as I  
18 state, that the inflation was going to offset the  
19 interest rates and, therefore, whatever the figure  
20 determined at that time was was going to be what the  
21 plaintiff would get.

22 We submit to this honorable Court that this is  
23 a decision upon which there is really no basis to make  
24 this type of finding. I think when we look at the  
25 purpose of determining why we give a lump sum award, it

1 is because the lump sum award, if it is given directly  
2 to the plaintiff at the time of the trial, is going to  
3 be worth much more after investing than it would be by  
4 the reduction to present value, which is what this Court  
5 set the standard to be in 1916 in the case of Chesapeake  
6 versus Kelly.

7           Also as recently as 1980 in the case of LIFEKO  
8 there was the same reiteration that in order to arrive  
9 at a full value, a fair figure for impairment of future  
10 earnings or lost wages that there must be a reduction of  
11 present worth. That was ignored by the Third Circuit  
12 and this is the only circuit which has adopted this  
13 measure of damages in a Federal action, and we submit  
14 that it should not be done so.

15           There have been many cases set forth in our  
16 brief, and also in the briefs of the Amicus which have  
17 filed on our behalf, setting forth the problems that  
18 even economists have with making a determination as to  
19 how to determine if in fact we are going to have  
20 inflation and be able to project inflation at a  
21 particular rate over a long time period.

22           I think with what we have seen in the economy  
23 in the last three, four, five years with the spiraling  
24 inflation rates, with the governmental steps to come in  
25 and try to reduce inflation, with determining whether or

1 not we are in a recession or a depression, with all the  
2 economic factors, the economists cannot even agree from  
3 past events what caused those.

4           It has been held almost uniformly, although  
5 there are some circuits which are making a distinction,  
6 that inflation is too speculative to have somebody come  
7 in and make an argument, give evidence to a fact-finder,  
8 to project over a long time period.

9           What we are suggesting is that the proper  
10 measure of damages would be to get back to what we still  
11 call the traditional approach. The traditional approach  
12 being that there can be evidence of a particular  
13 category of individuals in a particular geographical  
14 area, and there can be testimony of somebody to come in  
15 as an economist to set forth that there would be a  
16 likelihood of increased wages, but not to get into the  
17 convoluted type of testimony that we have with  
18 inflation.

19           QUESTION: So under your view, you start with  
20 the reduction of the award to present value, and then  
21 permit it to be augmented by testimony as to increased  
22 wages?

23           MR. MURDOCH: I think we would do it sort of  
24 backwards, Justice Rehnquist. We would have the  
25 testimony as to merit increases, productivity

1 increases. The fact for the particular occupation that  
2 the plaintiff is involved in that there would be the  
3 likelihood of increase of wages.

4 QUESTION: So what the jury ought to do is to  
5 consider that testimony as to future earnings, perhaps  
6 higher wage rates or promotions in the future. Then  
7 after they get the total award, they go through the  
8 mechanics of reducing it to present value.

9 MR. MURDOCH: That is correct, Justice  
10 Rehnquist.

11 We think this is the most fair because, I  
12 think as litigators and being in and out of courts, one  
13 of the things we want to do is to try to get the type of  
14 testimony which is not going to be convoluted, which is  
15 not going to increase the time of trial, the cost of  
16 trial, and also put it on the basis that some  
17 fact-finders or jurors can then make a decision as to  
18 what they should give a person who is injured.

19 I think this is fair because one of the things  
20 that we strive to do in courts is to make it a system  
21 that is fair not only for the defendants but for the  
22 plaintiffs. The history has shown that any increase in  
23 inflation has not kept up with any increase as far as  
24 interest rates are concerned.

25 You have problems if you project, such as in

1 Kaczkowski, the inflation, basically the inflation,  
2 because you are going to assume then that even the  
3 increases of salary are going to keep up with rates of  
4 inflation. I think that the past history has shown in  
5 the cases that we have cited, and that the Amici have  
6 cited, that this just is not so.

7           What I am suggesting, as I said, we want to  
8 preclude the introduction of speculation which is  
9 basically, as I say, convoluted, reduce it to present  
10 worth. You have a built-in factor there that if  
11 interest rates are going to increase that the increase,  
12 then, from the interest rates can be reinvested and this  
13 would also benefit the plaintiff.

14           So I am not looking at a situation where we  
15 are trying to cut down as far as what the plaintiff is  
16 going to get, but to make it something that is workable  
17 for the court system, fair to both parties, and still  
18 something that can cut down on the litigation costs.

19           QUESTION: The SG has filed a brief in this  
20 case on the damages question suggesting, I think, a  
21 different approach than you are suggesting if I  
22 understand it correctly.

23           MR. MURDOCH: That is correct.

24           QUESTION: And one that would propose that  
25 perhaps it's all right to consider the inflationary

1 factors, both as applied to the discount element and as  
2 applied to the prospective wage increase. But  
3 suggesting that this Court shouldn't finally determine  
4 as between some of the approaches now used which is  
5 better.

6 MR. MURDOCH: As far as what they have  
7 suggested, they were talking specifically about what  
8 would be the Feldman case and the Doca case where they  
9 had an adjusted discount rate. I am not so sure that  
10 they really did apply inflationary and non-inflationary  
11 matters before they applied the discount rate at that  
12 time.

13 One of the problems I have with their  
14 approaches is that they do assume, in fact, that the  
15 wages of those particular plaintiffs lost, or their  
16 earning capacity in the future, would have in fact kept  
17 rate, would have increased with inflation. I don't  
18 think that they can do that.

19 What I am suggesting is, I think, a better  
20 situation because if you look at the Feldman case, they  
21 had 1.5 percent discount rate. Doca had a 2 percent  
22 discount rate. But I believe in the Doca case, the  
23 Court of Appeals specifically said, we are not  
24 suggesting that it be this 2 percent, it might be 3  
25 percent or it might be 4 percent.

1           There are other approaches set forth in the  
2 other briefs which were filed on our behalf. I do think  
3 that the discussion does show that the inflation factor  
4 should not be part of the testimony. I think that this  
5 court should look at the vitality of Kelly and reaffirm  
6 it in light of this particular question.

7           What I would be concerned about is that, as we  
8 look at the uniformity provision of one and the same  
9 type of standards to look at in all the circuits, that  
10 this honorable Court is certainly going to have to make  
11 some determination as to what guidelines would be. At  
12 most, we would suggest that the Koczkowski case, or the  
13 total offset method which was adopted in this case, be  
14 overturned because there is no precedent for it, there  
15 is no evidence for it. I think it is improper.

16           If there are no other questions, I would like  
17 to reserve --

18           QUESTION: I have a question, Mr. Murdoch, if  
19 I may.

20           MR. MURDOCH: Yes, sir.

21           QUESTION: The calculation of the award in  
22 this case as set forth in the red brief, on page 17 they  
23 explain how they the \$275,000. I have two questions  
24 that I just didn't understand.

25           Did they not subtract from, in the

1 calculation, the future payments of compensation under  
2 the Longshoremen's Act?

3 MR. MURDOCH: No, they didn't.

4 QUESTION: Why not, I don't understand.

5 MR. MURDOCH: The \$33,000 which is subtracted  
6 there was the compensation payments we had made from the  
7 date of injury --

8 QUESTION: Right.

9 MR. MURDOCH: -- to the date of trial.

10 QUESTION: Why wouldn't they also -- If they  
11 subtracted an amount for the minimum wage, why wouldn't  
12 they also subtract -- Was that or maybe that wasn't  
13 raised?

14 MR. MURDOCH: I am sorry. The minimum wage,  
15 Justice Stevens, which was deducted was \$66,000.

16 QUESTION: Correct.

17 MR. MURDOCH: Then the \$33,000.

18 QUESTION: But the minimum wage, this \$66,000,  
19 as I understand it, is the minimum he would have earned  
20 in the future.

21 MR. MURDOCH: Over the 12 years, yes, sir.

22 QUESTION: Why wouldn't they also subtract 12  
23 years of future workmen's compensation payments?

24 MR. MURDOCH: What the Court indicated was  
25 going to happen was that if in fact there was going to

1 be an appeal at the time there was a final decision in  
2 this case, that we would then make a determination as to  
3 what had been paid at that time.

4 What happens from a practical standpoint is  
5 that if a lump sum award is going to be given to Mr.  
6 Pfeifer, no further payments are made at that time.

7 QUESTION: I see.

8 MR. MURDOCH: We are given credit for that.

9 QUESTION: Then my next question is, is there  
10 any place in the papers a calculation similar to this of  
11 what your expert or what your position in the trial  
12 court was as to the proper award?

13 MR. MURDOCH: No, there was not much evidence  
14 on that, Justice Stevens. We did not have an expert  
15 witness per se. We had somebody from the payroll  
16 office, who is high up in the payroll office, who came  
17 and talked about it, but we did not project anything.

18 QUESTION: If you did not offer evidence that  
19 in this case the award would have been lower under your  
20 theory, how do you have standing -- I don't understand  
21 whether there you have a standing to claim of reversible  
22 error on the damages.

23 MR. MURDOCH: We argued at the time, not only  
24 in proposed findings of fact but during the trial, that  
25 in order for there to be a proper decision as to any

1 damages which were going to be awarded that there would  
2 have to be the reduction to present worth.

3 QUESTION: Did you offer evidence showing what  
4 that would have produced?

5 MR. MURDOCH: No, we didn't. We felt that  
6 that was the burden of the plaintiff. We felt that if  
7 the court would come in and apply what we felt was the  
8 proper standard of damages.

9 QUESTION: It seems to me that it is at least  
10 theoretically possible that your approach would have  
11 produced a higher damage award and if that is the case --

12 MR. MURDOCH: I don't believe so because  
13 traditionally in Pennsylvania there has been a reduction  
14 to 6 percent.

15 QUESTION: Just looking at the record in this  
16 case, can we be sure that you would have been better off  
17 under your theory?

18 MR. MURDOCH: You have nothing in the record  
19 before you on that.

20 I would like to reserve whatever time I have.

21 CHIEF JUSTICE BURGER: Very well.

22 Mr. Libenson.

23 ORAL ARGUMENT OF JEROME M. LIBENSON, ESQ.

24 ON BEHALF OF THE RESPONDENT

25 MR. LIBENSON: Mr. Chief Justice, may it

1 please the Court.

2           There are two issues in this case. The first  
3 is whether a longshoreman may sue his employer for  
4 negligence as a vessel owner under 905(b) of the  
5 Longshoremen's and Harbor Worker's Compensation Act. I  
6 will refer to this as the Act as I go through my  
7 argument. The second is whether the lower court  
8 properly calculated damages on the record before it.  
9 Both these issues were affirmed in the lower court in  
10 favor of my client, the Respondent.

11           The Longshoremen's and Harbor Worker's  
12 Compensation Act was passed in 1927, but it was  
13 significantly amended in 1972 to add 905(b) for the  
14 first time. 905(b) put into statutory form permission  
15 to bring an action against a vessel as a third party in  
16 negligence instead of unseaworthiness which was the  
17 previous method of claim.

18           As Justice C' Connor pointed out, the  
19 Petitioner, J&L's negligence in its ownership capacity  
20 is not before this Court. Furthermore, J&L admitted  
21 that it was owner pro hac vice of all the barges in the  
22 fleet on January 13, 1978, when Howard Pfeifer was  
23 injured, when he slipped on an accumulation of snow and  
24 ice on a gunnel.

25           I don't know if the Court is familiar with how

1 barges are assembled on the Allegheny River. These are  
2 coal barges and they are assembled and lashed together  
3 in what they call a fleet. The barges are moved in or  
4 out of the fleet to unload or load coal to the steel  
5 mill.

6           The point is that of the 35 barges that were  
7 there that night or 40 barges, the ownership of those  
8 were all J&L's under the pro hac vice theory, whether or  
9 not they actually did own them or not. However, J&L  
10 would have you treat this case differently if my client  
11 fell on an unowned barge in the same fleet, which is  
12 contrary to the intent of the Act.

13           Under 905(b) all longshoremen are to be  
14 treated the same, and there should be no difference  
15 whether the vessel is employer-owned or third  
16 party-owned. The fact is that the employer assumes a  
17 dual capacity as all Circuit Courts have found of  
18 ownership of the vessel.

19           They don't have to do this, but when they do  
20 it, the Act applies to them as it would apply to any  
21 other vessel owner. The incidence of their being an  
22 employer of the person who is injured is incidental to  
23 the fact of their ownership of the vessel.

24           I submit to you that the award in this case  
25 should not depend on the gratuitous event or

1 happenstance of how or where a person happens to fall if  
2 he is going to be injured.

3           The 1972 amendments to this Act were brought  
4 about because of this Court's finding in Seas Shipping  
5 against Sieracki and in the Lyon case. During the  
6 period between 1927 and 1972, the practice was for a  
7 vessel to ask for an indemnity agreement from any  
8 stevedore company, and the effect was that any injury or  
9 claim against the vessel under unseaworthiness was paid  
10 finally by the stevedore company under the indemnity  
11 agreement.

12           Congress felt that this was improper. In  
13 passing the amendments in 1972, it took away the  
14 unseaworthiness doctrine, the indemnity provisions, and  
15 it expanded the Act by increasing the benefits. But it  
16 also in effect ratified Reed against The Yakka and  
17 Jackson which this Court had passed, and permitted a  
18 suit against the vessel itself under 905(b).

19           This Court in Edmonds, speaking through  
20 Justice White, considered 905(b) and stated: "To permit  
21 a third party suit against the vessel providing its own  
22 loading and unloading services where negligence and its  
23 stevedoring capacity contributes to the injury."

24           The second sentence means no more than that  
25 all longshoremen are to be treated the same, whether

1 their employer is an independent stevedore or a  
2 shipowner stevedore. All stevedores are to be treated  
3 the same whether they are independent or an arm of the  
4 shipowner itself.

5 Justice White further cited the congressional  
6 hearing reports and stated in footnote 12 in his opinion  
7 that "Congress ultimately decided to preserve the  
8 longshoremen's tort action against shipowners acting as  
9 shipowners."

10 The legislative goal of passing 905(b) was the  
11 safety of the longshoremen, and the committee reports  
12 say that "The Committee recognized the progress that has  
13 been made in reducing injury in the longshoring  
14 industry, but longshoring remains one of the most  
15 hazardous types of occupation, and the Committee expects  
16 to see further progress in reducing injuries and stands  
17 ready to immediately reexamine the third party  
18 question."

19 The point is that Congress felt that by  
20 preserving the action against the vessel, it would have  
21 a salutary effect on the vessels to ensure their  
22 safety.

23 There are six Circuit Courts that have  
24 addressed this question since the 1972 amendments have  
25 been in effect, and all of them have arrived at a

1 finding that is in conformity with Griffith and the  
2 results in this case.

3 I believe that this Court, speaking through  
4 Justice Powell in Pfeifer, stated that this was a  
5 remedial statute, and the amendments were made out of  
6 solicitude for the workers. Justice O'Connor very  
7 recently, since the filing of our brief, in Director  
8 againt Perrini, cited the committee reports for  
9 authority as to what the Act meant. I think if this  
10 Court will again refer to the Act and committee reports,  
11 they should have no problem with 905(b).

12 Congress's intent was to treat all  
13 longshoremen alike, whether employed by an independent  
14 stevedore or shipowner stevedore and to impose liability  
15 on shipowner stevedores for negligence in their  
16 ownership capacity. This comports with the legislative  
17 intent of encouraging safety on vessel and holding an  
18 employer/owner to the same standards as any other  
19 shipowner when acting in its shipowner capacity.

20 To deny Pfeifer's recovery due to the mere  
21 happenstance of his being injured on an employer-owned  
22 or pro hac vice vessel would be grossly unfair and  
23 contrary to the legislative intent, and to circuit  
24 cases. It would remove any incentive to  
25 shipowner/employers to exercise due care in their

1 ownership capacity in this case.

2 I would also point out to this Court that  
3 there is no double recovery. As Justice Stevens asked  
4 and was advised, the award in this case is deducted from  
5 the -- the compensation in this case is deducted from  
6 the award, so there is no double recovery. The employer  
7 is repaid any payments it makes under the compensation.

8 Jones & Laughlin undertook ownership  
9 responsibilities and failed to live up to its  
10 responsibilities and it must, therefore, be held liable  
11 in negligence for the injuries to my client under  
12 905(b).

13 The question of damages and the proper method  
14 of determining damages is also before this Court.

15 First of all, I would point to the Court, as  
16 Justice Stevens has asked, there is a complete waiver on  
17 the part of the petitioner to raise this question.

18 The local rules of the District Court in which  
19 this was tried require any expert testimony to be  
20 proffered in the pretrial statement with a report from  
21 the expert, and before an expert is permitted to  
22 testify. There was no report filed by the petitioner  
23 nor any evidence offered on his behalf.

24 QUESTION: The burden of proof -- Mr.  
25 Libenson, isn't the burden of proof as to the amount of

1 damages he is entitled to recover on someone in Mr.  
2 Pfeifer's shoes?

3 MR. LIBENSON: The initial burden, but if they  
4 were going to contest the award, they have to offer  
5 their own evidence, Your Honor.

6 QUESTION: Granted that they can't rely on any  
7 testimony other than that already adduced. But  
8 supposing your expert takes the stand and due to a slip  
9 of communication between you and your expert, testifies  
10 favorably to the defendant. The fact that he is your  
11 expert doesn't mean that the Defendant can't rely on his  
12 testimony.

13 MR. LIBENSON: I agree. But in our case, we  
14 offered in the known wages, and we put in the wages of  
15 the men above and below my man in seniority to show what  
16 he would have earned over the period of time up to the  
17 time of trial.

18 In addition, we offered into evidence the  
19 known union contract which had had certain increases in  
20 it, I think through 1982, although the trial, I think,  
21 was in 1979 or 1980.

22 Judge Cohill in the District Court decided,  
23 after looking at this case, that there was no Federal  
24 common law.

25 QUESTION: Let's return to your waiver point.

1           MR. LIBENSON: Okay.

2           QUESTION: Supposing that after precisely the  
3 same testimony as was adduced here, which I take it was  
4 your expert on the question of damages --

5           MR. LIBENSON: We had no expert, Your Honor.

6           QUESTION: Who was it?

7           MR. LIBENSON: There was no expert. We just  
8 put in the wages, the wage losses, and we were satisfied  
9 to proceed with that.

10          QUESTION: Supposing that Judge Cohill had  
11 then said, "I don't care what the law is elsewhere, I  
12 think inflation is 20 percent a year. So I am going to  
13 figure a factor of 20 percent a year on the basis of  
14 this testimony," and made his award accordingly.

15          MR. LIBENSON: He didn't do that .

16          QUESTION: I realize that, but do you think  
17 that the Defendant would be prevented from urging on  
18 appeal that Judge Cohill had applied the wrong measure  
19 of damages simply because the Defendant --

20          MR. LIBENSON: You are presupposing, Justice  
21 Rehnquist, that he went outside the record which he did  
22 not do, and that is my point.

23          QUESTION: But the rule, the law of damages  
24 doesn't necessarily depend on the record. It is a body  
25 of law that you find in cases and not in the record of

1 this case.

2 MR. LIBENSON: I would like to -- If I could  
3 answer your question by directing your attention or  
4 inviting your attention to the Alma case against  
5 Manufacturers Hanover Trust in the Ninth Circuit, which  
6 stated that in the absence of evidence on the reduction  
7 by either side, the Court is not obligated to go ahead  
8 sue sponte to do it.

9 QUESTION: But the Third Circuit did go ahead  
10 here and considered various rules of damages.

11 MR. LIBENSON: I think the Third Circuit did  
12 essentially what the Ninth Circuit did in Alma, it  
13 addressed the record in front of it and what it did was  
14 say that whether or not the Longshoremen's and Harbor  
15 Worker's Compensation Act considered inflation and  
16 whether or not there was Federal law as precedent at  
17 that time. My point is that the Act itself, unlike the  
18 Shoremen Act, does not have a treble damage  
19 requirement. It has no requirement as to damages.

20 QUESTION: But the Third Circuit, unless I  
21 wholly misread its opinion, affirmatively adopted a  
22 rather sweeping change in the law of damages in this  
23 kind of case at least for that circuit. Do you dispute  
24 that?

25 MR. LIBENSON: I don't dispute it but I think

1 the answer is that there was no law of damages in a  
2 fixed manner at that time. What the Third Circuit did  
3 was evolve, if you will, Federal common law like any  
4 other common law that is evolved.

5 QUESTION: But it certainly wasn't a rule of  
6 damages applicable to only these particular facts and  
7 only this particular case. It laid down a fairly  
8 sweeping rule, whether there was a preceding rule or  
9 not.

10 MR. LIBENSON: I think it was discretionary.

11 QUESTION: What was discretionary?

12 MR. LIBENSON: For the Third Circuit to adopt  
13 the Kaczkowski case and a total offset.

14 QUESTION: It may have been discretionary, but  
15 they exercised their discretion to adopt it.

16 MR. LIBENSON: That is true, but I think there  
17 was room for it because there was nothing in the Federal  
18 law at that time that directed them any other way.

19 QUESTION: But now it is the law of the Third  
20 Circuit. I am not suggesting that they may not have  
21 been correct in doing it, but I am suggesting that your  
22 argument about waiver really has little bearing in view  
23 of what the Third Circuit did.

24 MR. LIBENSON: My argument -- The waiver goes  
25 to the fact that I don't think the petitioner can ask

1 for a reduction to present worth at this point in time  
2 because it is not in the record, that is my point, Your  
3 Honor.

4 QUESTION: If the rule, the yardstick that the  
5 Third Circuit applied is not warranted and justified,  
6 what about that?

7 MR. LIBENSON: If they had other evidence  
8 before it from which they could argue, but to say that  
9 it is not warranted --

10 QUESTION: Isn't that just a matter of  
11 evidence?

12 MR. LIBENSON: That is right, Your Honor.

13 QUESTION: Don't you think that they made a  
14 new rule?

15 MR. LIBENSON: I don't think they were  
16 entitled to make a new rule under the state of the law  
17 as it was before them at the time that this case was  
18 presented to them. I think that is one of the reasons  
19 they took the case, Your Honor -- Mr. Chief Justice.

20 QUESTION: The question is whether made the  
21 correct rule of law on measuring damages, is it not.

22 MR. LIBENSON: I am sorry, I didn't hear.

23 QUESTION: Whether they made the correct rule  
24 of law to measure the damages, and that is a question of  
25 law and not a question of fact.

1               MR. LIBENSON: That is true, but a law evolves  
2 from facts and I think a court has to have facts in  
3 front of it before it can make law.

4               QUESTION: On what facts do you think the  
5 Third Circuit evolved, to use your term, their rule?

6               MR. LIBENSON: All right. I think they  
7 utilized the unique situation in this case that there  
8 was no precedent governing Federal law of damages, other  
9 than Chesapeake and Ohio.

10              The case -- the Pfeifer case in the Third  
11 Circuit opinion comports with Chesapeake and Ohio  
12 against Kelly, a 1916 case, because the set off of  
13 inflation against reduction to present worth in effect  
14 is a reduction. That is what the Third Circuit said,  
15 and the Third Circuit also said that this case, in their  
16 opinion, conforms to Chesapeake and Ohio against Kelly.

17              QUESTION: Does this involve an assumption  
18 that inflation is always going to remain in the state  
19 that it is on the day or at the time the Court of  
20 Appeals is evolving its new rule?

21              MR. LIBENSON: I think that the history of  
22 inflation is recognized by all circuits at this point,  
23 but the First. I think that everyone on this bench  
24 knows that inflation has been present since at least  
25 1950 and has been increasing. It is a problem that has

1 to be considered.

2 QUESTION: Do you think we can take judicial  
3 notice that it has been decreasing lately?

4 MR. LIBENSON: That is one of the problems in  
5 the case. I think that you probably will or could.

6 QUESTION: But it has, has it not?

7 MR. LIBENSON: Pardon.

8 QUESTION: Has it not gone down?

9 MR. LIBENSON: Yes, but it is a variable  
10 thing. You see in the newspapers it changes every day.  
11 But this case was tried in 1980, and we are in front of  
12 you in 1983.

13 QUESTION: What was it in 1980, about 11  
14 percent or 12 percent?

15 MR. LIBENSON: It was runaway inflation at  
16 that time, that is right. The Defendant was probably  
17 getting 18 percent on the verdict here that they have  
18 been appealing while the Plaintiff got nothing. The  
19 Plaintiff only gets 6 percent if he collects on the  
20 verdict anyway.

21 QUESTION: That is a separate and different  
22 matter, isn't?

23 MR. LIBENSON: It is a different issue, but I  
24 think it illustrates the problem, Your Honor.

25 But also, I think, the Court should consider

1 that when inflation decreases, interest rates go down,  
2 too. So the concept of the total offset method has many  
3 good features. It is predictable. It is precise. It  
4 is inexpensive, and it saves Court time. Bringing  
5 experts in the Court can change an argument, or a trial,  
6 rather, to a trial within a trial, and many cases  
7 totally confuses the jury.

8           As a matter of fact, at this point in time, I  
9 think between the various circuits that have considered  
10 it, you have possibly four different concepts. You have  
11 cases, in Doca, in Feldman, or O'Shea, where the various  
12 Courts have said that there is a real rate of interest  
13 which is anywhere from 1.5 to 2 to 3 percent.

14           There is a series of cases where the Court  
15 just lets it to the jury to consider what inflation is.  
16 There is a series of cases that requires expert  
17 testimony. Then there is the total offset method. All  
18 four wrestle with the same problem as to what is the  
19 method, but I think they illustrate that any one method  
20 is just not exclusive.

21           I think that this Court, if it attempted to  
22 say that there is one method that is superior to the  
23 others, would only run into additional problems on other  
24 aspects of damages that would not hold water.

25           The only question that the Third Circuit

1 really answered in its opinion was that they held that  
2 the District Court did not err in computing damages for  
3 future loss of earnings -- this is on 16a of the  
4 petition for certiorari -- because it is not necessary  
5 to go through the process of discounting lump sum awards  
6 at theoretical present values. The discount factor is  
7 presumed equal to the offset by the impact of inflation  
8 on the future economic value of the award.

9 I submit that the total offset method is as  
10 good as others and better from a theoretical  
11 standpoint. It is efficient, predictable, and saves  
12 court time.

13 Justice O'Connor, I would like to point out  
14 that in the 1982 Congressional hearings on amending the  
15 Longshoremen Act, at page 32, Congress said: "However,  
16 apart from these limitations on owner vessel --  
17 limitations, an owner vessel would not be relieved of  
18 liability for owner occasioned negligence," and cites  
19 Lundy against Litton, Smith against Eastern Seaboard,  
20 and Griffith. I submit that Congress has no intention  
21 in 1982 of overruling the Griffith case which this case  
22 follows.

23 QUESTION: Mr. Libenson, you intimated a  
24 moment ago that you thought the Third Circuit was  
25 reviewing the District Court's damage award on kind of

1 an abuse of discretion theory. Taking the paragraph of  
2 the Court of Appeals' opinion beginning at the bottom of  
3 page 15a of the petition for certiorari and continuing  
4 over that paragraph until you find the Roman five in the  
5 middle of the page. Do you think that's really a fair  
6 interpretation of the Court of Appeals' rule?

7 MR. LIBENSON: Your question again, is this a  
8 fair interpretation?

9 QUESTION: Is it a fair interpretation to say  
10 that all the Court of Appeals was saying it was not an  
11 abuse of discretion for the District Court to have  
12 applied this rule, intimating that perhaps if the  
13 District Court had applied another rule, it would have  
14 affirmed it, too.

15 MR. LIBENSON: I think so.

16 But I think that Judge Aldisert in writing  
17 this opinion felt that inflation had to be addressed,  
18 obviously, from the contents of the opinion, and he felt  
19 that this method, if it is going to be addressed, is  
20 superior to anything else that has been utilized in the  
21 various circuits.

22 QUESTION: Well, if he felt that it was  
23 superior, then is it really fair to say that it is a  
24 review on an abuse of discretion basis, and that if  
25 Judge Cohill had applied any one of five or six other

1 rules, you think that would have been affirmed, too?

2 MR. LIBENSON: I think so.

3 QUESTION: May I ask you if you know whether  
4 this problem of how to compute damages in an  
5 inflationary economy has ever been addressed by any  
6 legislature?

7 MR. LIBENSON: I am not aware of any, Justice  
8 Stevens.

9 QUESTION: Were any arguments made to any of  
10 the courts along the line that something like a cost of  
11 living adjustment could be built into an award?

12 MR. LIBENSON: Your Honor, in the record in  
13 this case, cost of living increases were submitted to  
14 the District Court that were known under the various --  
15 under the union contract, however; and that is the  
16 reason, on page 21 of my brief, I was able to  
17 demonstrate that if you add in the cost of living  
18 increases that were known up to the time of the trial  
19 and then reduce them by the 2 percent method under the  
20 Doca case, you would still come up with about an \$80,000  
21 higher verdict than was obtained in this case. Judge  
22 Cohill felt that the Kaczkowski case or the Alaska rule  
23 of total offset was appropriate and he applied it in  
24 this case. I hope that answers your question.

25 (Pause.)

1           MR. LIBENSON: I think this Court did address  
2 inflation in Leipheld and it said again future inflation  
3 are matters of estimate and prediction, but estimate and  
4 prediction is not anything precise. The problem is if  
5 the court is looking for a precise and totally accurate  
6 damage award, I just don't think they exist.

7           I think the question is, if you are looking  
8 for a method that is appropriate for most cases and  
9 which should be followed, I commend the total offset  
10 method to you because, again, it is comprehensible,  
11 efficient, and inexpensive. It will save court time.  
12 You will avoid the necessity of expert witnesses. I  
13 think any of you Justices, who have tried cases with  
14 expert witnesses on both sides, you do not get a  
15 consensus or an agreement. It is something for a jury  
16 to have to decide who to believe anyway.

17          QUESTION: May I ask you one other question.  
18 The government comes up with two proposals, both of  
19 which differ from the total offset method. Am I correct  
20 in believing that both of those which do in a sense take  
21 inflation into account -- both of those represent a  
22 change in the law at least as it was, let's say, ten  
23 years ago, a rather dramatic change in the law?

24          MR. LIBENSON: I think the question of  
25 inflation itself represents the change. The question of

1 how to factor it in is the problem. The method is, we  
2 could --

3 QUESTION: Both of the government suggestions  
4 do factor in inflation at least partially.

5 MR. LIBENSON: Yes. I don't disagree with  
6 that. I think all the Circuit Courts, but the First, at  
7 this time, consider inflation in awards. But the real  
8 question is: What is the most efficient way of doing in  
9 the first place.

10 QUESTION: Yes.

11 MR. LIBENSON: I might add that the total  
12 offset method, if it does favor a Plaintiff in a very  
13 small degree, it should because the Plaintiff is not the  
14 culpable party, at that point he has already established  
15 his liability.

16 I submit to this Court that Pfeifer's cause of  
17 action against the vessel owned or controlled by his  
18 employer J&L is valid. The damages were properly  
19 calculated in accordance with Federal law. The judgment  
20 of the Third Circuit Court of Appeals must be affirmed.  
21 Thank you.

22 CHIEF JUSTICE BURGER: We resume at 1:00  
23 o'clock, counsel, so as not to divide your rebuttal.

24 (Whereupon, at 11:58 a.m., the Court recessed,  
25 to reconvene at 1:00 p.m., the same day.)

1 AFTERNOON SESSION

2 1:00 p.m.

3 CHIEF JUSTICE BURGER: Mr. Murdoch, you may  
4 carry on.

5 REBUTTAL ARGUMENT OF ROBERT W. MURDOCH, ESQ.

6 ON BEHALF OF THE APPELLANT

7 MR. MURDOCH: Thank you, Chief Justice Burger,  
8 and may it please the Court. I would like to cover  
9 several points which were raised in Mr. Libenson's  
10 argument.

11 I would respectfully disagree that by having  
12 the amendments of 1972 that the Reed versus The Yakka  
13 case was overruled. I feel that if in my  
14 interpretation, putting 905(a), 905(b), and 933  
15 together, would indicate again, without getting back  
16 into my argument, that all actions against a vessel or  
17 an employer are completely devoid due to these  
18 amendments and, therefore, I feel the negligence actions  
19 which are allowed under 905(b) are for a longshoreman or  
20 anyone covered under the Act against somebody other than  
21 the employer.

22 As to the payments that come under the  
23 workmen's compensation benefits, such as we have in this  
24 case, I believe that one of the intents, one of the  
25 purposes that we have in the workmen's compensation

1 statute was to provide regular payments to the  
2 individual who was injured.

3           We have two dangers if this type of action is  
4 allowed. First of all, it requires a lump sum payment,  
5 which is going to be paid with the stopping of the  
6 compensation payments. There is no guarantee that  
7 anybody who receives a lump sum payment such as this is  
8 going to retain it or have the wise investment  
9 opportunities.

10           So I think that it is something that should be  
11 considered, with the purpose to allow the monetary  
12 benefits on a regular basis, that these type of actions  
13 go against that particular intent.

14           QUESTION: Are you suggesting that ad hoc  
15 evaluations could be appropriately made?

16           MR. MURDOCH: Yes, I believe they could.

17           As to the total offset method, I would like to  
18 raise something as an example in order to show exactly  
19 what we are involved with with the total offset method.  
20 If we assume that the finding of the Court would be that  
21 the lost earning capacity in the future would be  
22 \$180,000 for that particular plaintiff, what the total  
23 offset method does is provide \$180,000 in that  
24 individual's pocket at that time. It allows him to  
25 invest at the rates, to reinvest at higher rates, so

1 that assuming that he had ten years of lost  
2 productivity, he gets \$180,000 plus all the total  
3 interest over that time period.

4           That is not what we are attempting to do when  
5 we are determining what amount of money is due to an  
6 injured individual. We are determining that if he, in  
7 fact, is going to lose \$180,000 over his worklife  
8 expectancy, that by reducing to the present value that  
9 in the ninth and tenth year in my example of his  
10 worklife expectancy, he is going to receive exactly what  
11 he would have received had he been continuing to work.  
12 The total offset method does not do that. It goes  
13 completely against the grain to the prejudice of the  
14 Defendants.

15           Also I would like to point out that under  
16 section 905(a) and 905(b) that it is almost a strict  
17 liability situation as far as the employer is  
18 concerned. We are required as employers to make these  
19 payments whether there is negligence, non-negligence, or  
20 anything like that. I think that this should be taken  
21 into consideration. Thank you very much.

22           CHIEF JUSTICE BURGER: Gentlemen, the case is  
23 submitted.

24           (Whereupon, at 1:02 p.m., the case in the  
25 above-entitled matter was submitted.)

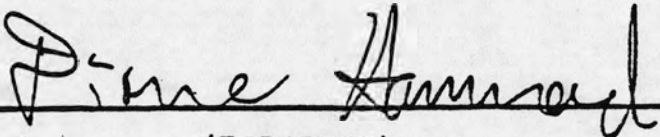

CERTIFICATION

Alderson Reporting Company, Inc., hereby certifies that the attached pages represent an accurate transcription of electronic sound recording of the oral argument before the Supreme Court of the United States in the Matter of: JONES & LAUGHLIN STEEL CORPORATION, ETC. Petitioner v. HOWARD E. PFEIFER # 82-131

---

and that these attached pages constitute the original transcript of the proceedings for the records of the court.
