v.	: Case No. 82-1167
	:
BRADLEY THOMAS JACOBSEN AND DONNA	:
MARIE JACOBSEN	:
-----x	:

Washington, D.C.
Wednesday, December 7, 1983

The above-entitled matter came on for oral argument before the Supreme Court of the United States at 10:48 a.m.

APPEARANCES:

DAVID S. STRAUSS, ESQ., Office of the Solicitor General, Department of Justice, Washington, D.C.; on behalf of the Petitioner.
MARK W. PETERSON, ESQ., Minneapolis, Minnesota; on behalf of the Respondents.

CHIEF JUSTICE BURGER: Mr. Strauss, I think
you may proceed when you're ready.

ORAL ARGUMENT OF DAVID A. STRAUSS, ESQ.,
ON BEHALF OF THE PETITIONER

MR. STRAUSS: Thank you, Mr. Chief Justice,
and may it please the Court:

The issue in this case is whether law
enforcement officers must obtain a search warrant before
they conduct a chemical analysis of a substance that is
lawfully in their possession to determine whether it is
an illegal or controlled drug.

The facts of this case are typical of
narcotics prosecutions. In May 1981 the employees of
Federal Express, which is a private freight carrier,
opened a cardboard package addressed to Respondents that
had been given to Federal Express for shipment. Inside
the package was a tube wrapped in gray tape. The
Federal Express employees cut open the tube and removed
from inside of it a transparent container that consisted
of four plastic bags, one inside the other. Inside the
innermost plastic bag was a white powder.

It is undisputed that the Federal Express
employees undertook all these actions on their own
without any governmental involvement whatever.

1 The Federal Express employees suspected that
2 the white powder might be an illegal drug and --

3 QUESTION: Well, they didn't -- they didn't
4 open the plastic bag.

5 MR. STRAUSS: They did not open the plastic
6 bag, that's right.

7 QUESTION: Would the existence of the bag in
8 that condition amount to, in your view, immediately
9 apparent incriminating material to authorize a plain
10 view seizure?

11 MR. STRAUSS: I think it's absolutely clear
12 that at that point probable cause existed.

13 QUESTION: Why?

14 MR. STRAUSS: That's right. Because it was a
15 white powder packaged --

16 QUESTION: Any white powder package like that,
17 there's probable cause to believe that it's contraband?

18 MR. STRAUSS: Yes. I don't think people send
19 baking soda or sugar or talcum powder through Federal
20 Express wrapped in four plastic bags like that; or at
21 least the probability of their doing so is small enough
22 so this constitutes probable cause. In fact, if this
23 didn't constitute probable cause, then you're in the
24 paradoxical situation -- it's one of the oddities of the
25 court of appeals opinion -- that the court apparently

1 thought that law enforcement officers were in the
2 position that they couldn't do anything. They would
3 simply have had to allow this shipment to go through.
4 They couldn't seize it, they couldn't test it.
5 According to the court of appeals, they would simply
6 have had to walk away at this point.

7 QUESTION: Do you think the knowledge they had
8 acquired at that time before the testing, just the
9 observation, would have been sufficient to support the
10 issuance of a warrant to search the house after they
11 made the controlled delivery?

12 MR. STRAUSS: Yes, I think that's right,
13 because there existed probable cause to --

14 QUESTION: I was asking the question. Is it
15 -- would it support the warrant?

16 MR. STRAUSS: Yes.

17 QUESTION: And you think it would.

18 MR. STRAUSS: In my view it would, yes,
19 because it would establish probable cause to believe
20 that that was contraband, probably cocaine, and after
21 delivery there would be probable cause to believe it was
22 cocaine.

23 QUESTION: Is that -- there must be a lot of
24 cases then supporting your view that any time you see a
25 white powder in plastic bags, you have probable cause to

1 believe it's contraband. Are there a lot of cases like
2 that?

3 MR. STRAUSS: Well, actually not just --

4 QUESTION: Does anybody ever get a warrant
5 when they see white powder in a plastic bag, or do they
6 just automatically open up the bag?

7 MR. STRAUSS: Well, they conduct a field test,
8 that's right. And every other court that has looked at
9 this situation has not had any difficulty with their
10 conducting a field test, and the field test, of course --

11 QUESTION: Well, the field test is one thing,
12 but getting in the bag -- getting in the bag is
13 another. I take it your position wouldn't be any
14 different if the bag had been not transparent but
15 opaque. And yet you had -- suppose you had had private
16 information, reliable private information that there was
17 cocaine in that bag; namely, you had probable cause to
18 believe there was cocaine in the bag, which is no
19 different than the kind of probable cause you say
20 existed here where it was transparent.

21 MR. STRAUSS: No. I think --

22 QUESTION: Could you then -- could you then
23 open the bag?

24 MR. STRAUSS: I think it would make a
25 difference if the bag were opaque.

1 QUESTION: Why? Why?

2 MR. STRAUSS: Because the Court said in
3 Arkansas against Sanders that certain containers don't
4 support a reasonable expectation of privacy because
5 their contents is immediately --

6 QUESTION: Well, yeah, but what if you had
7 probable cause to believe there was cocaine in that
8 opaque bag?

9 MR. STRAUSS: Well, at least certain opaque
10 containers. If, say, it were an attache case or
11 something like that, probable cause, of course, is not --

12 QUESTION: Well, what about an opaque plastic
13 bag, and you had probable cause to believe there was
14 cocaine in it. Could you tear it open and field test it?

15 MR. STRAUSS: Well, the question would be
16 whether under what the Court said in Arkansas against
17 Sanders that container supported a reasonable
18 expectation of privacy.

19 Now, an opaque plastic bag I think would be a
20 borderline case. A transparent plastic bag is not a
21 borderline case. A transparent plastic bag is the best
22 example of a container that, to quote the Court's words
23 in Arkansas against Sanders, "containers that by their
24 very nature cannot support a reasonable expectation of
25 privacy because their contents can be inferred from

1 their outward appearance."

2 There is no inference going on here. The
3 contents were immediately apparent from the outside --
4 from the outward appearance because the container was
5 transparent.

6 QUESTION: Well, that is -- it's just not the
7 contents, but it's the fact they're wrapped up in a
8 plastic bag and shipped by Federal Express.

9 MR. STRAUSS: That's right. But there's no
10 question at all those things were lawfully apparent to
11 the DEA agents when they arrived.

12 QUESTION: You wouldn't say that if you have a
13 search warrant for an apartment to hunt for some object
14 and you run into a white powder sitting around in a
15 glass somewhere that that's immediately seizable as
16 cocaine, would you?

17 MR. STRAUSS: Oh, no, certainly not.

18 QUESTION: It may be somebody's ashes.

19 MR. STRAUSS: I think those containers are
20 ordinarily opaque.

21 QUESTION: An urn.

22 MR. STRAUSS: In fact, the Court went on to
23 say in Arkansas against Sanders, "Similarly, in some
24 cases the contents of a package will be open to plain
25 view, thus obviating the need for a warrant."

1 Now, the contents of this package were open to
2 plain view, and that obviated the need for us to obtain
3 a warrant to open the transparent container.

4 QUESTION: So you think the plain view
5 exception just covers this case and that's the end of it.

6 MR. STRAUSS: Well, the plain view exception
7 authorized the -- authorized the agents to take a few
8 grains of cocaine.

9 QUESTION: To open the bag and take a few
10 grains.

11 MR. STRAUSS: That's right. To open the bag
12 and take a few grains.

13 QUESTION: That still leaves a question of the
14 test.

15 MR. STRAUSS: That's right. That leaves the
16 question of the test. And that, in our view, is the
17 principal issue in the case.

18 Now, before I get to the merits of the test, I
19 would like to say a word about why we considered this
20 issue to be of considerable importance.

21 The chemical analyses of substances suspected
22 of being narcotics are absolutely routine in narcotics
23 prosecutions. They are undertaken in virtually
24 hundreds, if not thousands, of cases a year. And to
25 hold that every time a chemical analysis is undertaken

1 of a substance that the -- the possessor of which has
2 not consented to the analysis in some way, that every
3 time that occurs, a warrant must be obtained.

4 QUESTION: But you -- you -- you agree before
5 the test should be administered that you at least ought
6 to have probable cause to believe that it's contraband
7 or not.

8 MR. STRAUSS: No, we don't need probable --
9 it's not a search within the meaning of the Fourth
10 Amendment.

11 QUESTION: So -- so in my example when you're
12 searching the apartment for a stolen piano, you see on
13 the -- you see on a shelf a white powder in a glass, you
14 can just take a pinch of it and test it, even though you
15 have no reason to believe whatsoever that it's
16 contraband.

17 MR. STRAUSS: I -- that -- that is our
18 position, Justice White. I think that is the right view.

19 Now, let me say as I say that that -- that we
20 don't think and we're not asking the Court to say that
21 there is no circumstance at all --

22 QUESTION: Well, you are, though. You are,
23 though. You're saying that it's not a search at all
24 subject to the Fourth Amendment to field test any white
25 powder that you find anywhere.

1 MR. STRAUSS: Well, that -- that is, we are
2 not asking the Court to go so far as to say there
3 couldn't be some circumstance in which someone could
4 make it clear that they attach unusual privacy values to
5 a substance. Maybe Justice Rehnquist's example is a
6 good example. If it were clear that this was a --

7 QUESTION: An ashes urn?

8 MR. STRAUSS: An ashes urn, something which
9 had unusual privacy attributes, we're not asking the
10 Court to say that some such extraordinary case might not
11 come along in which we would be required to have some
12 quantum of suspicion. But this is clearly not that
13 case. No one suggested that a white powder package like
14 this in a transparent container shipped like this had
15 the privacy attributes associated with someone's ashes
16 in an urn. And --

17 QUESTION: Of course, you don't need to go
18 that far in this case because you claim you had probable
19 cause to believe that it was cocaine or was a drug.

20 MR. STRAUSS: Yes, yes. I -- well, I --

21 QUESTION: And at least in those cases you
22 think you ought to be able to field test.

23 MR. STRAUSS: Oh, yes, certainly, a fortiori,
24 if we have probable cause.

25 QUESTION: But how -- how much difference does

1 -- do the two alternate methods of analysis make,
2 because your position is that every time you see white
3 powder wrapped in several sacks in transit, you have
4 probable cause to believe that it's contraband. So that
5 there really isn't any independent determination or
6 additional factual determination that you make once you
7 have those facts before you.

8 MR. STRAUSS: Well, in this case and in a case
9 similar to it we will have probable cause. There may be
10 many instances in which we would have suspicion not
11 amounting to probable cause. We might come across a
12 substance like this in the course of a search incident
13 to arrest or of a car search.

14 QUESTION: Well, maybe we ought to wait until
15 we get a case like that.

16 MR. STRAUSS: Well, there is -- there was
17 undoubtedly probable cause in this case. And if the
18 Court's view is that we need probable cause to conduct
19 this test, we are entitled to win this case.

20 But there are instances in which substances --
21 where you have only reasonable suspicion to believe that
22 a substance is contraband, and to require warrants in
23 those cases would, we think, not serve -- or to require
24 probable cause in those cases would, we think, not serve
25 the interests --

1 QUESTION: Mr. Strauss, may I ask a question
2 about the record? Does the warrant application appear
3 in the record, and if so, where, in the materials before
4 us?

5 MR. STRAUSS: It's in the record. It's not in
6 the -- it's not in the Joint Appendix.

7 QUESTION: Am I correct in assuming, because
8 otherwise I have difficulty understanding the court of
9 appeals, that the warrant application did not spell out
10 the elements of probable cause other than the results of
11 the field test?

12 MR. STRAUSS: Not quite, Justice Stevens. It
13 did not -- it did not supply all of the details of the
14 package.

15 QUESTION: So it's conceivable that the
16 warrant application would not have been sufficient
17 without including the -- it's conceivable. I'm not
18 asking you to make an admission on that.

19 MR. STRAUSS: It is conceivable.

20 QUESTION: Yes.

21 MR. STRAUSS: It is no more than that. We
22 don't think that's right.

23 QUESTION: Because if you had ample probable
24 cause apart from the field test, I imagine you could
25 protect yourself by filling out a warrant application

1 that did not rely on the field test.

2 MR. STRAUSS: Oh, yes. I mean we -- we
3 presumably could have obtained a warrant to search the
4 house without the field test, and then the search of the
5 house --

6 QUESTION: And in that circumstance the field
7 test really would just have served to protect the -- the
8 owner of the powder from the risk that you were making a
9 mistake.

10 MR. STRAUSS: That's exactly right. And that
11 is often the function that these field tests serve. I
12 mean very often that is true. Very often the
13 investigation could go forward quite properly without
14 the field test, and it is better --

15 QUESTION: But often it couldn't.

16 MR. STRAUSS: Sometimes it couldn't.
17 Sometimes --

18 QUESTION: If there was just reasonable
19 suspicion.

20 MR. STRAUSS: Sometimes the next action the
21 officers would take would require more than reasonable
22 suspicion. But very often, as in this case, the
23 officers could have gone forward without it and search
24 the house.

25 QUESTION: Let me take you back to the agents

1 who are searching the premises for the piano that
2 Justice White suggested, and in the kitchen of the house
3 they see a sugar bowl with sugar. Do you distinguish
4 that from -- on the -- the basis that white substances
5 in a sugar bowl in a kitchen of a private home are
6 somewhat different from a white powdered substance
7 encased in three or four plastic bags in interstate
8 commerce?

9 MR. STRAUSS: Well, they are undoubtedly
10 different, Mr. Chief Justice. And, for example, the
11 sight of white sugar in a sugar bowl would not authorize
12 an arrest of the persons in possession of the sugar
13 bowl, because they wouldn't have probable cause to
14 believe it was cocaine.

15 But I think that's a good example of why a
16 field test simply does not invade significant
17 expectations of privacy. I don't think any reasonable
18 person would object if in the course of a search of his
19 house the police officers took a pinch of sugar and
20 exposed it to some chemicals to see if it was cocaine.
21 I mean his house is being searched, after all, pursuant
22 to a warrant, by hypothesis lawfully. And that
23 additional --

24 QUESTION: Yeah, but you don't search a sugar
25 bowl for a stolen piano.

1 MR. STRAUSS: No. Our argument is not that
2 the warrant authorized the search of the sugar bowl.
3 Our argument is that the testing of a few grains of
4 sugar is not a search, because no reasonable person
5 would think that his privacy had been additionally
6 invaded by that action. After all, what will they
7 discover? They will discover that what was in the sugar
8 bowl was sugar, which is what it was labeled as from the
9 beginning. They simply haven't invaded that person's
10 privacy by learning that he keeps sugar in his sugar
11 bowl.

12 QUESTION: Well, this -- this problem is --
13 becomes complicated because when it's discovered that
14 it's just sugar, the householder doesn't complain; it's
15 only when they discover that it's marijuana or heroin
16 that the complaint begins.

17 MR. STRAUSS: That's exactly right, Mr. Chief
18 Justice. This -- this is one of those investigative
19 techniques that invades principally the privacy -- and I
20 put "privacy" in quotation marks -- of guilty persons,
21 of persons who are concealing contraband, who are trying
22 to ship contraband.

23 QUESTION: I thought people were innocent
24 until they were proved guilty.

25 MR. STRAUSS: Well, people are innocent until

1 they are proven guilty.

2 QUESTION: Yeah, but obviously you don't --
3 you don't pay any attention to that.

4 MR. STRAUSS: No, of course I pay attention to
5 that, Mr. Justice Marshall. People are innocent until
6 proven guilty. But I think there is a meaningful sense
7 in which we can say that a person in possession who --
8 whom you and I would agree is in possession of
9 contraband, is a guilty person. And it was only in that
10 sense that I was using the term. No one is suggesting
11 that consequences be visited on these people on the
12 basis of a field test.

13 QUESTION: Mr. Strauss, may I ask one other
14 question about the record? At the time the bags or the
15 article was given to the DEA agent by the Federal
16 Express was the white powder visible?

17 MR. STRAUSS: That is a matter of some dispute
18 in the record, and I believe the district court did not
19 --

20 QUESTION: He didn't resolve it.

21 MR. STRAUSS: -- Resolve it. Because he
22 viewed it as immaterial, and I think he was right,
23 Justice Stevens. There is no question that the DEA
24 agent -- that the Federal Express employees summoned the
25 DEA agents for the purpose of showing them the white

1 powder. And whether they showed it to them by taking it
2 out of the bag and showing it to them in their hands or
3 simply by saying it's over there in the bag, go take it
4 out for yourselves, can't be a matter of constitutional
5 significance.

6 QUESTION: Well, it could be if you followed
7 Justice White's opinion in the Walther case.

8 MR. STRAUSS: Well, I -- I don't -- I don't
9 think that's right. I think that is a -- that was a
10 different situation where the -- the law enforcement
11 agents came across the information -- the viewing of the
12 film in that case -- not because a private person showed
13 it to them or wanted to show it to them, but simply
14 because the private person happened also to have done it.

15 Where you have a case in which the private
16 person deliberately intends to reveal something to law
17 enforcement officers, the precise way in which he
18 reveals it I think is immaterial.

19 In *Burdeau* against *McDowell*, which is, of
20 course, the fountainhead of the private search doctrine,
21 the private party sent some documents to the
22 government. Now, I'm sure they didn't send it to them
23 in a way that the contents of every document was
24 available -- was immediately apparent on plain view at a
25 glance. I'm sure they sent it to them in a stack, and

1 the government agents had to leap over some documents.
2 But there is no question in that case the government was
3 entitled to look at all the documents.

4 QUESTION: Mr. Strauss, would it be your view
5 that any time an officer comes in to lawful possession
6 of an item which he has probable cause to believe is
7 incriminating that the officer is entitled to subject
8 that item to any scientific test? Or maybe it's a blood
9 stain, maybe it's in this case cocaine. But any
10 scientific test to determine its true composition?

11 MR. STRAUSS: Your hypothesis --

12 QUESTION: Without -- without a warrant to do
13 that?

14 MR. STRAUSS: Your hypothesis was -- yes, it
15 would be our view that he does, yes, that's right.

16 I think the best way to understand what a
17 truly minimal intrusion a chemical analysis is is to use
18 the court of appeals' own analogy, which was, of course,
19 to the Walther case where the court held narrowly that
20 the viewing of a film was a search subject to the
21 warrant clause. Viewing a film belonging to another
22 person or listening to another person's tape cassette,
23 which is a similar activity, is vastly more intrusive
24 than conducting a chemical analysis. A film or a tape
25 can reveal a great deal about a person's interests or

1 tastes or thoughts or associations or political views or
2 private life. And a chemical analysis does not reveal
3 anything comparable, because people simply don't lock
4 their secrets into the molecular structure of a
5 substance in the way that they might place private
6 thoughts on a tape, or private activities on a film, or
7 private effects in a locked container.

8 And in this case, for example, if Respondents
9 had not been implicated in a shipment of cocaine, a
10 chemical analysis of that substance that the DEA agents
11 -- the Federal Express people and the DEA agents found,
12 might have revealed that the white powder wasn't sugar,
13 which is what it first appeared to be, but was actually
14 baking soda or talcum powder.

15 Now, it's just not the kind of invasion of
16 privacy that reasonable people care about. And there is
17 no basis for comparing that to the far more intrusive
18 law enforcement measures that the Fourth Amendment
19 properly regulates.

20 Now, as I understand Respondents' position,
21 they don't squarely join issue with us on the question
22 of whether the chemical analysis was a search within the
23 meaning of the Fourth Amendment, and they instead seem
24 to think that it was the steps leading up to the
25 chemical analysis -- the opening of the plastic bag and

1 the extracting of a few grains of the substance -- that
2 constituted a search.

3 QUESTION: Is it established it takes just a
4 few grains?

5 MR. STRAUSS: Yes. There was testimony to
6 that effect, Justice Blackmun. Less than a gram and a
7 trace amount I believe were the descriptions the agent
8 used.

9 As I said before, this was the opening of a
10 transparent container which is the quintessential
11 example of a container that can't support an expectation
12 of privacy. The example the Court used in Arkansas
13 against Sanders was a gun case, but however much a gun
14 case reveals from the outside about its contents, a
15 transparent container reveals much more. And if a gun
16 case can't support a reasonable expectation of privacy,
17 then, a fortiori, a transparent container cannot.

18 And the next thing they did was to extract a
19 few grains. In our view this was simply de minimis, and
20 therefore, not within the Fourth Amendment. But if it
21 wasn't de minimis, there is no possible sense in which
22 it was a search. It must have been at most a seizure.
23 And the Court has said many times, twice last term
24 alone, that a seizure can be justified on the basis of
25 probable cause without a warrant. And as I said, it's

1 clear that the agents had probable cause here.

2 I'd like to save the rest of my time for
3 rebuttal.

4 CHIEF JUSTICE BURGER: Very well.

5 Mr. Peterson.

6 ORAL ARGUMENT OF MARK W. PETERSON, ESQ.,

7 ON BEHALF OF THE RESPONDENTS

8 MR. PETERSON: Thank you, Mr. Chief Justice,
9 and may it please the Court:

10 I must confess that the Government and the
11 Respondents view the issue in this case as being totally
12 different. I submit to the Court that the issue in this
13 case is not whether police officers are required to get
14 a search warrant every time they want to submit a
15 suspected contraband substance to testing; and rather,
16 the only issue which is involved in this case is whether
17 police officers who lawfully come into possession of a
18 -- of an item which was subjected to a prior private
19 search may extend the scope of that search without
20 obtaining a search warrant, assuming that no exception
21 is present.

22 The result which we maintain and which was --

23 QUESTION: Do you concede -- do you concede,
24 Mr. Peterson, that had the information that's described
25 in this record been presented to a magistrate before

1 they did the testing, a warrant would properly issue for
2 the opening of the bag and the testing of the contents?

3 MR. PETERSON: No, I do not concede that, Mr.
4 Chief Justice. As indicated, the search warrant
5 affidavit is not before this Court. It was before the
6 Circuit Court of Appeals. And they specifically stated
7 in their opinion that had it not been for the results of
8 the field test, there would not have been a sufficient
9 basis for a search warrant. And therefore, because that
10 -- that particular finding has not been challenged here
11 except by implication, I do not make that concession.

12 QUESTION: Well, do you think a warrant could
13 have been issued without the testing, a warrant issued
14 for the search of the house after they made a controlled
15 delivery, on the information that is now available?

16 MR. PETERSON: If we assume that the narcotics
17 agents viewed the same thing that the Federal Express
18 people did and put in --

19 QUESTION: That's -- that's -- that's in --
20 that's this record, isn't it?

21 MR. PETERSON: They did view the same thing,
22 but the -- I simply can't recall what was in the
23 affidavit. But if we make those assumptions and if the
24 case had been decided after Illinois v. Gates, I think
25 it's a likely possibility that the warrant may have been

1 issued. But that simply is not before the Court at this
2 --

3 QUESTION: You think we -- you think we -- as
4 the case comes here there -- there's been a holding that
5 there was no probable cause prior to the testing, and
6 that's the way we should judge the case?

7 MR. PETERSON: That's -- that's correct, Mr.
8 Justice White.

9 QUESTION: And the only way the Government
10 then can win the case is by our holding that the -- that
11 the testing is not a search at all subject to the Fourth
12 Amendment.

13 MR. PETERSON: That is my view of this case.

14 QUESTION: This isn't quite fair to the Eighth
15 Circuit. Wasn't their precise holding that there was no
16 probable cause set forth in the application for a
17 warrant? I mean they didn't hold that the facts could
18 not have -- might not amount to probable cause if they'd
19 been assembled and presented in a different warrant
20 application.

21 MR. PETERSON: I'm sorry, Justice Stevens.
22 That is accurate.

23 QUESTION: Well, what about -- but your
24 position is that -- that there was no probable cause
25 just from looking at this white powder in plastic bags.

1 MR. PETERSON: No. We have -- we have
2 conceded, both in our brief and below, that the
3 appearance of the white powder in the plastic baggies in
4 the circumstances of this case provided reasonable
5 grounds for a seizure, but that is a totally different
6 question from the question which we submit --

7 QUESTION: Well, then, you -- you think they
8 could have gotten a warrant then. They just -- from
9 looking at the powder in these bags.

10 MR. PETERSON: In all likelihood, they could
11 have gotten a warrant if they had seized it, presented
12 the facts known to them at the time to a United States
13 magistrate. There's little doubt in my mind that they
14 would have obtained a warrant for the entry of the
15 packages --

16 QUESTION: Well, then, you -- a valid warrant.

17 MR. PETERSON: Correct.

18 The point I was attempting to make earlier is
19 that the result which we maintain in this case would not
20 require search warrants for all chemical tests, the vast
21 majority of them are valid for other reasons, usually
22 because there's a prior Fourth Amendment justification
23 for the testing itself. We are submitting that a search
24 warrant is only necessary when the Government expands
25 the scope of a prior private warrantless search.

1 Now, our position here is very simply stated:
2 that being that the opening of the baggies, the
3 withdrawing of the substances and the chemical testing
4 does in fact constitute a search. There was no warrant
5 present. Those items were discovered in a previously
6 sealed and wrapped package which is clearly protected by
7 the Fourth Amendment. Therefore, because there was no
8 exception to the warrant requirement present, Walther
9 and a litany of this Court's decisions require the
10 holding that the search was invalid.

11 I would also submit to this Court that
12 following Walther will further an important goal which
13 has been identified at a number of this Court's recent
14 Fourth Amendment decisions.

15 QUESTION: Which of the prevailing opinions in
16 Walther do you suggest that we follow?

17 MR. PETERSON: Well, I'm suggesting that you
18 follow Justice Stevens' opinion. I am not here arguing
19 the -- the basis for the holding which Justice White
20 would have reached in his concurring opinion. And I
21 think that the items which were focused upon by the four
22 dissenters in that case are not present in this case.
23 In particular, the fact that one of the major points
24 made in the dissenting opinion was the fact that the
25 condition of the packages or the containers within which

1 were the films at the time the FBI was contacted to come
2 and look at them was brought on by actions of the
3 consignor of the packages themselves; in other words,
4 sending it to a fictitious address, not picking it up
5 for a lengthy period of time. The point being what was
6 the recipient of the packages supposed to do except to
7 try to find out who they belonged to. And we simply
8 don't have that situation here.

9 The condition of the package at the time the
10 DEA came upon it was due to circumstances which were
11 entirely beyond the control of the Respondents.

12 QUESTION: Well, if they'd sent it in a better
13 package, perhaps it wouldn't have broken open.

14 MR. PETERSON: That perhaps is correct, but I
15 believe there is some evidence in the record -- and I
16 confess I can't recall if it's in the Joint Appendix --
17 that the damaged package was due to the actions of
18 Federal Express because it was punctured with a forklift
19 or something like that. In any event, there were
20 circumstances beyond their control.

21 The standard which I was mentioning before and
22 which the Court has identified as important is a single
23 familiar standard to guide the police who are out in the
24 field making on-the-spot decisions, and they have to
25 know what rule is going to control their behavior.

1 I would submit that by following Walther in
2 this case, that standard will be not only reaffirmed but
3 also be made clearer. It's very simple. After private
4 parties have conducted a search of an item such as a
5 package, the police can examine it to the same extent
6 that the private parties did, but they can go no further
7 if there is an expectation of privacy in that particular
8 item without obtaining a search warrant.

9 It's simple, it's identifiable, and it's
10 easily implemented; and we submit that it should be
11 followed in this case.

12 QUESTION: Then how do you respond to your
13 opponent's argument based on Burdeau against McDowell
14 that this stack of papers were turned over to the -- to
15 the Government, and they don't really know the extent to
16 which the private party might have read all those papers?

17 MR. PETERSON: Well, the -- the simplistic
18 response to your question, Justice Stevens, is that they
19 should call the private party and find out. When you're
20 dealing with private papers, of course, you do have --
21 you have another problem because of the possible Fifth
22 Amendment implications of your activity.

23 But I would suggest that the prudent thing to
24 do in that situation would be to since you have the item
25 in your exclusive possession, dominion and control

1 anyway, there's no danger that you're going to lose any
2 of it or the potential defendant is going to take it
3 from you. You just go get a search warrant,
4 particularly when search warrants are so easily
5 obtainable.

6 QUESTION: In this case you say it's your
7 position, I gather, Mr. Peterson, that the Government
8 could search to the same extent that the FEA people had
9 searched; so that would have left them at the most
10 extreme point of the FEA's -- looking at a clear plastic
11 bag with powder inside.

12 Now, do you concede at that point that they
13 would have had probable cause to seize that as
14 contraband?

15 MR. PETERSON: Yes. I can seize -- I concede,
16 excuse me, Justice Rehnquist, that they had probable
17 cause to seize it at that time, and that's exactly what
18 they should have done and then gone to get a warrant
19 which they got within a hour anyway.

20 QUESTION: So you think that although they had
21 probable cause, since they did not have a warrant, the
22 -- the seizure fails because that is the kind of seizure
23 for which a warrant is required?

24 MR. PETERSON: No. The seizure does not
25 fail. They clearly had the right and in fact the duty

1 to be in possession of that package. It was obviously
2 suspicious to them. But they should have done nothing
3 further with it until they got a warrant if they were
4 going to physically enter the package further than the
5 Federal Express people had entered it and then conduct a
6 scientific examination; in fact, destroy some of the
7 evidence in the process.

8 QUESTION: So they -- they could seize it
9 under probable cause, but they couldn't further
10 penetrate its nature, whatever you want to call it, its
11 molecular structure without getting a warrant.

12 MR. PETERSON: That is our position.

13 QUESTION: Well, I think a separate point is
14 they couldn't open the package either.

15 MR. PETERSON: The -- and I'm going to get
16 hung up in words here -- they could open the -- the big
17 package itself --

18 QUESTION: Well, I know, but could they open
19 the plastic bag?

20 MR. PETERSON: It's -- it's my position that
21 they should not have opened the plastic bags themselves
22 because they had not been previously opened. They
23 should have not gone inside the plastic bags, they
24 shouldn't have taken anything out, and they shouldn't
25 have subjected it to a chemical test.

1 QUESTION: But you would still be here even if
2 the bag -- if one of the plastic bags had been opened
3 and the -- they still couldn't have done anything but
4 seize and then get a warrant to do the test.

5 MR. PETERSON: That is my submission, Justice
6 White.

7 QUESTION: Could they have applied for a
8 warrant at that stage without opening the bag?

9 MR. PETERSON: Based upon the information that
10 they had from Federal Express, based upon the appearance
11 of the container --

12 QUESTION: The appearance of the container.

13 MR. PETERSON: -- They certainly could have.
14 And as I think I -- I indicated before, they probably
15 would have gotten one.

16 QUESTION: They would have gotten it.

17 QUESTION: In your brief -- I believe it was
18 in your brief, Mr. Peterson; perhaps it was in the
19 Eighth Circuit opinion -- the position is taken that
20 this case is fairly unique and that most field tests
21 simply wouldn't present this problem because they're
22 bags that are seized from someone who is arrested as a
23 result of a search.

24 But under your analysis I would think even
25 though it's seized as a result of a search incident to

1 arrest, wouldn't you still need a warrant to conduct a
2 field test?

3 MR. PETERSON: That is a question, Justice
4 Rehnquist, which I think would probably be answered
5 based upon this Court's decisions in *New York v. Belton*
6 and *United States v. Robinson*.

7 In *Robinson*, as you will recall, the Court
8 held that incident to a valid arrest you can search the
9 entire person of the person arrested, and in that case
10 the issue was whether you could search a crumpled --
11 crumpled up cigarette package containing cocaine.

12 In *Belton* the issue was the permissible scope
13 of a search incident to a valid arrest in an
14 automobile. You held that you could search the entire
15 interior of the automobile, all the containers found
16 within, and I believe the person as well. So if -- if
17 that issue were to arise based on those two decisions
18 primarily, the holding would probably be that no warrant
19 would be required.

20 QUESTION: Well, Mr. Peterson, suppose --
21 suppose the Government has an informant -- has an
22 undercover agent and he goes around and buys -- and is
23 -- and buys some drugs off of a pusher. And he comes
24 back and says I've just bought this drug, paid \$100 for
25 it, and so the Government goes and arrests the pusher,

1 and they indict him, and at the trial they offer the
2 drug in evidence. And they put on an expert and say
3 yes, this is really -- this is really a drug.

4 And the pusher gets up and says I've been
5 talking to Mr. Peterson, and this evidence is not
6 admissible because they didn't have a warrant to test
7 the drug.

8 MR. PETERSON: Well, if Mr. Peterson were
9 present, he would tell the pusher that you weren't
10 listening to what I was saying, because --

11 (Laughter.)

12 -- Once you sold that heroin or whatever it
13 was to the informant or cooperating individual or
14 whatever, you relinquished your expectation of privacy
15 in that package, you didn't care what he did with it, in
16 fact, you probably never wanted to see it again; so you
17 had no legitimate expectation of privacy, and you have
18 no basis for claiming that your rights were violated by
19 what he did with that package.

20 QUESTION: And I suppose the same rationale
21 vaguely could apply to incident to arrest.

22 MR. PETERSON: It does because there -- and
23 the other examples of field tests or chemical tests of
24 contraband, which Justice Rehnquist referred to, and
25 several of which I did set forth in my brief, there is a

1 prior Fourth Amendment justification for the search
2 which is involved, whether it be a valid search warrant,
3 a hand-to-hand buy or what have you. And, therefore, I
4 think it's accurate to say that this situation just does
5 not arise that frequently.

6 One thing that I think should be discussed
7 here is the expectation of privacy which one has in
8 packages, and is set forth in our brief as early as Ex
9 parte Jackson, recently reaffirmed in Place. There is a
10 legitimate expectation of privacy in sealed containers
11 traveling via common carrier.

12 I would like to emphasize one thing regarding
13 this case, that being that as stated in the opinion in
14 the Walther decision, a person's expectation of privacy
15 in a package which is shipped by a common carrier is
16 established at the time that it is shipped, not at the
17 time that it is searched by somebody, whether it be the
18 FBI or someone else.

19 And I think it's worth noting that the
20 Government has never challenged that language in
21 Walther; they have never addressed our assertion that
22 that is in fact the law. And assuming that this Court
23 still accepts that position, it's clear that the search
24 here was a search of a package, and therefore, under
25 Chadwick and any number of other decisions, it was

1 illegal.

2 The Government also suggests that there was no
3 expectation of privacy in this case because there's no
4 expectation of privacy in the molecular structure of
5 contraband. Once again, we're dealing with the
6 expectation in the package itself, not what that package
7 contains, and --

8 QUESTION: But you said there was probable
9 cause to seize the package because of a belief that it
10 had contraband. How much privacy interest is left in
11 the package after -- because of just looking at it you
12 can have probable cause to seize it for contraband?

13 MR. PETERSON: There may be very little
14 privacy interest left, Justice Rehnquist. And in this
15 case, as it turned out, perhaps the only privacy
16 interest left was the molecular structure of the
17 substance. But in another case there might be personal
18 papers in the package, there might be other --

19 QUESTION: Well, but in -- in that case it
20 might well be that there wouldn't be probable cause to
21 seize the package or the papers because it wouldn't be
22 at all evident that they were contraband. I don't
23 believe the Government here takes the position that just
24 because you can see into the -- see the outline of the
25 contents that's probable cause to seize it. It has to

1 be something a good deal more suspicious than that.

2 MR. PETERSON: Well, it was my understanding
3 that the Government stated every time you see white
4 powder in plastic baggies, that's probable cause to
5 believe it's contraband. And --

6 QUESTION: But they didn't say every time you
7 see papers in a plastic sack it's cause to believe it's
8 contraband.

9 MR. PETERSON: The only point I was making is
10 that if you -- if you assume that the presence of such a
11 plastic baggie in a package provides probable cause to
12 seize that package, then whatever else is in there, if
13 it is anything else, apparently you don't have an
14 expectation of privacy in that either.

15 QUESTION: I didn't think the Government's
16 submission was based just on the fact it was a baggie,
17 but that you could see a white powder in a baggie, and
18 that the combination was what gave you probable cause.

19 MR. PETERSON: Well, maybe that is the case.
20 In any event, I disagree with the Government's
21 contention that a plastic baggie containing powder or
22 any transparent container of powder is so uniquely
23 attributable to contraband that you can automatically
24 seize it and search it.

25 But in this case, as I've stated before, I

1 have conceded the propriety of the seizure of the bag.
2 It's what they did with the bag afterwards that I am
3 concerned about.

4 QUESTION: Let me put --

5 MR. PETERSON: Excuse me.

6 QUESTION: Let me put this hypothetical to
7 you. The carrier, Federal Express or whatever, comes on
8 a package which by reason of its shape and its weight
9 which is -- and its lack of heavier packaging because of
10 the weight, they conclude there's something dubious
11 about it because it's addressed to some people in
12 Dublin, Ireland. And they call in the FBI, and they run
13 it through an x-ray, and they see that it's a whole
14 bunch of automatic pistols or machine guns or whatever,
15 but it has been declared something else.

16 Is the taking of that x-ray a search in the
17 same way you say the testing of the powder is a search?

18 MR. PETERSON: Well, it might be a search
19 which is valid under the border search exception if it
20 were going to --

21 QUESTION: This isn't incoming; this is
22 outgoing. It hasn't left the continental limits of the
23 United States yet.

24 MR. PETERSON: Okay. Assuming that the border
25 search exception does not apply, I think the argument

1 can be made that clearly you have an expectation of
2 privacy in that package. The question is whether due to
3 the suspicious circumstances which you described, Mr.
4 Chief Justice, there should be an exception allowing
5 examination.

6 The argument can be made that that is in fact
7 a search because it is a scientific entry of a place
8 where you have a legitimate expectation of privacy, but
9 due to essentially, I guess, the exigency of the
10 situation and the suspicious circumstances, it may not
11 be held to be a search.

12 I guess it's probably closer to the dog
13 sniffing situation in United States v. Place, which
14 although this Court held that that was not a search
15 because there was no physical --

16 QUESTION: But dog sniffing is no intrusion.
17 The dog is smelling what comes out of the package.

18 MR. PETERSON: That's correct, Justice
19 Marshall. And although I don't believe that that was
20 clearly explicated in that -- that opinion, that perhaps
21 is the basis for it. There is no -- there was no
22 physical entry of the suitcase which was sniffed, and it
23 was in a public place, and certainly there was no
24 destruction of any of the contents of the suitcase. So
25 I don't think that supports the fact that there was no

1 search here.

2 I think it's been clearly recognized by this
3 Court that although containers or packages are the items
4 in which privacy expectation is recognized, the true
5 principal privacy interest is in the contents
6 themselves, as recognized in Chadwick.

7 Secondly, the Government has suggested that
8 the Fourth Amendment does not apply to contraband or the
9 molecular structure of contraband. They cite no cases
10 in support of that proposition. I would submit that
11 this Court's decision in United States v. Jeffers, which
12 is cited in our brief, plus a number of other cases
13 where there were an expectation of privacy -- in
14 pornographic films, or drugs, or illegal phone calls,
15 illegal coins, what have you -- has been found would
16 support our position that the Government is simply
17 incorrect.

18 I'd like to discuss the so-called plain view
19 doctrine under the circumstances of this case, and my
20 basic position is that it simply is irrelevant, and it
21 does not apply for a number of reasons.

22 Number one, application of the plain view
23 doctrine ignores the fact that the expectation of
24 privacy of Respondents is based upon the condition of
25 the package at the time it was sent and not afterwards.

1 But even setting that aside, the plain view doctrine
2 applies to seizures. And as I've stated before, I've
3 never challenged the seizure in this case. The police
4 were in lawful possession of the package itself.

5 Now, at one point the Government in its brief
6 calls the entry of the packages and the testing just
7 another seizure in addition to the one which had already
8 taken place. I would submit that that is just playing
9 with semantics, and it just doesn't make any common
10 sense.

11 The Government also cites the decision in
12 United States v. Lisk, which is an opinion of Justice
13 Stevens when he was a circuit court judge. There he
14 stated, among other things, that a search involves an
15 invasion of privacy; a seizure is a taking of property.

16 I would submit in this case that the package
17 was seized when the DEA came into possession of it.
18 Everything that happened after that was a search. The
19 fact that what the DEA did to the package was a search
20 is supported by Cardwell v. Lewis where the taking of
21 paint scrapings was a search; Cupp v. Murphy where the
22 taking of fingernail scrapings was a search --

23 QUESTION: Mr. Peterson, may I interrupt you?

24 If you emphasize that the slitting open the
25 plastic bag and taking the trace out to test it is a

1 search rather than a seizure, would your case be
2 precisely the same if the bag had had a tiny rip in it
3 at the time this all happened?

4 MR. PETERSON: And the agents just dumped the
5 powder out to test it?

6 QUESTION: Just took a little bit out of what
7 was -- which they could get to without having to -- do
8 you rely at all on the ripping -- on the puncturing? I
9 think you do not, as I understand you.

10 MR. PETERSON: I guess my case might be a
11 little bit more difficult, but I don't think it would be
12 crucial had it happened that way.

13 The second reason that plain view does not
14 apply in this case is that it's well established that in
15 order for plain view to apply, there's got to be an
16 antecedent Fourth Amendment justification for the police
17 officers' presence. That clearly did not exist here.
18 They weren't present to execute a warrant to make an
19 arrest or anything else. They were only here to seize
20 the package, and therefore, there was no prior
21 justification.

22 The third element is that their discovery of
23 the evidence must be inadvertent, as recently
24 established again in Texas v. Brown. In other words,
25 they can't have known in advance that they were going to

1 seize the item that they seize. Here they clearly did
2 know about it beforehand, and they found exactly what
3 they were looking for.

4 Therefore, we contend that plain view, which
5 only applies to seizures anyway, simply does not apply
6 in this case.

7 In conclusion, we -- we submit that this case
8 is governed not only by *Walther v. United States* but
9 other well-established and longstanding decisions
10 recognizing the expectation of privacy in packages; and
11 we would urge the Court to affirm the decision of the
12 United States Court of Appeals in this case.

13 Thank you very much.

14 CHIEF JUSTICE BURGER: Very well. Do you have
15 anything further, Mr. Strauss?

16 ORAL ARGUMENT OF DAVID A. STRAUSS, ESQ.,

17 ON BEHALF OF THE PETITIONER -- REBUTTAL

18 MR. STRAUSS: Mr. Chief Justice, just two
19 points of clarification.

20 If the Court disagrees with our submission and
21 concludes that this is in fact a search, it does not
22 follow, as -- as has been suggested during my friend's
23 argument, that -- it certainly does not follow that we
24 have to obtain a warrant which, as I said, would be
25 extraordinarily burdensome; and it doesn't even follow

1 that we have to have probable cause, because the privacy
2 interests are so limited -- we think so limited they're
3 not a search. But if the Court concludes otherwise,
4 reasonable suspicion would surely be enough to justify
5 this sort of limited invasion.

6 The second point is that when considering
7 whether the chemical analysis is a search, it's
8 important to remember that we're talking about
9 substances that are already lawfully in the possession
10 of the agents. That means they can hold it in their
11 fingers, they can feel its texture, they can hold it up
12 to the light, they can taste it, they can smell it. I
13 suppose in this case they could even have used it the
14 way cocaine users use it -- all without even conceivably
15 violating any other Fourth Amendment interest.

16 And in light of that, it seems to make little
17 sense to say that they couldn't take the more precise
18 and obviously more desirable step of conducting a
19 chemical analysis.

20 Thank you.

21 CHIEF JUSTICE BURGER: Thank you, gentlemen.

22 The case is submitted.

23 We'll hear arguments next in Hudson against
24 Palmer and the consolidated case.

25 (Whereupon, at 11:36 a.m., the case in the

1 above-entitled matter was submitted.)
